**Rainfall summary for the seven days ending at 8 hrs. on Thursday,
the 16th October 1919, based on the Indian Daily Weather
Reports of the period.**

During the week rainfall was limited to Burma, northeast India and the Peninsula, and even in these areas the total fall was in marked defect. In the Peninsula the monsoon was much less active than usual between the 9th and 12th, but strengthened slightly during the rest of the week, while in northeast India rainfall was fairly widespread on the 9th and 10th, but ceased altogether after the 12th.

2. *Burma*.—Rainfall was local in Lower Burma on all days except the 13th; in Upper Burma a few falls occurred daily except on the 12th.

Northeast India, including Orissa.—There was nearly general rain in Assam on the 10th and in Chota Nagpur on the 9th; local falls occurred on two other days and one other day respectively in these areas. Rainfall was local in Bengal on the 9th and 10th, in Orissa on the 10th and 11th, and in Bihar on the 9th, while a few falls were recorded on two other days in the first two sub-divisions and on one other day in the last sub-division.

The United Provinces, Central India and the Central Provinces.—In the east of the Central Provinces local rain fell on the 9th and individual falls occurred on two other days; over the rest of the division there was no rain.

Northwest India.—Weather was dry except for a light fall at Sonamarg.

The Peninsula.—Rainfall was nearly general in south Hyderabad and Malabar on the 9th, in Mysore on the 13th and 14th, in the Madras Deccan on the 13th and on the north Madras coast on the 9th and 12th; rain fell locally or at a few stations on one other day in Malabar, on two other days in south Hyderabad and the Madras Deccan, on three other days in Mysore and on four other days on the north Madras coast. There was local rain in the Konkan and the Bombay Deccan on the 15th, and in southeast Madras on the 13th and 15th; a few falls were recorded during the rest of the week in southeast Madras, and on one other day in the Bombay Deccan. •

3. The chief amounts of rainfall reported were as follows :—

October 9th.	Akyab 1·05", Myitkyina 1·32", Dibrugarh 1·35", Berhampore 1·15", Mymensingh 1·45", Jalpaiguri 1·05", Sambalpur 1·03", Ranchi 1·42", Naya Dumka 1·20", Mangalore 2·64", Cuddapah 1·22" and Cocanada 1·30".
„ 10th.	Maymyo 2·19", Dibrugarh 1·14", Saugor Island 0·91", Burdwan 1·07", Berhampore 1·90" and Sambalpur 1·68".
„ 11th.	Moulmein 1·85", Mandalay 1·75", Dibrugarh 2·57" and Cocanada 1·03".
„ 12th.	Masulipatam 1·40".
„ 13th.	Chitaldrug 1·03", Bangalore 2·02", Tinnevely 0·70", Salem 1·39" and Cuddalore 1·28".
„ 14th.	Rangoon 1·17", Maymyo 2·57", Trichinopoly 2·21" and Ostacamund 1·45".

October 15th. Victoria Point 1·53", Rangoon 1·40", Kyaukpyu 1·63", Bijapur 1·33", Gulbarga 0·88", Madura 1·65", Coimbatore 0·77", Salem 0·90", Madras 1·03" and Kodaikanal 0·95".

4. The week's rainfall was 20 per cent. or more in defect in the Bay Islands, Burma, Bengal, Orissa, Bihar, the United Provinces, Kashmir, Rajputana East, Central India, Berar, the Central Provinces, the Konkan, the Bombay Deccan, Hyderabad North and the Madras Presidency; and was either equal to the normal or differed from it by less than 20 per cent. in Assam, Chota Nagpur, Hyderabad South and Mysore. No rain usually falls at this time of year in the Punjab, the North-West Frontier Province, Baluchistan, Sind, Rajputana West and Gujarat.

The rainfall from the 2nd May to date is 20 per cent. or more in defect in the Bay Islands, Kashmir and Sind; and is 20 per cent. or more in excess in Chota Nagpur, Baluchistan, Rajputana West, Central India and the Central Provinces West. In the remaining divisions the rainfall of the period differs from the normal by less than 20 per cent.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
11th October 1919.

Burma.—During the week light to moderate rain was general in Lower Burma and in wet zone of Upper Burma. In dry zone practically no rain fell. Agricultural operations for cultivation of main rice crops are practically over in Lower Burma and in irrigated tracts of Upper Burma. Reaping of early sesamum is completed. Picking of cotton is progressing. Cultivation of miscellaneous cold weather crops in Upper Burma is proceeding normally. Standing crops are generally doing well. The health of cattle is generally satisfactory. The price of unhusked rice in Rangoon remains unchanged at Rs. 150 and for white rice specials at Rs. 385 much above normal.

Assam.—During the week the weather was rainy and generally favourable for standing crops but in Brahmaputra Valley it was retarded. Cultivation of mustard and pulses and plucking of tea continues. Harvesting of jute is nearly finished. Prospects of standing crops except cotton in the Garo hills are generally fair to good. Cattle disease is reported from two districts. The price of common rice has risen slightly.

Bengal.—Light to moderate rain generally fell during the week. Transplanting of winter rice is practically over. More rain is needed for growth of the crops especially in western districts. Steeping and washing of jute is still going on. Preparation of lands for next spring crops and their sowings continue. Conditions of prospects of standing crops on the whole are favourable. The average price of common rice has fallen by about 0.45 per cent. Total number of persons receiving gratuitous relief in the Brahmanbaria subdivision of Tipperah was 3,489.

The weekly report on famine in Bankura is as follows:—The rainfall was insufficient but agricultural prospects are favourable. Seventy-three works were open. Numbers relieved on works were 13,265. Special relief:—paddy husking advances 3,683, weavers 555, better class poor 7, total 4,245. Gratuitous relief was previously closed; grand total 17,510. The decrease in numbers on works is due to closure of works in two thanas. Numbers relieved on private works were 500. 700 persons were relieved on daily doles by charitable societies. The public health is generally good. Outbreak of malaria is reported from certain localities. Cloth is being distributed to destitutes. Relief measures are adequate. The price of common rice varies from 5½ to 5¾ seers per rupee. Burma rice is being sold.

Bihar and Orissa.—During the week rain was fairly general over the Province, the fall being heavy in parts of Shahabad, Purnea, the Santal Parganas, Cuttack and Sambalpur and light to moderate, elsewhere. The rainfall has been greatly beneficial to the paddy crop which is doing well. More rain is wanted in parts of Darbhanga, Angul, Puri and Singhbhum. Harvesting of autumn crops continues. Preparation of lands for spring sowings is going on. The daily average number of persons on test works was 1,463 in Angul and 151 in Singhbhum. Gratuitous relief was given to 17,470 persons in Bhagalpur, 8,803 in the Santal Parganas, 6,888 in Angul, 6,735 in Cuttack, 7,734 in Puri and 525 in Hazaribagh. The number of persons attending relief works was 478 in Bhagalpur and 3,184 in the Santal Parganas. The price of common rice has risen in five districts, fallen in eight and remained stationary in the remaining districts. The average price of local common rice at headquarters was 5.5½ seers a rupee against 5.37 seers in the preceding week and that of maize was 8.45 seers a rupee against 8.48 seers of the preceding week. Cattle disease is reported from twelve districts. During the week ending the 4th October 22,716 persons were given gratuitous relief and 6,022 attended test works in eleven Feudatory States of Orissa:—viz., Athgarh, Baramba, Bhenkanal, Hindol, Narsinghpur, Nayagarh, Talchar, Tigiria, Bamra, Daspalla and Khandpara.

The weekly report on famine is as follows:—Famine tracts are unchanged. For week ending the 11th October in Angul including an undeclared area test workers were 2,772. Relief works were closed and persons gratuitously relieved were 6,888, total under relief 9,660. In Bhagalpur Sadr relief workers were 360 and persons gratuitously relieved by poor houses, orphanages, village doles and kitchens 5,389, total under relief 5,708. In Banka relief workers were 109 and persons gratuitously relieved by poor houses, village doles and kitchens 12,131, total under relief 12,240. In Deoghar relief workers were 3,184 and persons gratuitously relieved by village doles 8,764, total under relief 11,948, grand total under relief 38,556. The price of food grains is falling. The physical condition of persons on relief has improved. Agricultural prospects are good.

United Provinces.—During the week good rain fell in southeast of the Province. Preparation of lands for spring crops and harvesting and irrigation of autumn crops continue. Picking of cotton has commenced. Standing crops are doing well and prospects are favourable. The condition of agricultural stock is good and little cattle disease is reported. Fodder, water and market supplies are sufficient. Prices are generally stationary with tendency to fall in places.

Punjab.—During the week the weather remained dry. Rain is badly needed. Standing irrigated crops are average to good and unirrigated below average to average and are withering for want of rain. Picking of cotton and reaping of maize, bajra and rice, etc., continue. The field is expected to be normal to good on irrigated and below normal to normal on unirrigated areas. Sowings of spring crops continue and are generally normal on irrigated and below normal on unirrigated areas. Cattle are healthy and fodder and water are sufficient. Prices are generally stationary and above scarcity rates. Prices of wheat :—Rawalpindi 6½, Ambala 6½, Ferozepore and Lyallpur 7 and Lahore 7½ seers per rupee.

North-West Frontier Province.—The week was rainless. Sowings of spring crops are in progress. Cotton is being picked in one district with outturn below average in parts. Standing crops are generally average but crops are reported to be withering on unirrigated areas in one district through lack of rain. Prices of wheat :—Peshawar 7½ and Dera Ismail Khan 6½ seers per rupee.

Jammu.—During the week no rain fell. Prices are stationary. Fodder is sufficient.

Kashmir.—During the week the weather was generally dry and mild. Cattle are healthy. Autumn crops are being harvested. Fodder is sufficient. Prices are fluctuating.

Rajputana.—During the week there was no rain. The weather was hot and clear. Harvesting of autumn crops is in progress. Preparation of lands for and sowing of spring crops are in full swing. Pasturage and water are abundant. The condition of agricultural stock is good. Cattle disease is reported from Bharatpur only. Prices are stationary but falling in few places.

Central India.—During the week the rainfall was partial. Autumn crops are being weeded and harvested. Lands are being prepared for spring crops. Sowings are in progress in Gwalior and have commenced in Malwa. Standing crops with probable outturn are in fair to good condition except in three districts of Gwalior where they have been damaged by excessive rain. Agricultural stock is generally good except cattle disease is reported in parts of Gwalior, Indore, Bhopal, Baghelkhand and the Southern States. Prices are high.

*The weekly report on famine in Bundelkhand is as follows :—*Distress is not acute. Numbers on relief works are gradually decreasing. People are reverting to agricultural operations. No wandering or emaciation is reported. Relief measures are adequate. Suspensions of land revenue are being granted. Takavi advances are sufficient. The public health is generally good. Prices range from 5½ to 7½ seers per rupee save in Bijawar, and Chhatarpur where *kodon* is available for 8 seers per rupee. The number of persons on relief in thousands :— works 3·1, gratuitous relief 7·7, total 10·8.

Central Provinces.—During the week the weather was practically clear with only light showers of rain in parts of Nagpur and Chhattisgarh Division. Preparation of lands for and sowing of spring crops continue. Harvesting of rice and pulses is in progress. Cotton picking in Berar is proceeding. Standing crops are in satisfactory condition. The average outturns of principal autumn crops in districts where they are of importance are estimated at, rice 115, juar 105, til 100, kodokutki 110, cotton 115 and sugarcane 110 in American notation except in Sangur, Damoh, Jubbulpore and Narsinghpur where the production of til and kodokutki would be about 70. Cattle are generally in good condition. There are no marked variations in prices of food-grains.

Feudatory States :—Good rain was received which benefited standing crops. Reaping of rice on light soil has commenced.

*The weekly report on famine and scarcity is as follows :—*The public health is good except for a little malaria. Prices of food-grains are stationary. Numbers on works in Jubbulpore famine districts were 7,076, and Mandla figures have not been received. Numbers on works in scarcity districts were 5,909. Numbers on gratuitous relief were 5,305.

Bombay.—Good rain fell during the week in the Konkan, Dharwar and Sarantvadi and heavy in parts of Kolhapur. More rain is needed in parts of Kaira. Standing crops are flourishing except in parts of Nasik where they have been slightly damaged by heavy rains. Harvesting of early crops generally continues. Spring preparation has commenced in some places. Fodder supply is sufficient. Agricultural stock is generally sufficient. Cattle are in good condition. Prices of food-grains have slightly fallen in parts of Gujrat and high but generally steady elsewhere.

*The weekly report on famine and scarcity is as follows:—*Slight rain fell during the week in affected districts. Standing crops are in good condition. Harvesting of autumn crops and spring sowing are in progress. Relief operations have ceased in Sholapur. Two relief works continue in Ahmednagar. Numbers on relief works on the last day of the week ending the 11th October were:—works 2,900 and dependents 1,520. Numbers on gratuitous relief including village servants were 17,151. The public health is generally good. Fodder and water supply are adequate. The condition of cattle is satisfactory. Prices of food-grains are still high.

Hyderabad.—Weather report not received.

*The weekly report on famine is as follows:—*Situation has further improved. As the weather continues seasonable and marked with good showers, agricultural prospects are bright. Good spring crops are expected. The number of persons on relief works is decreasing. Relief operations are expected to be closed this month in affected parts of Mahratwara. The situation has much improved in the Telingana districts but some relief must be continued till next harvest. Emaciation is disappearing. Cheap grain shops continue in Hyderabad city. Takavi is still being advanced for seeds and cattle for spring and Tabi cultivation. Government fodder Depôts in the Mahratwara districts were closed. Grass is available for grazing. Prices of staple grains continue high but show slight downward tendency. Rice sells at $3\frac{1}{2}$ seers and *juar* 6 seers per rupee. The number of persons on relief in thousands for week ending 2nd October:—works 17, gratuitous relief 25, total 42.

Mysore.—During the week the rainfall was light to fair. Standing crops are in fair condition. Cattle are generally healthy. Water and fodder are available. Prices are high but falling. Prospects of season are fair but more rain is wanted in parts. Harvesting of rice, ragi and sugarcane proceeds in parts with outturn fair.

Coorg.—Light rain fell during the week. Transplanting of rice is completed. Prospects are good. Picking of cardamum and reaping of dry crops continue. Cattle are generally healthy. Water and fodder for cattle are available. The public health is fair. Prices of food-grains are high.

Madras.—During the week the rainfall was heavy in South Karara, good in the Circars, Kurnool, Bellary, Sandur, Cuddapah, Nellore, Chingleput, Madras, Chittoor, North Arcot, and Travancore, fair in Banganapalle, Malabar and Cochin and light or *nil* elsewhere. Standing crops are in fair condition generally. Harvesting of paddy and dry crops is limited with outturn generally fair. Sowing of second crop is proceeding in West Coast and that of early paddy and dry crops is progressing elsewhere. The condition of cattle is good generally. Water is in sufficient except in Ganjam, Vizagapatam, Godavari, Kistna, ceded districts Chingleput and West Coast and the hills. Pasture is sufficient except in parts of seven districts. Fodder is insufficient in parts of eight districts. Prices are generally steady or falling. Prospects are fair generally.

*The weekly report on famine in Ganjam is as follows:—*Relief works 31 in Goomsur, 7 in Udayagiri, 29 in Kallikotta and Attagada, 8 in Humma, Biridi, Palur and one in Ronabha are in progress. Labourers and small agriculturists are mostly affected. People are resorting freely to work and their physical condition is generally fair. Relief measures are adequate. Cloth distribution is being provided by private charity. Prices of rice in Goomsur 4·8 seers, in Udayagiri 4·5, in Kallikotta and Attagada 4·5 and in Chatrapur 4 seers and of *ragi* in Kallikotta and Attagada 6, Chatrapur 7·2 seers per rupee. Numbers on relief works were 59,706, gratuitous relief incomplete figures 91,875, total 1,51,581.

R. A. MANT,

Secretary to the Government of India.

No. 8503.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

EMIGRATION.

Simla, the 15th October, 1919.

RESOLUTION.

The following papers regarding reciprocity in matters of immigration between India and the Dominions are published for the information of those interested in the subject, in continuation of Resolution No. 2754, dated the 9th May 1919 :—

Colonial Office to Officers administering Governments of Canada, Commonwealth of Australia, New Zealand, Union of South Africa, Newfoundland.

Downing Street,
7th August 1917.

504.

My Lord Duke,My Lord,

Sir,

I have the honour to request Your Excellency you to invite the attention of your Ministers to the discussion and resolution of the Imperial War Conference on the subject of reciprocity of treatment between India and the self-governing Dominions (pages 117-120 and 159-162 of Cd. 8566).

2. Your Ministers will no doubt furnish in due course such comments as they may wish to make on the Memorandum which was laid before the Conference.

I have, &c.,

WALTER H. LONG.

The Officers administering the Governments of—
Canada,
Commonwealth of Australia,
New Zealand,
Union of South Africa,
Newfoundland.

Extracts from Debate in Canadian House of Commons, dated 18th May 1917.

SIR ROBERT BORDEN:—

The next resolution to which I invite your attention is that relating to the representation of India. I moved this resolution, and I have no doubt that the course which the Conference took was absolutely wise. The resolution is as follows :—

“ That the Imperial War Conference desires to place on record its view that the resolution of the Imperial Conference of 20th April 1907 should be modified to permit of India being fully represented at all future Imperial Conferences, and that the necessary steps should be taken to secure the assent of the various Governments in order that the next Imperial Conference may be summoned and constituted accordingly.”

I should read in connection with that, another resolution in regard to India as to which a word might be said. It is :—

“ That the Imperial War Conference, having examined the memorandum on the position of Indians in the self-governing Dominions presented by the Indian representatives to the Conference, accepts the principle of reciprocity of treatment between India and the Dominions, and recommends the memorandum to the favourable consideration of the Governments concerned.”

As far as the representation of India is concerned, I am absolutely confident that it will be productive of good. I had more than one illustration of that during the Conference itself. The Indian representatives were the Maharajah of Bikaner, one of the Indian princes and a man of splendid loyalty and devotion who governs his country along progressive lines, and who has contributed in every possible way to the winning of this war. Another member was Satyendra Sinha, who is a member of the Indian Council, a man of notable learning, experience and ability, and of great fairness and moderation as well. The third was Sir James Meston, the Governor of the United Provinces, who has had a distinguished career as a civil servant in India, and who also is a man of commanding ability and wide experience. I found it of very great advantage in discussing matters of common concern to India and ourselves that we had the representatives of India at the Conference. I invited the members of the Conference to meet informally at the hotel at which I was staying, and we had a free, full and frank discussion of the whole situation in so far as the Dominions are concerned. India has had matters of difference, matters sometimes of controversy with South Africa, perhaps also with Australia and New Zealand, and on some occasions with Canada. Sir Satyendra Sinha stated the case from the Indian standpoint with great ability and fairness, conspicuous moderation and very deep feeling. His address to us was not the less impressive because it was so fair and so moderate. On our part, we spoke with equal freedom, equal frankness, and, I hope, with equal moderation. The net result was the resolution at which we arrived, and which I have read. Its basis is the idea that the self-respect of India shall be maintained by an agreement that whatever measures we enforce in regard to the emigration or the visits of Indians to Canada shall also prevail with regard to the emigration or visits of Canadians to India.

I do not think that anyone in this House can dispute the fairness of that proposal. Upon certain other matters which we discussed I need not dwell to-day. I see nothing but good in the presence of India at that Conference, and I believe that there will be no objection in this House or in this country to having that great dependency of the Empire represented at future meetings. India has been splendidly loyal in this war and has contributed of her manhood and of her treasure for the purpose of enabling us to win it. We must take that all into account. Her civilization is different from ours; it is more ancient, in some respects it may be said to be on a higher plane, perhaps—

SIR WILFRED LAURIER : Hear, hear.

SIR ROBERT BORDEN : There is more of idealism in their civilization; more perhaps of materialism in ours. I am not disposed to discuss the question as to whether one or the other civilization is superior; but I do say that the Indian civilization is entitled to our respect, and that we must do our part in making the inhabitants of that great dependency of the Empire feel that they are not treated with contumely or injustice by the people of any of the Dominions. I believe that purpose will be carried out; I believe it will be materially assisted by the Conference which we had with the Indian representatives.

SIR WILFRED LAURIER :

Another resolution was passed by the Conference which was not as concrete as this last; indeed, it was very vague. I read:

"That the Imperial War Conference, having examined the memorandum on the position of Indians in the self-governing Dominions presented by the Indian representatives to the Conference, accepts the principle of reciprocity of treatment between India and the Dominions, and recommends the memorandum to the favourable consideration of the Governments concerned."

What is the meaning of this? The meaning will be found in the fact that in British Columbia, Australia, New Zealand, South Africa, and in many other establishments of the British Empire, Asiatics, Indians, and Hindus are not permitted to come into work as labourers. It was against this condition that representations were made in the memorial which was presented to the members of the Conference by the Indian representatives. I call attention to this because it is one of the important subjects that we have to deal with in order to maintain the unity of the British Empire. If representatives of the people of India shall attend future Imperial Conferences, we must be prepared to give the subjects of India fair and proper treatment when they ask for it. This is a very serious subject, and I do not see how it can be successfully dealt with unless a very wise and prudent course is adopted. At the bottom of it there is an economic condition which we must not lose sight of. What is the reason why Asiatic and Hindu labourers, our fellow-subjects, have not been admitted into some parts of the British Empire? What is the reason why Sikhs and Gurkhas, who fought in the British Army were not admitted into some parts of the British Empire, where they were seeking work as labourers? The reason is that they were accustomed to such a low wage and they could live so cheaply that they could compete with white labour on conditions which no white man could accept. We should not close our eyes to this situation. I approve the idea that we should endeavour to overcome these difficulties, but it is evident that nothing has been done so far at the Conference to overcome them. But if, as I say, the leaders of India be admitted into the consultations of the Governments of the overseas Dominions and of the Empire, we must be prepared to take up the other question, which is perhaps of greater significance, greater moment and greater difficulty.

Colonial Office to Self-Governing Dominions.

No. 476.

Downing Street,

My Lord Duke,

My Lord,

Sir,

28th August 1915.

I have the honour to transmit to ^{you} Your Excellency, to be laid before your Ministers a copy of a Resolution relating to reciprocity of treatment between India and the Dominions passed by the Imperial War Conference, together with a copy of a memorandum on the subject by Sir S. P. Sinha.

2. The memorandum with the discussion on the subject, and the Resolution will be published shortly.

3. His Majesty's Government will no doubt be kept informed of any administrative or legislative action taken in the matter, and will receive any observations that your Ministers may wish to offer on the outstanding points in the memoranda presented to the Conference last year and this year in accordance with the procedure suggested in paragraph 4 of the Resolution.

I have, &c.,

WALTER H. LONG.

The Officer administering the Government of—

Canada.

Commonwealth of Australia.

New Zealand.

Union of South Africa.

Newfoundland.

Governor-General of Union of South Africa to Colonial Office.

No. 704.

Governor-General's Office,
Pretoria,
30th August 1918.

Sir,

With reference to your Despatch (Dominions) No. 504, of the 7th August, 1917, I have the honour to inform you that I am advised by my Ministers that the subject of reciprocity of treatment between India and the Self-governing Dominions received their consideration and was placed in the hands of Mr. Burton for discussion at the recent Imperial War Conference.

I have, etc.,
BUXTON,
Governor-General.

The Secretary of State,
Colonial Office.

Governor-General of New Zealand to Colonial Office.

No. 224.

Government House, Wellington,
6th November 1918.

Sir,

I have the honour to inform you that I did not fail to convey to my Ministers the substance of your Despatch (Dominions) No. 476, enclosing copy of a resolution passed by the Imperial War Conference relating to reciprocity of treatment between India and the Dominions, and enclosing also a copy of a memorandum on the subject prepared by Sir S. P. Sinha.

2. I am advised by my Ministers to reply that so far as the Government of New Zealand are concerned, no administrative or legislative action appears to be necessary to give effect to the articles of agreement approved by the Imperial War Conference on 24th July 1918. Provision already exists for the admission of Merchants tourists and *bona fide* students of all nationalities who are unable to pass the education test imposed by the Immigration Restriction Act, 1908, provided they are in possession of passports issued by their respective Governments.

3. Indians domiciled in New Zealand are subject to no disabilities. They have equal rights and privileges in every respect with Europeans. An Indian domiciled in the Dominion would be entitled to bring in his wife and children if the wife and children were certified by the Government of India, or if there were proof of a permanent monogamous marriage.

I have, etc.,
LIVERPOOL,
Governor-General.

The Secretary of State,
Colonial Office.

Colonial Office to Governor-General of Canada.

No. 35.

Downing Street,
28th January 1919.

My Lord Duke,

With reference to my predecessor's Despatch (Dominions) No. 476, of the 28th August, I have the honour to request Your Excellency to inform your Ministers that the Secretary of State for India has inquired as to the action taken in Canada to give effect to that part of Resolution XXI of the Imperial War Conference, 1918, which deals with the admission into Canada of the wives and minor children of Indians already domiciled there.

2. I should be glad if your Ministers would arrange for a statement on the matter to be furnished as soon as possible.

I have, &c.,

The Governor-General of Canada.

MILNER.

Governor-General of Canada to Colonial Office.

No. 275.

Government House, Ottawa,
27th March 1919.

My Lord,

With reference to previous correspondence, and more particularly to your despatch of the 28th January last, on the subject of reciprocity of treatment between India and the self-governing Dominions, I have the honour to transmit, herewith, copies of an approved minute of the Privy Council for Canada, setting forth the views of my responsible advisers.

I have, &c.,

DEVONSHIRE.

The Secretary of State,
Colonial Office.

[Enclosure in above.]

Certified copy of a Report of the Committee of the Privy Council, approved by His Excellency the Governor-General on the 26th March 1919,

P.C.-641.

The Committee of the Privy Council have had before them a report, dated 22nd March 1919, from the Acting Secretary of State for External Affairs, to whom was referred despatches dated respectively 7th August 1917, 28th August 1918, and 28th January 1919, from the Secretary of State for the Colonies to Your Excellency, on the subject of reciprocity of treatment between India and the self-governing Dominions, submitting that the Memorandum of the India Office, bearing date of 22nd March 1917, which was under consideration by the Imperial War Conference, calls attention especially to :—

- (1) The policy of restriction of British East Indian immigration adopted by almost all the self-governing Dominions ;
- (2) The policy of Canada, which places the East Indian, who is a British subject, in a less advantageous position than Japanese and other Asiatics who do not belong to the Empire.
- (3) The existing regulations of Canada, which offer almost insuperable obstacles to the entry of wives and families of British East Indians now domiciled in Canada.

- (4) The difficulties met with by tourists and other non-immigrant classes in establishing their right to free access to Canada, as provided by our law.
- (5) The existing regulations, which practically constitute an embargo against the entry of immigrants of the labouring classes.

The Memorandum also suggests the possibility of an agreement between India and the self-governing Dominions on the following lines :—

- (1) As regards Indians already permanently settled in the Dominions, they should be allowed to bring in wives (subject to the rule of monogamy), and minor children, and in other respects should not be less privileged than Japanese settled immigrants.
- (2) Future admissions of Indians for labour or settlement should, if possible, be regulated on lines similar to, and not less favourable than, those governing the admission of any other Asiatic race.
- (3) If this is not possible, there might be reciprocal treatment in India and each Dominion of immigration for purposes of labour or permanent settlement. If a Dominion is determined to exclude these two classes of immigration from India, India should be free to do the same as regards that Dominion. It would be clearly recognised that the exclusion in either case was not motivated by prejudice of race, but was the outcome of different economic conditions.
- (4) Along with such exclusion, reciprocal arrangements would be made for granting full facilities for the admission of tourists, students, and the like, and for business visits entailing temporary residence, so long as this residence was not for labour purposes or for permanent settlement.

At the request of the representatives of India, the subject of reciprocity of treatment between India and the self-governing Dominions came up for further consideration at the Imperial War Conference in 1918. At this Conference all the self-governing Dominions and India were represented, and it was unanimously agreed that—

- (1) It is an inherent function of the Governments of the several communities of the British Commonwealth, including India, that each should enjoy complete control of the composition of its own population by means of restriction on immigration from any of the other communities.
- (2) British citizens domiciled in any British country, including India, should be admitted into any other British country for visits, for the purpose of pleasure or commerce, including temporary residence for the purpose of education. The conditions of such visits should be regulated on the principle of reciprocity as follows :—(a) the right of the Government of India is recognised to enact laws which shall have the effect of subjecting British citizens domiciled in any other British country to the same conditions in visiting India as those imposed on Indians desiring to visit such country ; (b) such right of visit of temporary residence shall in each individual case be embodied in a passport or written permit issued by the country of domicile, and subject to *visé* there by an officer appointed by, and acting on behalf of, the country to be visited, if such country so desires ; (c) such right shall not extend to a visit or temporary residence for labour purposes or to permanent settlement.
- (3) Indians already permanently domiciled in the other British countries should be allowed to bring in their wives and minor children, on condition (a) that not more than one wife and her children shall be admitted for each such Indian, and (b) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian.

The principal movement of East Indians to Canada occurred in 1907-08, the total immigration being under 7,000. Of this number, possibly not more than 1,200 now remain in Canada, there having been a heavy exodus to the United States, in addition to which quite a number have returned to India. Climatic, industrial, and social conditions in Canada have not, on the whole, been found congenial. Disease has made considerable inroads upon East Indians. Their caste system has seriously interfered with their employment in many walks of life. Notwithstanding the fact that only a small proportion of those who originally emigrated to Canada are now resident here, the Minister submits that certain modifications of the restrictive provisions of the Immigration Act and Regulations should be made for the relief of such of our fellow-British subjects of the East Indian race as may be affected by the resolution of the Imperial War Conference of 24th July 1918, as above recited.

The Minister, therefore, with the concurrence of the Minister of Immigration and Colonisation, recommends that the following declaration, unanimously adopted at the Imperial War Conference, 24th July 1918, be approved, *viz.*, that—

- (1) It is an inherent function of the Governments of the several communities of the British Commonwealth, including India, that each should enjoy complete control of the composition of its own population by means of restriction on immigration from any of the other communities.
- (2) British citizens domiciled in any British country, including India, should be admitted into any other British country for visits, for the purpose of pleasure or commerce, including temporary residence for the purpose of education. The conditions of such visits should be regulated on the principle of reciprocity, as follows :—(a) the right of the Government of India is recognised to enact laws which shall have the effect of subjecting British citizens domiciled in any other British country to the same conditions in visiting India as those imposed on Indians desiring to visit such country; (b) such right of visit or temporary residence shall in each individual case be embodied in a passport or written permit issued by the country of domicile, and subject to *visé* there by an officer appointed by, and acting on behalf of, the country to be visited, if such country so desires; (c) such right shall not extend to a visit or temporary residence for labour purposes or to permanent settlement.
- (3) Indians already permanently domiciled in the other British countries should be allowed to bring in their wives and minor children on condition (a) that not more than one wife and her children shall be admitted for each such Indian, and (b) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian.

The Committee of the Privy Council concur in the foregoing report, and the recommendations therein contained, and recommend that Your Excellency may be pleased to forward a copy thereof to the Right Honourable the Secretary of State for the Colonies, for the information of His Majesty's Government.

All which is respectfully submitted for Your Excellency's approval.

RODOLPHE BOUDREAU,

Clerk of the Privy Council.

Telegram from Governor-General of the Commonwealth of Australia, to Colonial Office, dated 6th May 1919.

With reference to your Despatch, 28th August, reciprocity treatment between India and Dominions. My Despatch 14th April, No. 95, conveys decision.

Government of Commonwealth of Australia, which are briefly as follows :--

- (a) Government agrees admission on passports India, merchants, students, tourists with their respective wives, exemption to continue without necessity for annual application as long as status preserved ;
- (b) Indians domiciled Australia may bring one wife and minor children ;
- (c) Australians visiting India will require to obtain passport ;
- (d) Legislative proposals will be submitted to Parliament to place Indians on equality with other British subjects as regards old age and invalid pensions, but admission to Parliamentary franchise not approved at present—FERGUSON.

Governor-General of the Commonwealth of Australia to Colonial Office.

No. 95.

MELBOURNE,

MY LORD.

14th April 1919.

With reference to your predecessor's Despatch of the 28th August—last, Dominions, No. 476, transmitting a copy of a resolution relative to reciprocity of treatment between India and the Dominions passed by the Imperial War Conference, together with a copy of a memorandum on the subject by Mr. S. P. Sinha, I have the honour to forward herewith a copy of a communication which has been addressed to me by my Acting Prime Minister.

I have, &c.,

The Secretary of State,

R. M. FERGUSON,

Colonial Office.

Governor-General.

[Enclosure in above.]

(S.C. 443-5.)

MELBOURNE,

YOUR EXCELLENCY,

10th April 1919.

With reference to the Secretary of State's letter of the 28th August 1918, Dominions, No. 476, I desire to inform Your Excellency that the documents transmitted have been considered, and Ministers have had the advantage also of perusing the report of the Conference, dealing fully with the question of reciprocity of treatment between India and the Dominions.

As far as Australia is concerned the position is that in 1904 the Commonwealth Government agreed to permit the admission of Indian merchants, students, or tourists, with their wives, on passports for a period of one year, the question of subsequent stay to be considered on application.

In view of the resolution, and with the desire to give full effect to the spirit which animated the Conference, the Government is now prepared to extend the former arrangement so as to permit Indian merchants, students, and tourists to be admitted to Australia on passports, and to remain here indefinitely without the need for further application, so long as they preserve the capacity in respect of which the passport was issued.

In order that there may be no doubt as to the meaning which this Government attaches to the term "merchant," it is desired that the Indian Government should understand that the Commonwealth Government does not consider that the term "merchant" includes retail shopkeepers as such, or hawkers, but that its application is confined to persons engaged in the wholesale overseas trade between India and Australia.

It is further agreed that Indians already here permanently domiciled in the country may bring in a wife and minor children. To give effect to this it will be necessary in the first place for persons desiring to take advantage of the arrangement to apply to the Commonwealth Government, in order that their status may be ascertained, and it will be further necessary that the Indian Government should issue a certificate that the persons proposed to be admitted are the wives and children of the respective applicants.

The departure from Australia for India of any persons will not be permitted unless they are in possession of passports issued or visaed by the Commonwealth Government. No passports or visas will be given to persons if they are of such classes as would be objected to by the Government of India in the light of the agreement reached at the Conference.

It is understood that the claims of Indians to enter Australia for the purpose of labour or permanent settlement are not pressed. It appears from the memorandum that Indians will be satisfied if they receive treatment not less favourable than that accorded to other Asiatic people who are not subjects of the British Empire. As Australia does not discriminate against Indians in favour of any other Asiatics, it is thought that the position should be regarded as satisfactory.

The main points of internal Australian administration which create a differentiation between Indians and Australian-born persons or white British subjects appear to be two: (1) exclusion from the Parliamentary franchise, and (2) exclusion from the privileges of the old age and invalid pension law. The Commonwealth Government, after giving the matter full consideration, regrets that it cannot see its way at present to admit Indians to the Parliamentary franchise; but in regard to the old age and invalid pensions, legislative proposals will be submitted as soon as possible to place Indians on an equality with other British subjects.

I shall be pleased if Your Excellency will ask the Secretary of State to bring this communication under the notice of the Government of India, with an assurance of the sincere desire of this Government to work in most complete harmony with them in regard to all matters arising out of the agreement reached at the Imperial Conference.

Yours faithfully,

W. A. WATT,
Acting Prime Minister.

His Excellency the Governor-General,

Sir Ronald Munro-Ferguson, P.C., G.C.M.G.,

&c., &c., &c.

ORDERED that a copy of the above Resolution be forwarded to all Local Governments and Administrations and that it be published in the Supplement to the *Gazette of India*.

Notifications by High Court, Comptroller-General, etc.

GAZETTE OF INDIA.

NOTICE.

The 18th March 1919.

On and after 29th March and until further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published in Simla, Parts II and III will continue to be published in Calcutta. All notifications and other matter intended for publication in those Parts should be addressed to the Publisher at Simla and Calcutta, respectively.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette* and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 p.m. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India."

THE PATENT OFFICE

PATENTS and DESIGNS.

Calcutta, the 18th October 1919.

LICENSE TO PAY FEES FOR PATENTS AND DESIGNS.

The 4th October, 1919.

No. 7880.—I, Frederick John Napier Thesiger, Baron Chelmsford, in pursuance of the powers reserved in the Trading with the Enemy Proclamations do hereby give and grant license :—

- (1) To all persons residing, carrying on business or being in British India to pay
 - (a) on their own behalf or on behalf of any person or persons residing, carrying on business or being in British India ;
 - (b) on behalf of any person or persons residing, carrying on business or being in any part of His Majesty's dominions outside British India who have been authorised to make such payments by the Government of that part of His Majesty's dominions ; and
 - (c) on behalf of any other person who has been authorised or is permitted to make such payments by the Government of the country in which such person resides, carries on business or is,

any fees necessary for obtaining the grant, or for obtaining the renewal, of patents, or for obtaining the registration of designs, or trade marks, or the renewal of such registration, in an enemy country and to pay to enemy agents their charges and expenses in relation to the matters aforesaid ;

- (2) To all persons residing, carrying on business or being in British India to pay on behalf of an enemy any fees payable on application for, or renewal of, the grant of patents, or on application for the registration of designs or trade marks or the renewal of such registration
 - (a) in British India ;
 - (b) in any part of His Majesty's dominions outside British India where the payment of such fees on behalf of an enemy has been authorised by the Government of that part of His Majesty's dominions ; and
 - (c) in any other country where the payment of such fees on behalf of an enemy has been authorised or is permitted by the Government of that country ; and to pay
 - (i) agents in British India (including themselves) ;
 - (ii) agents in any part of His Majesty's dominions outside British India who has been authorised by the Government of that part of His Majesty's dominions to act on behalf of enemies in connection with the matters aforesaid ; and
 - (iii) agents in any other country who have been authorised or are permitted by the Government of that country to act on behalf of enemies in connection with the matters aforesaid their charges and expenses, if any, in relation to the matters aforesaid.

CHELMSFORD,

Viceroy and Governor-General of India.

This license rescinds the order of the Viceroy and Governor-General of India, dated the 7th December 1918, and the direction thereunder which appeared in the Notices of the Patent Office in the *Gazette of India*, Part II, dated the 21st December 1918.

EXTENSION OF INDIAN PATENTS AND DESIGNS ACT TO SHAN STATES.

Dated Rangoon, the 5th September 1919.

No. 38.—In exercise of the powers conferred by section 10 of the Burma Laws Act, 1898, as amended by Regulation II of 1910, the Lieutenant-Governor is pleased to extend to the

Shan States the Indian Patents and Designs Act, 1911, and the Rules thereunder, subject to the following modification:—

Modification.

If any proceeding is taken in respect of an infringement in the Shan States of a patent, which antedates the extension of the Indian Patents and Designs Act, 1911, to the said Shan States, against any person who may have availed himself of the subject matter of that patent before the lapse of one year from the date of the extension, the Court before which the proceeding is taken, may, if it thinks fit, refuse to award any damages in respect of such infringement.

By order,

C. M. WEBB,

Chief Secy. to the Govt. of Burma.

APPLICATIONS FOR PATENTS UNDER SECTION 3.

October 11.

- 4889. E. C. Hanson. *Wireless transmission of energy.*
- 4890. Fulton Iron Works Co. *Controlling mechanisms for internal combustion engines.*
- 4891. Roneo Ltd., and W. Chipperfield. *Improvements in or relating to means or devices for supporting drawers, shelves and other sliding structures.*
- 4892. T. Kuriaco. *Improvements in pumps or centrifugal distributors for irrigation purposes and the like.*

CESSATION OF EXCLUSIVE PRIVILEGES.

The public are warned that entries under this heading must not be accepted as final, as under the provisions of Rules 9 and 11 of "The Indian Patents and Designs (Temporary) Rules, 1915," the Controller may extend the time prescribed by the Indian Patents and Designs Act, 1911, and by the Inventions and Designs Act, 1888, for paying the necessary renewal fees.

The Patent Office will supply on request definite information, so far as possible, as to the position of any particular Patent or Exclusive Privilege.

NOTICES.

THE PATENT OFFICE, 1, COUNCIL HOUSE STREET, CALCUTTA.

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. All communications relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (II of 1911), or in continuation of

applications under the Inventions and Designs Act (V of 1888) must be made in English and addressed to the Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed and a full address given in all communications.

2. *Directions* for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Temporary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1915, together with current regulations and instructions. *These should be consulted before an application is made to the Controller.*

3. *Advice.* The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs, or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inventions. Models are not required unless specially asked for. Drawings must be on tracing cloth and the Rules and Instructions for the preparation of drawings as given in the Handbook should be strictly followed. A provisional patent cannot be secured under the Indian Patents and Designs Act, 1911.

4. Applicants are warned that the Indian Patents and Designs Act, 1911, is in force in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. The International Convention for the Protection of Industrial Property does not include India. For information regarding patents in countries other than India application should be made to the patent offices in the countries concerned.

5. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission for which due allowance should be made. In cases where it is not possible to have the fees handed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

6. *Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. There is no provision of law in British India for their registration. Neither does this Act deal with *pictures, photographs, etc.*, for which copyright is obtainable under the Indian Copyright Act, 1914.

7. *Printed Specifications* of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*. These specifications can be purchased at the Patent Office at a uniform price of 8 annas per copy; and may be seen free of charge, together with other publications of the Patent Office, at the following places:—

AHMEDABAD . . .	R. C. Technical Institute.	HYDERABAD . . .	Revenue Department of His Highness the Nizam's Government.

J. A. CHAPMAN,

Librarian.

**SULPHATE OF QUININE, SULPHATE OF CINCHONIDINE,
 CINCHONA FEBRIFUGE, RESIDUAL ALKALOID
 AND QUINOIDINE.**

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona Alkaloids. QUININE can be purchased by Government officers, District and Local Boards for Hospitals and Dispensaries in the Provinces of Bengal, Bihar, Punjab and Assam on indents duly countersigned by the Civil Surgeon of their Districts. It can also be purchased by Missionaries for *bona fide* public purposes. It is never sold to private persons or firms. CINCHONA FEBRIFUGE both in powder and $3\frac{1}{2}$ grain tablet forms and CINCHONIDINE can be purchased by Government officers and the general public. It is also sold by the Principal Druggists in Calcutta. QUINOIDINE or *Pure Amorphous Alkaloid* and *Residual Alkaloid* or *Amorphous Cinchona Alkaloid*, which contains about 40 per cent. of *Pure Amorphous Alkaloid*, are for sale to Missionaries and Government Institutions only. *These drugs are sold strictly cash and in advance but private purchasers may use the V. P. P. system*, and are obtainable from the SUPERINTENDENT, JUVENILE JAIL, ALIPORE.

The rates for these drugs from 16th May 1919 are as follows:—

SULPHATE OF QUININE.

For quantities 60 lbs. and above in one delivery	Rs. 24 per lb.
For quantities of not less than 6 lbs. but below 60 lbs. in one delivery	" 25 "
For any quantity less than 6 lbs.	" 26 "

SULPHATE OF CINCHONIDINE.

For quantities of not less than 6 lbs. in one delivery	Rs. 11 per lb.
For any quantity less than 6 lbs.	" 12 "

(Only small quantities available when in stock.)

CINCHONA FEBRIFUGE.

For quantities of not less than 6 lbs. in one delivery	Rs. 5 per lb.
For quantities less than 6 lbs. (when in stock)	" 6 "

CINCHONA FEBRIFUGE TABLETS.

For quantities of not less than 6 lbs. in one delivery	Rs. 6 per lb.
For any quantity less than 6 lbs. (when in stock)	" 7 "

QUINOIDINE in non Tablet form (when in stock) and Residual Alkaloids.	" 4 "
---	-------

QUINOIDINE TABLETS.

For quantities of not less than 6 lbs. in one delivery	Rs. 6 per lb.
For quantities less than 6 lbs. in one delivery (when in stock)	" 7 "

Quinine is available in 1-oz., $\frac{1}{2}$ -lb., $\frac{1}{4}$ -lb., 1-lb., 4-lb., and 6 $\frac{1}{2}$ -lb. tins.

Cinchonidine is available in $\frac{1}{2}$ -lb., $\frac{1}{4}$ -lb. and 1-lb. boxes.

Cinchona Febrifuge is available in $\frac{1}{2}$ -lb., $\frac{1}{4}$ -lb. and 1-lb. boxes.

Residual Alkaloid is available in 1-lb., 5-lb. and 10-lb. boxes.

Quinoidine is available in 1-lb. box.

Quinoidine Tablets are available in 1-lb. box.

Transit charges are in addition to the above prices in every case.

Local sale at the Jail gate from 7 to 10 A.M. and 2 to 4 P.M.

Drugs are sold for cash or by V. P. Post. Price of Postage must accompany the price of the drug (when the drug is required by Post). The name of the Railway and Steamer Station or Post Office must be written distinctly when the parcels are required by Rail Steamer or by Post. A scale of Postage is given below:—

[For $\frac{1}{2}$ lb. 4 As.; $\frac{1}{4}$ lb. 5 As.; 1 lb. 8 As.; $1\frac{1}{2}$ lb. 11 As.; 2 lbs. 14 As.; 2 $\frac{1}{2}$ lbs. Re. 1 Anna 1; 3 lbs. Re. 1 Anna 1; 3 $\frac{1}{2}$ lbs. Re. 1 As. 4; 4 lbs. Re. 1 As. 7; 4 $\frac{1}{2}$ lbs. Re. 1 As. 10; 5 lbs. Re. 1 As. 13; 6 lbs. Rs. 2; 6 $\frac{1}{2}$ lbs. Rs. 2 As. 3.]

GOVERNMENT OF MADRAS.
Revenue (Special) Department, No. 1881.

FORM 2.

(License to carry on business of winning, extracting, smelting, dressing, refining or dealing by way of wholesale trade in metal or metallic ore to which the Indian Non-ferrous Metal Industry Act, 1918, applies).

No. 1 of 1919-20, dated 8th October 1919.

License is hereby granted to Messrs. Bird & Co., Chartered Bank Buildings, Calcutta, to win, extract, smelt, dress, refine, deal by way of wholesale trade in the Madras Presidency in the metals and ores specified below :—

Zinc,
Copper,
Tin,
Lead,
Nickel, and
Aluminium.

S. WADSWORTH,

Temporary Additional Secretary to Government.

DEPARTMENT OF MINES IN INDIA, DHANBAD P. O.,
MANBHUM.

Indian Mines Act, 1901.

NOTICE.

An examination for first class Coal Mine Managers' Certificates of Competency under the rules applicable to coal mines will be held on the 16th, 17th and 18th February 1920. An examination for Second class Coal Mine Managers' Certificates of Competency will be held on the 23rd, 24th and 25th February 1920. Both examinations will be held at the Railway Institute, Dhanbad.

Rules 32 and 33 of the Indian Mines Act, 1901, require that a candidate for a first class certificate must be at least 23 years of age and have had at least five years' practical experience in a coal mine, and for a second class certificate be at least 21 years of age and have had at least three years' practical experience in a coal mine. The periods of practical experience may be reduced to three years and one year respectively, in the case of a candidate who has received a diploma in scientific and mining subjects after a course of study of at least two years at an educational institution approved in this behalf by the Governor-General in Council, or who has taken a degree in scientific and mining subject at a University approved in this behalf by the Governor-General in Council.

The fees are Rs. 15 in the case of first class certificates and Rs. 8 in the case of second class certificates. By rule 34 of Government of India, Department of Commerce and Industry, Notification No. 2968—82, dated the 21st April 1906, "these fees shall be paid not less than one month prior to the date of the examination, to the Chief Inspector of Mines at his office." The fees may be remitted by money order or paid in any other manner.

Applications and fees should be addressed to the Chief Inspector of Mines in India Dhanbad P.O., E. I. Railway, and not to any Officer by name. No candidate will be permitted to sit at the examination unless his application, supported by original certificates as to experience and character, and fee, is received, in the case of a candidate for the first class certificate examination on or before the 15th January 1920, and, in the case of a candidate for the second class certificate examination on or before the 22nd January 1920. Candidates are advised to send all papers under registered cover.

G. F. ADAMS,

Chief Inspector of Mines in India,
and *ex-officio* President of the Board of Examiners.

DHANBAD,

The 18th October 1919.

RAJPUTANA ADMINISTRATION, PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

LOCAL ADMINISTRATION'S ORDERS.

Mount Abu, the 7th October 1919.

No. 3037-S.—Mr. C. E. Hall, Superintending Engineer, having reverted to the United Provinces, Lieutenant-Colonel C. C. H. Hogg, C.M.G., R.E., took over charge of the Office of Superintending Engineer and Secretary in the Public Works Department, Rajputana, with effect from the forenoon of the 7th October 1919.

C. C. H. HOGG, Lieut.-Colonel,
Secretary, Public Works Department, Rajputana.

CHIEF COMMISSIONER, DELHI.

NOTIFICATIONS.

Delhi, the 9th October 1919.

No. 6068-Education.—With reference to the Notification No. 4564-Education, dated the 29th July 1919, and in exercise of the powers vested under Section 240(1) (a) of Act III of 1911 (The Punjab Municipal Act) and Section 55(2) (c) of Act XX of 1883 (The Punjab District Boards Act) the Chief Commissioner is pleased to make the following rules for the supply of liveries to servants of local bodies in the Province of Delhi:—

Rules for regulating the supply of liveries to servants of local bodies.

1. In these rules the word 'livery' means any distinctive uniform clothing and includes the scarlet livery ordinarily worn by messengers in Government offices. It does not include the belt and badge worn by messengers, but includes such accessories as turbans when supplied at the public expense.
2. The supply in every case is subject to the ordinary rules of budget provision and reappropriation.
3. A new livery may not be supplied at the expense of the local body within two years.
4. Liveries costing not more than Rs. 12 each may be supplied subject to the provisions of rule 3 above and with the sanction of the Deputy Commissioner.
5. Belts, buckles and badges may be supplied, with the sanction of the Deputy Commissioner, subject to the limit of Rs. 12 in each case and to the proviso that the supply in each case must last for four years. Buckles and brass badges should in practice last much longer.

NOTE.—Any of the limits prescribed by this rule or by rules 3 and 4 may for special reasons be relaxed by the Deputy Commissioner.

Delhi, the 10th October 1919.

No. 6113-Home.—The following return of births and deaths at the undermentioned Municipal towns in the Province of Delhi for the week ending 4th October 1919 is published for information:—

Delhi, the 11th October 1919.

No. 6139-R. & A.—In exercise of the powers vested in him under section 43 of the Co-operative Societies Act, 1912 (II of 1912), the Chief Commissioner is pleased to confirm the following rules published with his Notification No. 4890-R. & A., dated the 13th August 1919.

RULES.

No member, other than a registered society shall hold more than one-fifth of the share capital of a Co-operative Society whether the liability be limited or unlimited.

2. (a) Every application for the Registration of a society shall be submitted to the registrar in the form prescribed by him.

Application for registration.

(b) The application may be submitted either by a registered society or societies or by persons not less than 10 in number and all above the age of 18. When a registered society is an applicant the application shall be signed on its behalf by the officer of the society duly empowered for that purpose under the bye-laws of the society.

(c) Together with the application shall be submitted two copies of the bye-laws which the society proposes to adopt, unless the model bye-laws issued by the Registrar are adopted in their entirety, in which case a note to that effect shall be recorded on the application.

(d) When bye-laws other than the model bye-laws are adopted the Registrar shall when he has approved of them, return one copy of the society, stamped with the official seal of the Registrar, at the time when he sends the certificate of registration.

3. When the Registrar refuses to register a society or its bye-laws he shall record in writing his reasons for refusing.

Compulsory bye-laws.

4. A society shall make bye-laws in respect of the following matters :—

- (a) Name.
 - (b) Registered address.
 - (c) Objects for which the society is established.
 - (d) Purposes to which the funds may be applied.
 - (e) Qualifications for membership, the terms of admission of members, and the mode of election.
 - (f) Nature and extent of the liability of members.
 - (g) Withdrawal and expulsion of members, and the payments, if any, to be made to such members.
 - (h) Transfer of the shares or interest of members.
 - (i) Manner of raising funds.
 - (j) General meetings, and the procedure and powers of such meetings.
 - (k) Appointment, suspension and removal of members of the committee and officers ; the powers and duties of the committee and officers.
- If the objects of the society include the creation of funds to be lent to the members, additional bye-laws shall be made on the following matters :—
- (l) The tribe, class, caste, occupation, or residence of the members.
 - (m) The conditions on which loans may be made to members, including—
 - (1) the rate of interest ;
 - (2) the maxima amount which may be lent to a member ;
 - (3) extension of the term and renewal of loans ;
 - (4) the purposes of loans ;
 - (5) security for repayment.
 - (n) The consequences of default in payment of any sum due on account of shares or loan.
 - (o) Disposal of the profits.
 - (p) The authorisation of an officer to sign documents on behalf of the society.

5. (a) Subject to the provisions of section II of the Act and of rule 4 of these rules a society may from time to time make new bye-laws for the conduct of its business, or may amend or

Amendment of bye-laws.

cancel any bye-laws already made.

(b) Such additions, amendments or cancellation shall only be made by the majority of members present at a general meeting at which not less than two-thirds of the members are present, provided, that in the case of societies with limited liability, model bye-laws or amendments previously approved by the Registrar may be adopted by a majority consisting of two-thirds of the members present at a general meeting of which due notice of the intention to discuss such model bye-laws or amendments has been given.

(c) Two copies of such amendments, signed by two officers of the society, shall be submitted to the Registrar accompanied by—

- (1) a statement that the provisions of clause (b) have been fully complied with ;
- (2) an application that the change in the bye-laws be registered.

If the Registrar approves of the amendments he shall register them, retain one copy in his office and return the other to the society with a certificate that the amendments have been registered.

Explanation :—

Amendment includes a new bye-law and a resolution rescinding a bye-law.

6. Every society with unlimited liability shall from time to time fix, in a general meeting, the maximum liability it may incur in loans or deposits from non-members. The maximum so fixed shall be subject to the sanction of the Registrar who may at any time reduce it. No society may receive any loans or deposit from a non-member which will make its liability to non-members exceed the limit sanctioned by the Registrar.

Limits of loans.

7. (a) Every society shall from time to time hold general meetings as provided in the bye-laws for the disposal of necessary business including—

General meetings.

- (1) the fixing of a maximum liability as required by rule 6 ;
- (2) the fixing of a maximum credit for each member ;
- (3) the election of members of committee ;
- (4) the consideration of the annual balance sheet ;
- (5) the consideration of the audit note and any inspection note by the Registrar or Inspection.

(b) Questions before the general meeting shall be decided, unless otherwise specifically provided, by a majority of members present. In primary societies no proxies shall be allowed.

In Unions and Central Banks no proxies shall be allowed for individual members but a shareholding society may be represented by any of its members empowered by general or special resolution to do so.

(c) The Registrar or any person authorised by him may at any time summon a special general meeting of the society in such manner and at such time and place as he may direct. He may also direct what matters shall be discussed by the meeting. Such meeting shall have all the powers and be subject to the same rules as a meeting called according to the bye-laws of the society.

8. Members of the committee shall be appointed, suspended and removed in a general meeting by the majority of members present.

Managing committee.

9. A member is not eligible for the committee if—

- (a) he is under 21 years of age ;
- (b) he holds any office of profit under the society or receives any honorarium ;
- (c) (in a credit society) he lends money on his own account.

10. A member of the committee shall cease to hold office if—

- (a) he ceases to be a share-holder, or
- (b) he is declared insolvent, or
- (c) he becomes of unsound mind, or
- (d) he is convicted of any offence involving dishonesty or is imprisoned for three months, or
- (e) he accepts any office of profit under the society or receives any honorarium, or
- (f) (in a credit society) he lends money on his own account.

11. The committee shall exercise all the powers of the society except those reserved for the general meeting, and subject to any regulations or restrictions duly laid down by the society

Powers of committee.

in a general meeting or in the bye-laws.

Duties of committee.

12. The duties of the committee shall include the following :—

- (1) To comply with the Act and the rules made thereunder, and the bye-laws of the society.
- (2) To maintain true and accurate accounts.
- (3) To keep a true account of the assets and liabilities.
- (4) To keep a correct register of members.
- (5) To lay before the annual general meeting a profit and loss account and a balance sheet.
- (6) To assist the inspection of the books by any person authorised to see them.
- (7) (In a credit society.) To watch that loans are applied to the approved purposes for which they were made.

Books of a society.

13. Every credit society shall maintain—

- (a) a cash book ;
- (b) a ledger account for each member ;
- (c) a register showing when loans are due for repayment ;
- (d) a register of deposits ;
- (e) a minute book.

14. Every Central Bank shall exhibit its annual balance sheet to any person desiring to see it during office hours. Every primary credit society shall exhibit its annual balance sheet to

Publication of balance sheet.

any person interested in its funds as member, depositor, or creditor.

15. The committee of every society, or some officers of the society appointed for this purpose by the committee, shall prepare yearly in such form as may be prescribed by the Registrar,

Annual statements.

(a) an account showing the income and expenditure for the year, (b) a profit and loss account, and (c) a balance sheet. The account shall be made up to 31st July, and a copy of each account shall be sent to the Registrar within such time as he may direct.

16. For the purpose of section 26 of the Act a copy of an entry in the book of a society

Copies.

may be certified by a certificate written at the foot of such copy, declaring that it is a true copy of such entry, and that the book containing the entry is still in the custody of the society, such certificate being dated and signed by the Secretary of the society or other officer approved by the Registrar.

Register of members.

17. Every society shall maintain a register of members showing—

(a) the name, address and occupation of each member, and a statement of the shares held by him ;

(b) the date on which each member's name was entered in the register ;

(c) the date on which any person ceased to be a member ;

(d) the nominee, if any, appointed under rule 20 ;

18. (a) Any dispute concerning the business of a co-operative society between members

Disputes.

or past members of the society or persons claiming through them, or between a member or past member or person so claiming and the committee or any officer shall be referred to the Registrar. Reference may be made by the committee or by the society by resolution in general meeting or by any party to the dispute, or if the dispute concern a sum due from a member of the committee to the society, by any member of the society.

(b) The Registrar may either decide the dispute himself or appoint an arbitrator or refer it to three arbitrators, of whom one shall be nominated by each of the parties and the third shall be nominated by the Registrar and shall act as chairman. When any party to a dispute fails to nominate a suitable arbitrator within 15 days the Registrar may make the nomination. No legal practitioner may be nominated as arbitrator by any party.

(c) In such a proceeding the Registrar or arbitrator shall have power to administer oaths, to require the attendance of the parties and witnesses, and to require the production of all necessary books and documents by a summons delivered orally or sent by hand or by registered posts, or through the nearest civil court having jurisdiction in the area in which the society operates and shall further have power to order the expenses of determining the dispute to be paid either out of the funds of the society or by such party or parties to the dispute as he may think fit.

(d) The Registrar or arbitrator shall hear the evidence of the parties and witnesses who attend and upon that evidence and after consideration of any documentary evidence produced by either side, a decision or award shall be given in accordance with justice, equity, and good conscience and shall be reduced to writing. In the absence of any party duly summoned to attend, the dispute may be decided against him in default. Where three arbitrators are appointed, the opinion of the majority shall prevail.

(e) Any person duly summoned by the Registrar or arbitrator to appear before him or to produce any document and failing to do so shall be liable to the penalties prescribed in paragraph 7 (2) of the second schedule of the Code of Civil Procedure, 1908.

(f) Any party aggrieved by an award of an arbitrator may appeal to the Registrar in person or by agent within one month of the date of the award.

(g) An arbitrator's award, if no appeal has been made within a month, or a decision of the Registrar originally or in appeal, shall not, as between the parties to the dispute, be liable to be called in question in any civil or revenue court, and shall be in all respects final and conclusive, except on proof of the receipt of a corrupt gratification by the arbitrator.

(h) A decision or award shall on application to any civil court having jurisdiction in the area in which the society operates be enforced in the same manner as a decree of such court.

(i) In proceedings before the Registrar or an arbitrator no party shall be represented by a legal practitioner.

Withdrawal of members.

19. In societies of unlimited liability—

(a) a member who is not in debt to the society and is not surety for an unpaid debt, may withdraw from the society after giving one month's notice to the Secretary ;

(b) a member who ceases to be qualified under the bye-laws shall be removed by the committee ;

(c) a member may be removed or expelled from the society in such way and for such cause only as may be prescribed by the bye-law ;

(d) a member withdrawing, removed or expelled from the society shall be entitled to repayment without interest of any money paid by him or his predecessor in interest towards the purchase of shares, after the period prescribed in the bye-laws.

20. Every member of a society may nominate a person to whom his share or interest

Nominee.

referred to in section 22 of the Act shall on his death be transferred or the sum specified shall be

paid and may from time to time revoke or modify such nomination. The nomination shall be recorded in the register of members, and attested by the thumb mark or signature of the member. The value of the share or interest shall be represented by the sum actually paid by him to acquire such share or interest unless the bye-laws provided for calculation or otherwise.

The nominee may become a member only if admitted by the committee.

21. The reserve fund of a society may, unless the Registrar by special order direct it to be invested as provided in section 32 (1), (a), (b), (c), (d), be utilized in the business of the society.

Reserve fund.

22. The reserve fund shall be indivisible and no member shall be entitled to claim a specified share in it.

23. On the dissolution of a society, the reserve fund shall be applied to discharging the liabilities of the society and to the repayment of the share capital.

Any sum that may remain may be applied to such object of local and public utility as may be selected by the committee and approved by the Registrar.

If within three months of the dissolution of the society the committee fails to select an object that is approved by the Registrar, the latter shall credit the balance of the reserve fund to the co-operative society to which the society was affiliated or shall deposit the amount in some co-operative or other bank until a new co-operative society with a similar area of operations is registered, in which case it shall be credited to the reserve fund of the new society.

24. (a) In a society with limited liability the dividend shall not exceed 10 per cent. per annum on share capital actually paid up without the previous consent of the Chief Commissioner.

Dividend.

No bonus to share-holders shall be distributed in addition to dividend.

(b) In a society with unlimited liability and with shares no dividend or bonus shall be paid until ten years have elapsed from the date of registration. In the eleventh year, after at least one quarter of the accumulated net profits has been carried to the reserve fund, the remainder of such profits may be apportioned among the members in the form of non-returnable shares. In the twelfth and each following year, after at least one-fourth of the net profits of the year have been carried to the reserve fund, a dividend not exceeding 10 per cent. on each fully paid share may be paid from the remainder of the profits.

(c) No part of the funds of a society not having share capital shall be divided among the members as bonus or dividend.

(d) Without the sanction of the Registrar, no part of the funds of a society shall be divided as bonus or dividend or otherwise among the members until the entire expenditure incurred by the society during the year has been debited in the annual Profit and Loss Account before the net profit was calculated.

(e) No dividend shall be paid by any society while any claim due from the society to a depositor or lender remains unsatisfied.

(f) The Registrar may by general or special order direct that a society shall not pay a dividend or shall pay dividends at a reduced rate so long as it receives loans or deposits from non-members other than a Central Bank.

(g) In calculating profits for the purpose of declaring a dividend under this rule all interest due but which has not been recovered on the date up to which the balance sheet is prepared shall be excluded.

25. The appeal under section 39 of the Act from an order of the Registrar cancelling the registration of a society shall lie to the Chief

Appeal.

Commissioner. No appeal shall lie against any

other order of the Registrar passed in any matter dealt with in the Act or in the rules framed under the Act.

26. (a) On cancelling the registration of a society the Registrar may publish, in such manner as he thinks proper, a notice requiring

Winding up.

claims against the society to be submitted within

one month to him or to such person as he may name as liquidator. All liabilities recorded in the books of any society shall be deemed *ipso facto* to have been duly notified.

(b) When the registration of a society is cancelled under section 39 or 40 the liquidator shall take charge of the books of the society in order to wind up its affairs.

(c) If necessary the liquidator may institute suits for the recovery of sums due to the society.

(d) The liquidator shall proceed to determine the assets and liabilities of the society as they stood at the time of the cancellation of its registration, and shall determine the contributions to be made by the members and past members respectively to the assets of the society. He shall also determine by what persons and in what proportions the costs of the liquidation are to be borne.

(e) The liquidator may issue a summons to any person whose attendance is required either to give evidence or to produce documents. He may compel the attendance of any person to whom a summons is issued and for that purpose issue a warrant for his arrest through the civil court exercising jurisdiction in the area in which the society operates.

(f) The liquidator shall send all such processes for service to the civil court having jurisdiction in the area in which service is to be effected. The court shall proceed as if such processes had been issued by it and shall return them to the liquidator with a report of service.

(g) He shall make an order noting the names of members and past members of the society and the amount to be realized from each as contribution under clause (b), sub-section (2) of section 42, and as costs of liquidation under clause (d) of the same sub-section. This order shall be submitted to the Registrar for his approval, and he may modify it or refer it back to the liquidator for further enquiry or other action.

(h) A copy of the order as finally approved by the Registrar, accompanied if necessary by a list of the property of each member or past member against whom the decree has to be enforced shall be filed in the civil court having local jurisdiction to be enforced as laid down in clause (a), sub-section (5) of section 42.

(i) If the civil court is unable to recover the sum assessed against any member or members the liquidator may frame a subsidiary order or orders against any other member or members to the extent of the liability of each for the debts of the society until the whole amount due from the members is recovered and these orders shall be executed in the same way.

(j) The liquidator shall submit to the Registrar a quarterly report in such form as the Registrar may prescribe showing the progress made in the liquidation of the societies placed under his charge.

(k) All funds in charge of the liquidator shall be deposited in the Post Office Savings Bank or with such other bank or person as the Registrar may approve.

(l) After recovery of the dues of the society and the realisation of the contribution and the costs of liquidations from the members and past members, the liquidator shall, after meeting the liabilities of the society wind-up its affairs and submit a final report to the Registrar.

(m) The Registrar shall fix the amount of the fee, if any, to be paid to the liquidator.

(n) No appeal shall lie from any order of the liquidator under section 42.

27. Subject to principles to be laid down by the Local Government in respect to

Transactions with non-members. measure for the general promotion of agriculture and to the general control of the Local Government in this and in other respects, the transactions of a society with persons other than members shall be subject to such prohibition and restriction as may be prescribed by the Registrar.

28. Any member of the public shall be permitted, on payment of a fee of one rupee for each occasion of inspecting, to inspect for any lawful purpose any public documents (exclusive of public documents privileged under sections 123, 124, 129 and 131 of the Indian Evidence Act, 1872) filed in the office of the Registrar of Co-operative Societies, in particular of the following documents, namely:—

- (1) The registration register.
- (2) The registration certificate of a society.
- (3) The registered bye-laws of a society and amendments effected in such bye-laws.
- (4) An order cancelling the registration of a society.
- (5) An order directing the liquidation of a registered society.
- (6) The annual accounts of a society.

The fees prescribed for certified copies of any public documents, which any person has under the preceding rule a right to inspect, are as follows:—

For a registration certificate Rs. 3; in the case of other documents, a sum calculated at the rate of two annas for each hundred words of the copy or extract.

29. Powers to make rules under section 43 in respect to the following matters is delegated to the Registrar of Co-operative Societies:—

- (a) Under clause (h) of section 43 (2) of the Act, prescribing the accounts and book to be kept by a registered co-operative society.
- (b) Under clause (i) of section 43 (2) of the Act prescribing the returns to be submitted by a society to the Registrar and providing for the persons by whom and the form in which such returns shall be submitted.
- (c) Under clause (c) of section 43 (2) of the Act prescribing for any society the maximum loan which may be made to any member without the Registrar's prior consent.

Condition.—The power hereby delegated does not extend to the making of any rule inconsistent with any rule made under the Act by the Local Government and for the time being in force.

CONCESSIONS TO CO-OPERATIVE SOCIETIES.

A.—CONCESSIONS GRANTED BY THE GOVERNMENT OF INDIA UNDER SECTION 28.

Income-tax.—Notification No. 681-F., dated 28th December 1912 (Finance Department—Separate Revenue—Income-Tax), as amended by Notification No. 579-F., dated 2nd June 1913, omitting the word "credit."

In exercise of the powers conferred by section 28, clause (a) of the Co-operative Societies Act, 1912 (11 of 1912), the Governor-General in Council is pleased to remit the income-tax.

payable in respect of the profits of any Co-operative Society for the time being registered under that Act or of the dividends or other payments received by the members of any such society on account of profits.

2. *Stamp duty*.—Notification No. 688-F., dated 28th December 1912 (Finance Department—Separate Revenue—Stamps), as amended by Notification No. 579-F., dated 2nd June 1918 (omitting the word “credit”).

In exercise of the powers conferred by section 28, clause (b), of the Co-operative Societies Act, 1912 (II of 1912), the Governor-General in Council is pleased to remit the stamp duty with which, under any law for the time being in force, instruments executed by or on behalf of any Co-operative Society for the time being registered under that Act, or instruments executed by any officer or member of any such society, and relating to the business of the society are respectively chargeable.

3. *Arbitration Awards*.—Notification No. 1245-F., dated 16th May 1919.

In exercise of the powers conferred by section 9, Clause (a) of the Indian Stamp Act, 1899 (II of 1899), the Governor-General in Council is pleased to remit the duty chargeable under Article 12 of Schedule I of the said Act on the awards of arbitrators in all disputes to which Co-operative Societies in the Delhi Province are parties.

4. *Registration*.—Notification No. 376-Judicial—Home Department, dated 24th April 1914.

In supersession of the Home Department, Notification, No. 2025, dated the 20th June 1910, and in exercise of the powers conferred by section 28, clause (c), of the Co-operative Societies Act, 1912 (II of 1912), the Governor-General in Council is pleased to remit the following fees payable under the law of Registration for the time being in force, namely—

- (a) All fees payable by or on behalf of any Co-operative Credit Society for the time being registered under that Act, and
- (b) all fees payable in respect of any instrument executed by any officer or member of such a society and relating to the business thereof.

B.—CONCESSIONS AS TO THE USE OF TREASURY FACILITIES.

The following letters explain themselves :—

1. Circular letter No. 5-107-14, dated 4th March 1914, from Under-Secretary to Government of India, Department of Revenue and Agriculture, to the Revenue Secretary to Government, Punjab.

* * * * *

Paragraph 3.—The Government of India are prepared to agree to the receipt or the payment of remittances at sub-treasuries provided that no extra expenditure is thrown upon Government in the way of extra establishment at those sub-treasuries, and provided also that the amount of money to be remitted to or from a sub-treasury in order to meet the payments or to remove the money paid in, is not considerable . . . they therefore leave it to the Local Accountant-General to settle . . . the sub-treasuries at which remittances will be received and paid and the maximum amount of money transactions at each, sub-treasuries.

2. Letter No. T.-M.-1-8-750, dated 19th August 1916, from the Accountant-General Punjab, to the Deputy Commissioners.

With reference to previous correspondence on the subject of remittances of money belonging to the Co-operative Credit Societies through the treasuries including sub-treasuries both in their own districts and in other districts, I have the honour to point out for your information the concessions that have been granted to the Societies in this respect.

2. The occasions on which a remittance is sent by one society to another may be classified as follows :—

- (A) Remittances from head-quarters treasury to—
 - (1) sub-treasuries within the same districts ;
 - (2) head-quarters treasuries in other districts ;
 - (3) sub-treasuries in other districts ;
- (B) Remittances from a sub-treasury to—
 - (1) the head-quarters treasury of the same district ;
 - (2) the head-quarters treasury in other districts ;
 - (3) other sub-treasuries in the same district ;
 - (4) sub-treasuries in other districts.

3. Case A (1) is met by the issue of cash orders authorised in this office General letter No. 17, dated the 10th September 1915.

Case A (2) is governed by the revised article 143-B (9), Civil Account Code.

Case A (3) can be met by issue of Remittance Transfer Receipt which should include the cash order necessary to make the money payable at a sub-treasury—*vide* Note to article 390, Civil Account Code.

Case B (1) is regulated by the issue of payment bills on the head-quarters treasury when the money has been paid into the sub-treasury. The bill is cashed after tracing the credit of the money in the Tahsil Siyah, the credit being shown in the schedule of unclassified items and the payment in Schedule F.

Case B (2) can be managed by payment bills as in Case B (1) and by obtaining Remittance Transfer Receipts to another treasury.

Case B (3) can be met by the payment of the money into the sub-treasury which will pass on the credit through its daily Shiah to Sadr treasury which again will issue a cash order on the sub-treasury where payment is desired.

Case B (4) is the combination of the processes B (1), A (2) and A (1).

4. The above concessions are subject to the condition that the amounts paid in or paid out at any sub-treasury do not exceed Rs. 30,000, in the course of one year and the Treasury Officers should be instructed to apply to this office, for further instructions when the limit is exceeded at any sub-treasury. The Sadr treasury should, as far as possible, keep itself in touch with the probable requirements at sub-treasuries and keep the latter in funds.

3. The issue of Remittance Transfer Receipts is governed by article 143 (b), Civil Account Code.

Remittance Transfer Receipts may be issued to Civil Officers at par :—

(a) Co-operative Societies—
(Credit and non-credit).

For Remittances between societies, provided that the amount to be remitted is not less than Rs. 150.

4. Letter No. 1249—268-2, dated 16th August 1905, from the Secretary to the Government of India, Revenue and Agricultural Department, to the Secretary to the Government of Madras, Revenue Department.

I am directed to acknowledge the receipt of your letter No. 567, dated the 17th June last, asking that societies registered under the Co-operative Credit Societies Act X of 1904, may be allowed the privilege of depositing their strong boxes for safe custody in Government treasuries.

2. The Government of India sanction the grant of the privilege in all cases in which the Local Government is satisfied that the society could not otherwise, except at unreasonable cost, arrange for the custody of its funds and papers either with a Government Savings Bank, or with an approved banker or in some other safe manner; on the condition that the concession may at any time be withdrawn should Government see fit.

3. I am to add that in considering whether there is room in the treasury, it must be remembered that accommodation should be reserved for a currency chest, whenever the Commissioner of Paper Currency may desire to create one. Moreover, when the concession is given, the society should be required to use a strong box of moderate dimensions with a good lock, sealed with a proper seal, and it should be warned that the treasury staff must not be harassed by too frequent applications to open the treasury. It is reasonable that the authorities of the society should be required to keep in their own office the money required for current needs and only to deposit in the treasury what will not often be wanted.

No. 1253.

Copy forwarded to the Government of the Punjab for information.

Endorsement by the Punjab Government, No. 136, dated 29th August 1905.

Copy forwarded to the Senior Secretary to the Financial Commissioners, Punjab, for the information of the Financial Commissioner and for favour of opinion whether the concession is necessary or desirable in the Punjab.

C.—CONCESSIONS RELATING TO THE POST OFFICE SAVINGS BANK AND MONEY ORDERS.

1. Copy of a communication No. 1-49-27, dated 23rd November 1916, from the Postmaster-General, Punjab, and North-West Frontier Circle, to all Superintendents of Post Offices and Postmasters, Punjab, and North-West Frontier Circle, except the Superintendents of Post Offices, Kashmir, Peshawar, Derajat and Postmasters, Srinagar, Jammu, and Abbottabad, etc., etc.

With reference to the note below rule 42 (k) of the Post Office Savings Bank Rules, it is hereby ordered that in the case of public accounts opened in the names of Co-operative Credit Societies under rule 42 (b), the following classes of Post Offices in this circle should allow withdrawals from such accounts, of sums not exceeding Rs. 3,000, on three days' notice and of sums exceeding Rs. 3,000, but not exceeding Rs. 10,000, on ten days' notice :—

(a) All Post Offices situated at District Head-quarters.

(b) All Post Offices situated at sub-treasury stations, where there is a Telegraph Office.

2. All other Post Offices (excluding branch offices) at which such accounts are open should allow withdrawals from them of sums not exceeding Rs. 3,000 on ten days' notice.

FINANCE DEPARTMENT.

NOTIFICATIONS.

ACCOUNTS AND FINANCE.
MINT.*Simla, the 18th October, 1919.*

No. 2728-F.—In pursuance of sub-section 2 of section 3 of the Gold (Import) Act, 1917, the Governor General in Council is pleased to prescribe the following rates at which payment shall be made for gold taken possession of under the provisions of the said Act :—

Class of gold.	Rate.
(1) Gold coins coined at His Majesty's Royal Mint in England or at any mint established in pursuance of a Proclamation of His Majesty as a branch of His Majesty's Royal Mint. Provided that such coins have not been called in by any Proclamation made in pursuance of the Coinage Act, 1870, or have not lost weight so as to be of less weight than that for the time being prescribed for like coins by or under the said statute as the least current weight.	Rs. 11-11-0 per sovereign.
(2) All other gold not included in entry No. 1 ...	Rs. 1 for every 9662 grains troy of fine gold.

2. The notification by the Government of India in the Finance Department No. 25414-F., dated the 30th September 1919, is hereby cancelled.

(NOTE 1.—Gold shipped to India on a through bill of lading before the 20th October 1919 will be paid for at the rates hitherto in force.)

NOTE 2. — When firms or institutions have arranged to import gold into India and wish to avoid risks from possible variations in the acquisition rate before it is delivered to the Government of India, the Controller of Currency or, in the case of gold delivered at Bombay, the Accountant General, Bombay, will be prepared to contract on behalf of the Government of India to pay for the gold on delivery at the acquisition rate prevailing at the time the gold was purchased for shipment. Firms or institutions wishing to take advantage of this arrangement must declare the fact and date of purchase to the above officers without delay and as soon as they have received intimation thereof. The officer making the contract will take such undertaking as he thinks fit from the firm or institution to ship and deliver gold with all possible expedition for payment at the rate stated.

The India Office is prepared to make a similar arrangement with firms and institutions who find it more convenient to submit in London evidence of their having engaged gold for shipment to India.)

LEAVE AND APPOINTMENTS.

CANTONMENTS—REGULATIONS.

No. 3151.—The following draft of a notification which it is proposed to issue in exercise of the powers conferred by section 24 of the Cantonments Act, 1910 (XV of 1910), is published, as required by sub-section (1) of section 25 of the said Act, for the information of persons likely to be affected thereby. The draft will be taken into consideration by the Governor General in Council on or after the 27th November 1919.

Any objections or suggestions which may be received with respect to the draft before that date will be considered by the Governor General in Council :

Draft Notification.

In exercise of the powers conferred by section 24 of the Cantonments Act, 1910 (XV of 1910), the Governor General in Council is pleased to direct that the following amendments shall be made in the Cantonment Code, 1912, namely :—

1. For clause (n) of sub-section (1) of section 2 of the said Code the following shall be substituted namely :—

“(n) “Health Officer” means the officer appointed as such by the Officer Commanding the Division or Brigade, or where no officer has been specially so appointed,

the senior executive Medical Officer in military employ on duty in a cantonment."

2. For the words "Sanitary Officer" wherever they occur in the said Code the words "Health Officer" shall be substituted.

3. After clause (g) of sub-section (1) of section 3 of the said Code the following new clauses shall be added namely:—

(h). The senior executive Medical Officer in military employ on duty in a cantonment.

(i). The Medical Officer in charge of the Cantonment Hospital or Dispensary."

4. In section 71 of the said Code for the words "the officer responsible under section 69" the words "the senior executive Medical Officer in military employ on duty in the Cantonment" shall be substituted.

JUDICIAL.

No. 3152.—WHEREAS the securities and cash specified in Schedule A hereto represent or have been derived from subscriptions received on the invitation of Her Excellency Lady Chelmsford from the women of India, Indian and European, for an offering to Her Majesty the Queen Empress as a token of loyalty and affection on the occasion of the 25th anniversary of Their Imperial Majesties' Wedding.

AND WHEREAS Her Majesty in graciously consenting to receive such a gift signified the desire that it should take the form of a sum of money to constitute a fund to be devoted to the education of the children of Indian Soldiers who have fallen or been permanently disabled during the War.

AND WHEREAS the Government of India having undertaken responsibility for the early education of such children such a fund is required only for the higher education of those of such children who are suitable to receive higher education.

AND WHEREAS

Henry Fraser Howard,
Henry Sharp,
Charles Henry Kesteven,
Edward Douglas Giles,
Habibur Rahman Khan, and
John Evans Woolacott,

(hereinafter called the Administrators) who have been nominated by Her Excellency Lady Chelmsford to be the administrators of the said Fund and who have in pursuance of Her Excellency's wish received and now hold the said securities and cash and propose to apply the same for the purpose aforesaid have made application to the Governor General in Council for an Order under Section 4 of the Charitable Endowments Act, 1890, vesting the same in the Treasurer of Charitable Endowments for the territories subject to the Government of the Punjab upon the terms (directed to the carrying out of the purpose aforesaid) as to the application of the said securities and cash and the income thereof which have been agreed in pursuance of the provisions of the said section between the Governor General in Council and the Administrators and are hereinafter set forth.

NOW IN PURSUANCE and exercise of the powers conferred by and by virtue of Sections 4 and 7 of the Charitable Endowments Act 1890 it is hereby ordered by the Governor General in Council that the securities and cash specified in Schedule B hereto be and the same are hereby vested in the Treasurer for Charitable Endowments for the territories subject to the Government of the Punjab upon the following terms that is to say that the same securities and cash (to be called the Silver Wedding Fund) and the income thereof shall be devoted and applied to and for the higher education of the children of Indian Officers and Soldiers (including non-combatants) who have fallen or been permanently disabled during the War in accordance with the Scheme settled by the Governor General in Council on the application of the Administrators under powers conferred by Sections 5 and 7 of the said Charitable Endowments Act a copy of which is set forth in Schedule B hereto.

SCHEDULE B.

Scheme for the administration of the Silver Wedding Fund.

WHEREAS by a Vesting Order made by the Governor General in Council under the powers conferred by Sections 4 and 7 of the Charitable Endowments Act 1890 by Notification No. 3152 published in the Gazette of India on the 25th day of October 1919 certain securities and cash specified in Schedule A to the said Vesting Order were on the application of

Henry Fraser Howard,
Henry Sharp,
Charles Henry Kesteven,
Edward Douglas Giles,
Habibur Rahman Khan, and
John Evans Woolacott.

vested in the Treasurer for Charitable Endowments for the territories subject to the Government of the Punjab upon the terms as to the application of the same and the income thereof therein set forth that is to say that the said securities and cash and the income thereof shall be devoted and applied to the higher education of the children of Indian Officers and Soldiers (including non-combatants) who have fallen or been permanently disabled during the War in accordance with the Scheme therein referred to and settled by the Governor General under the powers conferred by Sections 5 and 7 of the said Act being this present Scheme.

NOW IT IS HEREBY DECLARED that in pursuance and exercise of the powers conferred by the said Sections 5 and 7 of the said Act the Governor General in Council has been pleased to settle the following Scheme for the administration of the Fund consisting of the said securities and investments.

1. The said Fund shall be called the "Silver Wedding Fund."

2. The income of the said securities and of any securities in which in pursuance of the provisions of the said Act the said cash or the proceeds of sale of any of the same securities (which may in pursuance or accordance with such provisions be sold) shall be invested shall be collected and received by and all securities cash and income hereinafter collectively referred to as "the Fund" shall be administered and applied in manner hereinafter mentioned by the following persons *viz* :

Henry Fraser Howard,
Henry Sharp,
Charles Henry Kesteven,
Edward Douglas Giles,
Habibur Rahman Khan, and
John Evans Woolacott,

or such of them as may for the time being continue to act as Administrators for the purpose of this Scheme or such other persons as may from time to time by virtue or in consequence of any appointment or appointments in pursuance of the power hereinafter contained or otherwise succeed them or any of them as the Administrators for the time being of the said Fund for the purpose hereof and the said persons or such of them as may at any time continue to act or other such Administrators as aforesaid are hereinafter called the Administrators.

3. The Fund shall be applied and employed in and for the provision of Scholarships of such amounts and to such persons as the Administrators may from time to time (whether on their own initiative or on applications received from Government Officers Imperial or Local Local Committees or Indian Princes or Chiefs) decide having regard to the special ability of such persons and their suitability in other respects in the opinion of the Administrators to receive and hold such Scholarships. The Scholarships shall be of such amounts respectively as the Administrators shall think sufficient having regard to the circumstances of each particular case to provide fully for the maintenance as well as the education of the recipients and may be granted for education in such institutions as the Administrators may think proper including if and so far as they think proper high schools arts colleges technical schools and colleges vocational institutions and women's medical colleges and in the case of scholarships for technical institutions may if the Administrators think fit include such amount as they consider sufficient to cover the cost of initial equipment. And the capital as well as the income of the Fund may at any time be applied and employed to such extent as the Administrators may in their uncontrolled discretion think fit for the purpose of granting any such Scholarships.

4. The Administrators shall never be less than four in number and if at any time any member of the body of Administrators for the time being shall die or resign or become incapable of acting as such the remaining Administrators may appoint any other person to act in

his place and the Administrators may at any time co-opt any person to act with them as an additional Administrator and the number of the Administrators may at any time by this means be increased and it shall not be obligatory to make any appointment in place of any Administrator dying resigning or becoming incapable of acting unless the number of the remaining Administrators shall be less than the minimum heretofore prescribed. If and so long as the number is at any time reduced below that minimum the continuing Administrators shall not act except for the purpose of appointing a fresh Administrator or Administrators.

5. The Administrators may at any time or times delegate any powers and discretions hereby conferred on them in connection with the application and distribution of the Fund and the income thereof to local Governments or such person or persons as they may think fit.

6. For the purpose of all acts decisions or determinations of the Administrators three shall be a quorum and it shall not be necessary for them to meet for the purpose of discharging their duties but any resolution decision or determination recorded in writing and signed by not less than three of them shall have the same force and effect as a resolution passed at a meeting at which a quorum was present.

No. 4798 Havildar Ram Rattan, 27th Punjabis.

For conspicuous gallantry and initiative on the 19th September 1918. The numbers 1 and 2 of the Lewis Gun team having become casualties, he immediately took charge of the gun himself. When in front of an enemy strong point he worked his way under very heavy fire round to a flank position, from which he was able to provide excellent covering fire; owing to this the company was able to take the enemy position, capturing 2 officers and 50 men.

No. 412 Naik Samma Singh, 27th Punjabis.

For conspicuous gallantry and devotion to duty on the 19th September 1918 when he did some magnificent work, firstly by rushing and capturing a Machine Gun and its crew, and secondly by the very prominent part he took in the capture of an enemy Battery in action when he wounded some of the crews and captured the rest. He showed extreme bravery throughout and used his bayonet in the most efficient manner, utterly regardless of his personal safety.

No. 701 Havildar Wazir Singh, 47th Sikhs.

For gallantry and devotion to duty in the operations on 19th-20th September 1918. On the 19th September he took command of his platoon when the commander was wounded, and showed great ability and judgment. On the 20th September when the company was held up by heavy rifle fire, he, with a few men, rushed an enemy Automatic Rifle which was enfilading the advance, and caused the enemy to abandon two other Automatic Rifles by his skilful use of the captured weapon.

Awarded a Bar to the Indian Distinguished Service Medal.

No. 422 Naik Chandu Ram, I.D.S.M., 27th Punjabis.

(The award of the Indian Distinguished Service Medal was published in Army Department Notification No. 9, dated the 1st January 1918.)

Subadar Major Farman Ali, *Bahadur*, M.C., I.O.M., I.D.S.M., 92nd Punjabis.

(The award of the Indian Distinguished Service Medal was published in Army Department Notification No. 528, dated the 3rd June 1919.)

Awarded the Indian Distinguished Service Medal.

Ressaidar Didan Singh, 19th Lancers (Fane's Horse).

Ressaidar Indar Singh, 19th Lancers (Fane's Horse).

No. 4902 Naik Rasul Khan, 59th Scinde Rifles (Frontier Force).

Subadar Allah Dad Khan, 1st Battalion, 125th Napier's Rifles.

Awarded a Bar to the Meritorious Service Medal.

No. 1677 Naik Lehna Singh, No. 4 Company, 1st King George's Own Sappers and Miners.

(The award of the Meritorious Service Medal was published in Army Department Notification No. 10, dated the 1st January 1918.)

No. 3155.—The following rewards have been granted to the undermentioned for acts of gallantry or devotion to duty in the field while serving with the Mesopotamian Expeditionary Force :—

Awarded the Indian Order of Merit (2nd class).

No. 1389 Dafadar (acting Kot-Dafadar) Jawahir Singh, 3rd Skinner's Horse, attached 32nd Lancers.

For conspicuous gallantry and devotion to duty on the 30th May 1919 when this non-commissioned officer was working with his Hotchkiss gun troop covering the retirement of the regiment. On one occasion whilst withdrawing his gun, when the enemy were within 50 yards, the gun pack-horse was shot. Under very heavy fire this non-commissioned officer dismounted, took the gun off the dead horse, and retired with it some 300 to 400 yards.

Awarded the Indian Distinguished Service Medal.

No. 4649 Sowar (Trumpeter) Wali Muhammad Khan, 82nd Lancers.

Awarded the Meritorious Service Medal (without annuity).

No. 20158 Havildar Yad Ram, Royal Horse Artillery, attached No. 39 Combined Field Ambulance.

No. 3156.—The following rewards have been granted to the undermentioned for acts of gallantry or devotion to duty in the field while serving with the Baluchistan Force :—

Awarded the Indian Order of Merit (2nd class).

Subadar Gulbadshah, Zhob Militia.

For conspicuous gallantry and devotion to duty on the 16th July 1919 when a convoy escort had been surrounded, the escort dispersed and all the British officers, except one, killed. Subadar Gulbadshah collected the rear guard and under orders from the surviving British officer took the offensive against vastly superior forces of the enemy, pouring a heavy fire into them at short range and inflicting heavy casualties. He was most conspicuous for his fearlessness throughout the action and responsible for withdrawing the rear guard intact and bringing it out of action.

Jemadar Thaman Sing Gurung, 3rd Battalion, 1st King George's Own Gurkha Rifles (The Malaun Regiment). For conspicuous gallantry and devotion to duty during the period 3rd-12th June 1919 when in command of a post with 50 rifles. He held the post despite the fact that he was attacked every night, and heavily sniped at all day, by large numbers of the enemy. He was entirely cut off and when asked to surrender on condition that he and his men would be given a safe conduct to their homes, he retaliated by bombing the party with very good results. During the time he was being attacked he inflicted very heavy losses on the enemy. This Indian officer's courage, endurance and forethought were worthy of the highest traditions of the Indian Army.

Awarded the Indian Distinguished Service Medal.

No. 52 Lance Naik Muhammad Khan, 38th Mountain Battery.

No. 324 Lance Naik Ali Sher, 38th Mountain Battery.

No. 867 Rifeman Palman Thapa, 3rd Battalion, 1st King George's Own Gurkha Rifles (The Malaun Regiment).

No. 2680 Naik Awal Khan, Zhob Militia.

No. 3157.—The following rewards have been granted to the undermentioned for acts of gallantry or devotion to duty in the field while serving with the Waziristan Force :—

Awarded the Indian Order of Merit (2nd class).

1092 Havildar Hoshiar Singh, 1st Battalion, 41st Dogras.

For conspicuous gallantry on the 3rd August 1919. Whilst under heavy fire at 150 yards range he made repeated attempts to rescue the wounded, two of whom he succeeded in bringing in. He also attempted to recover the dead body of a Sepoy but was unable to accomplish this on account of the heavy fire. He succeeded in bringing in the dead man's rifle.

Awarded the Indian Distinguished Service Medal.

Ressaidar Inder Singh, 31st Duke of Connaught's Own Lancers.

No. 463 Dafadar-Major Chet Singh, 31st Duke of Connaught's Own Lancers.

No. 1083 Lance Dafadar Uttam Singh, 31st Duke of Connaught's Own Lancers.

No. 2141 Sepoy Nagina, 1st Battalion, 41st Dogras.

A. H. BINGLEY, *Major-General,*
Secretary to the Government of India.

MARINE DEPARTMENT.

Simla, the 24th October 1919.

APPOINTMENTS.

No. 101.—Commander P. C. H. Lane, Royal Indian Marine, is appointed Staff Officer, Kidderpore Dockyard, sub. *pro tem.*, vice Commander R. G. Strong, Royal Indian Marine, with effect from the 1st October 1919.

A. H. BINGLEY, *Major-General,*
Secretary to the Government of India.

RAILWAY DEPARTMENT.

(RAILWAY BOARD.)

NOTIFICATIONS.

Simla, the 23rd October, 1919.

No. 54-E.-19.—Mr. Hugh Davies is appointed, on probation, an Assistant Locomotive Superintendent, in Class III, grade 3, of the Superior Revenue Establishment of State Railways and posted to the Oudh and Rohilkhand Railway.

No. 2101-E.-19.—Major M. T. Porter, M.C., R.E., Executive Engineer, North Western Railway, is appointed to officiate as Deputy Agent of the railway with effect from the 15th September 1919 and during the absence of Mr. S. P. Flowerdew, officiating Deputy Agent, on privilege leave.

The 24th October, 1919.

No. 131-T.-19.—In exercise of the powers conferred by the Notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, and in pursuance of Section 47, sub-section (4) of the Indian Railways Act, 1890 (IX of 1890), as in force in British India or as locally applied, the Railway Board sanction the following alterations made by the Guzerat Railways Co., Ltd., under sub-section (1), clause (c) of the said section in the rules published with Railway Board's Notification No. 131-T.-19, dated the 11th April 1919.

For the words "within seven days from date of receipt" appearing in lines 2 and 3 of Rule 3, substitute the words "within 48 hours from midnight of date of arrival".

No. 2078-E-19.—Mr. Panna Lal Gupta, qualified student of the Thomason Civil Engineering College, Roorkee, is appointed to the Provincial Service of the Engineer Establishment of State Railways as an Assistant Engineer with effect from the 24th September 1919 and posted to the Eastern Bengal Railway.

No. 2188-E-19.—Mr. A. T. Stowell whose services were placed temporarily at the disposal of His Excellency the Commander-in-Chief in India is, on return, reappointed to officiate as Traffic Manager, Oudh and Rohilkhand Railway.

No. 2188-E-2-19.—With reference to Railway Board's Notifications No. 2188-E-19, dated the 24th October 1919, and No. 1176-E-19, dated the 6th June 1919, Mr. A. Watson, officiating Traffic Manager, Oudh and Rohilkhand Railway, reverts to his substantive appointment of Deputy Traffic Manager.

No. 2188-E-3-19.—With reference to Railway Board's Notifications No. 2188-E-2-19, dated the 24th October 1919, and No. 1176-E-2-19, dated the 6th June 1919, Mr. R. J. Collett-White, officiating Deputy Traffic Manager, Oudh and Rohilkhand Railway, reverts to his substantive appointment of District Traffic Superintendent in Class II, grade 1, of the Superior Revenue Establishment of State Railways.

No. 2187-E-19.—With reference to Railway Board's Notification No. 367-E-19, dated the 21st March 1919, Mr. H. C. Sparke, Officiating Traffic Manager, Eastern Bengal Railway, will hold temporary rank from the 13th August 1919 and until further orders.

R. McLEAN,
Secretary, Railway Board.

SIMLA :

The 23rd October 1919.

F. H. G. HUTCHINSON, LIEUT.-COL., I.M.S.,

Sanitary Commissioner with the Government of India.

H. SHARP,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 23rd October 1919, based on the Indian Daily Weather Reports of the period.

1. Rain fell almost daily in the south of the Peninsula. On the 21st a disturbance appeared over the southwest of the Bay; it intensified during the next twenty-four hours and on the morning of the 23rd lay off Cocanada. Rainfall commenced on the north Madras coast on the 21st and was widespread and moderately heavy in that area on the 22nd. A winter depression entered the extreme north towards the end of the week and gave slight precipitation there.

2. *Burma.*—In Lower Burma rainfall was local on the 17th and 19th, and occurred at a few stations during the rest of the week; in Upper Burma rain was limited to a few scattered falls.

Northeast India, including Orissa.—Weather was rainless except for a very light fall at Tezpur and a moderate fall at Cuttack.

The United Provinces, Central India and the Central Provinces.—There was no rain except for a light fall at Jagdalpur.

Northwest India.—Drosh, Parachinar, Sonamarg and Murree each received a light fall of rain during the week.

The Peninsula.—Rainfall was nearly general in southeast Madras on the 17th and 18th, in the Madras Deccan on the 16th and on the north Madras coast on the 21st and 22nd; it occurred locally or at a few stations on one other day in the Madras Deccan, on three other days on the north Madras coast and on four other days in southeast Madras. Local rain fell in Mysore on the 16th and in Malabar on the 17th and 21st, and there were a few falls in these areas on three and four other days respectively. In the remaining sub-divisions the week was rainless except for a light fall at Belgaum.

3. The chief amounts of rainfall reported were as follows:—

October 16th.	Madura 1.48", Coimbatore 1.78", Madras 0.72" and Ootacamund 1.01".
„ 17th.	Toungoo 1.72", Cochin 2.76" and Coimbatore 0.78".
„ 18th.	Pamban 2.84", Negapatam 1.23", Coimbatore 1.81" and Madras 1.28".
„ 19th.	Victoria Point 3.32", Moulmein 1.22", Toungoo 2.42", Trivandrum 1.31", Pamban 1.16" and Negapatam 1.69".
„ 20th.	Mangalore 1.51".
„ 21st.	Trivandrum 0.88", Madura 1.48", Vizagapatam 1.29" and Calingapatam 0.70".
„ 22nd.	Rangoon 1.76", Cuttack 0.75", Sonamarg 0.84", Masulipatam 2.25", Cocanada 4.10", Vizagapatam 1.85", Calingapatam 1.64" and Gopalpur 2.64".

4. The week's rainfall was 20 per cent. or more in excess on the north Madras coast; and was 20 per cent. or more in defect in the Bay Islands, Upper Burma, Assam, Bengal, Bihar and Orissa, the United Provinces, the Punjab East and North, Kashmir, the North-West Frontier Province, Rajputana East, Gujarat, Central India, Berar, the Central Provinces, the Konkan, the Bombay Deccan, Hyderabad, Mysore, Malabar and the Madras Deccan. It was either equal to the normal or differed from it by less than 20 per cent. in Lower Burma and Madras Southeast. No rain usually falls at this time of year in the Punjab Southwest, Baluchistan, Sind and Rajputana West.

The rainfall from the 2nd May to date is 20 per cent. or more in defect in the Bay Islands, Kashmir, Sind and Hyderabad North; and is 20 per cent. or more in excess in Chota Nagpur, Baluchistan, Rajputana West, Central India and the Central Provinces West. In the remaining divisions the rainfall of the period differs from the normal by less than 20 per cent.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
18th October 1919.

Burma.—During the week light to moderate rain was general throughout the Province in Lower Burma and in irrigated tracts of Upper Burma. Transplanting of winter rice is completed in Upper Burma. Gathering of groundnuts and plucking of cotton are proceeding. Reaping of autumn rice has commenced. Cultivation of miscellaneous dry crops is progressing. The condition of standing crops is generally good. Cattle are generally healthy. The price of unhusked rice in Rangoon remains unchanged at Rs. 150 and of white rice for specials at Rs. 385.

Assam.—During the week the weather was seasonable and favourable for standing crops. Ploughing for tea continues. Harvesting of jute is finished. Ploughing for pulses and mustard is in progress. The outturn and prospects of crops are generally in fair to good condition and cattle disease is reported from four districts. The price of common rice shows a tendency to fall.

Bengal.—During the week the rainfall was generally light. More rain is needed for growth of winter paddy specially in Western Bengal districts. Steeping and washing of jute are almost finished. Preparation of lands for next spring crops and their sowings continue. The condition and prospects of standing crops are generally favourable. The average price of common rice has fallen by about 0.53 per cent. 660 persons received gratuitous relief in the Brahmanbaria subdivision of Tippera.

The weekly report on famine in Bankura is as follows:—The rainfall was insufficient but agricultural prospects are favourable. Twenty-four works were open. Numbers relieved on works were 4,319. Special relief:—paddy husking advances 3,683, weavers 555, better class poor 16, total 4,254. Gratuitous relief was closed, grand total 8,573. The decrease in numbers on works is due to closure of forty-seven works. During the week numbers relieved on daily doles by charitable societies were 700. The public health is generally good. Outbreak of malaria and influenza is reported from certain localities. Cloth is being distributed to destitutes. Relief measures are adequate. The price of common rice varies from 5½ to 5¾ seers per rupee. Burma rice is being sold.

Bihar and Orissa.—During the week light rain fell in parts of Patna, Cuttack, Balasore, Angul, Hazaribagh and Ranchi. There was no rain in the rest of the Province. Harvesting of autumn crops continues and that of early winter rice has begun in Orissa and Chota Nagpur. Preparation of lands for spring sowings is in progress. Sowings have commenced. Standing paddy crop is doing well. More rain is wanted in parts of Darbhanga, Balasore, Angul, Puri, Sambalpur and Singhbhum. Test works have been closed. Gratuitous relief was given to 18,079 persons in Bhagalpur, 8,482 in the Santal Parganas, 6,559 in Angul, 5,097 in Cuttack, 7,067 in Puri and 560 in Hazaribagh. The number of persons attending relief works was 400 in Bhagalpur and 2,232 in the Santal Parganas. The price of common rice has risen in nine districts, fallen in four and remained stationary in the remaining districts as compared with that of the preceding week. The average price of local common rice at headquarters was 5.51 seers against 5.54 seers in the preceding week and that of maize was 8.19 seers against 8.45 seers in the preceding week. Cattle disease is reported from eleven districts. During the week ending the 11th October 20,027 persons were given gratuitous relief and 5,819 attended test works in ten Feudatory States of Orissa—*vis.*:—Athgarh, Baramba, Dhenkanal, Hindol, Narsinghpur, Nayagarh, Talcher, Bamra, Daspalla and Khandpara.

Famine report not received.

United Provinces.—No rain fell during the week. Preparation of land for and sowing of spring crops, harvesting and irrigation of autumn crops and picking of cotton continue. Standing crops are doing well. Prospects are favourable. The condition of agricultural stock is good and little cattle disease is reported. Fodder water and market supplies are sufficient. Prices are almost stationary.

Punjab.—During the week the weather remained dry. Rain is badly wanted. The condition of standing crops is average to good on irrigated and below average to average on unirrigated areas. Reaping of rice, maize, *jowar* and *bajra* and picking of cotton are in

progress. The yield is expected to be normal to good on irrigated and below normal to normal on unirrigated areas. Sowings of wheat and other spring crops continue and are normal on irrigated and below normal on unirrigated areas. Cattle are healthy and fodder and water are sufficient. Prices are generally stationary and above scarcity rates. Prices of wheat :—Rawalpindi 6½, Ambala and Lahore 6½, Ferozepore and Lyallpur 7 seers per rupee.

North-West Frontier Province.—The week was rainless. Sowings of spring and harvesting of certain autumn crops are in progress. The outturn of cotton is below average in parts of the Peshawar district. Standing crops are generally average but prospects of crops on unirrigated areas in one district is reported to be poor. The price of wheat in Peshawar is 7½ and in Dera Ismail Khan 6½ seers per rupee.

Jammu.—No rain fell during the week. Prices are stationary.

Kashmir.—Report not received.

Rajputana.—The week was rainless. The weather was hot and clear. Harvesting of autumn crops is nearing completion with outturn fair to good. Lands are being prepared for spring crops and sowing has started in a few places. Pasturage and water are abundant. The condition of agricultural stock is good except in parts of Bharatpur, Dholpur and Kotah where cattle disease is prevailing. Prices are mostly stationary but some fall in autumn grains is reported.

Central India.—During the week no rain fell except in Gwalior and Dewas. The fall was insufficient in certain parganas of the northern districts of Gwalior. Autumn crops are being weeded and harvested. Land is being prepared for spring crops. Sowings are in progress in Gwalior and have commenced in Indore, Bhopal and the Southern States. Standing crops and their probable outturn are fair to good except in three districts of Gwalior and parts of Bhopal and Baghelkhand where crops have been damaged by excessive rain. Agricultural stock is generally good except for cattle disease in parts of Gwalior, Indore, Bhopal, Baghelkhand and the Southern States. Prices are high.

*The weekly report on famine in Bundelkhand is as follows :—*Distress is not acute. Numbers on relief have decreased. People are reverting to agricultural operations. No wandering or emaciation is reported. Relief measures are adequate. Suspensions of land revenue are being granted. Takavi advances are sufficient. The public health is generally good. Prices range from 5½ to 7 seers per rupee save in Chhatarpur where *kodon* is available for 8 seers per rupee. Numbers on relief in thousands :—works 3, gratuitous relief 7.1, total 10.1. Reports from several States have not been received.

Central Provinces.—The weather continues to be clear. The nights and mornings are cool. Reaping of rice and of minor crops and picking of cotton in places continue. Standing crops are in excellent condition. Spring sowings are in progress and germination is reported to be successful. Fodder and water are ample. Cattle are generally faring well. Gram rose in Nimar by one seer per rupee. *Juar* in Wardha and Amraoti fell by 1 to 1½ seers per rupee. Other variations in prices are irregular but exhibit a slight downward course.

Feudatory States :—Harvesting of rice and spring sowings are proceeding.

*The weekly report on famine and scarcity is as follows :—*The public health is good except for slight malaria and influenza. Prices of food-grains are stationary. Number on works in Jubbulpore famine district 3,031. Works in Mandla have been closed. Numbers on works in scarcity districts 4,790. Numbers on gratuitous relief 5,754.

Bombay.—Slight rain fell during the week in the Konkan, Dharwar, Savantvadi and Kolhapur. Standing crops are flourishing except in parts of Hyderabad where cotton has slightly been damaged by insects, in parts of Nawabshah where *juar* has been damaged by floods and insects and cotton by wind. Harvesting of autumn crops generally continues. Cotton picking has commenced in parts of West Khandesh, Nasik and Sholapur. Spring sowing has commenced in some places. Fodder supply is sufficient. Agricultural stock is generally sufficient. Cattle are in good condition. Prices of food-grains have slightly fallen in parts of Sind and Gujarat and are high but generally steady elsewhere.

*The weekly report on famine and scarcity is as follows :—*Slight rain fell during the week in parts of Bijapur and Belgaum. Standing crops are in good condition. Harvesting of autumn crops and spring sowings are in progress. All relief works in Ahmednagar were closed on 15th October. Numbers of workers were 2,695 and dependants 1,343. The number of persons on gratuitous relief including village servants was 13,770. The public health is generally good. The supply of fodder and water is adequate. Cattle are in good condition. Prices of food-grains are still high.

Hyderabad.—Isolated showers averaging 37 cents were received during the week. Autumn crops and early rice crops are generally in fair to good condition, the former being harvested. Sowings for spring crops continue. Prices of grains continue to be high. *Juar* is selling at 4 seers per rupee in the Raichur district.

*The weekly report on famine and scarcity is as follows:—*The season being generally favourable there is a marked mitigation in distress. Numbers on relief works are decreasing. Some camps have been closed and abolition of others is under consideration. A few cases of emaciation are reported. Cheap grain shops still continue in Hyderabad City. Takavi is being advanced for seeds and cattle to help the cultivation of spring and hot weather crops. Prices of staple grains continue to be high. Rice sells at 3½ seers and *juar* at 6½ seers per rupee. Numbers relieved in thousands for week ending 9th October:—Works 15, gratuitous 20, total 35.

Mysore.—The rainfall during the week was fair. Standing crops are in good condition. Cattle are generally healthy. Water and fodder are available. Prices are high and fluctuating. Prospects of the season are fair. Harvesting of rice, *ragi* and sugarcane is proceeding in parts. The outturn is fair.

Coorg.—The week was slightly wet. Rice crop is in good condition. Picking of cardamum and reaping of dry crops continue. Cattle are generally healthy. Water and fodder for cattle are available. The public health is fair. Prices of food-grains are high.

Madras.—During the week the rainfall was heavy in Madura, good in Vizagapatam, Littoral, Godavari, Kistna, Guntur, Cuddapah, Carnatic, Central Tanjore, Pudukkottai, Ramnad, Tinnevely, West Coast except Malabar and the hills and light or fair elsewhere. Standing crops are in fair condition generally. Harvesting of paddy and dry crops is generally in fair condition. Fresh sowing of paddy and dry crops is progressing. The condition of cattle is generally good. Water is sufficient except in parts of twelve districts. Pasture and fodder are sufficient generally. Prices are generally falling. Prospects are fair generally.

*The weekly report on famine in Ganjam is as follows:—*Relief works 30 in Goomsur, 29 in Kallikota and Attagada, 3 in Humma, Biridi, Palur and 1 in Ronabha are in progress. Udayagiri figures have not been reported. Labourers and small agriculturists are mostly affected. People are resorting freely to works and their physical condition is generally fair. Relief measures are adequate. Cloth distribution is being provided by private charity. Prices of rice in Goomsur 4·8 seers, in Udayagiri 5, in Kallikota and Attagada 5, Chatrapur 4·8 and of *ragi* in Kallikota and Attagada 6, and in Chatrapur 7·8 seers per rupee. The number on relief; works 56,668 (incomplete), gratuitous relief 85,794, total 1,42,462.

Nepal.—*Report on the agricultural and pastoral situation in Nepal for the period from 16th July to 15th October 1919.*—The rainfall for the period was 22·59 inches against 19·09 inches for the corresponding period of last year.

July and August 1919.—Pears and apples were gathered in Nepal, and the outturn was not good. Rice was transplanted in the Terai.

September.—Chillies, early rice and Indian corn were harvested in the hills and in the Nepal valley, the outturn was good. Early winter vegetables, mustard and potatoes for the first crop commenced to be sown in Nepal. The sowing of garlic and onions was in progress.

October.—Autumn rice and millet are now being harvested in the hills and valleys. Lands are being prepared for the sowing of wheat, barley and peas for the *rabi* crop.

The market still continues to be high.

The health of livestock is reported to be good.

R. A. MANT,

Secretary to the Government of India.

No. 525-Elec.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS—ELECTRICITY.

Simla, the 17th October 1919.

RESOLUTION.

READ—

The preliminary report on the water-power resources of India.

The Government of India have, for a considerable time past, had under consideration the question of undertaking a systematic survey of the water-power resources of India for the generation of electrical energy, and in view of rapid industrial development now anticipated the discovery of cheap sources of power has become a matter of national importance. The policy of the Government of India has hitherto been to leave to private enterprise the survey and investigation of water-power sites, but development upon these lines has been slow and they have therefore decided to make themselves responsible for a detailed hydrographic survey of India with the object of ascertaining to what extent water-power is available in the country, and how it can best be utilized for industrial purposes.

2. With this object in view Mr. G. T. Barlow, C.I.E., late Chief Engineer, Public Works Department, United Provinces, Irrigation Branch, and Mr. J. W. Meares, Electrical Adviser to the Government of India, were appointed in October 1918 to carry out a preliminary reconnaissance of the water-power resources of the country. An extensive tour was undertaken by these officers during the cold weather of 1918-19, visits being paid to the more important provinces, and the general lines upon which the survey was to be conducted were formulated in consultation with the local authorities. Before, however, this preliminary inquiry could be completed, the Government of India, in April 1919, suffered a great loss in the death of Mr. Barlow, which deprived them of the services of an officer of outstanding talent both as engineer and organizer. Mr. Meares succeeded Mr. Barlow as Chief Engineer of the survey and his report on the work accomplished has now been published under the title "Preliminary report on the water-power resources of India." This report is available for sale to the public and may be obtained from the Superintendent, Government Printing, India, Calcutta. The Government of India desire to take this opportunity to acknowledge the services of Mr. Meares, who has produced a most useful report, complete so far as material is at present available, and to indicate broadly the lines on which it is proposed that the investigation should proceed.

3. An examination of the report will show that, although a large number of possible sites has been brought to notice, very little precise information exists in regard to the majority of them, and the list of such sites included in the appendices is valuable mainly as the basis of a programme for further survey and inquiry. An examination of these and such other sites as may appear promising is now urgently required and in specially favourable cases, a detailed survey.

4. With the object of carrying out the further reconnaissance as speedily and as thoroughly as possible, each local Government has been requested to nominate an experienced officer of the Public Works Department to be placed on special duty to take charge of the work within the province concerned, and

it is anticipated that, during the coming cold weather, a considerable number of sites will be examined and reported on. Owing to the depletion of the staff of the Department in consequence of the war, it is impossible to provide as large an establishment for the purpose as could be desired, but by concentrating in the first instance upon those schemes which appear definitely promising it is hoped that much useful information may be collected even with the limited establishment which can be spared this year, and that in future it may be possible to extend the scope of the operations. Reports will be issued from time to time for the information of the public, showing the progress of the work and the results achieved.

5. Mr. F. E. Bull, Chief Engineer and Secretary to Government, Assam, has been appointed to succeed Mr. Barlow, and he and Mr. Meares will be in general charge of the operations during the coming winter.

ORDERED—that a copy of the Resolution be communicated to all local Governments and Administrations, to Mr. J. W. Meares, Electrical Adviser to the Government of India, to the Department of Commerce and Industry, and to the Indian Munitions Board. Ordered also that the Resolution be published in the Supplement to the *Gazette of India* for general information.

F. C. ROSE,

Secretary to the Government of India.

Statement of Approximate Gross Earnings of Indian
Railways.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, OCTOBER 25, 1919.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller-General, etc.

GAZETTE OF INDIA.

NOTICE.

The 18th March 1919.

On and after 29th March and until further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published in Simla, Parts II and III will continue to be published in Calcutta. All notifications and other matter intended for publication in those Parts should be addressed to the Publisher at Simla and Calcutta, respectively.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette* and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 p.m. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India."

Rates of Subscription.

 4934. Naamlooze Vennootschap Algemeene Norit Maatschappij. *A new or improved process for the sterilization and purification of water.*
 4935. Naamlooze Vennootschap Algemeene Norit Maatschappij. *A new neutral and sterile decolorising carbon adapted particularly for sanitary and medicinal uses.*
 4936. Naamlooze Vennootschap Algemeene Norit Maatschappij. *Improvements in or relating to filtering, decolorising or purifying processes and decolorising carbons therefor.*
 4937. Naamlooze Vennootschap Algemeene Norit Maatschappij. *Improvements in filtering, decolorising and purifying processes for liquids and liquors, juices, liquefied bodies and the like.*
 4938. W. C. Niehoer. *Process for the clarification and treatment of sugar juice.*
 4939. R. A. Thom. *Improvements in or relating to steam superheater pipes or elements and a method of manufacturing the return ends or torpedo ends of such elements and the like.*
 4940. E. S. Luard and V. P. Rawlings. *Improvements in or relating to vacuum brake systems and apparatus for railway vehicles.*

APPLICATIONS ACCEPTED AND ADVERTISED UNDER SECTION 6.

Notice is hereby given that all persons interested in opposing the grant of a Patent on any one of the applications, referred to below, may, at any time within three months of the date of this *Gazette of India*, give notice at the Patent Office in the prescribed form No. 5 of such opposition.

Printed copies of the specifications in the following list will be on sale at the Patent Office, 1, Council House Street, Calcutta, within about three weeks.

Any one desiring a copy posted to an address in British India should send to the Patent Office the sum of annas eight by money-order on which the number of the application should be stated on the coupon at the foot of the order.

3594. A. Aroutunianz. *Improvements in a water and dust tightly closed dynamos generators and electromotors.*
 3595. A. Aroutunianz. *Improvements in electro-pumps submergible into liquid.*
 3885. General Electric Co. *Improvements in and relating to methods of producing alloys.*
 4046. Standard Oil Company of New York. *Fire extinguishing apparatus.*
 4264. Miris Steel Co., Ltd. *Improved manufacture of steel.*
 4265. Miris Steel Co., Ltd. *Improved manufacture of iron or steel or their alloys.*
 4269. H. D. Bennett. *Improvements in cooking vessels.*
 4326. G. B. Bowles. *Improvements in or relating to axle boxes for railway and like vehicles.*
 4327. G. B. Bowles. *Improvements in or relating to dust shields for axle boxes for railway and like vehicles.*
 4347. T. P. Dave. *An improved process for extracting and purifying castor oil.*
 4557. John E. Minnitt Ltd. *Semi-portable incinerator.*
 4591. R. J. E. Thurnburn, J. V. Gamundi and L. I. Nogueira. *Improved apparatus for locking and detecting railway switch points and the like.*
 4659. E. Anderson. *Improvement in machine tools.*
 4681. S. L. Pathuck. *Improved padlock.*
 4785. H. W. Crane and J. W. Walker. *An improved live-stock food and process for manufacturing the same.*
 4801. F. Purshotam. *Improved rocking cradle for children.*

4803. T. W. Bonner. *Simplex disc pulveriser.*
 4808. K. Annaji and K. Sundararajan. *Improved automatic electric time switch.*
 4843. D. R. Blair. *Improvements in the manufacture of iron and steel.*
 4844. E. S. Luard. *Improvements in and relating to vacuum brake systems and apparatus for railway and like vehicles.*
 4845. E. S. Luard. *Improved apparatus for testing vacuum brakes on railway trains and the like.*
 4846. E. S. Luard and V. P. Rawlings. *Apparatus for testing vacuum ejectors such as those employed on railway loco-motives for brake purposes.*
 4847. D. H. Bibb. *Process for the manufacture of fuel briquettes.*
 4849. Fastnut Ltd. *Improved combined nut and washer.*
 4850. R. S. Whaley. *Improvements in or relating to internal-combustion engines.*
 4851. R. S. Whaley. *Improvements in or relating to the cylinder heads of internal combustion engines.*
 4852. F. R. Graham-Yooll. *Improvements in mouth pieces for feeding bottles.*
 4853. H. C. Jenkins. *Improvements in electrolytic cells.*
 4854. Aktiebolaget Kväfveindustri. *Improved apparatus for the production of nitrogen products.*
 4856. R. S. Hamilton. *Improved exterminator for the tea mosquito blight or other insect plant pests.*

PRINTED SPECIFICATIONS PUBLISHED.

Printed copies of the undernoted specifications may be purchased at the Patent Office, 1, Council House Street, Calcutta, annas eight each.

3724. M. Liyaqut Ali. *Improved tap for flushing drains.*
 3739. M. Liyaqut Ali. *Road watering tap.*
 4083. Berendonck's Syndicaat voor Banden in Deelen. *Improvements in pneumatic tyres.*
 4301. S. B. Crespi. *Improvements in circular weaving looms.*
 4472. R. J. Dennett. *An improved spring washer for use with lock-nuts.*
 4692. American Spike Co. *Improvement in railroad spikes.*
 4701. S. Brown. *Improvements in or relating to devices for the removal of ash dust and like matter from gases and the like.*
 4714. E. E. Dutt. *A process for the manufacture of sodium hydrate, alumina and calcium fluoride.*
 4726. J. White, Jr. and A. W. Wall. *Improvements in or relating to internal combustion engines.*
 4730. U. Pavesi. *Improvements in vehicles with two or more pairs of driving wheels.*
 4736. P. N. Mehta. *A process for the manufacture of calcium chromate from chromium ores.*
 4741. G. C. Brown. *Heavier than air airship.*
 4744. R. Sinha. *Process of manufacturing red lead in specially made iron cylinders.*
 4745. C. M. J. Roch and L. G. Mouchel and Partners Ltd. *Improvements in or relating to ships, barges caissons, foundation walls and other floating or fixed structures of reinforced concrete.*
 4746. C. M. J. Roch and L. G. Mouchel and Partners Ltd. *Improvements in or relating to reinforced concrete floors and roofs.*
 4747. S. E. Saunders. *Improvements in the manufacture of ply boards or sheets.*
 4749. H. C. Badder, S. F. Burrows and H. L. P. Allender. *Improvements in and connected with compositions for and the production of waterproof cements, concretes and mortars.*
 4751. L. Linden. *Separating the respective lighter and heavier matters from a flowing liquid.*
 4756. Vickers Ltd. *Improvements in or relating to intermittent driving mechanism.*
 4758. N. P. Roe. *Railway engine driver's block instrument voucher and signal detector.*
 4763. E. Vaughan. *Improvements in or relating to means for effecting the attachment and detachment of pneumatic tyres to and from the wheels of automobiles and other vehicles.*
 4764. L. Coatalen, H. C. M. Stevens, and Sunbeam Motor Car Co., Ltd. *Improvements relating to thrust bearings.*
 4765. W. A. P. Cosserat. *Improvements in railway track circuiting.*
 4770. T. E. Richards. *Improvements relating to structures.*
 4771. T. E. Richards. *Improvements relating to structures.*

SEALING FEES DUE UNDER SECTION 10.

Notice is hereby given that a patent may now be sealed on the applications referred to below. If it is desired that a patent should be sealed, a request on the prescribed form No. 7

accompanied by the fee, Rs. 30, should be sent to the Controller of Patents, 1, Council House Street, Calcutta.

APPLICATION FOR AMENDMENT UNDER SECTION 17.

Notice is hereby given that all persons interested in opposing the following application to amend at any time within three months of the date of this *Gazette of India* give notice at the Patent Office in the prescribed form No. 5 of such opposition.

No. 3894 of 1918. Samuel Grossman, of New York, Bronx, U. S. A., seeks leave to amend the specification of his patent numbered as above. The proposed amendments as shown in the printed specification are as follows :—

On page 4.

- Line 26. Striking out "hollow annular" before "hub".
 Line 28. Striking out "the cavity.....interiors" after "rim."
 Line 29. Striking out "of the.....and" before "the outer".

On page 5.

- Line 15. Inserting "and" before "means".
 Striking out Lines 16, 17, 18 and 19.

CESSATION OF EXCLUSIVE PRIVILEGES.

The public are warned that entries under this heading must not be accepted as final, as under the provisions of Rules 9 and 11 of "The Indian Patents and Designs (Temporary) Rules, 1915," the Controller may extend the time prescribed by the Indian Patents and Designs Act, 1911, and by the Inventions and Designs Act, 1888, for paying the necessary renewal fees.

The Patent Office will supply on request definite information, so far as possible, as to the position of any particular Patent or Exclusive Privilege.

1913.

1062. (Hawkins.) 1063. (Jagenberg.)

1915.

2206. (Miller.) 2209. (Highfield.) 2210. (Irwin.) 2211. (Synthetic Hydro-Carbon Co.) 2212. (Synthetic Hydro-Carbon Co.) 2213. (Sayer.)

DESIGNS ENTERED ON THE REGISTER.

From 13th to 18th October 1919.

Class 1. Nos. 8941 and 8942. The Audley Engineering Co. Ltd., of Newport, Salop, England. October 11, 1919.

Class 2. No. 8932. Bhima Bhagwan and Sadul Bhagwan, of Pinjrapole Lane, Gulal Wadi, Bombay. September 4, 1919.

NOTICES.

THE PATENT OFFICE, 1, COUNCIL HOUSE STREET, CALCUTTA.

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. All communications relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (II of 1911), or in continuation of applications under the Inventions and Designs Act (V of 1888) must be made in English and addressed to the Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed and a full address given in all communications.

2. Directions for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Temporary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1916, together with current regulations and instructions. These should be consulted before an application is made to the Controller.

3. *Advice.* The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inventions. Models are not required unless specially asked for. Drawings must be on tracing cloth and the Rules and Instructions for the preparation of drawings as given in the Handbook should be strictly followed. A provisional patent cannot be secured under the Indian Patents and Designs Act, 1911.

4. Applicants are warned that the Indian Patents and Designs Act, 1911, is in force in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. The International Convention for the Protection of Industrial Property does not include India. For information regarding patents in countries other than India application should be made to the patent offices in the countries concerned.

5. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission for which due allowance should be made. In cases where it is not possible to have the fees landed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

6. *Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. There is no provision of Law in British India for their registration. Neither does this Act deal with *pictures, photographs, etc.*, for which copyright is obtainable under the Indian Copyright Act, 1914.

7. *Printed Specifications* of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*. These specifications can be purchased at the Patent Office at a uniform price of 8 annas per copy; and may be seen free of charge, together with other publications of the Patent Office, at the following places:—

AHMEDABAD . . .	R. C. Technical Institute.	HYDERABAD . . .	Revenue Department of His Highness the Nizam's Government.

J. A. CHAPMAN,

Librarian.

**SULPHATE OF QUININE, SULPHATE OF CINCHONIDINE,
 CINCHONA FEBRIFUGE, RESIDUAL ALKALOID
 AND QUINOIDINE.**

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona Alkaloids. QUININE can be purchased by Government officers, District and Local Boards for Hospitals and Dispensaries in the Provinces of Bengal, Bihar, Punjab and Assam on indents duly countersigned by the Civil Surgeon of their Districts. It can also be purchased by Missionaries for *bonâ fide* public purposes. It is never sold to private persons or firms. CINCHONA FEBRIFUGE both in powder and 3½ grain tablet forms and CINCHONIDINE can be purchased by Government officers and the general public. It is also sold by the Principal Druggists in Calcutta. QUINOIDINE or *Pure Amorphous Alkaloid* and *Residual Alkaloid* or *Amorphous Cinchona Alkaloid*, which contains about 40 per cent. of *Pure Amorphous Alkaloid*, are for sale to Missionaries and Government Institutions only. *These drugs are sold strictly cash and in advance but private purchasers may use the V. P. P. system*, and are obtainable from the SUPERINTENDENT, JUVENILE JAIL, ALIPORE.

The rates for these drugs from 16th May 1919 are as follows:—

SULPHATE OF QUININE.

For quantities 60 lbs. and above in one delivery	Rs. 24 per lb.
For quantities of not less than 6 lbs. but below 60 lbs. in one delivery	„ 25 „
For any quantity less than 6 lbs.	„ 26 „

SULPHATE OF CINCHONIDINE.

For quantities of not less than 6 lbs. in one delivery	Rs. 11 per lb.
For any quantity less than 6 lbs.	„ 12 „

(Only small quantities available when in stock.)

CINCHONA FEBRIFUGE.

For quantities of not less than 6 lbs. in one delivery	Rs. 5 per lb.
For quantities less than 6 lbs. (when in stock)	„ 6 „

CINCHONA FEBRIFUGE TABLETS.

For quantities of not less than 6 lbs. in one delivery	Rs. 6 per lb.
For any quantity less than 6 lbs. (when in stock)	„ 7 „

QUINOIDINE in non Tablet form (when in stock) and Residual Alkaloids. „ 4 „

QUINOIDINE TABLETS.

For quantities of not less than 6 lbs. in one delivery	Rs. 6 per lb.
For quantities less than 6 lbs. in one delivery (when in stock)	„ 7 „

Quinine is available in 1-oz., ¼-lb., ½-lb., 1-lb., 4-lb., and 6½-lb. tins.

Cinchonidine is available in ¼-lb., ½-lb. and 1-lb. boxes.

Cinchona Febrifuge is available in ¼-lb., ½-lb. and 1-lb. boxes.

Residual Alkaloid is available in 1-lb., 5-lb. and 10-lb. boxes.

Quinoidine is available in 1-lb. box.

Quinoidine Tablets are available in 1-lb. box.

Transit charges are in addition to the above prices in every case.

Local sale at the Jail gate from 7 to 10 A.M. and 2 to 4 P.M.

Drugs are sold for cash or by V. P. Post. Price of Postage must accompany the price of the drug (when the drug is required by Post). The name of the Railway and Steamer Station or Post Office must be written distinctly when the parcels are required by Rail Steamer or by Post. A scale of Postage is given below:—

(For ¼ lb. 4 As.; ½ lb. 5 As.; 1 lb. 8 As.; 1½ lb. 11 As.; 2 lbs. 14 As.; 2½ lbs. Re. 1 Anna 1; 3 lbs. Re. 1 Anna 1; 3½ lbs. Re. 1 As. 4; 4 lbs. Re. 1 As. 7; 4½ lbs. Re. 1 As. 10; 5 lbs. Re. 1 As. 13; 6 lbs. Rs. 2; 6½ lbs. Rs. 2 As. 8.)

	Rs.	A.	P.

**GOVERNMENT OF MADRAS.
Revenue (Special) Department.****NOTIFICATION.**

Fort St. George, the 14th October 1919.

In exercise of the power conferred by sub-section (7) of section 4 of the Indian Non-ferrous Metal Industry Act, 1918 (XVII of 1918), the Governor-in-Council is pleased to notify that a license has been granted under sub-section (3) of that section to Messrs. Bird & Co., Chartered Bank Buildings, Calcutta, to carry on the business of winning, extracting, smelting, dressing, refining or dealing by way of wholesale trade in metal or metallic ore to which the said Act applies, in accordance with the provisions of the said Act.

S. WADSWORTH,

Temporary Additional Secretary to Government.

THOMASON CIVIL ENGINEERING COLLEGE, ROORKEE.**NOTIFICATION.**

Roorkee, the 21st March 1917.

A Registry Office for men of the undermentioned grades is kept up by the Principal, Thomason College, Roorkee. Officers and employers of labour requiring men are requested to apply to the Principal:—

1. Engineers.
2. Overseers.
3. Sub-Overseers.
4. Draftsmen and Sub-Surveyors.
5. Tracers.
6. Men trained in—
 - (a) Photo-Mechanical and Lithographic Work.
 - (b) Workshops (both Electrical and Mechanical sides).

W. G. WOOD,

Principal, Thomason College, Roorkee.

**DEPARTMENT OF MINES IN INDIA, DHANBAD P. O.,
MANBHUM.**

Indian Mines Act, 1901.

NOTICE.

An examination for First class Coal Mine Managers' Certificates of Competency under the rules applicable to coal mines will be held on the 16th, 17th and 18th February 1920. An examination for Second class Coal Mine Managers' Certificates of Competency will be held on the 23rd, 24th and 25th February 1920. Both examinations will be held at the Railway Institute, Dhanbad.

Rules 32 and 33 of the Indian Mines Act, 1901, require that a candidate for a first class certificate must be at least 23 years of age and have had at least five years' practical experience in a coal mine, and for a second class certificate be at least 21 years of age and have had at least three years' practical experience in a coal mine. The periods of practical experience may be reduced to three years and one year respectively, in the case of a candidate who has received a diploma in scientific and mining subjects after a course of study of at least two years at an educational institution approved in this behalf by the Governor-General in Council, or who has taken a degree in scientific and mining subjects at a University approved in this behalf by the Governor-General in Council.

The fees are Rs. 15 in the case of first class certificates and Rs. 8 in the case of second class certificates. By rule 34 of Government of India, Department of Commerce and Industry, Notification No. 2968—82, dated the 21st April 1906, "these fees shall be paid not less than one month prior to the date of the examination, to the Chief Inspector of Mines at his office." The fees may be remitted by money order or paid in any other manner.

Applications and fees should be addressed to the Chief Inspector of Mines in India, Dhanbad P.O., E. I. Railway, and not to any Officer by name. No candidate will be permitted to sit at the examination unless his application, supported by original certificates of experience and character, and fee, is received, in the case of a candidate for the first class certificate examination on or before the 15th January 1920, and, in the case of a candidate for the second class certificate examination on or before the 22nd January 1920. Candidates are advised to send all papers under registered cover.

G. F. ADAMS,

Chief Inspector of Mines in India,
and *ex-officio* President of the Board of Examiners

DHANBAD,
The 18th October 1919.

For First Assistant to the Agent to the Governor-General, Rajputana.

CHIEF COMMISSIONER, DELHI.

NOTIFICATIONS.

Delhi, the 11th October 1919.

No. 6166A.-Home.—In exercise of the powers conferred by section 10, sub-section (1) of the Code of Criminal Procedure, 1898, V of 1898, the Chief Commissioner is pleased to appoint Mr. H. A. Smith, I.C.S., Deputy Commissioner, to be a Magistrate of the 1st class and to be District Magistrate of the Delhi District.

No. 6166B.-Home.—Mr. H. A. Smith, I.C.S., District Magistrate, Delhi, is hereby invested under section 30 of the Code of Criminal Procedure, 1898, V of 1898, with power to try as a Magistrate all offences not punishable with death.

No. 6166C.-Home.—Mr. H. A. Smith, I.C.S., District Magistrate, Delhi, is hereby invested with power to try summarily in the Delhi District the offences specified in section 260 of the Code of Criminal Procedure, 1898, V of 1898.

No. 6166D.-Home.—The Chief Commissioner is pleased under the provisions of section 22 of the Code of Criminal Procedure, 1898, V of 1898, to appoint Mr. H. A. Smith, I.C.S., to be a Justice of the Peace within and for the Province of Delhi.

No. 6166E.-Home.—Under the provisions of sections 1 and 3 of Act IX of 1889, the Chief Commissioner is pleased to invest Mr. H. A. Smith, I.C.S., with the powers of a Magistrate under the said Act, such powers to be exercised within the local limits of the Delhi District.

The 13th October 1919.

No. 6167-Education.—In accordance with the provisions of section 241, sub-section (1) of Punjab Act III of 1911 (the Punjab Municipal Act, 1911), the Chief Commissioner of Delhi is pleased to declare that within the limits of the town of Narela in the Province of Delhi as defined in the annexed boundary schedule, improved arrangements are required in respect to the matters mentioned in section 52 of the said Act:—

BOUNDARY SCHEDULE OF THE NOTIFIED AREA OF NARELA.

On the West—The Delhi-Umbala-Kalka Railway line.

On the North—The Kachcha road leading to Bankner and the pucca road up to the village boundary of Narela and Mamurpur.

On the East—Village boundary of Mamurpur and Narela; the eastern boundary of the present abadi and the village boundary of Narela and Chak Dakhli Mamurpur, which corresponds to the Kachcha road to Alipur.

On the South—Village boundary between Chak Dakhli Mamurpur and Kureni.

No. 6169-Education.—Whereas the District Board of Delhi has applied to the local Government under the provisions of section 61 of Act XX of 1883 (The Punjab District Board Act), and whereas it appears to the Chief Commissioner, Delhi Province, that land is required by the said District Board for a public purpose, namely for widening the road from the Jumna bridge at Delhi to Abadi Ghosian at Silampur, in the Delhi Province, it is hereby declared that the undermentioned land is required for the said purpose.

This declaration is made under the provisions of section 6 of Act I of 1894, and under section 7 of the said Act the Collector of the Delhi Province is hereby directed to take order for the acquisition of the said land.

Memorandum of agreement made the Eighteenth day of October one thousand nine hundred and nineteen between the Tata Iron and Steel Company, Limited, a Company incorporated under the Indian Companies Act, 1882, and having its Registered Office at Bombay (hereinafter called "the Company") of the one part and the Secretary of State for India in Council (hereinafter called "the Secretary of State") of the other part whereas under an agreement dated the eighth day of July one thousand nine hundred and nine between the Company and the Secretary of State, published under Notification No. 2150 L. A. of the twelfth day of July one thousand nine hundred and nine, at pages 947 to 949 of Part I of the Calcutta Gazette of the fourteenth idem, certain lands situated in Pargana Dhalbhum in the District of Singhbhum were acquired for the Company for the purpose of the construction of works of the Company and other works in connection with the Company's undertaking or business and whereas the Company now intend to extend the said works and to form or take part in the formation of subsidiary Companies for the promotion and development of industrial undertakings or business subsidiary to the undertaking or business of the Company or capable of being conducted so as directly or indirectly to benefit the Company (hereinafter called "other Companies") and the Company have applied to the Lieutenant-Governor of Bihar and Orissa in Council (hereinafter called the "Local Government") for the acquisition under the provision of the Land Acquisition Act, 1894 (hereinafter referred to as "the said Act") of the additional land

• Not printed.

described in the Schedule hereunder written and delineated in the map hereunto annexed for works and purposes in connection with the undertaking or business of the Company and the establishment, by the Company or by other Companies formed or hereafter to be formed, of industrial undertakings or business subsidiary to the undertaking or business of the Company, including the construction of residences, and the improvement of sanitary conditions by the Company or other Companies as aforesaid and also the establishment of experimental agricultural farms and whereas the Local Government being satisfied by an enquiry held under their order under Section 40 of the said Act that the said acquisition is necessary for the construction of the said works and that such works are likely to prove useful to the public have consented to the said acquisition pursuant to the provisions of the said Act on condition of the Company entering into such agreement as is hereinafter contained now these presents witness and it is hereby agreed and declared as follows:—

1. The Company shall and will provide for pay and reimburse to the Local Government in the manner hereinafter mentioned the entire cost of acquiring the said land pursuant to the provisions of the said Act including all compensation damages costs charges and expenses whatsoever which have been or may be paid or incurred in respect of or on account of such acquisition and all law costs and other expenses which have been or may be incurred by the Government upon or in respect of or incidental to the said acquisition or any litigation arising thereout either in the original or appellate courts and including the cost of the establishment and salary of the officer or officers of Government to be employed by Government in connection with or for the purpose of such acquisition.

The moneys which shall become payable by the Company as aforesaid shall be paid by the Company to the Collector and the Company shall within seven days of the receipt of

the notice hereinafter mentioned pay to the Collector from time to time until the whole of the moneys payable as aforesaid shall be paid such sums payable as aforesaid as may be demanded by the Collector by notice in writing addressed to General Manager of the Company. In these presents the term "Collector" shall include the persons included in such term by the said Act.

2. As and when any award as to any portion of the said land is made by the Collector such portion shall be transferred to the Company in the manner hereinafter mentioned so soon thereafter as conveniently may be provided that the money then in the hands of the Collector and paid by the Company as hereinbefore provided shall be sufficient to defray the compensation awarded in respect thereof and all costs and expenses in connection therewith. Provided also that the Company may at any time pay any further or additional sum beyond the sum or sums already demanded by the Collector to enable such compensation to be paid and such transfer to be made.

3. The said land shall be transferred by the Secretary of State so as to vest absolutely in the Company subject to the conditions hereinafter contained.

4. The said land shall not be used by the Company or any of the other Companies as aforesaid for any purpose other than those specified in the preamble.

5. If at any time or times any part or parts of the said land not directly utilised for the purpose of the manufactory or works of the Company or of the other Companies as aforesaid shall be necessary to be possessed by Government for purposes of revenue administration or for purposes connected with public health safety or necessity (of which matters the Local Government shall be sole judge) the Company shall on being thereunto required by the Local Government transfer to the Secretary of State such part or parts of the said land as the Local Government shall specify to be necessary for the purposes aforesaid and in consideration of such transfer the Secretary of State shall pay to the Company a sum equal to the amount of the compensation awarded under the said Act and paid by the Company in respect of the land the subject of the transfer upon the acquisition thereof for the Company including the amount awarded in respect thereof under Section 23 (2) of the said Act. The Local Government shall be sole judge of whether any part of the said land is directly utilized for the manufactory or works of the Company or of the other Companies as aforesaid, and no demise which may be made hereafter by the Company shall in any way affect the obligation of the Company under this clause.

6. If at any time the said land or any part or parts thereof shall no longer be required by the Company for the works and purposes set forth in the preamble the Company shall not be entitled to sell or assign its interest in such part or parts until it shall have first offered the same to the Local Government at a price equal to the amount of compensation awarded under the said Act and paid by the Company in respect of the land the subject of the transfer upon the acquisition thereof for the Company including the amount awarded in respect thereof under Section 23 (2) of the said Act and until such offer shall have been declined by the Local Government.

When such offer has been made by the Company the Local Government may accept it in respect of such part or parts or of any portion or portions of such part or parts of the said land as it may deem fit and decline it as to the remainder.

7. A public right of way shall be recognised by the Company over such roads or paths as the Local Government may prescribe and no demise which may be made hereafter by the Company shall in any way affect such public right of way.

As witness the Common Seal of the Tata Iron and Steel Company, Limited and the hand of John Austen Hubback, Secretary to the Government of Bihar and Orissa (Revenue Department) for and on behalf of the Lieutenant-Governor of Bihar and Orissa in Council acting in the premises for and on behalf of the Secretary of State for India in Council the day and year first above written.

THE SCHEDULE ABOVE REFERRED TO.

All that piece of land situate in the villages of (1) Khuntadi, (2) Sonari, (3) Gunryagora, (4) Ulyan, (5) Bhetya (6) Kadma, (7) Sakchi (Sankohi), (8) Beldi (Bheldi), (9) Golmuri (Golmundi), (10) Kalimati, (11) Bara, (12) Baridih, (13) Moharda, (14) Murakatti, (15) Nildih, and (16) Jojobera in the Pargana Dhalbhum Sub-Registry Office Ghatsila, Thana Ghatsila, Zilla Singhbhum, namely, a piece of land measuring, more or less, 12214.74 acres, equivalent to 29194 bighas, 15 kathas 1 chitak of local measurement, bounded on the North by the River Subarnarekha, on the East by the boundary of villages Hulang, Manpita, Ghorbandha and Chhota Gobindpur, on the South by the Bengal Nagpur Railway Line, the

SUPPLEMENT TO
The Gazette of India.

No. 43.} CALCUTTA, SATURDAY, OCTOBER 25, 1919.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time containing such official papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of Rupees five per annum if delivered in Calcutta, or Rupees eight if sent by post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

WHOLESALE AND RETAIL (FORTNIGHTLY) PRICES

RETURN SHOWING the WHOLESALE and RETAIL PRICES of CEREALS, PULSES, OILSEEDS, SUGAR (RAW), SALT, ETC., in INDIA by DISTRICTS for the FORTNIGHT ENDING THE 15TH SEPTEMBER, 1919

DEPARTMENT OF STATISTICS, INDIA }

October 20, 1919

G. FINDLAY SHIRRAS,

Director of Statistics

Published by order of the Governor-General in Council

PREFATORY NOTE.

Prices of Country Produce and Salt in India in the middle of September, 1919.

(a) *The first fortnight of September, 1919, as compared with the preceding fortnight.*

The favourable character of the monsoon during the current year is producing a beneficial effect upon prices. The wholesale prices of cereals and pulses in India in the middle of September, 1919, as compared with the preceding fortnight, showed a fall of 2 per cent. Prices of rice, wheat, and barley decreased by 3 per cent; maize by 2 per cent; and jawar, gram, and arhar dāl by 1 per cent. Ghee and raw sugar (gūr) showed no change, while salt fell by 1 per cent. The only exception is bajra which showed a slight rise (1 per cent). The all-India fluctuation is as follows:—

Article	PREVIOUS FORTNIGHT (31st AUGUST 1919)		THIS FORTNIGHT (15th SEPTEMBER 1919)	
	Unweighted	Weighted	Unweighted	Weighted
Rice	100	100	97	99
Wheat	100	100	97	97
Barley	100	100	97	98
Jawar	100	100	99	100
Bajra	100	100	101	102
Maize	100	100	98	100
Gram	100	100	99	99
Arhar dāl	100	—	99	—
Ghee	100	—	100	—
Raw Sugar (gūr)	100	100	100	97
Salt	100	—	99	—

With regard to fluctuations in provincial prices the following are noticeable: a fall in the prices of rice in the Madras Presidency (17 per cent) and in Sind-Baluchistan (15 per cent); a fall in bajra prices in the North-West Frontier Province (20 per cent) and in the Punjab (17 per cent). The price of bajra, however, showed a rise of 17 per cent in Sind-Baluchistan.

(b) *The first fortnight of September, 1919, as compared with the average of the preceding three years at corresponding date.*

In the middle of September, 1919, the wholesale prices of food grains and pulses in India showed an increase of 63 per cent (unweighted average) as compared with the average of the prices which ruled at the corresponding date in the last three years. The price of rice advanced by 56 per cent (unweighted average), the weighted average showing a rise of 77 per cent. In the chief producing provinces the increases were: 88 per cent in Bengal, 119 per cent in Bihar and Orissa, 44 per cent in the Madras Presidency, and 50 per cent in Burma. Wheat prices rose by 43 per cent, showing an increase of 31 per cent in the Punjab, 44 per cent in the United Provinces, 52 per cent in the Central Provinces and Berar, and 43 per cent, in the Bombay Presidency. The unweighted average price of barley showed a rise of 47 per cent, of jawar 65 per cent, of bajra 73 per cent, and of maize 57 per cent. Gram prices advanced by 78 per cent and arhar dāl by 89 per cent. The average price of ghee showed a rise of 33 per cent and that of raw sugar (gūr) 63 per cent. The increase in the price of salt in India was only 3 per cent.

(a) Rangoon rice

GOVERNMENT OF INDIA
DEPARTMENT OF COMMERCE AND INDUSTRY.

TARIFF VALUATION OF SUGAR.

The following statement shows in respect of each of the descriptions of sugar distinguished in the Tariff Schedule II (excepting molasses and all other kinds of sugar), *first*, the total imports into India in the month of September 1919, and the average value per cwt. as calculated on the returns received from the Customs Houses; and, *secondly*, a running total showing the total imports into India since the beginning of the year (1st October to 30th September) and the average net value per cwt. so far established. It is published in conformity with the procedure laid down in Customs Circular No. V of 1911, in order to enable merchants to compute the probable rate of duty for the year 1920:—

Description of sugar.	IMPORTED DURING THE MONTH OF SEPTEMBER 1919.		IMPORTED SINCE 1ST OCTOBER 1918.	
	Quantity.	Average net value per cwt.	Quantity.	Average net value per cwt.
Sugar, crystallised, beet	Cwt.	Rs a.	Cwt.	Rs a.
" " and soft, refined in China . . .	32,790	29 12	26 129,299	25 0
" " " " from Egypt	27 4
" " " " from Java or Japan,* 33 Dutch Standard and above.	488,361	25 12	6,111,208	18 8
" " " " from Java or Japan,* 16 to 22 Dutch Standard.	175,927	22 4	1,668,928	17 4
" " " " from Java or Japan,* 15 Dutch Standard and under.	6,733	23 0
" " " " from Mauritius equal to 16 Dutch Standard and over.	11	27 4	1,251,157	17 4

* This revised classification has been adopted with effect from January 1918, in accordance with the classification of Japanese Sugar in item No. 18 of the Import Tariff schedule prescribed by the Government of India, Department of Commerce and Industry, Notification No. 1547-D., dated the 15th December 1917.

The imports of Sugar from Japan during the three months, October to December 1917, were 2,691 cwt. and the average value per cwt. was Rs17-8.

H. A. F. LINDSAY,
Director-General of Commercial Intelligence
A. H. LEY,
Secretary to the Government of India

NOTE.—These statistics are compiled from fortnightly returns furnished by Local Governments and Administrations. They relate to the wholesale prices in the markets referred to above, which prevailed on the last (or nearest mart) day of each fortnight. The statistics for Karachi, Bombay, and Calcutta are compiled from the Chambers of Commerce Market Reports.

(a) Based on the price for the fortnight ending the 31st July, 1914, which is taken as 100.

India per maund of 82½ lbs

NOTE.—These statistics are entirely compiled from returns furnished fortnightly by Local Governments and Administrations. They relate to the retail prices in the head quarters of the districts and in the ports referred to above.

(a) Based on the price for the fortnight ending the 31st July 1914, which is taken as 100.

* Relates to Khandwa wheat.

[The figures state quantity per rupee in seers of 80 tolas.]

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA, OCTOBER 17, 1919

First INDIGO Forecast, 1919-20.

This forecast is based upon reports received from six provinces, which contain practically the whole area under indigo in British India.

The total area sown is estimated at 208,100 acres which is 26 per cent below the estimate at the corresponding date of last year. As compared with the final estimate of last year (300,700 acres) the present estimate shows a decrease of 31 per cent. The total yield of dye is estimated at 27,300 cwts, as against 32,100 cwts estimated at this time last year, or a decrease of 15 per cent. As compared with the final estimate of last year (44,100 cwts) the present estimate shows a decrease of 38 per cent. Weather conditions at sowing time were generally favourable, except in parts of Madras and the United Provinces, and the condition of the crop, on the whole, is fair. The average yield per acre is expected to be a little higher than that of last year.

Details for the provinces are given below :—

First Forecast

Province	Area		Yield		Yield per acre	
	1919-20	1918-19	1919-20	1918-19	1919-20	1918-19 (a)
	Acres	Acres	cwts	cwts	lbs	lbs
Madras . . .	65,300	114,700	10,000	14,900	17	15
Bihar and Orissa . .	57,100	66,300	7,400	7,100	14	12
United Provinces . .	47,200	51,700	4,300	3,400	10	7
Punjab . . .	19,800	30,700	3,100	4,900	15	16
Bombay and Sind (including Native States) . . .	7,500	6,800	1,600	1,000	24	16
Bengal . . .	11,700	10,100	900	800	9	9
Total . . .	208,100	289,500	27,300	32,100	15	13

The provincial reports are summarised below :—

Madras (53·1 per cent of the total area under indigo in British India).—The area sown up to 1st September is estimated at 65,300 acres, as against 114,700 acres estimated at the corresponding date last year, or a decrease of 43 per cent. The decrease is general in all districts, except Kistna and Nellore, and is attributed to want of good sowing rains in the Ceded Districts, and to the scarcity of food and the dull market in the Northern Circars. The yield is estimated at about 10,000 cwts as against 14,900 cwts estimated at this time last year.

Bihar and Orissa (15·5 per cent of the total area under indigo in British India).—The area sown is estimated at 57,100 acres, as against 66,300 acres in the corresponding forecast of last year, or a decrease of 14 per cent. In the important districts of North Bihar there has been a reduction in area owing partly to a difficulty in selling the produce in spite of good prices and partly to the high prices ruling for food crops. Weather conditions are reported to be favourable, and a larger outturn is expected in spite of a reduced area. The outturn for the whole province is estimated at 73 per cent of the normal. According to the estimates furnished by the Bihar Planters' Association for Saran, Champaran, Muzaffarpur, and Darbhanga and by the District Officers for the remaining four districts, the total yield for the province works out to 7,400 cwts, as against 7,100 cwts estimated at this time last year, or an increase of 4 per cent. The trade estimate for the province (including the Nadia district of Beugal) amounts to 8,000 cwts.

United Provinces (20 per cent of the total area under indigo in British India).—The area sown is estimated at 47,200 acres, compared with 51,700 acres reported at this time last year. The monsoon did not penetrate these provinces until the second week of July and the crop suffered from drought in the early part of the season. Conditions improved later. On the basis of the reports received from factories, the total yield is estimated at 4,300 cwts, which is 10 per cent above the corresponding estimate of last year.

Punjab (10·1 per cent of the total area under indigo in British India).—The area at the end of September is estimated at 19,300 acres, as compared with 30,900 acres estimated in the corresponding forecast of last year, or a decrease of 38 per cent. As compared with the actual area of last year, however, the present estimate shows an increase of 17 per cent. The season has been favourable and the condition of the crop is good. The yield is estimated at 3,100 cwts, which is 36 per cent below the estimate reported in the corresponding forecast of last year.

Bombay and Sind (0·6 per cent of the total area under indigo in British India).—The area sown is reported to be 7,500 acres (4,700 acres being in the Khairpur State) which is 11 per cent over the corresponding area of last year. The crop is confined to Sind where it is thriving under favourable inundation. The yield is estimated at 1,600 cwts, as against 1,000 cwts last year.

Beugal (0·6 per cent of the total area under indigo in British India).—The area sown is estimated at 11,700 acres, as against 10,100 acres last year. The outturn is estimated at 70 per cent of the normal, which works out to about 900 cwts, as against 800 cwts last year.

(a) The final estimates for 1918-19 were: Madras 22 lbs, Bihar and Orissa 11 lbs, United Provinces 8 lbs, Punjab 19 lbs, Bombay and Sind 16 lbs and Bengal 9 lbs.

Chart.—The chart below illustrates the variations in the preliminary estimates of acreage for the last ten years as compared with those in the final figures.

G. FINDLAY SHIRRAS,
Director of Statistics.

ESTIMATES OF PRINCIPAL CROPS IN INDIA, 1918-19.

Preliminary Statement showing the Estimated Total Yield, the Acreage, and the Yield per acre of Principal Crops in India in the season 1918-19, with comparisons for 1917-18, and the Average Yield per acre of the Ten Years 1908-09 to 1917-18.*

Crops	ESTIMATED TOTAL YIELD		ACREAGE		AVERAGE ESTIMATED YIELD PER ACRE		
	1918-19	1917-18	1918-19	1917-18	1918-19	1917-18	AVERAGE (1908-09 to 1917-18)

	<i>Bales of 400 lbs</i>	<i>Bales of 400 lbs</i>					
Cotton . . .	3,671,000	4,065,000	20,497,000	25,298,000	72	64	77
Jute . . .	6,946,000	8,865,000	2,497,000	2,736,000	1,113	1,296	1,157
	<i>lbs</i>	<i>lbs</i>					
Tea † . . .	380,459,000	371,296,000	679,000	667,000	560	557	510

* The estimates are those published in the forecasts: those for wheat, cotton, jute, and tea relate practically to all the tracts in which these crops are grown in India (including Indian States); those for rice, indigo, sugarcane, and groundnut to British India and the Indian States in the Bombay Presidency; those for linseed, rape and mustard, and sesamum to British India and the Indian States in the Bombay Presidency and the State of Hyderabad.

† Provisional figures.

The Effects of Last year's Bad Monsoon.

The failure of last year's monsoon and the deficiency in the winter rains are shown in the large decrease in the production of the *khurif* (autumn) and *rabi* (spring) crops. The total production of rice in 1918-19 was more than 12½ million tons, or 35 per cent, less than in the previous year; the decrease in wheat was 2,420,000 tons or 24 per cent; in cotton 894,000 bales or 10 per cent; in jute 19 lakhs of bales or 22 per cent. There were decreases in the production of sugarcane, linseed, rape and mustard, sesamum, groundnut, and indigo. There was an increase of over 9 million lbs or 2·5 per cent in the production of tea.

SUPPLEMENT TO THE GAZETTE OF INDIA, OCTOBER 25, 1919.

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA, OCTOBER 21, 1919

Second SUGARCANE Forecast, 1919-20

This forecast is based upon reports furnished by provinces, which contain, on an average, 99 per cent of the total area under sugarcane in British India.

The area so far reported this year amounts to 2,729,000 acres, as against 2,530,000 acres estimated at this time last year, or an increase of 5 per cent. As compared with the final estimate (2,820,000 acres) of last year, the present estimate shows a decrease of 3 per cent.

The present condition of the crop, on the whole, is reported to be good.

The detailed figures for the provinces are as follows:—

Second forecast, October

Province	1919-20	1918-19	Increase + or Decrease—
	Acres	Acres	Acres
United Provinces	1,500,000	1,325,000	+175,000
Punjab	479,000	470,000	+9,000
Bihar and Orissa	280,000	271,000	+9,000
Bengal	219,000	219,000	...
Madras	88,000	113,000	—25,000
Bombay and Sind (including Indian States)	74,000	101,000	—27,000
Assam	32,000	32,000	...
North-West Frontier Province	36,000	31,000	+5,000
Central Provinces and Berar	21,000	28,000	—7,000
Total	2,729,000	2,590,000	+139,000

The provincial reports are summarised below:—

United Provinces (52.5 per cent of the total area under sugarcane in British India).—The area planted was estimated in August last at 1,500,000 acres, as against 1,325,000 acres at the corresponding time last year, or an increase of 13 per cent. No modification has been made since the publication of the August forecast. The course of the monsoon has been generally favourable. Ample rain was received in August and in the early part of September.

There were useful showers in the eastern districts at the beginning of October. The condition of the crop is reported to be satisfactory, and for the provinces as a whole a normal outturn is expected.

Punjab (16.4 per cent of the total area under sugarcane in British India).—The estimate of area up to the end of September is 479,000 acres, which is 2 per cent above the area given in the corresponding forecast of last year. The season is so far favourable and the condition and the expected yield of the standing crop are normal to good. Rain would be beneficial.

Bihar and Orissa (10.7 per cent of the total area under sugarcane in British India).—The area planted is estimated at 280,000 acres, which is 3 per cent above the area reported at the corresponding period of last year. The season has been favourable, and the condition of the crop is reported to be good. A normal outturn is expected.

Bengal (8.8 per cent of the total area under sugarcane in British India).—The area planted is reported to be 219,000 acres, which is the same as reported at this time last year. Insufficient rainfall at the outset was somewhat unfavourable to the planting of the crop and retarded germination in places. Good rain, since then, greatly benefited the growth of the plants, and, although the crop suffered somewhat in places through excessive rainfall in July and August, the present prospects are generally reported to be promising. The average outturn for the province is estimated at 88 per cent of the normal.

Madras (4 per cent of the total area under sugarcane in British India).—The area is estimated at 88,000 acres, which is 22 per cent below last year's estimate at the corresponding date. The decrease is mainly in the Central districts where the high price of manure is reported to have stood in the way of cane cultivation.

Bombay and Sind (2.9 per cent of the total area under sugarcane in British India).—The area planted is reported to be 74,000 acres (29,000 acres being in the Indian States). This is 27 per cent below the area reported at this time last year. The decrease is attributed to deficient water supply at the planting time. In the eastern parts of the Deccan and Karnatak the crop suffered somewhat owing to a prolonged break in the rains in July and August, but rains in September being plentiful its condition is now good almost everywhere.

sugarcane in British India).—There is no change in the area (32,000 acres) reported in the first forecast. The shortage of rain in August retarded to some extent the growth of the crop, but the rainfall in September has been seasonable, and a fair outturn is expected.

North-West Frontier Province (1·3 per cent of the total area under sugarcane in British India).—As reported in the August forecast, the estimated area planted is 36,000 acres, which is 16 per cent above the estimate at this date last year. The condition of the standing crop is, on the whole, good and an average outturn may be expected.

Central Provinces and Berar (0·9 per cent of the total area under sugarcane in British India).—The area is estimated at 21,000 acres, which is 24 per cent smaller than the area reported at the corresponding date of last year. The decrease is attributed to deficient water-supply at the planting time. The condition and prospects of the crop are generally satisfactory at present, and an outturn of 109 per cent of the normal is expected for the provinces as a whole.

Chart.—The chart below shows the estimate of area now made, as compared with the final figures of the preceding nine years.

Sugarcane Crop in Foreign Countries.—From the latest available information published by the International Institute of Agriculture, Rome, it appears that weather conditions were favourable in Egypt.

From unofficial sources it appears that in Louisiana the condition of the crop is generally not satisfactory.

In spite of the encouraging condition in some isolated plantations, the general situation indicates a short crop. It is reported that the weather is excellent for the growing cane crop in Cuba; and indications point to an amount of cane that will exceed all previous records. The Hawaiian crop suffered from shortage of water. In Porto Rico the cane crops are showing excellent growth.

G. FINDLAY SHIRAS,
Director of Statistics.

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA, OCTOBER 20, 1919.

First GROUNDNUT Forecast, 1919-20.

This forecast is based upon reports received from the three provinces of Madras, Burma, and Bombay, which comprise 99 per cent of the entire groundnut area of British India.

The total area sown in the present season in these provinces is estimated at 1,274,000 acres, as against 1,147,000 acres estimated at this date last year, or an increase of 11 per cent.

Weather conditions have been favourable, and the condition of the crop is reported to be good.

Details for the provinces are stated below :—

First forecast, October

Provinces	1919-20	1918-19	Increase + or Decrease—
	Acres	Acres	Acres
Madras	919,000	821,000	+ 98,000
Burma	235,000	236,000	—1,000
Bombay (including Indian States)	120,000	90,000	+ 30,000
Total	1,274,000	1,147,000	+ 127,000

The provincial reports are summarised below :—

Madras (75.9 per cent of the total area under groundnut in British India).—The area sown up to the end of September is estimated at 919,000 acres, which is about 12 per cent above the area reported at this date last year. The season has been generally favourable, and the recent rains have been beneficial to the crop.

Burma (12.6 per cent of the total area under groundnut in British India).—The area under the crop is estimated at 235,000 acres, as against 236,000 acres reported at this date last year. In the dry zone the early rains were scanty and insufficient, but the recent rains have been satisfactory, and the crop prospects are good.

Bombay (10.5 per cent of the total area under groundnut in British India).—The area sown is estimated at 120,000 acres (26,000 acres being in the Indian States), as against 90,000 acres reported at this date last year, or an increase of 33 per cent. The increase is attributed to favourable early rains and high prices. In the Deccan and Karnatak the unirrigated crop suffered in the eastern tracts owing to prolonged drought in July-August, but plentiful rains in September have improved it; elsewhere the condition of the crop is good except in places where it is slightly damaged by excessive rain. The crop in Gujarat is doing well. The irrigated crop is thriving everywhere.

Chart.—The chart below shows the variations in the preliminary estimates, as compared with those in the final figures of the last ten years.

AREA OF GROUNDNUT (In thousand acres)

SIMLA, WEDNESDAY, OCTOBER 29, 1919.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Simla, the 28th October 1919.

No. 96. The Governor General has been pleased, under Rule 23 of the Rules for the Conduct of the Legislative Business of the Council of the Governor General, to order the publication in the *Gazette of India* and in the local official Gazettes in English, of the following Bill, together with the Statement of Objects and Reasons relating thereto, and the Bill and Statement of Objects and Reasons are accordingly hereby published for general information : —

BILL, NO. 34 OF 1919.

A Bill to consolidate and amend the law relating to Government Securities.

WHEREAS it is expedient to consolidate and amend the law relating to Government securities; It is hereby enacted as follows : —

1. (1) This Act may be called the Indian Securities Act, 1919; and
Short title and commencement.

(2) It shall come into force on the first day of April, 1920.

2. In this Act—
Definitions.

(a) "Government security" includes promissory notes, stock-certificates, bearer bonds and all other securities issued by the Governor General in Council or by any Local Government in respect of any loan contracted either before or after the passing of this Act, but does not include a currency-note; and

(b) "prescribed" means prescribed by rules made under this Act.

3. Save as otherwise provided in or under this Act, no notice of any trust in respect of any Government security shall be receivable by the Government :
Notice of trust not receivable save as provided.

Provided that an indorsement by an executor or administrator as such shall not be deemed to convey notice of any trust under a will, nor shall the Government be bound to inquire into the terms of any will, but it shall be entitled to treat such executor or administrator as full owner of the security.

4. (1) Notwithstanding anything in section 45 of the Indian Contract Act, 1872, when a Government security is payable to two or more persons jointly and either or any of them dies, the security shall be payable to the survivor or survivors of these persons.
Right of survivors of joint payees of Government securities.

(2) Nothing herein contained shall affect any claim which the representative of the deceased person may have against the survivor or survivors and in respect of the security jointly payable to him or them and the deceased.

(3) This section shall apply whether the death of the person to whom the security was jointly payable occurred or occurred before or after this Act comes into force.

XXVI of
1891.

5 Notwithstanding anything in section 13 of the Negotiable Instruments Act, 1881, no indorsement of a Government security shall be valid unless made by the signature of the holder inscribed on the back of the security itself.

6 (1) In the case of any public office to which the Government General in Council may from time to time by notification in the Gazette of India, declare this sub-section to apply, a Government security may be made or indorsed payable to or for the holder for the time being of the office by the name of the office.

(2) When a Government security is made or indorsed as aforesaid it shall be deemed to be transferred without any or further indorsement from each holder for the time being of the office to the succeeding holder for the time being of the office on and from the date on which the latter takes charge of the office.

(3) When the holder for the time being of the office indorses to a third party a Government security made or indorsed as aforesaid he shall subscribe the indorsement with his name and the name of the office.

(4) A writing on a Government security now or hereafter standing in the name of the holder of a public office whereby the security has been or was made or indorsed payable to or to the order of the holder of the office for the time being by the name of the office shall not be deemed to be or to have been invalid by reason only of the security having been so made or indorsed.

(5) This section applies as well to an office of which there are two or more joint holders as to an office of which there is a single holder.

XXVI of
1891.

7 Notwithstanding anything in the Negotiable Instruments Act, 1881, the Governor General in Council may, in respect of any loan issue to the ruler of any State in India Government securities in such form and subject to such conditions as to negotiability, succession and other matters as may be prescribed.

XXVI of
1891.

8 Notwithstanding anything in the Negotiable Instruments Act, 1881, a person shall not be liable by reason only of his having indorsed a Government security, be liable to pay any money due either as principal or as interest, thereunder.

9 (1) The signature of the person authorized by the Government to sign Government securities may be printed, engraved or lithographed, or impressed by such other mechanical process as the Governor General in Council may direct, on the securities.

(2) A signature so printed, engraved, lithographed or otherwise impressed shall be as valid as if it

had been inscribed in the proper handwriting of the person so authorized.

Issue of duplicate, renewed, converted, re-issued or sub-divided securities

10 (1) When a Government security is alleged to have been lost or destroyed either wholly or in part, and a person claims to be the person to whom but for the loss or destruction it would be payable, he may on application to the prescribed officer, and on producing proof to his satisfaction of the loss or destruction and of the justice of the claim and on payment of the prescribed fee, if any, obtain from him an order for—

- (a) the payment of interest in respect of the security said to be lost or destroyed pending the issue of a duplicate security, and
- (b) the issue of a duplicate security payable to the applicant.

(2) An order shall not be passed under sub-section (1) until after the issue of the prescribed notification of the loss or destruction and after the expiration of the prescribed period.

(3) A list of the securities in respect of which an order is passed under sub-section (1), shall be published in the prescribed manner.

11 (1) Subject to the provisions of section 12, a person claiming to be entitled to a Government promissory note may on applying to the prescribed officer and on satisfying him of the justice of his claim and delivering the promissory note accepted in the prescribed manner and paying the prescribed fee, if any, obtain from such officer a renewed promissory note payable to him.

Provided that when application is made for the renewal of a Government promissory note which appears to the prescribed officer to stand in the name of a deceased member of a joint Hindu family governed by the *Mitakshara* law, a renewed promissory note shall not be issued to the applicant unless he furnishes a certificate signed by such authority as may be prescribed after inquiry in the prescribed manner to the effect that the deceased belonged to an undivided Hindu family governed by the *Mitakshara* law that the promissory note formed part of the joint property of the family, and that the applicant is the managing or sole surviving male member of the family.

Provided further that the issue of a renewed Government promissory note in such a case shall not affect any claim which any person claiming through the deceased person may have in respect of such promissory note against the applicant.

(2) The prescribed officer may, on the application of the holder of a bearer bond, on delivery of the bearer bond and on payment of the prescribed fee if any, issue to the applicant a renewed bearer bond.

12 (1) Where there is a dispute as to the title to a Government promissory note in respect of which an application for renewal has been made, the prescribed officer may—

- (a) refuse to renew such note until the parties have obtained a decision as to title from a Court of competent jurisdiction, or

(b) after such inquiry as is hereinafter provided and consideration of the result thereof, declare by order in writing which of the parties is in his opinion entitled to such note and may, after the expiration of three months from the date of such declaration, renew the note in favour of such party in accordance with the provisions of section 11 unless within that period he has received notice that proceedings have been instituted by any person in a Court of competent jurisdiction for the purpose of establishing a title to such note.

(2) For the purpose of the inquiry referred to in sub-section (1), the prescribed officer may himself record, or may request the District Magistrate to record or to have recorded, the whole or any part of such evidence as the parties may produce. When such request has been made to the District Magistrate, such Magistrate may himself record or may direct any Magistrate of the first class subordinate to him to record the evidence, and shall forward a copy thereof to the prescribed officer.

Explanation.—For the purposes of this sub-section, the District Magistrate means the District Magistrate having jurisdiction in the place where interest on the security is payable and, where interest is payable at a presidency-town or Rangoon the Chief Presidency Magistrate, or at a place in a State in India, the Political Agent.

(3) The prescribed officer or any Magistrate acting under this section may, if he thinks fit, record evidence on oath.

13 (1) The prescribed officer may, on the issue of converted application of a person claiming to be entitled to a Government security or securities, on being satisfied of the justice of the claim and on delivery of the security or securities received in the prescribed manner and on payment of the prescribed fee, if any, convert, consolidate or sub-divide the security or securities.

(2) The conversion, consolidation or sub-division referred to in sub-section (1) may be into a security or securities of the same or different classes or of the same or different loans.

(3) No such conversion, consolidation or sub-division shall affect the rights of any other person to the security or securities so converted, consolidated or sub-divided, as against the person upon whose application such conversion, consolidation or sub-division was made.

Discharge.

14. On payment by or on behalf of the Discharge of bearer Government to the holder bonds, etc. of a bearer bond or other Government security payable to bearer of the amount expressed therein on or after the date when it becomes due, on renewal of a bearer bond under sub-section (2) of section 11, on renewal of a Government promissory note under section 12, or on conversion, consolidation or sub-division of a bearer bond under section 13, the Government shall be discharged in the same way and to the same extent as if such bearer bond, promissory note or other security were a promissory note payable to bearer:

Provided that, in the case of a Government promissory note renewed under section 12, nothing

in this section shall be deemed to bar a claim against the Government in respect of a security so renewed by any person who either had no notice of the proceedings under that section, or who claims through a person who had no such notice.

15. Save as provided in section 14, when a Discharge in case of duplicate security has been duplicate and renewed issued under section 10 or securities. a renewed security has been issued under section 11 or section 12 or a converted, consolidated or sub-divided security or securities has or have been issued under section 13, the Government shall be discharged from all liability in respect of the security or securities in place of which a duplicate, renewed, converted, consolidated or sub-divided security or securities has or have been issued:—

(a) in the case of a duplicate security after the lapse of six years from the date of the publication under sub-section (3) of section 10 of the list in which the security is first mentioned, or from the date of the last payment of interest on the original security, which ever date is later;

(b) in the case of a renewed, converted, consolidated or sub-divided security after the lapse of six years, from the date of the issue thereof.

Summary procedure in certain cases.

16 (1) If within three months of the death of a person who was entitled to a Government security or securities (other than a security payable to bearer) the nominal or face value of which does not in the aggregate exceed five thousand rupees, probate of the will or letters of administration of the estate of such person or a certificate granted under the Succession Certificate Act, 1889, is not produced to the prescribed officer, such officer may, after inquiry in the manner provided in sub-sections (2) and (3) of section 12, determine who is the person entitled to the security or securities or to administer the estate of the deceased, and may,

VII of 1889.

(a) in the case of any such security relating to a loan due for repayment, authorise payment of the amount due thereon to such person, and

(b) in the case of any such security relating to a loan not due for repayment, authorise, in the case of a promissory note, the renewal of such promissory note in favour of such person, or, in the case of stock, the registration of the name of such person in substitution for the name of the deceased.

Explanation.—Where a certificate has been granted under the Succession Certificate Act, VII of 1889, in respect of some only of the securities to which the deceased person was entitled, the provisions of this sub-section shall apply when the value of the remaining securities does not exceed five thousand rupees.

(2) Upon the payment or renewal of any promissory note in accordance with sub-section (1), the Government shall be discharged from all liability in respect of the note so paid or renewed; and any substitution of names made in accordance with clause (b) of sub-section (1) shall, for the

purposes of any claim against the Government, be deemed to have effected a valid transfer of the stock in respect of which it was made.

(3) Any creditor or claimant against the estate of the deceased may recover his debt or claim out of money paid to any person under sub-section (1) and remaining in his hands undistributed in the same manner and to the same extent as if the said person had obtained letters of administration of the estate of the deceased, and nothing in this section shall affect any claim of an executor or administrator or other representative of the deceased against such person other than a claim to recover amounts lawfully paid by him in due course of administration of the estate of the deceased.

17. Where a Government security stands in the name of or is held by a minor or a person who is insane and incapable of managing his affairs, the interest accruing thereon, or the capital sum payable in respect thereof on the maturity or discharge of the loan, shall be paid in such manner as may be prescribed, and on any payment being so made, the Government shall, notwithstanding any provision of any enactment to the contrary, be discharged from all liability in respect thereof.

Indemnity.

18. Notwithstanding anything in sections 10, 11, 12 or 13, the prescribed officer may in any case arising under any of those sections—

(i) issue a duplicate or renewed security or convert, consolidate or sub-divide a security or securities upon the applicant giving the prescribed indemnity against the claims of all persons claiming under the original security or under the security or securities so renewed, converted, consolidated or sub-divided, as the case may be, or

(ii) refuse to issue a duplicate or renewed security or to convert, consolidate or sub-divide a security or securities unless such indemnity is given.

Inspection of registers, books and documents.

19. No person shall be entitled to inspect, or to receive information derived from, any book, register or other document kept or maintained by or on behalf of Government in relation to Government securities or any Government security, save in such circumstances and manner and subject to such conditions as may be prescribed.

Penalty.

20. If any person, for the purpose of obtaining for himself or for any other person payment of interest or of the capital sum due in respect of any Government security, or the issue of a duplicate security, or the renewal, conversion, consolidation or sub-division of a Government security or securities, makes to any authority under this Act a statement which is false and which he either

knows to be false or does not believe to be true, he shall be punishable with imprisonment for a term which may extend to six months, or with fine, or with both.

Rules.

21. (1) The Governor General in Council may, after previous publication, make rules to carry out the purposes of this Act.

(2) In particular and without prejudice to the generality of the foregoing power, such rules may provide for all or any of the following matters, namely:—

(a) the manner in which payment of interest in respect of Government securities is to be recorded and acknowledged;

(b) the circumstances in which Government securities must be renewed before further payment of interest thereon can be claimed;

(c) the form in which and the conditions subject to which Government securities may be issued to the rulers of States in India;

(d) the fees to be paid in respect of the issue of duplicate securities and of the renewal, conversion, consolidation and sub-division of Government securities;

(e) the proof which is to be produced by persons applying for duplicate securities;

(f) the form and manner of publication of the notification mentioned in section 10 and the period after which interest may be paid on a duplicate security may be issued under that section, and the manner of publication of the list mentioned in sub-section (3) of that section;

(g) the officer who is to exercise all or any of the powers and to perform all or any of the duties referred to in sections 10, 11, 12, 13, 16, and 18;

(h) the form in which securities delivered for discharge, renewal, conversion, consolidation or sub-division are to be receipted;

(i) the person to whom and the manner in which payments are to be made in respect of Government securities standing in the name of, or held by, minors or persons who are insane and incapable of managing their affairs;

(j) the taking of indemnities against adverse claims of third parties from persons who receive payment of interest or of the capital sum due in respect of Government securities, or who obtain duplicate, renewed, converted, consolidated or sub-divided securities;

(k) the manner in which any document relating to Government securities or any indorsement on a Government promissory note may, on the demand of any person who from any cause is unable to write, be executed on his behalf;

- (l) the recognition of trusts in the case of Government stock and of powers of attorney granted to persons holding stock as trustees whether of any particular trust or without qualification ;
- (m) the holding of Government stock by the holders of offices other than public offices, and the manner in which and the conditions subject to which stock so held may be transferred ;
- (n) the mode of attestation of documents relating to Government stock ;
- (o) generally, all matters connected with the grant of duplicate, renewed, converted consolidated and sub-divided securities ; and
- (p) the circumstances and the manner in which, and the conditions subject to which, inspection of books, registers and other documents may be allowed or information therefrom may be given under section 19.
- (3) Nothing in any rules made under clauses (j) and (m) shall, as between any trustees or as

between any trustees and the beneficiaries under a trust, be deemed to authorise the trustees to act otherwise than in accordance with the rules of law applying to the trust and the terms of the instrument constituting the trust ; and neither the Government nor any person holding or acquiring any interest in any Government stock shall, by reason only of any entry in any register maintained by or on behalf of the Government in relation to any Government stock or any stockholder, or of anything in any document relating to Government stock, be affected with notice of any trust or of the fiduciary character of any stockholder or of any fiduciary obligation attaching to the holding of any Government stock.

(4) Rules made under this section shall be published in the Gazette of India, and shall thereupon have effect as if enacted in this Act.

Repeals.

22. On and from the date on which this Act comes into force, the Indian Securities Act, 1886, and so XIII of 1886. much of the First and Second Schedules of the Repealing and Amending Act, 1914, as relates to X of 1914. the Indian Securities Act, 1886, shall be repealed. XIII of 1886.

STATEMENT OF OBJECTS AND REASONS.

THE existence of various defects and doubtful points in the present law regarding Government securities (Act XIII of 1886) has for some time pointed to the necessity of overhauling and re-casting that Act, in order that the law governing such securities, and the procedure and regulations based thereon, may be better adapted to the requirements of modern conditions. The principal changes introduced by this Bill are summarised below :—

(a) To legalise certain matters in the existing practice and procedure which it is desirable to maintain, but of which the legal basis is at present doubtful ;

(b) To obviate difficulties and delays which are at present liable to occur, in cases of disputed or doubtful claims on promissory notes, in discovering who is the Government's legal creditor in respect of such notes ;

(c) To relax the present procedure in certain matters, such as receiving notice of a trust and securities held by office holders ; and

(d) To provide special facilities in cases of small holdings of which the holder has died or is a minor.

2. The clauses of the Bill which introduce these changes are as follows :—

Clause 3. This corresponds to section 4 of the existing Act, the rigidity of which has caused much trouble in practice. The proviso to this clause legalises the existing practice regarding executors and administrators, while sub-clauses (l) and (m) of clause 21 (2) of the Bill will, in the case of Government debt held in the form of stock, enable various facilities to be given to the public, in the matter of securities held in trust or in the name of office holders (other than the holders of a public office), which are not possible under the existing law.

Clauses 4, 5 and 6 reproduce sections 5, 6 and 7 of the present Act.

Clause 7 is new and designed to legalise the present practice of issuing special notes to the Rulers of Indian States.

Clauses 8, 9 and 10 reproduce sections 9, 10 and 12 of the existing Act.

Clause 11 corresponds to section 11 of the present Act, but contains a proviso legalising the practice which is at present followed regarding securities belonging to a joint Hindu family, while sub-clause (2) provides for the renewal of bearer bonds.

Clause 12 introduces a definite procedure in cases in which adverse claims arise, and provides a means for their more expeditious disposal than is possible under the existing law.

Clause 13 provides for the conversion, consolidation or sub-division of Government securities, for which at present no specific provision exists.

Clause 14 provides for Government's liability being discharged in the case of bearer bonds and, in certain cases, of other securities, on payment, renewal, conversion, consolidation or sub-division, while the proviso safeguards the interests of third parties who may in certain cases be adversely affected as the result of proceedings under clause 12.

Clause 15 corresponds to section 13 of the existing Act, but includes provision for converted, consolidated or sub-divided securities.

Clause 16 introduces a procedure on the lines of sections 4 to 7 of the Government Savings Banks Act, 1873 (V of 1873), which will enable claims in respect of small holdings standing in the names of deceased persons to be expeditiously met.

Under *clause 17* Government takes power to prescribe the procedure to be followed in the case of securities held by minors or lunatics, and thereby to dispense with the formalities which under the existing law must attend transactions connected with securities so held.

Clause 18 provides for the taking of indemnities, and will cover cases in which there is reason to doubt a claimant's title though no adverse claimant has actually appeared.

Clause 19 places on a legal basis the confidential character of the books, registers, etc., maintained in the Public Debt Offices. The practice in England is to allow no inspection by the public, though a search is made at the request of *bona fide* applicants and the results reported to them. This is generally the practice followed in India, although at present it does not rest on any specific legal provision.

Clause 20 introduces a specific provision to penalise false statements made in proceedings in respect of securities for the purpose of obtaining payment or renewal and the like.

Of the rule-making powers enumerated in *clause 21* (2) (a), (b), (d), (e), (f), (g), (h), the second half of (j) and (o) correspond to and generally reproduce the rule-making powers conferred by section 14 of the existing Act. Of the remainder (c), (i) and (p) are consequential to clauses 7, 17 and 19, respectively, of the Bill, the first half of (j) being consequential to clause 18. (l) and (m) have been mentioned above under clause 3. (k) and (n) are new, and are designed to facilitate the procedure regarding the matters mentioned therein.

Sub-clause (3) of clause 21 has been adapted from the English law, and lays down the limits within which the recognition of trusts can operate, at the same time safeguarding the interests of beneficiaries.

R. A. MANT,*Secretary to the Government of India.*

DEPARTMENT OF COMMERCE AND INDUSTRY.**NOTIFICATIONS.****CUSTOMS DUTIES.**

Simla, the 1st November, 1919.

No. 9052.—In exercise of the power conferred by section 19 of the Sea Customs Act, 1878 (VIII of 1878), as amended by Act XII of 1914, the Governor General in Council is pleased to prohibit the bringing, by sea or by land, into British India of any copy of the Persian pamphlet entitled "Bolshevism and the Islamic body-politic" written by Mohamed Barakatullah.

CUSTOMS ESTABLISHMENT.

The 1st November, 1919.

No. 8931.—Mr. H. M. Willis, I.C.S., has been appointed to officiate as an Assistant Collector in the Imperial Customs Service, with effect from the forenoon of the 20th October 1919, and is posted to Bombay.

CUSTOMS-WAR.

The 1st November, 1919.

No. 9013.—The following extracts from the Board of Trade Journals, dated the 11th and 18th September 1919, are published for general information :—

Extract from the Journal dated the 11th September 1919.

GOVERNMENT NOTICES AFFECTING TRADE.**EXPORT AND IMPORT SECTION.****EXPORTS OF WOOL AND WASTES, NOILS, TOPS AND YARNS.**

The Board of Trade (Export Licence Department) give notice that applications will now be considered for Licences to export all classes of Wool, except Australasian Wools above 46's quality, in the form of—

- (a) Cased Wools.
- (b) Matchings.
- (d) Scoured in this country.

In the case of applications for other Australasian Wools (except Carbonised) exporters are reminded that it is necessary to state the Lot numbers and the Catalogue number of the Sale at which the Wool was purchased.

Samples should be submitted with applications in respect of all classes of Wool, except Australasian Wool in the original bales or purchased at Government Sales at Manor Row, Bradford.

Applications to export the following materials will also receive consideration :—

- Wool Waste.
- Wool Noils (except fine Crossbred Noils).
- Persian Wool Tops.
- Tops of 46's quality and under.
- Yarns.

Exporters should carefully note the following points :—

1. Licences for Fine Crossbred Noils and for Tops above 46's quality are granted only in exceptional circumstances and when specially allocated by the Supply Department.

Samples should be sent with all applications in respect of Waste Noils and Tops.

2. Delay may be experienced in the issue of licences for Yarns owing to the necessity of limiting, in the interests of home manufacturers, the monthly exports of Yarn.

It is highly desirable that holders of licences permitting the export of Yarn which it is not now intended to export should return such Licences for cancellation in order that the full rationed quantity may be exported.

This Notice supersedes all previous announcements, and due notice of any future changes in the export policy will be given in this Journal.

Applications for export licences, which must contain full descriptions of the materials to be exported, should be addressed to the Controller, Board of Trade (Export Licence Department), 1, Queen Anne's Gate Buildings, Westminster, S. W. 1.

Extract from the Journal dated the 18th September 1919.

GOVERNMENT NOTICES AFFECTING TRADE.

EXPORT SECTION.

EXPORTS OF CERTAIN COAL TAR PRODUCTS.

The Board of Trade (Export Licence Department) desire to draw attention to the fact that the export of—

“ Coal tar and derivatives thereof (except solvent naphtha, cresylic acid, and mixtures containing cresylic acid) suitable for use in the manufacture of dyes and explosives, whether obtained from coal tar or other sources, and mixtures and preparations containing such products or derivatives”,

is still prohibited to all destinations.

Certain coal tar products, such as :—

Naphthalene and its derivatives ;

Toluol and its derivatives ;

Picric acid ;

Xylol and its derivatives ;

Carbolic acid crystals ;

Anthracene oil ;

Benzol and its derivatives ;

Cresols (ortho, para and meta), and their derivatives ;

were originally mentioned by name in the British list of prohibited exports, but these prohibitions have now been merged in the inclusive prohibition on the export of coal-tar products. The export of Naphthalene, Toluol, Picric Acid, and the other coal-tar products above-mentioned, should therefore be regarded as prohibited to all destinations, and application for licences to export them should be addressed in the usual way to the Controller, Export Licence Department, 1, Queen Anne's Gate Buildings, Westminster, S.W.1.

No. 9016.—The following Board of Trade list, dated the 26th September 1919, on the subject of prohibitions of export from the United Kingdom, is published for general information :—

BOARD OF TRADE,
EXPORT LICENCE DEPARTMENT,
1, QUEEN ANNE'S GATE BUILDINGS,
WESTMINSTER, S. W. 1.

LIST OF EXPORT PROHIBITED GOODS, &c., 26th SEPTEMBER 1919.

This list cancels all similar lists and supplements issued by the Export Licence Department prior to the above date.

	Page.
List A. and B.	2121
List C.	2124
List D. and E.	2125
Open General Licences for Exports:	
APPENDIX No. 1	2125
General Information with regard to Export Regulations to certain Countries in Europe and on the Mediterranean	2126
Trade with Germany and Austria-Hungary	2131
Transshipment in the United Kingdom	2132

This consolidated “ List of Export Prohibited Goods ” is amended and issued fortnightly. Exporters who desire to have copies of each list posted to them during the current year can do so on payment of a registration fee of 2s. 6d. for one copy of each issue. Should more than one copy of each issue be required an additional payment should be made at the rate of 2d. per copy for each month up to the end of the current year.

Exporters who desire to have their names placed on the register should make application to the Stationery Clerk, Export Licence Department, enclosing Money Orders payable to the Export Licence Department, Board of Trade.

IMPORTANT NOTICE.

Application Form A for Licence to Export.

The Export Licence Department, having regard to the circumstances now existing, and subject to any further notification which it may hereafter become necessary to make, notifies Exporters that answers need only be given to the undermentioned questions which are set forth in the above-mentioned form of application.

- (a) Full name and address of Consignor.
- (b) Name and address of person or company to whom the licence is to be sent.
- (c)—1. Proposed date of despatch of goods.
2. Port of intended shipment in this country or post office of despatch.
- (d) Prospective port and country to which the goods are to be exported.

- (e) Route by which the goods are to be forwarded to ultimate destination.
 - (f) Full name and address of consignee abroad.
 - (h) State whether previous application has been made for all or part of the consignment, &c.
 - (i) Full description of goods—quantity, weight, value, number and description of packages and the shipping marks.
 - (t) Any special reasons in support of your request for a licence to export these goods.
- Instructions Nos. 1, 6, 7, 9 and 12 on page 4 of Application Form A are now cancelled.

P. S.—Should it be desired that in any exceptional case an answer should be given to any questions set forth in the Application Form but not appearing above, a notification will be addressed to the applicant concerned after the receipt of the relative application.

Application Form B for General Licences.

The use of Application Form B for making application for licence to export goods in several consignments over a certain period is no longer necessary. Form A can now be used when making application for either specific or general licence, provided that if a general licence is required a statement to that effect is endorsed on the Application Form A.

Applications for licences and all correspondence should be addressed to :—

**The Controller, Export Licence Department,
1, Queen Anne's Gate Buildings,
Westminster, S.W. 1.**

LIST A AND B.

 (A) Explosives ; *see*, however, page 2126 ; (19-11-18) (15-4-19).
 Fats, edible, *see* Oils.
 (A) Feeding stuffs containing molasses ; (21-2-19).
 (A) Firearms and their component parts ; (8-2-18) (29-11-18) (*see*, however, page 2126).
 (A) Fish except the following tinned, preserved or frozen fish, chinchards, sprats, herrings and cray fish ; (27-12-18) (30-5-19).
 (A) Salmon, tinned.
 (A) Flax, raw.
 Flour, *see* Bean ; Lentil ; Malt ; Maize ; Pea ; Rice ; Rye ; Wheat.
 Foodstuffs, *see* specific headings.
 Forage and food which may be used for animals, *see* specific headings as, e.g., Beans ; Cakes ; Hay ; Oats, &c.

* The following proprietary dyes may, however, be exported without licence to all destinations with which trading is permitted :—

Belly dyes Drummer dyes.
 Diamond dyes Dixon's home dyes.
 Mappes dyes.

- (A) Forage, green.
- (A) Fruit and fruit preserves, except olives, and except the following fresh fruit which may be exported without license to all destinations with which trading is permitted :—
 Apricots, grape fruit, green figs, grapes, peaches, pears, pine-apples, neotarines, imported plums (South African), and imported melons; (29-9-16) (15-1-17) (19-2-17) (10-1-19).
- Fuel, manufactured, *see* Coke.
- (A) Game.
- Gluten meal, or gluten feed, *see* Cakes and Meals.
- (A) Gold, coin and bullion.
- (A) Grains, Brewers' and Distillers'; (12-12-16).
- (A) Gram or dhol; (12-12-16).
- (A) Green forage; (12-12-16).
- (A) Grenades and component parts thereof; (10-5-17).
- Ground nut, or earth nut cake and meal, *see* Cakes and Meals.
- (A) Guanos, except whale guano; (2-2-17) (3-1-19).
- Guns, *see* Cannon, Firearms, Machine.
- Haricots, *see* Beans.
- (A) Hay.
- (A) Heliographs and their component parts; (2-7-18).
- Hempseed cake and meal, *see* Cakes and Meals.
- (A) Hides, British and Irish, cattle; (28-2-19) (8-7-19).
- Horses, *see* Animals.
- Hosiery needles, *see* Needles.
- Husk meal, *see* Cakes and Meals.
- (A) Indigo, synthetic; (6-8-18).
- Iron (1-5-17) the following :—
 Castings, *see* Armour plates.
- (A) Pig.
- (A) Scrap.
- (A) Jute, raw and carded; (12-3-17).
- (A) Lard of all kinds and imitation lard; (19-2-17) (10-5-17).
- Latch needles, *see* Needles.
- Lentil flour and meal.
- (A) Lime phosphate, *see* Phosphate Rock.
- Linseed cake, and meal, *see* Cakes and Meals.
- Livestock, *see* Animals.
- Locust bean meal, *see* Cakes and Meals.
- (A) Lupin seed; (12-12-16).
- (A) Machine guns, mountings for machine guns, and component parts thereof.
- (A) Maize; (12-12-16).
- (A) Maize germs; (12-12-16).
- Maize germ meal, *see* Cakes and Meals.
- Maize meal and flour, *see* Cakes and Meals.
- (A) Malt dust, malt flour, culms, sprouts or combings; (12-12-16).
- (A) Manures, compound, containing either sulphate of ammonia, superphosphate of lime, or potash; (2-1-17) (31-1-19).
- (A) Margarine; (19-2-17).
- Meals, *see* Barley; Bean; Cakes; Lentil; Pea; Rye; Wheat.
- (A) Meat of all kinds, except turtle meat and except tinned or potted meat, other than tinned bacon and tinned ham; (19-2-17) (7-2-19).
- Meat meal, *see* Cakes and Meals.
- (A) Mica block, mica sheets, and mica splittings; (22-6-17) (27-11-17).
- Middlings; *see* Offals of Corn.
- (A) Milk, condensed or preserved; (15-4-19).
- Mill dust and screenings, *see* Offals of Corn.
- (A) Millet; (12-12-16).
- (A) Mines and their component parts.
- Molasses, *see* Feeding Stuffs.
- (A) Mustard seed; (23-2-17).
- (A) Needles, hosiery machine, latch; (23-10-16) (18-10-17) (29-11-18).
- (A) Nicotine and its compounds; (6-8-18).
- (A) Nitrate bags (17-1-19).
- * Notes of the Bank of France; (27-8-18).
- (A) Notes, Russian rouble; (27-2-18).
- Nuts, *see* Ground Nut, Oleaginous.
- (A) Oats.
- Offals of corn and grain which may be used as food for animals, the following :—
- (A) Bran.
- (A) Middlings.
- (A) Mill dust and screenings.
- (A) Pollard.
- (A) Rice meal (or bran) and dust.
- (A) Sharps.
- (A) Oils and fats, edible, including blends of two or more edible oils or fats, except the following (which come under List C.) :—
 Hemp seed oil;
 Kapoo seed oil;
 Maize oil;
 Morah seed oil;
 Niger seed oil;
 Olive oil;
 Poppy seed oil;
 Rape seed oil;
 Shea butter;
 Sunflower oil;
 Dripping;
 Premier jus.
 (7-3-19) (28-3-19).
- Oil, cod liver, *see* Cod Liver Oil.
- (A) Oleaginous kernels, nuts, seeds, and products of all kinds; (12-3-17) (27-11-17).
- (A) Oleo-margarine; (19-2-17).
- (A) Onions.
- (A) Opium and its preparations.
- (A) Opium alkaloids and their salts and preparations.
- Ordnance, *see* Cannon; Carriages.
- Palmnut cake and meal, *see* Cakes and Meals.
- (A) Patent and proprietary cattle foods of all kinds.
- (A) Pea flour and meal.
- (A) Peas; other than split peas; (2-2-17) (25-4-19).
- (A) Periscopes and their component parts; (10-5-17).
- (A) Phosphate rock, namely :—Apatites; Phosphates of lime and alumina; (2-2-17).
- (A) Pigeon peas; (12-12-16).
- Pistols, *see* Firearms.
- Pollard, *see* Offals of Corn.
- Poonac cake, *see* Cakes and Meals.
- Poppy seed cake, and meal, *see* Cakes and Meals.
- (A) Potash, caustic, and articles containing caustic potash.

*Notes of the Bank of France are prohibited to all destinations except to destinations in France.

- (A) Potash, muriate, sulphate, and crude manurial potash salts, and mixtures containing any of these substances; (19-2-17) (17-1-19).
- (A) Potassium carbonate and mixtures containing potassium carbonate; (22-6-17).
- (B) Potassium permanganate.
- (A) Potatoes.
- (A) Poultry; (4-7-16) (29-9-16) (19-2-17). Preserves, *see* Fruit.
- (A) Projectiles of all kinds and their component parts.
- (A) Quinine sulphate; (20-6-19).
- (A) Range-finders and their component parts. Rapeseed, or colza seed cake, and meal, *see* Cakes.
- Rice meal (or bran) and dust, *see* Offals of Corn.
- (A) Rice and rice flour; (21-3-19). Rifles, *see* Firearms.
- Russian rouble notes, *see* Notes.
- (A) Rye, rye flour and meal. Salmon, tinned, *see* Fish.
- (A) Sausages, except tinned sausages; (2-2-17) (7-2-19). Screenings, *see* Offals of Corn.
- Scrap metal, *see* Iron; Steel.
- (B) Searchlights, and their component parts; (1-5-17). Seeds, *see* Lupin; Mustard; Beans, Peas and Cereals mentioned by name.
- Seeds, oleaginous, *see* Oleaginous.
- (A) Semolina. Sesame seed cake, and meal, *see* Cakes and Meals.
- Sharps, *see* Offals of Corn.
- Sheep, *see* Animals.
- Signalling apparatus, *see* Submarine.
- (A) Silver coin, British; (12-4-18) (29-11-18) (30-5-19). Skins, *see* Calf; Hides.
- Soya bean cake and meal, *see* Cakes and Meals.
- Spirits, *see* Whisky.
- (A) Steel, scrap; (1-5-17) (10-5-17).
- (B) Submarine sound-signalling apparatus.
- (A) Sugar, cane and beet; (10-5-17) (14-3-19); *see also* Confectionery.
- Sunflower seed cake, and meal, *see* Cakes and Meals.
- (A) Superphosphates.
- (A) Swords and their component parts.
- (A) Tea other than green tea; (22-6-16) (19-2-17) (2-7-18) (14-2-19) (28-2-19).
- (A) Tomatoes, fresh; (8-7-19).
- (B) Torpedoes and their component parts.
- (B) Torpedo nets.
- (B) Torpedo tubes.
- (A) Uniform clothing, naval, military and Air Force; (15-10-18) (7-3-19). Vegetables, *see* Onions; Potatoes; Tomatoes.
- Venison, *see* Game.
- (A) Vessels; (18-12-17).
- (B) Web equipment.
- (A) Whalebone; (1-5-17). Whale cake, *see* Cakes and Meals.
- (A) Whale fins; (1-5-17).
- (A) Wheat, wheat flour and wheat meal, and all articles, mixtures and preparations containing wheat, wheat flour, or wheat meal.
- (A) Whisky.
- Wool and Woollen Goods:—**
- (A) Wool, raw, and mixtures thereof; (8-9-16) (18-10-17). (*See also* Appendix No. 1 for camel hair, cashmere, alpaca and mohair.)
- (A) Wool tops and mixtures thereof; (18-10-17).
- (A) Wool noils and wool waste and mixtures thereof; (18-10-17).
- (A) Woollen and worsted yarn and mixtures thereof; (18-10-17). Yarns, *see* Wool.
- (A) Yeast; (8-9-16) (22-6-17) (28-2-19).

LIST C.

By Order of Council dated 1st October, 1918, as amended by Order of Council of the 24th December, 1918, the 7th January, 1919, the 7th February, 1919, the 11th February, 1919, the 28th February, 1919, the 11th April, 1919, the 29th April, 1919, and the 16th May, 1919, **ALL GOODS** (other than (1) printed matter and (2) personal effects accompanied by their owners) are prohibited from export to All Destinations in European Russia (except Russian ports on the Black Sea) and in other Foreign Countries in Europe and on the Mediterranean, except France and French Possessions, Italy and Italian Possessions, Belgium, Portugal, Greece, Serbia, Roumania, Iceland and the Faroe Islands, Spain, Morocco, Palestine and Syria as far north as a line from Alexandretta to Aleppo inclusive, and as far east as the Hedjaz railway inclusive, Czecho-Slovakia, Alsace-Lorraine, Luxembourg and the portions of Austria-Hungary in the occupation of the Armies of the Associated Governments, Occupied Rhineland territory, and to all Ports in any such Foreign Countries.

LIST C comprises **ALL GOODS** not included in List A or B, excepting the following goods which may be exported without licence:—

- (1) Printed matter;
- (2) Personal effects accompanied by their owners.

In addition to the above countries, trading is permitted with the following countries, to which List C goods may be exported without licence (*see, however, Lists D and E, below*) :—

Turkey, Bulgaria, Russian Black Sea ports, Austria-Hungary, Jugo-Slavia, Montenegro, Albania, Bosnia, Herzegovina, Dalmatia and Arabia.

Goods on List C may also be exported to the following countries without licence (*see page 2126*) :—

Denmark, Holland, Norway, Sweden, Switzerland, Esthonia, Finland, Germany, Lettland, Lithuania and Poland.

LIST D.

By Order of Council, dated 21st March, 1919, as amended by Order of Council of the 11th April, 1919, the 15th April, 1919, and the 9th May, 1919, the following goods on List D* are prohibited from export to Turkey, Bulgaria, ports on the Black Sea (not including Roumanian ports), Austria-Hungary, Jugo-Slavia, Montenegro, Albania, Bosnia, Herzegovina, Dalmatia and Arabia.

Aircraft of all kinds, including aeroplanes, airships, balloons and their component parts, together with accessories and articles suitable for use in connection with aircraft.	Field-glasses.
Apparatus which can be used for the storage or projection of compressed or liquefied gases, flame, acids or other destructive agents capable of use in warlike operations and their component parts.	Gases for war purposes.
Armour plates.	Guns and machine guns.
Armoured motor-cars.	Gun mountings.
Arms of all kinds, including arms for sporting purposes and their component parts.	Limbers, military waggons of all descriptions.
Barbed wire and implements for fixing and cutting same.	Harness or horse equipment of a military character.
Camp equipment, articles of, and their component parts.	Implements and apparatus designed exclusively for the manufacture of munitions of war or for the manufacture or repair of arms or of war material for use on land or sea.
Clothing and equipment of a distinctively military character.	Mines, submarines and their component parts.
Electrical appliances, adapted for use in war, and their component parts.	Projectiles, charges, cartridges and grenades of all kinds and their component parts.
Explosives specially prepared for use in war.	Range-finders and their component parts.
	Searchlights and their component parts.
	Submarine sound signalling apparatus.
	Materials for wireless telegraphs.
	Torpedoes.
	Warships, including boats and their component parts of such a nature that they can only be used on a vessel of war.

LIST E.

In addition to the goods contained in List D, the following goods on List E* are prohibited from export to Bulgaria.

All articles for use in transportation of land.	Locomotives and rolling stock.
Saddle or pack animals, vehicles, motor-cars, bicycles, and their component parts.	Telegraphs and telephones and their component parts, and materials for use therewith.

APPENDIX No. 1.

GENERAL LICENCES FOR EXPORTS.

- **An Open General Licence has been issued, permitting the exportation of the following goods (without application to the Export Licence Department) to all destinations except those Foreign destinations to which goods on List C (*see page 2124*) are prohibited from export.**

Alpaca, and noils, waste and yarns thereof.	Cashmere, and noils, waste and yarns thereof.
Beans, imported, other than Soya, Locust or Chinese horse beans.	Cement for building and engineering purposes.
Bird seed.	Chillies.
Blanc-mange powder.	Cocoa and milk, coffee and milk, chocolate and milk, sweetened or unsweetened, in tins.
Cake mixture.	Coffee, the following varieties :—
Camel hair, and noils, waste and yarns thereof.	Pernambuco.

* Many goods on the above Lists are already on List A or B.

West African.	Marmite.
Liberian.	Minced meat and mince pies.
Rio.	Mixtures and preparations containing not more than 10 per cent. aniline colour, not otherwise prohibited.
Bahia.	Mohair and noils, waste and yarns thereof.
Victorian.	Paisley flour.
Custard powder.	Paint, other than gold paint.
Dates.	"Phosio" animal food.
Gloy.	Pudding powder.
Koffio.	Puddings.
Lactol.	Vanilla custard.
Lactogol.	
Mango chutney, tomato chutney, and tomato ketchup.	

SAMPLES.

An open general licence has been issued which permits the free export of all *bona-fide* samples of prohibited goods to all non-enemy destinations, and to enemy territory with which trade is now permitted (*see page 2124*). Samples exported under this licence may be used only for genuine sample purposes, *i.e.*, for obtaining orders from foreign buyers, and may not be sold except with the written consent of the Export Licence Department, but such consent may be dispensed with when it is desired to sell the articles in the country of destination after they have fulfilled their purpose as samples. Exporters will be required to satisfy the Customs Authorities that the goods presented for export under this licence are *bona-fide* samples, and to make a declaration to that effect on the relative shipping documents.

This notice only applies to samples of goods which require licences for export to the particular destination concerned.

In addition, the consent of the Export Licence Department is not required for the sale of samples which, though within this scheme at the actual time they were exported, could be exported outside the scheme at the actual time of the proposed sale.

OPEN GENERAL LICENCE FOR THE EXPORT OF EXPLOSIVES, DOUBLE-BARRELED GUNS, etc.

An Open General Licence has been issued for the export of cartridges, charges, etc., industrial explosives, double-barrelled guns and sporting rifles, to the destinations given below, to which, therefore, exports may be made subject to the usual Customs formalities without applications for specific licences to the Export Licence Department:—

British Possessions and Protectorates.	Africa.
French Possessions and Protectorates.	Japan and Korea.
United States of America.	Asiatic Russia.
South America.	

France, Belgium, Spain, Portugal, Greece, Italy, Serbia, Roumania, Norway, Sweden and Denmark.

The issue of this licence does not relieve exporters from the necessity of obtaining import permits from the country of destination in cases where local regulations render such a course necessary.

General information with regard to Export Regulations to certain Countries in Europe and on the Mediterranean.

Albania.

Licences are only required for goods on Lists A, B and D. Licences will not, as a rule, be granted for goods on List D except as provided in Note (iii), page 2130. Any available route may be adopted at the option of the exporter.

There is no parcel post service at present.

Alsace-Lorraine.

Licences are only required for goods on Lists A and B. Goods may be exported by any available route at the option of the exporter.

There is no parcel post service at present.

Arabia.

Licences are only required for goods on Lists A, B and D. Licences will not, as a rule, be granted for goods on List D (except as indicated in Note (iii), page 2130).

See page 2130.

Asia Minor (*see* Turkey).**Austria-Hungary.**

Trade is now permitted with all portions of the late Austro-Hungarian Empire.

Licences are only required for goods on Lists A, B and D. Licences will not, as a rule, be granted for goods on List D (except as indicated in Note (iii), page 2130).

Goods may be exported *via* any available route.

Parcels will now be accepted by the Post Office for transmission to Austria (States of Upper and Lower Austria, Styria, Carinthia, Salzburg, Northern Tyrol, Vorarlberg and Liechtenstein, Trentino, Istria and Dalmatia).

For the portions of the late Austro-Hungarian Empire now incorporated in Italy, Czechoslovakia, Poland and Jugo-Slavia, *see* notes applicable to those countries.

See also page 2130.

Belgium.

Licences are only required for goods on Lists A and B.

Belgian import licences are required in respect of arms of all kinds, sugar, wheat (grain and flour) and coal.

Bulgaria.

Licences are required for goods on Lists A, B, D and E. Licences will not, as a rule, be granted for goods on Lists D and E except as provided in Note (c).

Any available route may be adopted at the option of the exporter.

Czecho Slovakia (*including any portions of Silesia and Galicia allotted to Czecho-Slovakia*).

This territory consists, broadly speaking, of the former Austrian provinces of Bohemia and Moravia, and the northern part of Hungary-Slovakia.

Licences are only required for goods on Lists A and B.

Goods may be exported *via* Hamburg and the Elbe, provided they are consigned to the Czechoslovak Government's Trade Office, Welschhaus 12, Schaarsteinwegsbucke, Hamburg, for further transhipment to the actual consignee in Czechoslovakia. Czechoslovak Import Licences should reach the Hamburg Office from the consignee previous to the shipment of goods. A duplicate set of shipping documents should be forwarded in advance to that Office. Goods may also be exported *via* any other available route.

All shipments to Czechoslovakia are subject to Import Licences, issued by the Import and Export Commission in Prague. Applications have to be made by consignees.

Denmark.

Licences are only required for goods on Lists A and B.

No certificates from the Danish Associations need be produced.

Exporters should satisfy themselves in all cases that the goods are not subject to any Danish import prohibition.

Esthonia (principal port—Reval).

Licences are only required for goods on Lists A and B. The support of the Esthonian Legation is no longer required.

There is no parcel post service at present.

Finland.

Licences are only required for goods on Lists A and B. Exporters should instruct their consignees to obtain any import licence that may be necessary.

Any available route may be adopted at the option of the exporter.

France.

Licences for exports are only required for goods on Lists A and B. Exporters are warned that French import licences are required for many classes of goods. Full information may be obtained from the French Customs Office, Bank Buildings, Kingsway, London, W.C. 2.

Germany.

Licences are only required for goods on Lists A and B.

Goods may be exported by any available route at the option of the exporter.

An import licence is required for the importation by parcel post into unoccupied Germany of goods other than newspapers, periodicals, books, and foodstuffs. Before goods other than those mentioned are despatched, therefore, the sender should apply to the Imperial Commissary for Export and Import Licences, Luetzowufer-6-8 Berlin, W. 10, with a view to ascertaining whether the German Authorities are actually prepared to admit the parcel.

For the occupied territory in the Rhineland (*see* Note (ii), page 2130.)

See also page 2130.

Greece.

Licences are only required for goods on Lists A or B. Any available route may be adopted at the option of the exporter.

Holland.

Licences are only required for goods on Lists A and B.

Consignment to the Netherlands Oversea Trust is no longer necessary.

Italy.

Licences are only required for goods on Lists A and B. Exporters are warned that Italian import licences are required for many classes of goods; full information may be obtained from the Italian Government Commission, West Africa House, Kingsway, W.C. 2.

Any available route to Italy may be adopted at the option of the exporter.

Jugo-Slavia.

Licences are only required for goods on Lists A, B and D. Licences will not, as a rule, be granted for goods on List D [except as indicated in Note (iii), page 2130].

Any available route may be adopted at the option of the exporter.

There is no parcel post service at present, except to Dalmatia.

Lettland (Latvia) (principal port—Libau).

Licences are only required for goods on Lists A and B. Applications to export goods on Lists A and B will be considered in the usual way.

There is no parcel post service at present.

Lithuania (principal port—Riga).

Licences are only required for goods on Lists A and B. Applications to export goods on Lists A and B will be considered in the usual way.

There is no parcel post service at present.

Luxembourg.

Licences are only required for goods on Lists A and B.

Goods may be exported by any available route at the option of the exporter.

Montenegro (*see* Jugo-Slavia).**Norway.**

Licences are only required for goods on Lists A and B.

No certificates from the Norwegian Associations, or other form of guarantee, need be produced.

Exporters should satisfy themselves in all cases that the goods are not subject to any Norwegian import prohibition.

Palestine.

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

Poland (*including any portions of Silesia and Galicia allotted to Poland*).

Licences are only required for goods on Lists A and B.

Exporters should satisfy themselves in all cases that the goods are not subject to any Polish import prohibition, *see* Note (iv), page 2131.

There is no parcel post service at present.

Portugal.

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

Roumania.

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

Exporters should satisfy themselves in all cases that the goods are not subject to any Roumanian import prohibition.

Russia (Asiatic).

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

Russia (European).

(a) *Northern District—approached via *Archangel or the Murman Coast.*

Licences are required for all goods, except "free" goods (a list of which can be had on application to the Stationery Clerk, Export Licence Dept.) and except "foodstuffs" on List C. All goods imported into Northern Russia must be for consumption in the districts of Archangel and Murmansk, and they must be consigned to the British Supply Mission at Archangel or Murmansk for account of a sub-consignee. Exporters are warned that import licences must be obtained by consignees from the Archangel Government before they can take delivery of the goods.

(b) *Southern District—approached via Batoum and Novorossisk on the Black Sea and Taganrog on the Sea of Azov.*

Licences are only required for goods on Lists A, B and D.

There is no parcel post service at present.

(c) *Other Districts.*

No licences are being granted at present.

Serbia.

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

There is no parcel post service at present.

Spain.

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

Sweden.

Licences are only required for goods on Lists A and B. No certificates from the Swedish Handels Kommission, or other forms of guarantee, need be produced.

Exporters should satisfy themselves in all cases that the goods are not subject to any Swedish import prohibition.

Switzerland.

Licences are only required for goods on Lists A and B. Consignment to the Société Suisse de Surveillance Economique is no longer necessary.

Any available route may be adopted at the option of the exporter.

With regard to exports to Switzerland under the British Re-export Scheme, goods may now be exported without licence, and without consignment to H.M. Consul at St. Gall, but it will be necessary for exporters to communicate with the Department of Import Restriction, 22, Carlisle Place, S.W. 1, in connection with the necessary import certificate for the re-admission of the goods into this country.

Syria (as far north as a line from Alexandretta to Aleppo inclusive, and as far east as the Hedjaz railway inclusive).

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

A Parcel Post Service is in operation as far north as Alexandretta but not east of Aleppo.

* It is understood that there are no shipping facilities for Archangel at present.

Turkey (including Asia Minor).

Licences are only required for goods on Lists A, B and D. Licences will not, as a rule, be granted for goods on List D except as provided in Note (iii), page 2130.

Any available route may be adopted at the option of the exporter.

Parcels for civilians in European Turkey (Constantinople) are accepted if they are addressed "Poste Restante, British Army Post Office, Constantinople", and parcels for civilians in Smyrna are accepted if they are addressed "Poste Restante, British Post Office, Smyrna."

NOTES.**FOODSTUFFS.**

(i) Foodstuffs should be regarded as including all articles intended for use as human food, including articles to be manufactured into human food and including beverages and spices.

Crefeld), Grevenbroich, Heinsberg (Rheinland), Hülchrath, Jülich Kaldenkirchen, Kempen (Rhein), Linn, Mörs, München-Gladbach, Neuss, Odenkirchen, Randerath, Rheydt, Steinstrass, Stolberg (Rheinland), Viersen, Wevelinghoven, Xanten.

GOODS ON LIST D.

(iii) Consideration will be given to applications in respect of the following goods on List D, if there is clear evidence that the shipments are destined for commercial purposes:—

Barbed wire and implements for fixing and cutting same.

Camp equipment, articles of, and their component parts.

Clothing and equipment of a distinctly military character.

Electrical appliances, adapted for use in war, and their component parts.

Military waggons of all descriptions.

Harness or horse equipment of a military character.

EXPORTS TO POLAND.

(iv) In order to facilitate the re-establishment of commercial relations between Great Britain and Poland, the Polish Commercial and Financial Agency, 88, Kingsway, London, W.C. 2, has been duly authorised to issue Import Permits. The applicant for an Import Permit must fill in the four forms with which he will be supplied, and return them with the original invoice and four copies thereof.

It must be noted that all goods intended for Poland must be addressed to:—

The Polish Government Import and Export Commission, Elektoralna 2, Warsaw (for the ultimate consignee).

The charges for this Import Permit are five shillings stamp duty, and £1 per thousand pounds sterling of the total value of the goods to be imported, which must be paid upon receipt of the Permit.

The Import Permit does not exempt the goods from any Custom dues or other taxes imposed by the Polish Government.

Due notification will be given of any alteration in these regulations.

TRADE WITH GERMANY, AUSTRIA, HUNGARY AND ARABIA.

In view of the raising of the blockade, the Board of Trade have issued General Licences under the Trading with the Enemy legislation authorising, with certain reservations, the resumption of trade with Germany, Austria, Hungary, and Arabia.

The Licences do not remove the existing restrictions upon the payment of debts and the return of property due or deliverable to persons in Germany, Austria, Hungary, and Arabia in respect of pre-war transactions.

The Licences do not permit the importation from Germany or Austria-Hungary of any goods included in the Prohibition of Import Proclamations and not covered by a General Licence issued under those Proclamations. Information with regard to imports into the United Kingdom can be obtained from the Import Restrictions Department, 22, Carlisle Place, S.W. 1. Further, Export Licences must be obtained from the Export Licence Department, 1, Queen Anne's Gate, Westminster, S.W. 1, before goods included in Lists A and B of prohibited exports are shipped to those countries, but no licences are required in respect of goods included in List C.

The text of these General Licences is as follows:—

The Board of Trade, on behalf of His Majesty, and in pursuance of the powers reserved in the Trading with the Enemy Proclamations and all other powers thereunto them enabling, do hereby give and grant licence to all persons and bodies of persons resident, carrying on business, or being in the United Kingdom, to trade and have commercial and financial transactions with persons or bodies of persons resident or carrying on business in Germany/Austria/Hungary:

Provided always that any licence which may be necessary in respect of any transaction under any prohibition of export or prohibition of import for the time being in force in the United Kingdom or in respect of any remittance of money out of the United Kingdom covered by Regulation* 41D of the Defence of the Realm Regulations is first obtained:

Provided also that this licence shall not permit any person or body of persons to pay to or for the benefit of any person or body of persons resident or carrying on business in Germany/Austria/Hungary any sum of money which by the terms of the Trading with the Enemy Amendment Acts, 1914 and 1915, or either of them, is required to be paid to the Custodian appointed under the Trading with the Enemy Amendment Act, 1914, but such sums of money must be paid to the said Custodian:

Provided further that this licence shall not permit any person or body of persons to pay or deliver any sum of money or property which is, or but for the war, would have been due or deliverable to any person or body of persons resident or carrying on business in Germany/Austria/Hungary in respect of a transaction entered into before the outbreak of war:

A General Licence with regard to Arabia has been issued, dated the 19th August 1919.

URGENT ORDERS.

The Board of Trade, Export Licence Department, announces that, in collaboration with the Department of Overseas Trade, an arrangement has been made whereby firms receiving orders which require immediate acceptance may telegraph details of any such order to the Department of Overseas Trade in order to ascertain whether a licence will be granted for the export of the goods if the order is accepted.

* Regulation 41 D of the Defence of the Realm Regulations is now cancelled.

In the event of an applicant being promised a licence he will be enabled to deal with the order straightaway with the knowledge that upon application being made in the proper form to the Export Licence Department the licence will be granted.

The telegrams should be addressed to "Orders, c/o Advantage, Stock, London." They should give in each case in addition to the name and postal or telegraphic address of the applicant the quantity and description of the goods comprised in the order and the name and address of the ultimate consignee if the goods are destined for a neutral country. In the case of orders from Allied or British Territory or from Territory in the occupation of troops of the Associated Governments, the consignee need not be stated; and it will be sufficient merely to give the country of destination. A reply of 24 words (1/3) must be prepaid.

Applicants are requested in their own interest to confine their enquiries to orders needing a very urgent decision, since the fewer the enquiries the more promptly can answers be given.

Any subsequent correspondence that is necessary in connection with the telegraphic enquiries should be addressed to the Comptroller General, Department of Overseas Trade (Export Facilities Section), 4, Queen Anne's Gate Buildings, Westminster, S W. 1.

TRANSHIPMENT IN THE UNITED KINGDOM.

The provisional approval of the Export Licence Department should be obtained before the following goods are brought to this country for transhipment:—

Bacon, ham and lard of all kinds.

Butter and cheese.

Cereals on Section "A" of the list of prohibited exports.

Animal feeding stuffs on Section "A" of the list of prohibited exports.

Seeds, oils and fats on Section "A" of the list of prohibited exports.

It is not now necessary to make application to the Collector of Customs at the transhipment ports on Form S. 90 for the transhipment of any goods except those specified in the following list:—

Foodstuffs for animal or human consumption which are on Section "A" or "B" of the list of prohibited exports (including tea, coffee and cocoa).

Seeds, oils and fats on Section "A" of the list of prohibited exports.

Synthetic dyestuffs.

Ergot.

Quinine sulphate.

Caustic potash.

Potassium carbonate.

Wool, raw, and mixtures thereof.

Wool-tops and mixtures thereof.

Woolen and worsted yarn and mixtures thereof.

EMIGRATION.

The 1st November, 1919.

No. 8909.—In pursuance of section 116-A., sub-section (4) of the Assam Labour and Emigration Act, 1901, as amended by the Assam Labour and Emigration (Amendment) Act, 1915, the Governor-General in Council is pleased to approve, with effect from the 22nd September 1919, of the election of Mr. R. A. Towler to be a member of the Assam Labour Board as a representative of the Indian Tea Association, Calcutta, and of the Indian Tea Association, London, *vice* Mr. John Leslie deceased.

POST AND TELEGRAPH ESTABLISHMENTS.

The 1st November, 1919.

No. 8990.—Mr. W. A. Roussac, Postmaster-General, 3rd grade, Bihar and Orissa, is appointed to officiate in the 2nd grade, *vice* Mr. J. Monteath, I.C.S., Postmaster-General, 3rd grade, officiating in the 2nd grade, on privilege leave. This is in continuation of this Department Notification No. 6937, dated the 6th September 1919.

TELEGRAPHS.

The 1st November, 1919.

No. 9074.—In exercise of the powers conferred by section 7 of the Indian Telegraph Act, 1885 (XIII of 1885), the Governor-General in Council is pleased to direct that the following amendments shall be made in the rules published with the notification of the Government of India in the Department of Commerce and Industry, No. 6975-137 (Telegraphs), dated the 16th September 1909, as subsequently amended, namely:—

I. For rule 8 of the said rules the following shall be substituted, namely:—

"3. An *Express* telegram will be accepted on payment of late fees for transmission during the hours when the office at which it is handed in, or the office to which

it is addressed, or an intermediate office through which it must pass is closed, provided the attention of the closed office or offices concerned can be gained. The late fees will be at the rate of one rupee for each closed office which is required to deal with the telegram and will be paid to the telegraphists in those offices. If the same sender presents, or causes to be presented, several telegrams together for despatch at an office which is closed, a single late fee only is payable in respect of that office and in addition a single late fee is payable for each closed intermediate office or office of destination. If the attention of a closed office cannot be gained the late fee collected for that office will be refunded, but no refund will be made of the late fee for an office which has already dealt with the late fee telegram or telegrams as the case may be.

Exception.—At places where there is more than one telegraph office, only one will ordinarily be available for use by the public during closed hours. The other telegraph offices at such a place will not accept telegrams for despatch, even on payment of late fees, but will exhibit a notice outside the office directing intending senders of telegrams to the nearest open telegraph office, or if there is no open telegraph office, to the nearest telegraph office which is available for the despatch of telegrams on payment of late fees."

II. In rule 36 of the said rules for the words "Native States" the words "Indian States" shall be substituted.

III. In rule 42 of the said rules for the words "receipt and despatch" the words "receipt or despatch" shall be substituted.

IV. For the first paragraph of sub-rule (1) of rule 148 of the said rules the following shall be substituted, namely:—

"Complaints respecting telegrams and claims for refund involving complaints against the service should be addressed to the Director General of Posts and Telegraphs, Traffic Branch, Calcutta. Claims for refund respecting telegrams which do not involve complaints against the service should be addressed to the Deputy Accountant General, Telegraph Check Office, Calcutta. Claims for refund or complaints respecting telegrams should be made within two months from the date of the telegram."

For sub-clause (ii) of clause (2) of rule 355 the following shall be substituted, namely:—

"(ii) that in India complaints respecting telegrams and claims for refund involving complaints against the service should be addressed to the Director-General of Posts and Telegraphs, Traffic Branch, Calcutta. Claims for refund respecting telegrams which do not involve complaints against the service should be addressed to the Deputy Accountant-General, Telegraph Check Office, Calcutta."

A. H. LEY,

Secretary to the Government of India.

DEPARTMENT OF EDUCATION.

SIMLA :

The 30th October 1919.

F. H. G. HUTCHINSON, Lieut.-Col., I.M.S.,

Sanitary Commissioner with the Government of India.

H. SHARP,

Secretary to the Government of India.

No. 558-E.A.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ESTABLISHMENTS.

Simla, the 22nd October 1919.

RESOLUTION.

In the Resolutions of the Government of India in the Public Works Department, cited in the margin,* revised scales of pay for the members of the Engineer establishments employed in the Public Works Department and State Railways were promulgated, together with certain measures of re-organization consequent thereon. The Government of India have lately had under consideration the question of the adequacy or otherwise of these scales, and they have arrived at the conclusion that, under present conditions, the existing rates of pay are insufficient. The Governor General in Council, with the approval of His Majesty's Secretary of State for India, is, therefore, pleased to sanction the following revised scales of pay with effect from the 30th August 1919, the date upon which the Secretary of State's orders upon the subject were received in India. They are not applicable to engineers employed on State Railways, whose case is separately under consideration.

Assistant and Executive Engineers.	IMPERIAL SERVICE.		PROVINCIAL SERVICE.	
	Senior scale.	Junior scale.	Senior scale.	Junior scale.

22nd " ...	1,500	...	1,200	...
23rd " ...	1,600	...	1,250	...

Superintending Engineers.—Rs. 1,750—100—2,150 for both Imperial and Provincial Services.

Chief Engineers.—Rs. 2,750—125—3,000 for both Imperial and Provincial Services.

2. The increments will be given for approved service only, but after the first increment has been admitted by the local Government or Administration under which the officer is serving, subsequent increments may be drawn on the date on which they are due and may be admitted in audit without sanction of higher authority, provided that the local Government or Administration has not issued an order withholding the increment in any particular case, and subject to the provisions of paragraph 3 below.

3. Pay on the junior scale will be drawn by officers holding charges of less importance than a divisional charge, but no such officer will be allowed to draw more than the pay of the 8th year of service on the junior scale unless he is reported to be fully qualified for the charge of a division.

4. Pay on the senior scale will be drawn by officers holding charges of not less importance than the charge of a division.

5. Permanent service rendered in the ranks of Chief and Superintending Engineers will count towards increments, except in the case of officers promoted to the rank of Superintending Engineer before their seniors in the ordinary line on special conditions as regards relative seniority.

6. The initial salary which each officer now in the service will draw under the new scales of pay will be determined by his local Government. In determining the initial pay under the new scales it should be understood that, though local Governments are accorded full power to fix the pay of any officer within the maximum admissible for his length of service, no officer whose promotion has been retarded in the past is by reason of length of service entitled to claim a higher rate of pay under the new scales than that admissible to the officer immediately above him in the seniority list.

ORDERED that this Resolution be forwarded to the local Governments, Administrations and officers noted below, for information, and that it be published in the *Gazette of India* for general information.

The Government of Madras, Public Works Department.

The Government of Bombay, Public Works Department.

The Government of Bengal, Public Works Department.

The Government of United Provinces of Agra and Oudh, Public Works Department.

The Government of the Punjab, Public Works Department.

The Government of Burma, Public Works Department.

The Government of Bihar and Orissa, Public Works Department.

The Hon'ble the Chief Commissioner of the Central Provinces.

The Hon'ble the Chief Commissioner of Assam.

The Hon'ble the Chief Commissioner and Agent to the Governor General, North-West Frontier Province.

The Hon'ble the Resident at Hyderabad.

The Hon'ble the Agent to the Governor General for Central India.

The Hon'ble the Agent to the Governor General for Rajputana.

The Hon'ble the Agent to the Governor General and Chief Commissioner, Baluchistan.

The Chief Commissioner of Coorg.

The Chief Commissioner of Delhi.

Ordered also that this Resolution be communicated to the Home, Finance, Revenue and Agriculture, Commerce and Industry, Railway and Army Departments of the Government of India.

By order,

F. C. ROSE,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 30th October 1919, based on the Indian Daily Weather Reports of the period.

1. The disturbance which lay off Cocanada on the morning of the 23rd crossed the coast during the day. It affected the weather in the Central Provinces and northeast India between the 23rd and 25th, when fairly widespread rain fell in these areas. Rainfall occurred daily in the south of the Peninsula and extended occasionally into the Konkan and the Bombay Deccan; the monsoon was, however, weaker than usual.

2. *Burma*.—In Upper Burma local rain fell on the 24th and 26th, and there were a few falls on two other days. In Lower Burma a few scattered falls occurred daily except on the 27th.

Northeast India, including Orissa.—In Chota Nagpur rainfall was nearly general on the 24th, and occurred locally or at individual stations on two other days. Local rain fell in Assam on 24th and 25th, in Bengal on the 24th and in Orissa on the 23rd and 24th; there were a few falls on one other day in Assam and Orissa, and on two other days in Bengal. In Bihar the week was rainless except for a fairly heavy fall at Naya Dumka.

The United Provinces, Central India and the Central Provinces.—There was no rain during the week in the United Provinces and Central India. In the east of the Central Provinces rainfall was nearly general on the 23rd, and occurred at a few stations on the 24th; in the west of the Central Provinces, Nagpur and Seoni received rain during the 23rd and 24th.

Northwest India.—Weather was dry.

The Peninsula.—Rainfall was nearly general in Mysore on the 24th, in Malabar on the 25th, 27th and 29th, and in southeast Madras on the 28th; rain fell locally or at a few stations during the rest of the week in southeast Madras, and on three other days in Mysore and Malabar. Local rain fell in the Konkan and the Bombay Deccan on the 26th, in the Madras Deccan on the 28th and on the north Madras coast on the 23rd; there were a few falls on one other day in the Bombay Deccan, on two other days in the Konkan and on three other days on the north Madras coast.

3. The chief amounts of rainfall reported were as follows:—

October 23rd.	Hazaribagh 2.12", Nagpur 1.15", Pendra 3.27", Raipur 1.03", Kodaikanal 1.33", Coimbatore 1.20" and Calingapatam 2.94".
" 24th.	Monywa 0.96", Maymyo 0.53", Barisal 1.44", Jessore 0.80", Naya Dumka 1.25" and Mercara 1.99".
" 25th.	Cox's Bazar 1.31", Narayanganj 0.95" and Coimbatore 1.12".
" 26th.	Monywa 1.58".
" 27th.	Mandalay 2.29", Ratnagiri 0.72", Cochin 1.62" and Trivandrum 1.15".
" 28th.	Pamban 0.68", Negapatam 1.35", Madras 1.40" and Nellore 0.78".
" 29th.	Mercara 1.49", Cochin 1.03", Pamban 1.40", Negapatam 3.08" and Kodaikanal 1.81".

4. The week's rainfall was 20 per cent. or more in excess in Chota Nagpur, Bihar and the Central Provinces East; and was 20 per cent. or more in defect in Lower Burma, Assam, Bengal, Orissa, the United Provinces, Kashmir, Rajputana East, Gujarat, Central India, Berar, the Konkan, the Bombay Deccan, Hyderabad, Mysore, Madras Southeast, the Madras Deccan and the Madras Coast North. It was either equal to the normal or differed from it by less than 20 per cent. in the Bay Islands, Upper Burma, the Central Provinces West and Malabar. No rain usually falls at this time of year in the Punjab, the North-West Frontier Province, Baluchistan, Sind and Rajputana West.

The rainfall from the 2nd May to date is 20 per cent. or more in defect in the Bay Islands, Kashmir, Sind and Hyderabad North; and is 20 per cent. or more in excess in Chota Nagpur, Baluchistan, Rajputana West, Central India and the Central Provinces West. In the remaining divisions the rainfall of the period differs from the normal by less than 20 per cent.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
25th October 1919.

Burma.—During the week light to moderate rain was general throughout the Province. In Lower Burma all operations for winter rice have been completed, while in Upper Burma reaping of autumn rice, gathering of ground-nuts and plucking of cotton continue. The condition of standing crops in Lower Burma and in irrigated tracts of Upper Burma is generally good. More rain is wanted in the deltaic and dry zone districts. The health of cattle is generally good. The price of unhusked rice in Rangoon remains unchanged at Rs. 150 and that of white rice for (specials) at Rs. 385.

Assam.—During the week the weather was seasonable but rain is wanted in the Surma Valley. Plucking of tea, sowing of pulses, and ploughing for mustard are in progress. Prospects of crops are fair. Cattle disease is reported from three districts. The price of common rice continues to fall.

Bengal.—The week was rainless. Some rain now, especially in western districts, would be highly beneficial to winter paddy which is just coming into ears. Preparatory tillage for spring crops continues. Harvesting of early winter paddy and sowing of potatoes, oilseeds and pulses have commenced. The average price of common rice for the Province has fallen by about 1.50 per cent. One thousand two hundred and eighty persons received gratuitous relief in the Brahmanbaria Subdivision of Tippera.

The weekly report on famine in Bankura is as follows:—No rain fell during the week. Agricultural prospects are favourable but paddy on high land has suffered for want of rain. Relief works were closed. Numbers on special relief:—weavers 555, better class poor 2, total 557. Four hundred persons were relieved on daily doles by charitable societies. The public health, on the whole, is good. Outbreak of malaria is reported. The price of common rice varies from 5 to 5½ seers per rupee. Burma rice is being sold.

Bihar and Orissa.—During the week light to moderate rain was general in Orissa and Chota Nagpur but the rainfall was scattered in Bihar, light falls being reported from Gaya, Shahabad, Monghyr and the Santal Parganas. Harvesting of autumn crops is nearly finished. Threshing is going on. Preparation of lands for and sowing of spring crops are in progress. Standing paddy crop is doing very well. More rain is needed in parts of Darbhanga, Balasore, Sambalpur and Singhbhum. Gratuitous relief was given to 3,777 persons in Bhagalpur Sadar, 7,550 in the Santal Parganas, 5,763 in Angul, 4,884 in Cuttack, 7,099 in Puri and 551 in Hazaribagh. The number of persons attending relief works was 258 in Bhagalpur Sadar and 899 in the Santal Parganas. The price of common rice has risen in nine districts, fallen in five and remained stationary in the remaining districts as compared with that of the preceding week. The average price of local common rice at headquarters was 5.42 seers a rupee against 5.51 in the preceding week and that of maize 7.97 seers against 8.19 seers in the preceding week. Cattle disease is reported from nine districts. During the week ending the 18th October, 16,842 persons were given gratuitous relief and 4,977 attended test works in nine Feudatory States of Orissa—viz:—Athgarh, Baramba, Dhenkanal, Hindol, Narsinghpur, Nayagarh, Bamra, Daspalla and Khandpara.

The weekly report on famine is as follows:—Famine tracts are unchanged. For week ending the 25th October in Angul including undeclared areas the number of persons gratuitously relieved was 4,763. In Bhagalpur Sadar relief workers were 258 and persons gratuitously relieved by poor houses, orphanages, village doles and kitchens 4,602, total under relief 4,860. In Banka relief workers were 113 and persons gratuitously relieved by poor houses, kitchens and village doles 13,928, total under relief 14,041. In Deoghar relief workers were 899 and persons gratuitously relieved by village doles 7,529, total under relief 8,428, grand total under relief 32,092. Conditions at Bhagalpur and Deoghar have much improved. Operations in those places are expected to be closed soon.

United Provinces.—During the week insignificant rain fell in Kheri but none elsewhere. Preparation of lands for and sowing of spring crops, harvesting of autumn crops, irrigation of late rice crops and picking of cotton continue. Standing crops are doing well. Prospects are favourable. Agricultural stock is in good condition. Cattle disease is slight. Fodder, water and market supplies are sufficient. Prices are mostly stationary.

Punjab.—During the week the weather remained dry. Rain is urgently wanted for spring sowings and for standing crops which are suffering from drought. Standing crops are average to good on irrigated and below average to average on unirrigated areas. Picking of cotton and reaping of other autumn crops continue. The expected yield is normal to good on irrigated and below normal to normal on unirrigated areas. Cotton is reported to have been slightly damaged by insects in two districts. Sowings of spring crops are in progress and are below normal to normal. Cattle are healthy and fodder and water are generally sufficient. Prices have risen slightly in some districts and are stationary in others. They are generally above scarcity rates. Prices of wheat:—Rawalpindi 6½, Ferozepore and Lyallpur 6½, Lahore 7 and Ambala 7½ seers per rupee.

North-West Frontier Province.—During the week light showers fell in one taball. Sowing of spring crops and harvesting of certain autumn crops are in progress. The outturn of cotton is below average in Peshawar. Standing crops are generally average but prospects of crops on unirrigated areas in one district are reported to be poor. Prices of wheat:—Peshawar 7½ and Dera Ismail Khan 6½ seers per rupee.

Jammu.—No rain fell during the week. Prices are stationary. Fodder is sufficient.

Kashmir.—During the week the weather was generally dry and cold. Fodder is sufficient. Cattle disease at Gurez and cholera at Handwara are subsiding. Prices are fluctuating. Harvesting of autumn crops is concluding with fair outturn.

Rajputana.—During the week the weather was hot and clear. Harvesting of autumn crops is nearing completion with outturn fair to good. Spring sowings are progressing. Pasturage and water are abundant. The condition of agricultural stock is good except in Kotah. Prices are stationary.

Central India.—No rain fell during the week. Harvesting of autumn crops and ploughing for and sowing of spring crops are in progress. Standing crops are in fair to good condition and their probable outturn is in fair to good except in Bhilsa where it is bad. Agricultural stock is generally good except for cattle disease in parts of Gwalior, Indore, Baghelkhand and Malwa. Prices are high.

The weekly report on famine in Bundelkhand is as follows:—Distress is not acute. Numbers on relief are decreasing. People are reverting to agricultural operations. No wandering or emaciation is reported and relief measures are adequate. Suspensions of land revenue are being granted. Takavi advances are sufficient. The public health is generally good. Prices range from 5½ to 7½ seers per rupee, save in Chhatarpur and Garauli where *kodon* is available from 8 to 9 seers per rupee. Numbers on relief in thousands:—works 3½, gratuitous relief 6, total 9½.

Central Provinces.—Light rain was received during the early part of the week in the eastern portion of the Provinces but the weather has since cleared up. Harvesting of autumn crops and picking of cotton continue. Cotton is being brought on the market in Nagpur and Wardha. Sowing of spring crops is proceeding rapidly and germination is satisfactory. The condition of standing crops is quite good. No deficiency of fodder and water is reported from anywhere. Agricultural stock is generally in good condition. Variations in prices are unimportant.

Feudatory States:—Rain fell in most of the States. Sowings of spring crops and harvesting of autumn crops are in progress.

The weekly report on famine and scarcity is as follows:—The public health is good except for a little malaria and influenza. Prices of food-grains are stationary. Relief operations were closed in the Jubbulpore district. Numbers on works in scarcity districts were 4,901 and on gratuitous relief 6,064.

Bombay.—Slight rain fell during the week in parts of the Konkan, Dharwar, and Kolhapur. Standing crops are flourishing except in parts of Hyderabad where cotton has been slightly damaged by insects and in parts of Larkana where it has been damaged by insects and where *juar* is withering. Harvesting of autumn crops generally continues. Cotton picking has commenced in parts of Khandesh, Nasik and Sholapur. Sowing for spring crops generally continues. Fodder supply is sufficient. Agricultural stock is generally sufficient. Cattle are in good condition. Prices of food-grains have fallen slightly in parts of Sind, Gujarat and the Deccan and are high but generally steady elsewhere.

The weekly report on famine and scarcity is as follows:—Standing crops are in good condition except in parts of Bijapur where they have been damaged slightly by grasshoppers.

Harvesting of autumn crops and sowing for spring crops continue. Relief operations have ceased in Belgaum. The number of persons on gratuitous relief including village servants on the last day of the week ending the 25th October was 13,518. The public health is generally good. The supply of fodder and water is adequate. Cattle are in good condition. Prices of food-grains although high, show a tendency to fall. Relief operations will cease at the end of October in Ahmadnagar and Kathiawar and shortly thereafter in Poona and Bijapur. No separate famine telegram will accordingly be despatched from next week but necessary information will be included in ordinary season telegrams.

Hyderabad.—Scattered showers were received during the week. The average fall was 8 cents. Autumn and early rice crops are generally in fair to good condition. The former is being harvested. Spring sowings are progressing. Cattle disease is reported in some talukas of the Nalgonda, Warangal, Adilabad and Karimnagar districts. Prices of grains continue to be high and show a downward tendency. *Juar* is selling at 4 seers per rupee in the Raichur district.

*The weekly report on famine is as follows:—*The general situation is satisfactory. Relief works in affected parts of Mahrattwara are to be closed at the end of November. Some parts of Telingana require relief for some months more. The number of persons on relief works is not increasing except in a few camps. Takavi is still being advanced to help spring and *tabi* cultivation. Prices of grains continue high but show a downward tendency. Rice is selling at $3\frac{1}{2}$ seers and *juar* at $6\frac{1}{2}$ seers per rupee. Numbers on relief in thousands for week ending 16th October:—works 20, gratuitous relief 23, total 43.

Mysore.—During the week the rainfall was light to fair. Standing crops are in fair condition. Cattle are generally healthy. Water and fodder are available. Prices are high but falling. Prospects of the season are fair but more rain is wanted in parts. Harvesting of rice, *ragi* and sugarcane is proceeding with outturn fair.

Coorg.—Moderate rain fell during the week. Rice crop is in good condition. Picking of cardamum and reaping of dry crops continue. Cattle are generally healthy. Water and fodder for cattle are available. The public health is fair. Prices of food-grains are high.

Madras.—During the week the rainfall was very heavy in Ramnad, heavy in Vizagapatam littoral, Godavari, Malabar and Cochin, good in Ganjam, Kistna, Madras, Coimbatore, Tanjore, Madura, Tinnevely, South Kanara, Travancore and the hills, fair in Vizagapatam Agency, Nellore, Chingleput and South Arcot and light or *nil* elsewhere. Standing crops are in fair condition generally but they have been damaged in one taluka in Kistana by recent rain. Castors in parts of one Taluka in Anantapur have been affected by insect pests. Harvesting of paddy and dry crops is generally fair. Fresh sowings of paddy and dry crops are progressing. The condition of cattle is generally good. Water is sufficient except in parts of fourteen districts. Pasture and fodder are sufficient generally. Prices are generally falling. Prospects are fair generally.

*The weekly report on famine in Ganjam is as follows:—*Relief works 31 in Goomsur, 4 in Udayagiri, 26 in Kallikota and Attagada, 3 in Humma, Biridi, Palur and 1 in Ronabha are in progress. Labourers and small agriculturists are mostly affected. People are resorting freely to works and their physical condition is generally fair. Relief measures are adequate. Cloth distribution is being provided by private charity. Prices of rice in Goomsur 4.54, in Udayagiri 5, in Kallikota and Attagada 4.5, in Chatrapur 4.8 and of *ragi* in Kallikota and Attagada 6, and in Chatrapur 7.6 seers per rupee. Numbers on relief works were 59,983, and on gratuitous relief (incomplete figures) 86,705, total 1,46,688.

R. A. MANT,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

(FAMINE.)

Statement showing the number of persons on relief works and in receipt of gratuitous relief in the Districts of British Provinces and in Native States affected by famine or scarcity in India.

For the week ending 20th September 1919.

No.	Name of District or State.	AREA UNDER FAMINE RELIEF.							TRACTS UNDER "SCARCITY" AND "OBSERVATION AND TEST."	
		Area affected in square miles.	Estimated population of area in column 3.	Number of persons employed on relief works.	NUMBER OF PERSONS ON GRATUITOUS AND SPECIAL RELIEF.			Grand total on relief.	Number of persons on test works.	Number of persons in receipt of gratuitous relief.

R. A. MANT,

Secretary to the Government of India.

No. 8810.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

POST OFFICE.

Simla, the 30th October, 1919.

RESOLUTION.

READ—

Letter from the Director General of Posts and Telegraphs, No. 229s-B.P., dated the 3rd October 1919, embodying the Administration Report of the Posts and Telegraphs of India for the year 1918-1919.

ORDERED that a copy of the letter be forwarded to His Majesty's Secretary of State for India and that it be published in the Supplement to the *Gazette of India*.

A. H. LEY,

Secretary to the Government of India.

ANNUAL REPORT

ON

THE POSTS AND TELEGRAPHS OF INDIA

FOR THE YEAR

1918-19.

No. 229-S.B.P., dated Simla, the 3rd October 1919.

FROM—THE HON'BLE MR. G. R. CLARKE, DIRECTOR-GENERAL OF POSTS AND TELEGRAPHS,

TO—THE SECRETARY TO THE GOVERNMENT OF INDIA, DEPARTMENT OF COMMERCE AND INDUSTRY.

I have the honour to submit the Annual Report on the Posts and Telegraphs of India for the year 1918-19.

2. The administration was in my hands throughout the year.

Charge.

POSTS.—General Remarks.

3. At the close of 1918-19 there were 99,074 postal officials, 19,445 post offices and 157,395½ miles of mail lines. During the year over 1,194 million articles, including nearly 31 million registered articles were posted; stamps worth Rs. 3 crores 52½ lakhs were sold for postal purposes; over 36 million money orders of the total value of Rs. 79½ crores were issued; a sum of nearly Rs. 16½ crores was collected for tradesmen and others on value-payable articles; over 3½ million insured articles valued at over Rs. 113 crores were handled; customs duty aggregating about Rs. 24½ lakhs was realised on parcels and letters from abroad; pensions amounting to nearly Rs. 56½ lakhs were paid to Indian Military pensioners; 11,844 lbs. of quinine were sold to the public. On the 31st March 1919 there were 1,677,407 Savings Bank accounts with a total balance of over Rs. 18½ crores and 27,889 Postal Life Insurance policies with an aggregate assurance of over Rs. 3 crores 96 lakhs. The total revenue and expenditure for the year, after making the various administrative adjustments, amounted to Rs. 4 crores 70½ lakhs and Rs. 4 crores 32½ lakhs, respectively, leaving a surplus of 38 lakhs.

4. The most important event in the Inland post was the revision of the rates of postage on letters and parcels. The revision in the case of letters, which only affected letters exceeding 1 tola, came into force on the 1st January 1919. Prior to this date the rates of postage were ½ anna for letters up to 1 tola, 1 anna for

General survey.

Principal events in the Inland post.

letters exceeding 1 tola but not exceeding 10 tolas and 1 anna for every additional 10 tolas. The new rates are $\frac{1}{2}$ anna for letters up to 1 tola, 1 anna for letters exceeding 1 tola but not exceeding $2\frac{1}{2}$ tolas and 1 anna for every additional $2\frac{1}{2}$ tolas. The revision of postage rates from India to the United Kingdom and British dependencies had to be introduced as a result of the raising of the Imperial Penny rate by the British Post Office to $1\frac{1}{2}d$. The increase in the postage rate on parcels between 20 and 440 tolas from 2 to 4 annas for every 40 tolas was made to meet the difficulty of handling the parcel traffic. Owing to congestion on the railways an enormous number of parcels, that would ordinarily be sent as railway parcels, were diverted to post offices and the Parcels Post was being used for the carriage of heavy merchandise, a purpose for which it was never intended. These revisions of postage rates were estimated to bring in an increase of revenue to Government to the extent of 24 lakhs a year.

At the request of the Mysore Durbar additional postal facilities were granted in the Mysore Province involving the opening of 28 experimental offices from 1st January 1919.

The number of deaths from plague which occurred during the year under report fell from 265 to 66. But the Influenza epidemic which swept over the country exacted a heavy toll from the Department, the number of deaths being 815. Some dislocation of work resulted from the outbreak of this epidemic at certain centres, but it is gratifying to record that the entire staff everywhere displayed great courage in carrying on their duties in spite of considerable inconvenience and personal risk.

Postal Co-operative Credit Societies were in existence at Calcutta, Bombay, Madras, Rangoon, Nagpur, Lucknow, Jalpaiguri, Chittagong and Sara with a total membership of 5,931 and a subscribed capital of Rs. 1,98,979. During the year 1,953 members were granted loans amounting to Rs. 3,30,243. All the Societies are making satisfactory progress.

5. The mail service to and from the United Kingdom continued to be a fortnightly one until the beginning of January 1919, when a weekly service was resumed. From the middle of December 1918 the letter mails for and from the United Kingdom were conveyed by the Marseilles route instead of by the all-sea route.

On two occasions during the year, viz., on the 3rd April 1918 and the 16th December 1918, inward foreign mails for India from France, Italy, Switzerland, Portugal, New York, etc., were received at Madras *via* Colombo, where they had been landed by Messageries Maritimes steamers.

Two mail steamers of the Peninsular and Oriental Steam Navigation Company, the "Shirala" with mails for India despatched from London between the 19th June and the 27th June and the "Tasman" with mails despatched from London between the 7th September and the 11th September, were lost at sea through enemy action.

Three other steamers named below were also lost at sea with mails for India on board: the "Omrah" with mails despatched from Paris between the 1st and the 7th May, the "Djennah" and the "Australian" with mails closed by the Marseilles post office between the 5th and the 16th July.

The difficulties of the British India Steam Navigation Company in supplying steamers for the various contract lines continued during the year under report. The Company were however able to provide an almost regular service between Calcutta and Rangoon (16 knots and 14 knots), Rangoon and Mergui (10 knots) and Bombay and Durban (10 knots) and an irregular service on six other contract lines.

The special arrangements introduced in 1917 for the transmission of mails from India to the Australasian Colonies had to be retained and the British India Steam Navigation Company continued to carry these mails free of any charge throughout the year.

From the 1st August 1918, an arrangement was introduced under which the originals and duplicates of correspondence for Europe are accepted at the same time by the post office, the originals being despatched by the first available mail and the duplicates retained for despatch by the next mail. Under this system 4,180

registered and 10,566 unregistered duplicate articles were posted in India between the 1st August 1918 and the 31st March 1919 and a sum of Rs. 3,688-12-0 was realised in special fees.

With the approval of the Postal Administration of the United States of America, an arrangement was also introduced during the year for the exchange between Calcutta and San Francisco, by the Pacific route, of articles of the letter mail for the United States and Canada specially superscribed for transmission by that route.

Owing to an outbreak of fire on the s.s. "Chindwara," which was carrying the homeward mail in November 1918, the greater portion of the parcel mail was destroyed and the Department incurred heavy expenditure on account of payment of compensation. The cause of the fires could not be ascertained.

The initial rate of postage on letters addressed to the United Kingdom and the British Colonies and Possessions participating in the British Imperial Postage Scheme had to be raised from 1 anna to 1½ annas with effect from the 1st September 1918.

Owing to the shortage of shipping and high freights, merchants began to use the parcels post for exporting large quantities of spices. In consequence certain spices were prohibited from transmission by parcels post and the weight of letters for the United Kingdom, Europe and United States of America was limited to 8 ozs. at first and then to 2 lbs.

The rate of conversion from sterling to Indian currency and *vice versa* in respect of foreign sterling money orders and British postal orders, which in September 1917 had been changed from 1s. 4d. to 1s. 5d. per rupee, had again to be altered in April 1918 to 1s. 6d.

Union rates of postage were made applicable with effect from the 1st September 1918 to articles of the letter mail for the civil post offices in Mesopotamia, and the parcels post and value-payable services between India and those offices were introduced from the 1st January 1919.

Mail communication was partially restored with Alsace and Lorraine and with the occupied territories in Palestine and Syria and the parcels post and the money order services were extended to Palestine. The foreign money order system was also extended to the British sphere of the Cameroons.

6. On the 31st March 1919 the total number of postal officials was 99,074 compared with 97,364 at the close of 1917-18. The figure includes 246 pensioned soldiers of the Indian Army and 108 women, of whom, 92 were Europeans or Eurasians.

The number of officials dismissed was 442 against 490 in the previous year. Of this number, 181 were postmen or village postmen.

7. The following table gives details regarding 10,866 postal officials whose pay was raised during the year under report :-

Head postmasters	3
Deputy postmasters	5
Sub-postmasters	454
Deputy sub-postmasters	3
Branch postmasters	182
Inspectors of post offices and head clerks in Superintendents' offices	9
Clerks and sorters	2,990
Mail guards	78
Overseers	88
Postmen and village postmen	2,792
Paid probationers	535
Runners	1,607
Other inferior servants in the Post Office	2,120
Total	10,866

In addition to the above all non-gazetted officials of the Post and Telegraph Department outside the cities of Bombay and Karachi, whose pay does not exceed Rs. 600 a month continued to receive the special war allowance approximating to 5 per cent. on their salaries, while officials on salaries of Rs. 70 and less have been granted this allowance at 10 per cent. on their salaries with a minimum of Rs. 2 from the 1st November 1918.

In Bombay and Karachi postal and telegraph officials have been given war allowances on the same scale as that granted to the officials serving under the local Government.

Field Post Office
work.

8. During the year under report Indian Field post offices continued to work with the overseas forces in France, Egypt, Syria, Palestine, East Africa, Mesopotamia, Aden, South Persia and the Force in East Persia (formerly called Eastern Persian Cordon), and the Post Office was further called upon to serve the Salonika Force which was separated from the Egyptian Expeditionary Force and made an independent Force for postal purposes. This latter Force is now known as the Army of the Black Sea. The various Expeditionary Forces were served by 10 base post offices and 176 field post offices and the number of postal officials serving in the field increased to 2,261 as compared with 1,708 in 1917-18.

The outstanding feature of the Indian field postal arrangements during the year under report was the transfer from the Postmasters-General of Bombay and Punjab to the Director General of the administration and control of the field postal services in the several theatres of the war. This reorganisation made for greater efficiency in the arrangements, and, as a part of this scheme, a special Base Postal Depot was established at Bombay with effect from the 1st June 1918, from which date the Chief Base Office was abolished. The Base Postal Depot worked independently of the Bombay General Post Office and was placed under the control of a commissioned officer with the designation of Officer Commanding, Base Postal Depot. All executive work connected with the postal services and the Field postal staff attached to the various Indian Expeditionary Forces overseas (including recruitment and mobilisation), which used formerly to be done in the offices of the Postmasters-General, Punjab and Bombay, and in the Bombay General Post Office, was centralised in the Base Postal Depot. A small Base post office was also established at Karachi for the sorting of Army Mails for and from Mesopotamia and South Persia. Both the Base Postal Depot at Bombay and the Base Post Office at Karachi were under the direct control of the Director General.

The Base Postal Depot was divided into four sections, namely, (A) Inquiry, (B) Sorting, (C) Mobilisation and (D) Correspondence and Accounts. The Enquiry Branch of the former Chief Base Office, Bombay, was thoroughly reorganised at the instance of the Military authorities who desired that all information connected with the movements of troops should be kept strictly confidential. As there was some difficulty in getting a proper class of men to take up the appointments in the inquiry Section, it was decided, with the approval of the Military authorities, to confine those appointments exclusively to lady clerks. This experiment proved very successful and I have received commendations from all sources of the excellent manner in which the work of this section was carried out. The staff consists of 1 lady superintendent, 1 assistant lady superintendent and 40 lady clerks.

The Card Index file maintained in the Inquiry Section had, at the close of the year, a record of the movements of 175,500 officers and men invalided from the Overseas Forces as against 133,000 at the close of the year 1917-18. The Card Index system continued to work most successfully. Out of 3,525,090 letters (registered and unregistered) for officers and men received, 1,894,668 were redirected or delivery at Hospitals, Camps, Depots, etc., and 1,630,422 were returned to the country of origin for delivery to the senders as the addressees were either deceased or untraceable.

The Mesopotamia Expeditionary Force continued to be the most important of all the Expeditionary Forces served by the Indian Post Office, while the Egyptian Expeditionary Force and the Army of the Black Sea increased in importance during the year. One notable feature of the Indian field postal arrangements in the Army of the Black Sea is the establishment of a travelling field post office for money order work with a view to provide scattered units with facilities for sending money to their homes. This service has saved those units much inconvenience and has been greatly appreciated.

The work of the Indian Postal Services in all the theatres of the war was performed with great zeal and devotion to duty and many of the officials of the Department serving with each of the Forces have been granted distinctions or been mentioned in Despatches. Over 160 officials also were, during the year under report, awarded departmentally for specially meritorious services in the Field.

The "Posts and Telegraphs Comforts Fund" continued to provide the members of the staff of the Department on Field Service with special comforts. The management of this Fund remained under Mrs. Sharpe who has been brought to the notice of the Government of India for valuable services rendered in India in connection with the war up to the 31st December 1918.

9. The weekly service was resumed with the homeward mail of the 11th January and with the inward mail of the 9th January 1919. Fifty-five steamers were despatched from the United Kingdom with letter and parcel mails for India and two were lost at sea through enemy action. The mails of eighteen steamers were transhipped at Port Said. In the reverse direction thirty-five steamers were despatched from Bombay with mails for the United Kingdom and all of them reached London safely.

Post Offices and Postal Communications.

10. There were 19,445 post offices and 49,838 letter-boxes at the close of the year, or 35 post offices and 89 letter-boxes more than in the preceding year. The number of post offices in charge of school masters and other extra-departmental agents rose from 12,550 to 12,668.

11. The total length of all mail lines by road, rail, river or sea was 157,395½ as detailed below :—

	Runners.	Railway.	Mail carts, horses, camels, etc.	Steamers.	Motor cars.
Mileage at close of 1918-19	91,105	35,227	11,366	18,447	1,250½
Increase (+) or decrease (—)	+119	+48	—783	+27	+278½

The extension of the railway in Baluchistan and the substitution of motor services have caused a considerable reduction in the total length of mail cart and horse services.

12. In recent years endeavours have been made to utilise motor transport instead of mail carts or tongas for the conveyance of mails wherever possible. The total length of the motor mail lines is 1,250½ miles, of which 278½ miles represent the increase during the year under report over the total length in the previous year.

A list of the motor lines is given below :—

<i>Bengal and Assam.</i>					
Gauhati-Shillong	68 miles.
<i>Bihar and Orissa.</i>					
Hazaribagh-Suriya	42 "
Kalimati-Sakchi	"	3 "
<i>Bombay.</i>					
Telegaon-Dabhada-Junnar	52 "
Vathar Railway Station-Mahableshwar	40 "
<i>Central Circle.</i>					
Abu-Abu Road	13 "
Piparia-Pachmarhi	32 "
Sehore Cantonment-Khilechipur	93 "
<i>Madras.</i>					
Trichinopoly-Tirumayam	46 "
Bolarum-Begampat Railway Station	10 "
Ootacamund-Ootacamund Railway Station	1 mile.
Mysore-Mercara	78 miles.
Kottayam-Mandakayar	35 "
Kadur-Mudigere	44 "
Mannady-Broadway	½ mile.
Mangalore-Puttur	32 miles.
Toungoo-Thandaung	29 "
Magok-Thabeitkyin	60 "
Aungmye-Taunggyi	36 "

Burma.

Kyaukmedaung-Wazinhaung	17 miles.
Tavoy-Hermingyi	24 "
Tavoy-Kyaukmedaung	27 "
Taunggyi-Taiyaw	13 "
Mergui-Sandawut	7 "
Taiyaw-Yawnghwe	10 "

Punjab and North-West Frontier.

Rawalpindi-Srinagar	196 "
---------------------	----	----	----	----	-------

United Provinces.

Kathgodam Railway Station-Brewery tonga stables (Naini Tal)	13	"
Dehra Dun-Chakrata	60	"

In addition to the above, motor mail services are also maintained in the following cities and the daily mileage run in each city is noted against it:—

Calcutta	662
Bombay	200
Karachi	55
Nagpur	45
Madras	456
Bangalore	80
Rangoon	67
Moulmein	29

Of the services mentioned above, those in the cities of Calcutta and Madras and that on the Rawalpindi-Srinagar line are worked departmentally, while all the others are worked under contract.

Postal Articles and Postage Stamps.

13. The total number of postal articles of all kinds, excluding money orders, transmitted during the year is estimated at over 1,194 millions, being 80 millions more than in the preceding year, as detailed below:—

Classes of postal articles.	1918-19.	Increase (+) or decrease (—).	Percentage of increase (+) or decrease (—).
<i>Articles of the letter mail.</i>			
Paid unregistered letters	459,268,026	+34,360,023	+8.09
Unpaid letters	27,027,129	+2,527,367	+10.32
Registered letters and packets (including insured and value-payable)	23,441,214	+1,973,519	+9.19
Postcards	565,131,610	+33,502,044	+6.30
"Registered" newspapers	57,661,450	+3,112,018	+5.70
Ordinary unregistered packets	47,680,023	+4,857,296	+11.34
Total	1,180,209,452	+80,341,257	+7.30
<i>Articles of the parcel mail.</i>			
Registered parcels	7,497,136	+280,977	+3.89
Unregistered parcels (including value-payable unregistered packets)	6,767,423	—167,366	—2.41
Total	14,264,559	+113,611	+.80
GRAND TOTAL	1,194,474,011	+80,454,868	+7.22

The diagram on the adjoining leaf shows graphically the growth of postal traffic in its principal branches since 1879-80.

14. It is computed that out of the total of 1,230 million articles and money orders which were posted, 99.75 per cent. were actually delivered or paid as compared with 99.78 per cent. out of a total of 1,149 millions in the preceding year.

15. The following details show the work done by Dead Letter Offices :—

Work of Dead Letter Offices. (Appendix III, page 25.)

	1917-18.	1918-19.
Postal articles received in Dead Letter Offices	13,537,018	14,251,527
Re-directed to addressees	47 per cent.	46 per cent.
Re-directed to senders	37 per cent.	35 per cent.
Finally treated as undeliverable	2,161,335	2,731,671

In Bengal, Madras and Bombay alone 147 articles without address, many containing money or valuables, were posted every day on an average. In articles opened by the five larger Dead Letter Offices, cheques, hundies, currency notes, bills of exchange, coins and other property of the nominal value of over 14 lakhs of rupees were found, and the great majority of these were successfully re-directed to the addressees or the senders.

16. Owing to the continuance of the general dislocation of the foreign mail service, statistics of correspondence sent to and received from foreign countries during the year were not kept. Foreign correspondence.

17. The total number of parcels despatched by the foreign post from this country was 646,615 compared with 551,054 during the previous year, and the number received was 564,505 compared with 609,839 in 1917-18. There was thus an increase of 17·34 per cent. in the number of parcels exported and a decrease of 7·43 in the number imported. Foreign parcels.

The parcels sent to and received from the United Kingdom numbered 377,143 and 363,974 compared with 187,660 and 436,285, respectively, during 1917-18. In addition 2,339 parcels were despatched from India through the medium of the Peninsular and Oriental Company while none were received in this country through that agency.

18. The aggregate value of stamps issued for sale from treasuries was :— Postage stamps.

Ordinary postage stamps and postal stationery.	Rs. 5 crores 70 lakhs—increase 82 lakhs.
Service postage stamps and postal stationery.	Nearly Rs. 83½ lakhs—increase 16½ lakhs.

The varieties of ordinary postage stamps and postal stationery issued in the largest quantities from the Central Stamp Depots were as follows :—

	Number issued in	
	1917-18.	1918-19.
	(In millions).	
½ anna single postcard	211½	242½
½ anna adhesive stamp	159	163
½ anna reply postcard	93	115½
1 anna adhesive stamp	97½	100½
Small ½ anna envelope	86½	97½
½ anna adhesive stamp	95	88½

The steady decline in the sale of ½ anna stamps is largely due to increase in the price of paper. Postcards of private manufacture are much more expensive than they used to be, so the public are making greater use of Government postcards.

The total number of stamp booklets issued from the Central Stamp Depots was 3,871,261 compared with 3,902,268 in 1917-18, the decrease being .79 per cent. Trade advertisements were printed on the covers and interleaves of a number of these booklets.

In addition to postage stamps, non-judicial and court-fee stamps are sold in many post offices but, except in Burma, postmasters act as private vendors of these stamps which do not form part of the Post Office balance. In Burma where such

stamps are kept by postmasters in the same way as postage stamps, the sales, during the year amounted to Rs. 79,217-8-0 against Rs. 75,945-8-0 in 1917-18.

Insured and Value-payable Post.

Insurance business.

19. The number of insured letters and parcels posted was 3,845,189 of the aggregate declared value of more than 113 crores of rupees, being an increase of 239,144 or 6.63 per cent. in number and 26.66 per cent. in value. The insurance fees realised amounted to nearly 16 lakhs of rupees.

Claims for compensation.

20. The number of claims for compensation received in respect of insured articles was 449, of which 187 were admitted as well-grounded. The total amount paid as compensation was Rs. 47,643 against Rs. 38,701 in 1917-18. Recoveries to the extent of Rs. 25,874 were, however, made so that the net loss to the Department was Rs. 21,769 compared with Rs. 18,737 in the preceding year.

Value-payable business.

21. The number of value-payable articles posted increased from 10,068,093 to 10,140,954 and the aggregate amount specified for recovery from Rs. 14,45,14,114 to Rs. 16,46,71,822, an increase of 13.95 per cent.

In Calcutta alone 2,423,094 value-payable articles were posted, the total sum recoverable thereon being Rs. 3,52,46,954. The corresponding figures for the city of Bombay were 1,211,926 value-payable articles posted and Rs. 2,13,08,891 specified for recovery.

The number of value-payable articles despatched from India to Ceylon was 122,303 representing a total sum of Rs. 16,59,166 as compared with 152,284 articles valued at Rs. 19,19,406 in 1917-18.

Money orders.

Money order business generally. [Appendix IV (a), page 26.]

22. The total number of money orders of all kinds, inland and foreign, issued was over 36 millions of the aggregate value of Rs. 79½ crores as compared with over 35 million money orders for Rs. 75½ crores in the preceding year.

Inland money orders. [Appendices IV (b) & IV (c), pages 27 and 28.]

23. More than 34½ million inland money orders, ordinary and telegraphic, for a total sum of over 69½ crores of rupees were issued on which 76½ lakhs of rupees were realised as commission. There was an increase over the previous year of 2.88 per cent. in number and 11.40 per cent in value.

Telegraphic money orders. [Appendix IV (b), page 27.]

24. The number of telegraphic money orders issued fell from 875,012 to 828,740 while their total value increased from Rs. 6 crores 21 lakhs to Rs. 6 crores 44 lakhs. The commission realised was Rs. 6,74,165 as compared with Rs. 6,55,242 in the preceding year.

Foreign money orders. [Appendix IV (d), page 29.]

25. In the sterling exchanges, which are in force with the United Kingdom and British Dominions and with foreign countries generally, the total number of money orders sent and received was 314,521 of the aggregate value of £4,467,589 as against 268,123 orders for £4,490,313 in the preceding year.

There was a remarkable increase in the remittances from India to the United Kingdom, the number and amount of such remittances being 98,066 and £339,340 in 1917-18 compared with 159,033 and £832,020, respectively, during the year under report.

Foreign rupee money orders which are exchanged with Ceylon, the Portuguese Settlements in India, East Africa and the Far East, fell from 606,444 to 504,008 in number and from Rs. 5 crores 48 lakhs to Rs. 2 crores 73 lakhs in amount.

Remittances to India exceeded those from this country, the balance in India's favour being over £2,730,000 on sterling money orders and Rs. 2,20,90,000 on foreign rupee orders. In the sterling money order exchanges, the largest amounts were received from Egypt (£2,672,749), Union of South Africa (£369,599), the United Kingdom (£355,081), Italy (£65,107), France (£18,244), New Zealand (£17,783), Queensland (£15,446) and New South Wales (£15,090) and in the rupee exchanges from Ceylon (Rs. 89 lakhs), the Federated Malay States (Rs. 80 lakhs), the Straits Settlements (Rs. 36 lakhs) and British East Africa (Rs. 19 lakhs).

26. The following figures show the year's transactions in British postal orders :— British postal orders

	SOLD IN INDIA.		PAID IN INDIA.		Commission realized.
	Number.	Value.	Number.	Value.	
		£		£	
1918-19	140,864	91,957	332,850	170,472	14,212
Increase (+) or Decrease (—) ..	—16,474	—747	—102,423	—47,885	—3,566

Nearly two-thirds of the orders sold were for 5, 10 and 20 shillings, although there are 41 denominations of postal orders ranging from 6d. to 21s. The field post offices with the Indian Expeditionary Forces overseas sold 31,139 orders of the total value of £18,492.

Of the orders cashed, 18,171 for £11,091 were originally issued in India.

Post Office Savings Bank.

27. The number of active accounts was 1,677,407 representing an increase of 2·43 per cent. The total balance at the credit of depositors was 18 crores 82 lakhs, which exceeded the balance of the preceding year by nearly 2 crores 24 lakhs or 13·51 per cent. The average balance at the credit of a depositor was as compared with Rs. 101 in 1917-18. General results. (Appendix V(a), page 30).

28. Investments during the year in Government securities through the Post Office are shown in the following statement :— Transactions in Government securities.

	GOVERNMENT PROMISSORY NOTES. (NOMINAL VALUE.)			INVESTMENT CERTIFICATES FOR FRACTIONAL AMOUNTS OF GOVERNMENT PROMISSORY NOTES. (NOMINAL VALUE.)	
	Purchased.	Sold.	Held in custody of Accountant- General, Posts and Telegraphs, on behalf of depositors.	Purchased.	Sold.
	Rs.	Rs.	Rs.	Rs.	Rs.
	5,76,40,450	8,02,925	4,38,58,800	1,22,208	1,45,031
Increase (+) or decrease (—)	+1,18,04,075	—14,05,600	+72,89,925	+1,05,540	+21,218
Percentage of increase (+) or decrease (—)	+25·75	—63·64	+10·93	+633·59	+17·14

The transactions in Government promissory notes were mainly in War Bonds 1921, 1923, 1925 and 1928. Of the total value of the notes held on behalf of savings bank depositors securities of the nominal value of Rs. 77,52,900 are of the 2nd Indian War Loan.

Financial result of working the Post Office Savings Bank.

29. The following estimate of the financial result of working the Savings Bank is prepared in accordance with Resolution No. 2428, dated the 13th May 1902, of the Government of India in the Finance and Commerce Department :—

Receipts.	Amount.	Expenditure.	Amount.
	Rs.		Rs.
Interest at 3½ per cent. per annum on total balance at credit of depositors.	57,83,454	Interest actually paid to depositors	46,87,601
		Estimated cost of managing the Bank	5,86,911
Total ..	57,83,454	Total ..	52,74,512

Miscellaneous Post Office Matters.

Post Office Guarantee Fund.
[Appendix VI, page 32.]

30. The surplus of receipts over charges in the Guarantee Fund during the year was Rs. 23,265 against Rs. 28,799 in 1917-18. The amount decreed against the Fund was Rs. 12,674 compared with Rs. 7,179 in the previous year and a sum of Rs. 7,575 was paid in compassionate gratuities to deserving postal officials and their families. The balance of the Fund was Rs. 10,73,891.

Complaints by the public.

31. The number of complaints made by the public was 112,724 as against 93,991 in 1917-18. Of the total number 32 per cent. were found to be justified as compared with 34 per cent. in 1917-18, while 55,064 or 48 per cent. proved to be groundless. In the remaining cases either no definite conclusion could be arrived at or the investigation had not been completed by the end of the year.

Compensation for uninsured registered articles.

32. Compensation amounting to Rs. 6,636 was paid during the year in respect of inland uninsured registered letters, packets and parcels lost or damaged in course of transmission by post.

Offences by postal officials.
[Appendix VII, page 33.]

33. The number of postal officials dealt with for criminal offences was 443, of whom 241 were convicted in Court and the remainder punished departmentally, against 419 offenders and 232 convictions in the preceding year. The defalcations and losses amounted to Rs. 49,326 compared with Rs. 43,165 in 1917-18. By the end of the year adjustment had been effected to the extent of Rs. 28,079 of which only Rs. 3,536 was written off.

Offences by other persons.

34. The offences against the Post Office committed by persons not belonging to the Department included 35 cases of money order fraud involving a sum of Rs. 5,640 and 4 cases of fraudulent withdrawal from the Savings Bank of sums amounting to Rs. 1,238. There were 121 cases of theft and Government money amounting to Rs. 16,135 was stolen from mails and post offices. Excluding the losses due to highway robberies which are dealt with in the next paragraph, the total amount stolen was Rs. 23,013 of which Rs. 4,782 was recovered and Rs. 1,414 was written off as finally lost, Rs. 16,817 remaining unadjusted at the close of the year.

Highway robberies of mails.

35. Three runners were murdered : one in the Kohat district, one in the district of Chanda and the third on his way from Drosh to Chakdara. The coachman of a tonga carrying mails on the Poona to Sirur mail line in the Poona district died of wounds received in an encounter with a gang of robbers who attacked and plundered the mails. In the Peshawar district a mail peon, on his way back to the post office from the Jehangira Railway Station, was strangled to death. No trace of the culprits was obtained in any of these cases.

Of the total number of robberies twenty occurred in British Territory and four in Indian States. The entire mails were recovered in five cases, and a portion in eight. The loss to Government up to the close of the year amounted to Rs. 1,758. Prosecutions were instituted in four cases in three of which convictions were obtained.

Other casualties.

36. There were several mishaps during the year resulting in the death of servants of the Post Office.

A runner was drowned in his attempt to recover a mail bag from a river into which it had been thrown by a lunatic ; another was accidentally shot dead by a constable of the Gwalior State Police who was escorting the mails ; while a third met his death from a snakebite. A sub-postmaster was murdered by an overseer under the influence of liquor. The latter was condemned to death. A mail peon was run over and killed while attempting to jump on to the footboard of a moving train and a sorter was burned to death by the explosion of a kerosine stove in a mail van.

37. The most important buildings completed during the year were the joint **Buildings** Post and Telegraph Office at Sholapur and the combined Post and Telegraph Office at Karachi City. Among other less important projects finished were :—

- (1) New buildings for the post offices at Jorhat, Kalaw and Ballia.
- (2) An extension to the Instrument Fitting Shop and Godown in the Telegraph Workshops at Alipore.
- (3) Additions and alterations to the Khulna post office building and to the stables at Apollo Bundar.
- (4) Quarters for Deputy Postmaster-General (Traffic), Superintendent of post offices (Traffic) and telegraphists at Patna.

The construction of a new telegraph office building at Simla was commenced during the year.

38. The revenues obtained from post offices situated in the Kashmir and Jammu State was Rs. 3,41,949 as compared with Rs. 3,08,239 in 1917-18 and Rs. 2,69,115 in 1916-17, while the expenditure amounted to Rs. 5,90,371, as against Rs. 3,09,487 in 1917-18 and Rs. 2,86,054 in 1916-17, the actual deficit during the year being Rs. 2,48,422. The growth in expenditure was chiefly owing to the establishment of the departmental motor mail service between Rawalpindi and Srinagar, the approximate cost of the service in Kashmir territory during the year under report being Rs. 2,83,129. **Financial results] working the posts Kashmir.**

Non-postal Branches of the Post Office.

39. There were 1,774 new Life Insurance and Endowment Assurance policies of the aggregate value of Rs. 27,76,170 against 1,566 for Rs. 22,81,293 last year. The number taken by pure Asiatics was 1,693. Three women were insured during the year so that there were 30 female policy holders in all. **Post Office Insurance Fund. I [Appendices VII, (a), VIII (b) and IX, pages 34 to 34**

Two new contracts for monthly allowances were entered into, the amount secured being Rs. 32, both of them were Life Annuities purchased from the Post Office under Article 807 of the Civil Service Regulations.

The total sum realized on account of premia on old and new policies taken together amounted to Rs. 15,28,672, compared with Rs. 15,08,758 representing revised figures for the previous year. Claims to the extent of Rs. 11,89,457 were discharged compared with Rs. 10,26,972 in 1917-18, while 414 policies for a gross sum of Rs. 3,94,385 lapsed or were surrendered or cancelled.

40. The Post Office acted as an agent for the receipt of salt revenue at certain selected offices in the Punjab and North West Frontier, United Provinces, Bihar and Orissa, Bengal and Assam, and Central Circles. It will be seen from the following figures that, except for a slight increase in the value of salt indented for, there was a falling off in this class of business, owing mainly to the restriction referred to in my last report which continued to be in force throughout the year under review :— **Receipt of salt revenue.**

		1918-19.	1917-18.
Post offices authorized to receive salt revenue	.. Number	363	353
Indents received	635	1,263
Quantity of salt indented for Mds.	460,235	473,432
Value of salt indented for Rs.	6,95,405	6,87,631
Postal commission realized Rs.	905	1,012

The increase in the amount of salt revenue received, was to some extent due to the enhancement of the through-traffic charge on all salt supplied from Khewra,

Sambhar and Pachbadra from 3 to 6 pies a maund from the 1st March 1918, and to a further increase of the same charge on Pachbadra salt from 6 to 9 pies a maund from the 1st March 1919.

Sale of quinine.

41. The Post Office obtained 11,844 lbs. of quinine for sale to the public during the year under report compared with 17,307 lbs. in the preceding year. The decrease is due to the short supplies and increased price of the drug.

Payment of Indian military pensioners.

42. The number of men of the Indian Army whose pensions were paid through the agency of the Post Office in the Punjab and North-West Frontier Province was 83,252 as compared with 76,611 in 1917-18, the amount disbursed being Rs. 56,46,718 against Rs. 53,31,750 in the previous year. The Post Office received Rs. 42,350 as commission for this special service.

Post Office cash certificates, [Appendix X, page 31.]

17(b).

43. The amount invested in Post Office cash certificates was over 3 crores 16 lakhs of the nominal value of 4 crores 8 lakhs, compared with an investment of 10 crores of the nominal value of 12 crores 90 lakhs in the previous year. The amount repaid to investors was over 3 crores 97½ lakhs, compared with 1 crore 11½ lakhs in the preceding year.

Financial results of the Post Office.

Financial position of the Post Office. [Appendix X, page 37.]

44. The Post Office accounts show the following results :—

—				Receipts.	Charges.	Surplus.
				Rs.	Rs.	Rs.
1917-18	4,16,10,225	3,54,24,461	61,85,764
1918-19	4,53,02,802	3,96,59,483	56,43,319

After allowing for the sum of Rs. 6,97,320 charged against the Post Office in the Finance and Revenue Accounts of the Government of India and after making the usual adjustments, notably in connection with free services rendered by or to the Department, the net surplus was Rs. 38,02,465 as compared with Rs. 46,51,397 for the previous year. This amount is exclusive of any credit for the maintenance of unremunerative post offices and lines required for military or political purposes. The decrease in the surplus is largely due to the cost of the special war allowance given to the staff and partly to the increased cost of all postal services arising from the high prices prevailing in the country.

TELEGRAPHS.—General Remarks.

General survey.

45. At the close of the year under review the total number of telegraph officials was 11,298 of whom 202 were women. The number of telegraph offices was 10,373 of which 8,894 were open to the public. The latter comprised 185 departmental offices, 3,368 combined post and telegraph offices, 5,334 Railway and 7 canal offices.

During the year 21,314,943 telegrams were transmitted over the lines of the Department, an increase of 1,417,156 over 1917-18.

The total number of signalling operations entailed in the transmission of all telegrams from the office of origin to the office of destination was 99,814,395 with an average of 4.49 operations per telegram as against 4.76 for 1917-18.

The necessity for conserving stores referred to in the reports for the last two years continued throughout a large part of the year under review, and the construction of new lines was again practically confined to meeting urgent military and political requirements. The policy of dismantlement and reconstruction with a view to recovering materials not absolutely necessary in existing lines was continued, and after the signing of the armistice, it was found possible to take in hand some of the more urgent work required by the Railway and Civil Administrations. The net addition to the telegraph and telephone system was 100 miles of line and 9,566 miles of wire and cable conductors, and on the 31st March 1919, the whole system consisted of 87,814 miles of line and 357,472 miles of wire and cable conductors.

Statistics maintained by 58 of the principal offices showed that 25 per cent. of the telegrams handed in were transmitted within 10 minutes of acceptance and 42 per cent. within 20 minutes, also that 58 per cent. of the telegrams received for delivery were sent out to the addressees within 10 minutes of receipt.

The total receipts of the Telegraph Department amounted to Rs. 3 crores and 24 lakhs nearly, and the working charges to Rs. 1 crore and 47 lakhs, as against Rs. 2 crores and 47 lakhs and Rs. 1 crore and 27 lakhs, respectively, for the previous year.

The chief items of revenue were : —

	Rs.
Fees on telegrams	2,52,79,000
Claims from railways and canals	30,83,000
Claims from guarantors	1,01,000
Rent of telephone connections	11,95,000
Royalties from telephone Companies	1,28,000

46. With effect from the 1st September 1918, the charges for inland ordinary telegrams were increased from 8 annas for a telegram of 12 words or less, with half an anna for every additional word, to a uniform rate of one anna a word with a minimum of 12 annas ; and the charges for inland express telegrams were raised from Re. 1 for 12 words or less, with two annas for every additional word, to a uniform rate of 2 annas a word with a minimum of Rs. 1-8-0.

Consequent on the increase in the rates for inland telegrams, the rates for telegrams between India and Ceylon were revised with effect from 1st February 1919. An "Express" service was introduced at the rate of two rupees for twelve words, with three annas for each additional word, and the existing service at the rate of one rupee for twelve words with two annas for each additional word was classed as "Ordinary."

Certificates in telegraphy were granted to 116 soldiers and 436 post office clerks.

The Co-operative Credit Societies at various Central Telegraph Offices have all continued to do very good work.

The sum of Rs. 2,14,182 was disbursed to the members of the signalling establishment as overtime allowance for the disposal of work outside the ordinary hours of duty, as compared with Rs. 1,51,850 in the preceding year. The increase was due to the abnormally large number of absentees during the epidemic of influenza, to the replacement of the skilled telegraphists deputed on Field Service by less highly trained and experienced operators and to the growth in traffic.

A sum of Rs. 2,38,902 was earned by telegraphists as "Pie-money" or remuneration for messages disposed of in excess of certain standards, the corresponding amount for 1917-18 being Rs. 2,06,096. The increase in pie-money earnings is due partly to the growth of traffic and partly to the shortage of staff which necessitated men working overtime.

During the year an epidemic of influenza spread over many parts of India and caused considerable dislocation in the work of telegraph offices. Great difficulty was experienced in the disposal of traffic which did not diminish while the epidemic lasted.

The system for the recruitment of probationers for the signalling establishment has not been altogether satisfactory. It involved taking candidates into the training classes at the age of 15-16 years, before they had completed their school education. With a view to remedy this, it has been decided to open telegraph training classes in approved schools all over India, and to arrange that the special course of training in telegraphy should occupy 2 hours a day, the rest of the time being devoted to general education. The first training classes under these conditions were opened in the Scottish Churches Collegiate School at Calcutta on the 26th February 1919 and in St. Andrew's Colonial Homes at Kalimpong on the 6th March 1919 and the first batch of students will pass out about the beginning of

the year 1921. Arrangements are being made to open classes in other schools throughout the country.

In the course of the year, considerable improvements have been made in the pay and prospects of the members of the signalling establishment and of the clerical establishment employed in signal offices. The pay of telegraphists was raised with effect from the 1st January 1919 and the revised scales are particularly designed to attract recruits by a good starting pay, which now compares very well with that offered by other employers. The Telegraph Masters, Deputy Superintendents and officers in the 2nd Division of the Superior Traffic Branch benefited by a revision which took effect from the 1st March 1919 and at the same time eight appointments of Deputy Superintendents in the special class were transferred to the 2nd Division of the Superior Traffic Branch. A considerable addition was also made in the number of allowances given to telegraphists selected to perform duties of a special nature. The case of women telegraphists also received consideration, and it has been arranged from the 1st August 1918 that the pay and war allowances drawn by women telegraphists shall not be less than Rs. 60 a month in Rangoon, Calcutta, Bombay and Karachi and Rs. 50 a month at other places.

A scheme for improving the pay and prospects of clerks in signal offices was introduced from the 1st March 1919, and among the benefits of the scheme is the eligibility of literate peons for promotion to the lowest grade of the clerical service. A time scale has been applied to some of the clerical appointments which should remove a long standing complaint of slow promotion. The total annual cost of these revisions amounted to 9 lakhs.

During the year under review the pay and prospects of the following branches of the staff were materially improved : —

The Technical Branch, generally.

The Engineering Branch, Deputy Superintendents.

The Engineering Branch, Inspecting Telegraph Masters and Telegraphists.

The Engineering Branch, Telephone Supervisors.

The Engineering Branch, Telephone Inspectors.

The Engineering Branch, Telephone Operators.

The Engineering Branch, Circle and Divisional Clerks.

The Clerks and petty Establishments of the Stores and Workshops.

Improved prospects were also opened to Deputy Superintendents of the Engineering Branch by the creation of the Superior Engineering Branch, II Division.

Demands from the field for technical personnel continued to be very heavy up to the declaration of the armistice and the greatest difficulty was experienced in meeting them without impairing the telegraph service in India. It was hoped that a substantial number of men would be released at the beginning of 1919 but traffic in the field continued to be so heavy that this was not possible. The result was that at the end of March 1919 the Telegraph contingent in Mesopotamia numbered 3,547 composed as follows : —

Superior Officers	14
Deputy Superintendents	25
Telegraphists (Inspecting, Civil, Military, and Unattached List) ..	507
Telegraph Masters	18
Clerks	163
Sub-Inspectors, Linemen and Workmen	2,129
Other Staff	691

The total personnel supplied to Mesopotamia since the commencement of the Military Operations in 1914 amounted to :—

Gazetted Officers	16
Upper Subordinates	39
Traffic (Civil, including Telegraph Masters and Clerks)	701
Traffic (Military)	774
Line Staff	450
Workmen	5,107
Artisans	180
Followers	910
Total						8,177

The approximate value of telegraph stores issued during the year to the various Expeditionary Forces was as follows :—

	Rs.		
(1) Mesopotamia Expeditionary Force	8,57,719
(2) East African Expeditionary Force	6,614
(3) East Persian Cordon and Bushire Field Force	1,74,297

Stores worth Rs. 1,60,440 were also issued direct to the Indo-European Telegraph Administration and other Departments.

Inland Telegrams.

47. The total number of inland telegrams was 18,152,099 and the value Rs. 1,92,76,205, an increase over the preceding year of 1,003,869 or about 6 per cent. in number and of Rs. 56,13,683 or about 41 per cent. in value. The disproportionate increase in value is due to the increased rates for inland telegrams introduced from 1st September 1918. Inland telegrams. [Appendix XIV (page 45).]

State telegrams which constitute about 11 per cent. of inland traffic rose by about 8 per cent. in number and by about 34 per cent. in value.

Private telegrams increased by 5 per cent. in number and about 44 per cent. in value.

Press telegrams decreased by 4 per cent. in number and increased by about 0·3 per cent. in value. The decrease in this class of traffic is partly due to the discontinuance to Government officials of Reuter's Summary of news from 1st March 1919 and to a decrease in the war news since the cessation of hostilities.

The average value of a State telegram was Rs. 1·856 compared with Rs. 1·496 in the previous year, of a private telegram Re. 0·961 against Re. 0·706 in 1917-18 and of a press telegram Re. 0·940 in 1918-19 and Re. 0·899 in 1917-18.

48. The total number of inland telegraphic money orders was 858,865, yielding telegraph revenue of Rs. 6,22,231 against 849,307 and Rs. 4,76,216, respectively, in the previous year. Inland telegraph money orders. [Appendix XIV (page 46).]

49. Owing to the difficulty in obtaining apparatus it has not been possible to extend the use of Printing Telegraph Systems to any very large extent during the year. Creed apparatus has been installed at Lahore and two of the early pattern Creed printers have been replaced by printers of the latest pattern. Apparatus.

50. The total number of combined post and telegraph offices open on 31st March 1919 was 3,368 with a staff of 4,654 clerks employed on signalling against 3,337 offices and 4,827 clerks employed on that duty at the close of the preceding year. The net increase in the number of combined offices was 31 compared with 5 in the preceding year. Combined post and telegraph office

Excluding free messages, the number of telegrams sent from combined offices increased from 11,349,659 to 11,859,711 or by 4 per cent. The revenue rose from Rs. 82,05,119 to Rs. 1,17,23,315 or by about 43 per cent. The number of telegrams delivered by these offices was 9,614,720 against 9,297,575 during 1917-1918.

Postal receiving
offices.

51. In addition to the messages sent and received from combined post and telegraph offices, 73,665 telegrams were accepted by other post offices for transmission by post to telegraph offices and the revenue realised on them was Rs. 59,269. The corresponding figures for 1917-18 were 72,755 and Rs. 46,250.

The total number of telegrams received at post offices in the Persian Gulf for the Indo-European Telegraph Department was 17, as against 273 during the preceding year, and the fees levied on them amounted to Rs. 127 as compared with Rs. 1,298 in 1917-18.

Growth of inland
traffic, private
and state.

52. Charts are appended showing year by year the number and value of inland private and inland state telegrams during the ten years 1908-09 to 1918-19. These have been drawn on a logarithmic scale so as to show clearly to the eye the relative changes which have taken place. The actual changes in number and value can be inferred from the numerical scales, any causes which have affected the normal increase in the growth of traffic have been noted at the appropriate points on the charts themselves.

Foreign Telegrams.

Foreign telegrams
generally.
[Appendix XIV(3),
page 46].

53. The total number of foreign telegrams dealt with rose from 1,988,825 containing 38,245,565 words in 1917-18 to 2,175,969 containing 45,307,691 words in 1918-19, the increase being 9 per cent. in the number of telegrams and 18 per cent. in the number of words. The Indian share of value was Rs. 59,76,011 against Rs. 44,14,551 in the previous year, an increase of about 36 per cent.

The chief items responsible for this increase were State foreign telegrams which rose by about 26 per cent. in number, 27 per cent. in words and 75 per cent. in value and private foreign telegrams at full rates which increased by 16 per cent. in number, 26 per cent. in words and 32 per cent. in value.

Telegrams exchanged
with Ceylon.

54. The total number of telegrams exchanged between India and Ceylon was 309,566, an increase of 22 per cent. over the preceding year. This large increase is due to a rise in the telegraphic money order traffic and to frequent fluctuations in trade.

Telegraphic money
order advices ex-
changed with Cey-
lon, Mesopotamia,
the Persian Gulf and
the United King-
dom.

55. The number of telegraphic money orders exchanged with Ceylon was 50,962 as against 45,702 in the previous year, an increase of 11 per cent.

There were 445 telegraphic money order advices exchanged with Mesopotamia and the Persian Gulf during the year as against 1,206 in the previous year, a decrease of 63 per cent.

There were 2,785 telegraphic money order advices exchanged with the United Kingdom during the year as compared with 1,451 in the previous year from 1st November 1917 to 31st March 1918.

Telegraphic com-
munication with
foreign countries.

56. The routes to Europe *via* Teheran and *via* Turkey remained interrupted leaving only one direct telegraphic route, namely *via* Suez, open to Europe from India during the year. The result was that the traffic on the Suez route was congested on several occasions and it became necessary for the Eastern Telegraph Company to suspend entirely the acceptance of week-end (quarter rate) telegrams since the 18th of October.

There was very heavy congestion and delay on foreign telegrams both with Europe and the Far East during the latter part of the year. This was caused partly by the Peace Conference traffic which was very heavy and partly by the interruption of the direct Pacific route between America and the Far East, resulting in the traffic from America to the Far East having to be diverted *via* Europe and the Aden-Penang routes, one of which goes *via* India and the other *via* Colombo. The situation was further aggravated by an interruption on the Cocos cable route connecting South Africa with Australia which necessitated additional diversion of traffic to the Indian and Ceylon routes.

Communication with China *via* Bhamo was practically confined to the province of Yunnan as the telegraph line beyond was interrupted for about ten months out of the twelve. With Yunnan itself communication was interrupted for about 369 hours during the year.

Communication with Siam *via* Moulmein was interrupted for about 410 hours as against 319 hours the previous year.

Direct cable communication with Australia *via* Madras was maintained throughout the year without interruption.

- 57. Charts are appended showing the changes in number and value of foreign, private and state telegrams during the ten years 1908-09 to 1918-19. The remarks made under the heading "Inland Telegrams", regarding the corresponding charts, apply to the charts for foreign telegrams also. Growth of foreign traffic, private and state.

Wireless Telegraphy.

58. The wireless telegraph stations in India continued to work satisfactorily throughout the year except during the usual periods of atmospheric disturbance. Working of wireless stations.

No new stations were opened during the year.

The accumulator batteries at three stations were renewed.

Small lookout stations, erected for war purposes at Preparis Island and Cape Negrais, were dismantled.

This Department reassumed control of the coast wireless telegraph stations from the Navy in March.

TELEPHONES.

59. The demand for telephones continued to increase but unfortunately the policy of restricting new connections to those required for urgent Military or Political reasons had to be continued for practically the whole year. Progress in provision of telephone communication.

Small exchanges were opened at Abbottabad, Nowshera, Mardan and Risalpur.

The trunk service between Calcutta and the Coalfields established in May 1917 has been in great demand as is shown by the increase in the revenue from Rs. 9,963 in 1917-18 to Rs. 21,387 in 1918-19. The provision of additional trunks to carry the rapidly increasing traffic is now under consideration.

The demand for connections in Simla and Delhi during the year exceeded the capacity of the equipment available. Material for the reconstruction of the Delhi Exchange, which was destroyed by fire in March 1918, was not received in time to permit of its installation before the commencement of the Delhi season but temporary arrangements were made for the supply of the bulk of the connections required by Government. The new apparatus arrived shortly before Christmas and was speedily installed without affecting the quality of the service. Before the end of the season all demands had been met.

The work of laying underground cables to replace the main sections of overhead lines on the Lahore Telephone system, which was mentioned as being in progress in last year's report, was completed during the year and the fitting of the Automatic Exchange was taken in hand.

Trunk Telephone lines were opened to the public during the year from Rawalpindi to Murree, from Simla to Lahore during the hot weather and Delhi to Lahore during the cold weather and from Lahore to Amritsar. These lines are worked on the two wire composite system giving 1 telephone and 1 telegraph circuit.

A few Public Call offices have been opened in Calcutta and in the Bengal Coal Fields district but the demand for these call offices has so far been moderate.

60. The gross rental of all telephones provided by this Department, excluding those supplied to Railways and Canals, was Rs. 12,41,115 in 1918 as against Rs. 11,99,213 for the preceding year. There are now 241 telephone exchanges owned and maintained by Government of which 61 are operated by this Department—an increase of three over last year. The number of connections at the end of 1918 was 7,066 against 6,905 connections on the 31st December 1917. There were also 1,047 offices connected to independent non-exchange circuits, compared with 1,127 in the previous year. The number of operators employed in the exchanges worked by the Department was 230. Telephone staffs.

Telephone ex-
changes worked by
companies.

61. At the end of 1918 the number of exchanges established by licensed telephone companies was 13 with 15,653 connections, compared with 13 exchanges and 14,741 connections at the close of the preceding year. The rental of these systems rose from Rs. 24,86,193 to Rs. 25,77,517. The restrictions referred to in paragraph 45 applied also to these systems and adversely affected their extension during 1918.

Construction and Maintenance.

Line construction
and maintenance.

62. A considerable number of wires were erected, mostly in the Northern and Southern Circles, to cope with the growth of traffic. A number of extra wires were also erected for train control purposes along the East Indian, Bengal-Nagpur and Great Indian Peninsula Railways.

New cables were laid across the Channel Creek at Mud Point and across the Rangoon River at Choki Point. The shore ends of a number of other cables also had to be lengthened, owing to the erosion of rivers, and certain faulty cables in the Dacca Division which had almost been abandoned were successfully repaired.

The telegraph lines throughout the country worked satisfactorily, though maintenance repairs have had to be somewhat curtailed during the last four years owing to conditions caused by the war.

There was a total break down of all the telegraph and telephone lines in Madras on the night of the 11th November 1918 caused by a cyclone of exceptional violence. Communication was, however, promptly restored.

Fitting and re-
fitting of offices.

63. The Sholapur Office which was removed to a new building and the new Departmental office at Patna, located in the same building as the post office were fitted up during the year on modern lines.

Telegraph Stores and Workshops.

Telegraph stores.

64. The value of the stock at the beginning of the year was Rs. 47,21,542 ; stores to the value of Rs. 59,04,010 were received during the year, of which Rs. 20,78,511 represented the value of stores imported from England ready for issue, Rs. 10,67,393 the value of stores transferred from the workshops and Rs. 20,37,199 the value of stores purchased in India. The issues during the year amounted to Rs. 42,85,716, of which Rs. 14,11,542 was transferred to other Government Departments and sold to the public. The value of stock in hand on 31st March 1919 was Rs. 63,39,836.

The store Agency at Cawnpore was closed during the year.

Telegraph work-
shops.

65. The Telegraph workshops have been very active throughout the year. The value of outturn rose from Rs. 13,58,000 in the previous year to Rs. 14,48,000.

The output of galvanized tubes for posts was limited to the material available, and fell from 59,000 in the previous year to 50,000. 954 tons of iron castings were made against 1,233 tons in 1917-18.

The manufacture of insulator stalks which was started last year, increased from 32,800 to 290,600 during the year.

83 steel masts of various heights and 5,500 bamboo posts were made.

The instrument shops continued to be fully occupied throughout the year. 11,419 of the principal instruments were made, including among those for the Army Department 519 Field Service Telephones I. P. Mark II and 60 I. P. Mark III.

13,269 instruments were repaired against 14,329 in 1917-18.

The manufacture of munitions has gradually fallen off since the armistice.

The number of vans of the Calcutta Postal Motor Service increased from 15 last year to 23 on 31st March 1919.

26 van bodies for the Kashmir Motor Postal Service were designed and made. Besides these, 15 bodies for various services were also designed and under construction during the year. Van body building has now become an established branch of workshops.

The value of raw materials and stores consumed during the year was Rs. 10,66,374 of which nearly half represents local purchase.

Financial Results of the Telegraph Department.

66. The Telegraph Accounts for the last five years shows the following results :—

Financial position
of the Telegraph Department.
(Appendix XVII
page 50.)

	Receipts.	Revenue charges.	Surplus.
	Rs.	Rs.	Rs.
1914-15	1,70,59,934	1,40,66,947	29,92,987
1915-16	1,85,78,406	1,42,20,653	43,57,753
1916-17	2,07,82,482	1,36,74,010	71,08,472
1917-18*	2,46,85,087	1,27,30,656	1,19,54,431
1918-19	3,23,60,223	1,47,12,321	1,76,47,902

*Revised figures.

The very large surplus for the year under review may be attributed to (1) the rise in telegraph rates which had effect from September 1st 1918, (2) the extended use by the public of foreign fully paid cables due to the uncertainty of the mail service and the delays to deferred traffic, (3) the conditions of trade which were brisk throughout the greater portion of the year and which resulted in heavy commercial traffic, (4) the increase in state traffic which continued to expand at a very rapid rate and (5) the reduction in charges for the maintenance and upkeep of the system in India owing to the difficulty which was experienced in obtaining line stores and apparatus from England and to the necessity for conserving such stocks as were forthcoming in case they might be required for military purposes.

It cannot be anticipated that such favourable results will be obtained again as several revisions of pay involving heavy expenditure have been sanctioned recently and very large revenue expenditure must be incurred in restoring the system to a thoroughly efficient state now that material is again forthcoming. In addition the staff hitherto employed on field service will doubtless gradually return to India and will replace the lower paid staff which has been employed temporarily.

Revenue charges include gratuities, leave allowances paid out of India, and the average capitalised value of pensions paid to telegraph officials, while the receipts include the *pro forma* value of news free and concessional traffic. No credit is, however, taken for the services rendered by the Department in the care and maintenance of large quantities of mobilization telegraph stores which are kept at the disposal of the military authorities at various centres; nor is any allowance made for the very heavy expenditure, both initial and recurring, that has been incurred in connection with the erection and upkeep of the various wireless stations for which there is practically no monetary return.

The capital account of the Department was increased by Rs. 37,11,404 during the year and amounted to Rs. 13,69,65,861 at the end of the year.

PERSONAL MATTERS.

67. During the year under review the following rewards were conferred upon officials of the Department for meritorious service in the field :—

Post Office.

Tempy. Lt.-Col. H. A. Sams, R. E. .. Created a Companion of the Most Eminent Order of the Indian Empire.

Tempy. Capt. C. J. E. Clerici,
C.I.E., R.E.

Tempy. Major A. Angelo, R.E.

Tempy. Major (Bt.-Lt.-Col.) K. A.
Appleby.

.. } Appointed Officers of the Most Excellent Order of the British Empire.

Capt. S. C. Sinclair ..

Tempy. Lt. J. S. Buckner, R. E. ..

Tempy. Lt. C. Probyn Smith,
R.E.

Tempy. 2nd-Lt. E. B. Thompson, R.E.

Tempy. Hon. 2nd-Lt. K. C. Sen, R.E.

Tempy. 2nd-Lt. J. Ferguson, R.E. ..

Tempy. Hon. 2nd-Lt. Shujat Ali, R.E. }

Appointed Members of the Most Excellent Order of the British Empire.

Mr. T. J. Daintith ..

.. } Awarded the Military Cross.

Mr. H. Galvin ..

Mr. M. D. Murtrie ..

Mr. H. V. H. Roberts ..

Mr. A. Paul ..

Mr. A. S. Pusey ..

Mr. G. F. Gonsalves ..

Mr. C. G. Rebello ..

Mr. A. W. Vernem ..

Mr. W. W. Homer ..

Mr. A. D. Gonsalves ..

Mr. C. E. Lovejoy ..

Mr. A. B. Cutting ..

Mr. L. A. T. Anthony ..

.. } Awarded the Meritorious Service Medal.

Mr. Muzaffar Ahmad ..

Mr. Bishan Das ..

Mr. Abdul Karim ..

Mr. Bindra Ban ..

Mr. Shah Ghafur Khan ..

Mr. J. S. Nadder (deceased) ..

Mr. Raj Rup Lal ..

.. } Awarded the Indian Distinguished Service Medal.

Mr. Jainti Pershad ..

.. } Awarded the title of Rai Sahib.

Mr. Bhagwant Ramchandra Chawan.. } Awarded the title of Rao Sahib.

Mr. Jowahir Singh Sahni } .. } Awarded the title of Sardar Sahib.

Telegraphs.

Tempy. Major A. P. Manning, M. C. ..

Mr. C. N. Garnier ..

.. } Appointed Officers of the Most Excellent Order of the British Empire.

Mr. R. Robertson ..

Mr. E. V. Arklie ..

Mr. W. C. Bamford ..

Mr. H. R. McHugh ..

.. } Appointed Members of the Most Excellent Order of the British Empire.

Hari Pershad, I.D.S.M. ..

.. } Awarded the title of Rai Sahib.

Mr. M. S. Perkins ..

Mr. H. Pickering ..

Mr. W. E. Robinson ..

Mr. E. W. Jones ..

.. } Awarded the Meritorious Service Medal.

SUPPLEMENT TO THE GAZETTE OF INDIA, NOVEMBER 1, 1919.

Sher Khan	Awarded the Indian Distinguished Service Medal.
Karam Khan	} Awarded the Indian Meritorious Service Medal.
Niamat Khan	

68 officials of the Post Office branch and 78 of the Telegraph branch were mentioned in Despatches for service in the Field.

In addition, the rewards noted below were conferred on the undermentioned officials of this Department for meritorious service rendered in India in connection with the war : —

Post Office.

Mr. D. J. Murtrie, I.S.O.	Appointed an Officer of the Most Excellent Order of the British Empire.
Mr. S. H. Glackan..	Appointed a Member of the Most Excellent Order of the British Empire.

Telegraphs.

Mr. R. S. Purssell	} Appointed Officers of the Most Excellent Order of the British Empire.
Mr. E. Thompson	
Mr. B. F. Gomes	Appointed a Member of the Most Excellent Order of the British Empire.

Besides the names of 13 officials of the Post Office and 12 of the Telegraph Branch of the Department were brought to the notice of the Government of India for valuable services rendered in India in connection with the war.

I have the honour to be,

Sir,

Your most obedient servant,

G. R. CLARKE.

Director General of Posts and Telegraphs.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, NOVEMBER 1, 1919.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller-General, etc.

GAZETTE OF INDIA.

NOTICE.

The 18th March 1919.

On and after 29th March and until further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published in Simla, Parts II and III will continue to be published in Calcutta. All notifications and other matter intended for publication in those Parts should be addressed to the Publisher at Simla and Calcutta, respectively.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette* and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 p.m. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India."

Rates of Subscription.

	per annum.
Subscription for <i>Gazette</i> and Supplement	Rs. 15 0 0
Postage	5 8 0

1910—586 (Watzlawik).

APPLICATIONS FOR PATENTS UNDER SECTION 8.

October 20.

- 4941. Carey-Gavey Syndicate Ltd. *Improvements in or relating to shaded-pole motor and the like.*
- 4942. J. Wells. *Improvements in gas producers for mechanical traction.*
- 4943. A. E. M. Van der Meersch. *Improvements in safety razors.*
- 4944. Macfarlane Communications Corporation. *Improvements in electrical system of train communication.*
- 4945. Macfarlane Communications Corporation. *Improvements in electrical system of communication.*
- 4946. Lobnitz & Co., Ltd. *Improvements in dipper dredges and excavators.*
- 4947. Vereinigte Chemische Werke Aktiengesellschaft. *Manufacturing of propantriol from sugar.*
- 4948. B. B. Raha. *Family milk churner.*
- 4949. V. F. Nowell and C. A. Collett. *An improved waste preventing water tap.*
- 4950. S. Midzushima. *Improvements in and relating to pneumatic tyres.*
- 4951. Singer Manufacturing Co. *Sewing machine cabinet.*

October 21.

- 4952. G. W. Murray. *Measuring appliance for fluids.*
- 4953. F. Handley Page and Handley Page Ltd. *Improvements in mechanism for releasing bombs and other articles from aircraft.*
- 4954. F. Handley Page. *Means for supplying fuel to internal combustion engines.*

October 22.

- 4955. (Mrs.) M. Fuhrhop. *Luminous glass bangles.*
- 4956. J. C. Dallas and T. Hoggan. *Improvements in apparatus for the sterilization of sewage and the like.*

October 25.

- 4957. S. H. Hasan. *Improved gear box.*
- 4958. L. Bartmann. *Process for disintegrating fragmentary or granular material.*
- 4959. T. Umeda. *Improvements in apparatus for manufacturing seamless envelopes.*
- 4960. Sindicato Argentino Para la Explotacion de Inventor. *Improvements in wheels for vehicles and especially for automobiles.*
- 4961. M. Tsubumi. *Solid ink.*
- 4962. K. Dwarak Nath and K. Srinath. *Fountain brush.*
- 4963. V. K. Singhan. *Improved processes for manufacturing copra-cake dessicated meat or oil and poonac out of the fresh meat of coconuts.*
- 4964. J. Maden. *Improvements in and relating to hollow concrete blocks for building purposes and road construction.*

APPLICATIONS ACCEPTED AND ADVERTISED UNDER SECTION 6.

Notice is hereby given that all persons interested in opposing the grant of a Patent on any one of the applications, referred to below, may, at any time within three months of the date of this *Gazette of India*, give notice at the Patent Office in the prescribed form No. 5 of such opposition.

Printed copies of the specifications in the following list will be on sale at the Patent Office, 1, Council House Street, Calcutta, within about three weeks.

Any one desiring a copy posted to an address in British India should send to the Patent Office the sum of annas eight by money-order on which the number of the application should be stated on the coupon at the foot of the order.

- 4576. O. Hermoye and C. Glorian. *Improved concrete construction.*
- 4592. H. L. M. J. Benaid. *Improvements in and relating to projectors, beacon lights, signalling apparatus and the like.*
- 4848. Holt Manufacturing Co. *Improvements in and relating to the track-shoes or tread-plates of chain-track vehicles.*
- 4862. Alphaero Engines Ltd. *Improvements in or relating to internal combustion engines.*
- 4865. R. A. Thom. *Improvements in or relating to steam superheater pipes or elements and a method of manufacturing the return ends or torpedo ends of such elements and the like.*
- 4867. L. J. Martin. *Improved rail fastening.*
- 4868. Holt Manufacturing Co. *Improvements in and relating to chain-track tractors.*
- 4869. Holt Manufacturing Co. *Improvements in and relating to chain-tracks for vehicles.*
- 4870. P. A. H. Mossay and Enclosed Motor Co., Ltd. *Improvements in dynamo electric machines.*
- 4872. B. Andrews and W. C. Averill, Jr. *Process and apparatus for treating hydro-carbons.*
- 4873. F. Handley Page. *Connections for members of aircraft frames.*
- 4874. W. A. Brown and F. G. White. *Process for separating hydro-carbons and water.*
- 4876. Owens Bottle Co. *Means for making bottles.*
- 4877. F. J. J. Gibbons. *Improvements in metal window frames and sashes of the sliding sash type.*
- 4879. Q. Sestini and T. Rondelli. *Improvements in or relating to the "bronzing" or colouring of metallic surfaces.*
- 4880. Electrolytic Zinc Co. of Australasia Proprietary Ltd. *Improvements in the roasting of zinc sulphide ores preparatory to leaching.*
- 4883. T. G. Jones. *Improvements in and relating to metal seals.*
- 4884. E. H. W. Weibull. *Improvements in roller bearings.*
- 4885. E. H. W. Weibull. *Improvements in roller cages for roller bearings with convex rollers.*
- 4886. F. A. Anderson, M. Deacon, and N. P. W. Brady. *Improvements in or relating to furnaces for distillation of coal, shale and other like substances.*

PRINTED SPECIFICATIONS PUBLISHED.

Printed copies of the undernoted specifications may be purchased at the Patent Office, 1, Council House Street, Calcutta, annas eight each.

- 4263. P. M. Mehta. *Improvements in rifles.*
- 4886. J. Wells. *Improvements in and relating to the carbonisation of wood and the like.*
- 4889. Techno-Chemical Laboratories Ltd. *Improvements relating to methods of and means for conducting high temperature reactions.*
- 4577. M. Weinrich. *Method of manufacture of carbonaceous filtering media.*
- 4686. J. M. Marum. *An improved method and apparatus for vaporizing volatile oils for disinfecting and other purposes.*
- 4709. V. F. Nowell and C. A. Collett. *Improved waste preventing water tap.*
- 4712. J. A. Palmer. *Improvements in draw-bar gear.*
- 4748. G. Atcock. *Improvements in liquid fuel burners for the furnaces of locomotive boilers and for other furnaces.*
- 4772. O. Stott and E. R. Jones. *Improvements in and connected with the aeration of sewage and other impure liquids.*
- 4773. E. S. Luard. *Improvements relating to power brake apparatus for railway vehicles.*
- 4774. E. S. Luard. *Improvements in and relating to piston rods for the cylinders of vacuum brake apparatus and the like.*
- 4777. C. A. Stevens. *Process for the separation of sulphur from furnace gases.*
- 4780. H. S. Reece. *Improvements in furnaces for boilers and the like.*
- 4784. H. S. Hele-shaw. *Improvements in hydraulic clutches or couplers.*
- 4787. C. O. Manuel. *Improvements in padlocks or the like.*

4789. E. Hayward. *A flat file extractor.*
 4791. S. D. Master. *Bottle lamp.*
 4795. F. G. Pickering. *Improvements in or relating to clip devices for fastening rubber jointing sleeves or the like to metal or other pipes and tubes.*
 4797. Standard Oil Company. *Petroleum products.*
 4799. T. H. West. *Improvements in or relating to carburetting devices.*
 4800. British Westinghouse Electric and Manufacturing Co., Ltd. *Improvements in axial flow steam turbines.*

SEALING FEES DUE UNDER SECTION 10.

Notice is hereby given that a patent may now be sealed on the applications referred to below. If it is desired that a patent should be sealed, a request on the prescribed form No. 7 accompanied by the fee, Rs. 30, should be sent to the Controller of Patents, 1, Council House Street, Calcutta.

CESSATION OF EXCLUSIVE PRIVILEGES.

The public are warned that entries under this heading must not be accepted as final, as under the provisions of Rules 9 and 11 of "The Indian Patents and Designs (Temporary) Rules, 1915," the Controller may extend the time prescribed by the Indian Patents and Designs Act, 1911, and by the Inventions and Designs Act, 1888, for paying the necessary renewal fees.

The Patent Office will supply on request definite information, so far as possible, as to the position of any particular Patent or Exclusive Privilege.

 2228. (King.)

DESIGNS ENTERED ON THE REGISTER.

From 20th to 25th September 1919.

- Class 13. Nos. 8943 to 8987. The Calico Printers' Association, Ltd., of St. James's Buildings, Oxford Street, Manchester, England. October 11, 1919.
 Class 15. Nos. 8988 to 8992. The Calico Printers' Association Ltd., of St. James's Buildings, Oxford Street, Manchester, England. October 11, 1919.

NOTICES.

THE PATENT OFFICE, 1, COUNCIL HOUSE STREET, CALCUTTA.

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. *All communications* relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (II of 1911), or in continuation of applications under the Inventions and Designs Act (V of 1888) must be made in English and addressed to the Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed and a full address given in all communications.

2. *Directions* for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Temporary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1915, together with current regulations and instructions. *These should be consulted before an application is made to the Controller.*

3. *Advice.* The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inventions. Models are not required unless specially asked for. Drawings must be on tracing cloth and the Rules and Instructions for the preparation of drawings as given in the Handbook should be strictly followed. A provisional patent cannot be secured under the Indian Patents and Designs Act, 1911.

4. Applicants are warned that the Indian Patents and Designs Act, 1911, is in force in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. The International Convention for the Protection of Industrial Property does not include India. For information regarding patents in countries other than India application should be made to the patent offices in the countries concerned.

5. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission for which due allowance should be made. In cases where it is not possible to have the fees handed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

6. *Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. There is no provision of Law in British India for their registration. Neither does this Act deal with *pictures, photographs, etc.*, for which copyright is obtainable under the Indian Copyright Act, 1914.

7. *Printed Specifications* of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*. These specifications can be purchased at the Patent Office at a uniform price of 8 annas per copy; and may be seen free of charge, together with other publications of the Patent Office, at the following places:—

AHMEDABAD . . .	R. C. Technical Institute.	HYDERABAD . . .	Revenue Department of His Highness the Nizam's Government.

Qualified Urdu Teachers.

ABBOTTABAD.—M. Q. Rahmat Ullah Khan, B. A., Assistant Master, Government High School, Abbottabad.

AGAR-MALWA.—M. Rameshwar Dayal, Officer's Munshi, Agar, Malwa, C. I.

ALLAHABAD—

M. Shaikh Mohammad Ismail, South Malaka, Allahabad.

M. Syed Mazhar-ul-Husain, 253A, Mohtashim Ganj, Allahabad.

M. S. Athar Hussain Jafari, Head Maulavi, A. P. Mission High School, 257 Chak, Allahabad.

AMBALA—

M. Mohd. Akbar Khan Haidari, The Oriental Lodge, Ambala.

M. Zafarullah Khan Haidari, Oriental Lodge, Ambala.

M. Chhote Lal, Lalkurti Bazar, Ambala.

M. Jawala Parshad, Regimental Munshi, Lalkurti Bazar.

M. Gulam Qadir, Karimullah's Compound, near H. M. High School, Ambala Cantonment.

M. Mohomed Khalil, Urdu Instructor, Mohalla Maimaran, Ambala City.

*M. M. Muzaffar Hamid Faruqi, Munshi Rasul Bakhs Compound near Kali Bari.

AMRITSAR.—M. Mahrudin, C/o Messrs. Karamdin Bros., Hall Bazar, Amritsar.

AMROHA.—M. Khwaja Amir Ahmad Ansary, Government High School, Amroha.

BANGALORE—

†M. Mukhtar Ahmad, 1, Gun Troop Road, Bangalore.

M. Ghulam Ahmed Sahib, 58, Dispensary Road, Bangalore (Cantonment).

*M. S. M. Abdullah Afzali, Officers' School of Instruction, Bangalore.

BANNU.—M. Mui Chand Khurana, Munshi Alim, Pensioner and Clerk to Afghan Medical Mission, Bannu.

BAREILLY.—M. Hafizuddin Khan, B.A., Aqab Kotwali, Bareilly.

M. Basheer Ahmad, Bazaria Inayatganj (Old City).

BARRACKPORE.—M. Nisar Ahmad Khan, 89, Baker Mahal.

BELGAUM.—M. Ismail Babaji Bhaldar, 4221, Chandoo Mholla.

BOMBAY—

†Mr. H. M. Anwar, Karelwadi, Thakurwar Road, Post No. 2, Bombay.

Mr. Musa Younus Hakim, Mustafa Lodge, Antop Hill, Matunga, Bombay.

Mr. Mohd. Shafi Ahmad Mashari, M.A., Address.—Kerawala Mansion, Carnac Road, Bombay.

Mr. M. Abdul Salam, Moulvi Tola, Budaun.

CALCUTTA—

M. A. M. F. Wahhab, Librarian, Calcutta Madrasah, 14, Zakaria Street.

M. A. M. Ubaidur Rashid, B.A., 4, Korabardar Lane, P. O. Wellesley.

M. Abdul Badi, 5, Ramsanker Roy Lane.

M. Abdul Habib Khan, 12, Jamadar Khan Lane, Balligunge.

M. Abdul Karim Nashtar, 8, Jamadar Khan Lane, Balligunge.

M. Abdul Wajid, 106, Harrison Road.

M. Akmal Ali Akmal, 25, Nur Ali Lane, P. O. Entally.

M. Asherur Sadain, Teacher, Calcutta Madrasah, 138/1, Karaya Road.

M. Azizun Nabi Khan 27, Karaya Bazar Road, Balligunge.

*M. Badruddin Ahmed, B.A., 3, Elliot Lane.

M. Badru-z-Zaman, 212/1, Linton Street.

†M. Daliluddin Ahmed, 37, Karaya Bazar Road, Balligunge.

M. Husain Mirza, 4/1, Collin Lane.

†M. Mirza S. M. K. Sultan, B.A., M.F., 11, Colootolla Street.

M. Mohd. Asam, 19, Tiljala 1st Lane, P. O. Balligunge.

M. Mohd. Gholam Kibriya Ibrat, 17/1, Norrallah Doctor's Lane, Balligunge.

M. Mohd. Israil Khan, 5, Doctor Karam Hossain Lane, Balligunge.

M. Mohd. Muslim, 12, Damzen's Lane, Chinapara.

M. Mohd. Quasim Khan, C/o H. A. Rahaman & Co., 44, Lower Chitpore Road.

M. Mohd. Qurban Ali Asri, 7, Onrait 1st Lane, Entally P. O.

M. Nizamuddin, 12, Damzen's Lane, Chinapara.

M. Rashiduddin Ahmed Khan, 41, Gardner Lane, Entally P. O.

M. Raza Ali Wahshat, M.R.A.S., 2/1/2, Tiljala 1st Lane, Balligunge.

M. S. E. Haque, 41, Gardner Lane, Entally P. O.

M. S. M. Yunus, Baker Hostel, Calcutta Madrasah.

M. Shahabuddin Ahmad Siddiqi, 41, Gardner Lane, Entally P. O.

M. Syed Abu Zafar, 35, European Asylum Lane.

M. Syed Nawab Ali, 11, Colootolla Street.

CAMPBELLPORE.—*M. Din Mohammad Khan Talib, Officer Cadet Unit.

CAMPPORE—

M. S. Abdul Ghani, Regimental Munshi, Garrison Battalion, Royal Irish Rifles.

M. S. M. Aminuddin, Regimental Munshi, 1st Garrison Battalion, Royal Irish Rifles.

DELHI.—M. Aziz-us-Rahman (of Delhi), Regimental Munshi, The Fort, Delhi.

DERA GHAAZI KHAN.—M. M. Waris Ali Khan, "Waris," Junior English Master, Government High School Dera Ghazi Khan.

FEROZEPOR—

M. Suraj Narain, B.A., Kabari Bazar, Ferozepore.

M. Harnam Das, Headmaster, Malwa Khalsa School, Ferozepore City.

HAZARA.—M. Syed Mohammad, B.A. (Cal.), near Civil Dispensary, Mansohra, Dist. Hazara.

HISAR.—M. M. I. Jan Bukhari, C/o Booking Clerk, Railway Station, Biwani District, Hisar.

HYDERABAD (DECCAN).—M. Jamaluddin, Revenue Secretariat, H. E. H. the Nizam's Government, Hyderabad

JHANSI—

- *M. Mohd. Sadiq Ali, 39, Orcha Gate, Jhansi.
 M. Abdullah Khan, Officers' Munshi, Sadar Bazar, behind Kotwall.
 M. Nirmal Prasad Jain, Sadar Bazar.

JHELUM—

- M. Thakur Das Pahwa, Officers' Munshi, Jhelum.
 M. Chandan Khan, Officers' Munshi, Phurianwala Bazar, Jhelum.

JUBBULPORE—

- M. Abdul Rahim, Regimental Munshi, 1/4th Royal West Kent Regiment, Saddar Bazar, Jubbulpore.
 M. Mohd. M. Haque, Officers' Munshi, C/o Near Ali Shah's Garden, Nerbadda Road, Jubbulpore Cantt.
 Mr. Mahomed Zahid Khan, C/o Hakim Mahomed Hayat Khan, General Merchant, Sadar Bazar, Jubbulpore.

JULLUNDUR—

- M. Karam Chand, C/o Jacki Mull & Sons, Sadar Bazar, Jullundur Cantonment.
 M. Dharm Lal, C/o Oriental Book Depot, Jullundur.
 M. Murtaza Ahmad Khan, Akhgar Durrani, Village Bhaddam, Post Office Parjhan, District Jullundur.

KARACHI.—M. Anandram Thadamal, Regimental Munshi, Norfolk Regiment, Garrikhata, Karachi.**KASAUJI.—**M. Anand Sarup, Depot Munshi, Kasauli (summer only).**KOHAT.—***M. Lal Muhammad Qureshi, Officers' Munshi, C/o Head Master, A. V. M. Islamia School, Kohat.**KOLHAPUR.—**Pt. Vasudeo Damodar Kulkarni, 112, Shahupuri, Kolhapur.**LAHORE—**

- M. Sham Lal Bhargava, Officers' Munshi, Sadar Bazar, Lahore Cantonment.
 M. Mohd. Ishaq, Regimental Munshi, Bengali Mohalla, Sadar Bazar, Lahore Cantonment.
 M. M. Abdul Hamid, C/o H. Abdul Latif, Esq., Pleader, Haveli Pathranwali Mochi Gate, Lahore.
 M. Muhammad Din, 2999, Pir Gilanian Street, Lahore.
 M. Abdur Rahman Ahmed, C/o M. Nizamuddin Sahab, Kucha Bangrezan, Lohari Mandi, Lahore.

LUCKNOW—

- M. Abdul Karim, C/o The 10th Battalion, Middlesex Regiment, Lucknow.
 M. Mohd. Ashfaq Hussain, Regimental Munshi, 1/10th Middlesex Regiment, Lucknow.
 M. Sh. Abdul Rabb, E(d) Section, No. 1 Barrack of 1/10th Middlesex Lines, Lucknow.
 †M. Abdul Alim, Hussainganj, Lucknow.
 *M. Mohd. Yaqub Khan (Munshi Fazil), near Royal Hotel.
 M. Mohammad Musharraf Ali, Hewett Road, near Post Office, Lucknow.
 *M. Abdul Hamid, Kook's Hospital, Ghusiyari Mandi, Lucknow.
 M. S. Muzaffar Hussain "Zaidi", C/o Maulana "Sofi", Molvi Ganj, Lucknow.
 M. Mohd. Fazil Khan, C/o Munshi Karim Khan, Chhitwapur, near Takya Langara Shah.
 *M. Asis Mohd. Khan Afridi, 57, LaTouche Road.

LUDHIANA—

- M. Kishori Lal Jothi, Khanna Khurd, District Ludhiana.
 M. Amar Nath Yogi, Professor of oriental languages, Ludhiana.

MADRAS—

- M. Muhiiddin Hussain Sahib, 15/16, Vathiar Chinniah Pillai Street, Royapettah, Madras.
 Salyed Mahmud Padshah, General Collins' Road, Vepery.

MEERUT—

- M. Ahmad Bux, Regimental Munshi, 21st (Empress of India) Lancers.
 M. Mohamed Sarwar, Regimental Munshi, 12th Brigade, R. H. A., Lalkurti Bazar.

MHOW—

- Mr. Thomas Shah, son of Shaikh Mahomed Shah, C/o Commandant, Machine Gun Centre, Mhow.
 Mr. Syed Muhammad Umar, C/o Post Master, Mhow.

MONTGOMERY.—M. S. Karim Baksh, Regimental Munshi.**MOZUFFERPORE.—**M. Mohd. Shuaib, Arabic Teacher, Zilla School, Mozufferpore.**MULTAN—**

- M. M. Ghulam Haider Khan (of Nowshera), Officers' Munshi.
 M. Sultan Mohammad, Regimental Munshi, Multan Cantonment.
 M. Sher Ali Khan Rind, House No. 634, Sadar Bazar, Multan.
 M. S. M. Ramzan Masrur, Cantonment School, Multan.
 M. Sahibzada Dost Mohd. Khan, Durrani, Chahwala Hata of L. Jagannath, Sadar Bazar, Multan Cantt.

MURREE HILLS—

J. A. CHAPMAN,

Librarian.

**SULPHATE OF QUININE, SULPHATE OF CINCHONIDINE,
 CINCHONA FEBRIFUGE, RESIDUAL ALKALOID
 AND QUINOIDINE.**

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona Alkaloids. QUININE can be purchased by Government officers, District and Local Boards for Hospitals and Dispensaries in the Provinces of Bengal, Bihar, Punjab and Assam on indents duly countersigned by the Civil Surgeon of their Districts. It can also be purchased by Missionaries for *bona fide* public purposes. It is never sold to private persons or firms. CINCHONA FEBRIFUGE both in powder and $3\frac{1}{4}$ grain tablet forms and CINCHONIDINE can be purchased by Government officers and the general public. It is also sold by the Principal Druggists in Calcutta. QUINOIDINE or *Pure Amorphous Alkaloid* and *Residual Alkaloid* or *Amorphous Cinchona Alkaloid*, which contains about 40 per cent. of *Pure Amorphous Alkaloid*, are for sale to Missionaries and Government Institutions only. *These drugs are sold strictly cash and in advance but private purchasers may use the V. P. P. system*, and are obtainable from the SUPERINTENDENT, JUVENILE JAIL, ALIPORE.

The rates for these drugs from 16th May 1919 are as follows:—

SULPHATE OF QUININE.

For quantities 60 lbs. and above in one delivery	Rs. 24 per lb.
For quantities of not less than 6 lbs. but below 60 lbs. in one delivery	" 25 "
For any quantity less than 6 lbs.	" 26 "

SULPHATE OF CINCHONIDINE.

For quantities of not less than 6 lbs. in one delivery	Rs. 11 per lb.
For any quantity less than 6 lbs.	" 12 "
(Only small quantities available when in stock.)	

CINCHONA FEBRIFUGE.

For quantities of not less than 6 lbs. in one delivery	Rs. 5 per lb.
For quantities less than 6 lbs. (when in stock)	" 6 "

CINCHONA FEBRIFUGE TABLETS.

For quantities of not less than 6 lbs. in one delivery	Rs. 6 per lb.
For any quantity less than 6 lbs. (when in stock)	" 7 "

QUINOIDINE in non Tablet form (when in stock) and Residual Alkaloids.

" 4 "

QUINOIDINE TABLETS.

For quantities of not less than 6 lbs. in one delivery	Rs. 6 per lb.
For quantities less than 6 lbs. in one delivery (when in stock)	" 7 "

Quinine is available in 1-oz., $\frac{1}{4}$ -lb., $\frac{1}{2}$ -lb., 1-lb., 4-lb., and 6 $\frac{1}{4}$ -lb. tins.

Cinchonidine is available in $\frac{1}{4}$ -lb., $\frac{1}{2}$ -lb. and 1-lb. boxes.

Cinchona Febrifuge is available in $\frac{1}{4}$ -lb., $\frac{1}{2}$ -lb. and 1-lb. boxes.

Residual Alkaloid is available in 1-lb., 5-lb. and 10-lb. boxes.

Quinoidine is available in 1-lb. box.

Quinoidine Tablets are available in 1-lb. box.

Transit charges are in addition to the above prices in every case.

Local sale at the Jail gate from 7 to 10 A.M. and 2 to 4 P.M.

Drugs are sold for cash or by V. P. Post. Price of Postage must accompany the price of the drug (when the drug is required by Post). The name of the Railway and Steamer Station or Post Office must be written distinctly when the parcels are required by Rail Steamer or by Post. A scale of Postage is given below:—

[For $\frac{1}{4}$ lb. 4 As.; $\frac{1}{2}$ lb. 5 As.; 1 lb. 8 As.; $1\frac{1}{4}$ lb. 11 As.; 2 lbs. 14 As.; $2\frac{1}{4}$ lbs. Rs. 1 Anna 1; 3 lbs. Rs. 1 Anna 1; $3\frac{1}{4}$ lbs. Rs. 1 As. 4; 4 lbs. Rs. 1 As. 7; $4\frac{1}{4}$ lbs. Rs. 1 As. 10; 5 lbs. Rs. 1 As. 13; 6 lbs. Rs. 2; $6\frac{1}{4}$ lbs. Rs. 2 As. 3.]

Quinoidine tab: 1 lb. Weg. 3 lbs. Postage	Rs. 1	1	0
Quinoidine tab: 2 lbs. Weg. 6 lbs. Postage	2	0	0
Quinoidine tab: 3 lbs. Weg. 9 lbs. Postage	3	0	0

N.B.—Postage stamps are not accepted as revenue.

W. G. WOOD,

Principal, Thomason College, Roorkee.

**DEPARTMENT OF MINES IN INDIA, DHANBAD P. O.,
MANBHUM. ***

Indian Mines Act, 1901.

NOTICE.

An examination for First Class Coal Mine Managers' Certificates of Competency under the rules applicable to coal mines will be held on the 16th, 17th and 18th February 1920. An examination for Second Class Coal Mine Managers' Certificates of Competency will be held on the 23rd, 24th and 25th February 1920. Both examinations will be held at the Railway Institute, Dhanbad.

Rules 32 and 33 of the Indian Mines Act, 1901, require that a candidate for a first class certificate must be at least 23 years of age and have had at least five years' practical experience in a coal mine, and for a second class certificate be at least 21 years of age and have had at least three years' practical experience in a coal mine. The periods of practical experience may be reduced to three years and one year respectively, in the case of a candidate who has received a diploma in scientific and mining subjects after a course of study of at least two years at an educational institution approved in this behalf by the Governor-General in Council, or who has taken a degree in scientific and mining subjects at a University approved in this behalf by the Governor-General in Council.

The fees are Rs. 15 in the case of first class certificates and Rs. 8 in the case of second class certificates. By rule 34 of Government of India, Department of Commerce and Industry, Notification No. 2968—82, dated the 21st April 1906, "these fees shall be paid, not less than one month prior to the date of the examination, to the Chief Inspector of Mines at his office." The fees may be remitted by money order or paid in any other manner.

Applications and fees should be addressed to the Chief Inspector of Mines in India, Dhanbad P.O., E. I. Railway, and not to any Officer by name. No candidate will be permitted to sit at the examination unless his application, supported by original certificates as to experience and character, and fee, is received, in the case of a candidate for the first class certificate examination on or before the 15th January 1920, and, in the case of a candidate for the second class certificate examination on or before the 22nd January 1920. Candidates are advised to send all papers under registered cover.

G. F. ADAMS,

Chief Inspector of Mines in India,
and *ex-officio* President of the Board of Examiners.

DHANBAD,

The 13th October 1919.

C. S. SCOTT,
for Offg. Director, Royal Indian Marine.

THE HON'BLE THE CHIEF COMMISSIONER IN BALUCHISTAN.**NOTIFICATION.**

Quetta, the 24th October 1919.

No. 4183-R.—In exercise of the powers conferred by section 89 of the British Baluchistan Bazars Regulation, 1910 (V of 1910), the Hon'ble the Chief Commissioner in Baluchistan is pleased to make the following rules for the suppression of mendicancy and of loitering or importuning for the purpose of prostitution in, and for the removal and exclusion of certain persons from Sibi Bazar:—

1. Within the limits of the Sibi Bazar no person shall in any street or public place (a) loiter, or beg for alms as a mendicant, (b) loiter, or importune any person, for the purpose of prostitution.

2. (i) The Deputy Commissioner, Sibi, on receiving information that any person, whether resident within or frequenting the Sibi Bazar limits—

- (a) is a disorderly person keeping or frequenting a common gaming house, a disorderly drinking shop, or a disorderly house of any other description, or
- (b) has been convicted more than once, either within the Sibi Bazar limits or elsewhere, of an offence punishable under Chapter XVII of the Indian Penal Code, or
- (c) has been ordered under Chapter VIII of the Code of Criminal Procedure, 1898, either within the Sibi Bazar limits or elsewhere, to execute a bond for his good behaviour may make an order in writing, setting forth the substance of the information received, and issue a summons requiring such person to show cause why he should not be removed from the Sibi Bazar limits and be prohibited from re-entering them.

(ii) Every summons issued under sub-section (i) shall be accompanied by a copy of such order as aforesaid, and the copy shall be delivered by the officer serving the summons to the person served with the same.

(iii) The Deputy Commissioner shall, when the person so summoned, appears before him, proceed to enquire into the truth of the information received, and take such further evidence as may appear necessary and if on such enquiry it appears to him to be necessary for the maintenance of good order that the person should be required to remove from the Bazar limits and be prohibited from re-entering, the Deputy Commissioner shall report the matter to the Hon'ble the Chief Commissioner in Baluchistan, and if the Hon'ble the Chief Commissioner so directs, shall issue a notice in writing, requiring the person to remove from the Sibi Bazar limits within a time to be specified in the notice and prohibiting him from re-entering them without written permission from the Chief Commissioner in Baluchistan.

3. Whenever the Hon'ble the Chief Commissioner in Baluchistan thinks it expedient to exclude any person from the limits of the Sibi Bazar, whether with or without assigning any reason therefor, he shall send or cause to be sent to the Deputy Commissioner, Sibi, an order in writing to that effect, and the Deputy Commissioner shall cause a copy of the order to be served on the person, together with a notice in writing requiring him to remove from the Bazar limits within a time to be specified in the notice, and prohibiting him from re-entering them without the permission in writing of the Hon'ble the Chief Commissioner in Baluchistan.

Provided that no such order shall be made if the only reason for making it is that such person :—

- (i) is disorderly, or
- (ii) has been convicted of any offence punishable under Chapter XVII of the Indian Penal Code, or
- (iii) has been ordered under the Code of Criminal Procedure, 1898, to execute a bond for his good behaviour.

4. When any person has, under either of the two last foregoing rules, been directed to remove from the Sibi Bazar limits, and has not obtained the written permission mentioned in such rule to re-enter the Sibi Bazar limits, no person who has knowledge of those facts shall harbour or conceal him within those limits.

5. Whoever, (a) having under rule 2 or 3 been prohibited from remaining in or re-entering the Sibi Bazar limits, remains in or re-enters them without the written permission of the Hon'ble the Chief Commissioner in Baluchistan, or (b) commits a breach of rule 1 or 4, shall be liable to be arrested on a warrant issued by the District Magistrate, Sibi, and shall, on conviction by a Magistrate, be punishable with fine which may extend to fifty rupees and when the breach is a continuing breach, with a further fine which may extend to five rupees for every day after the date of such conviction during which the breach is proved before a Magistrate to have been persisted in.

6. Any member of the Police Force employed in the Sibi Bazar limits may arrest without warrant any person committing or charged with having committed an offence punishable under clause (a) or clause (b) of the last foregoing rule :—

Provided as follows :—

- (i) No person shall be so arrested whose name and address are known to the arresting officer.
- (ii) No person shall be so arrested who consents to give his name and address unless there is reasonable ground for doubting the accuracy of the name or address so given, the burden of the proof of which shall be on the arresting officer.
- (iii) No person so arrested shall be detained after his name and address have been ascertained.
- (iv) No person so arrested shall, except under the orders of the Deputy Commissioner, Sibi, be detained longer than may be necessary for bringing him before the Deputy Commissioner.

By order,
J. H. DAVIES,

Secretary.

HC 2

PUBLIC WORKS DEPARTMENT, DELHI.

**GOVERNMENT OF BENGAL, REVENUE DEPARTMENT.
Land Acquisition Branch.**

NOTIFICATION.

Darjeeling, the 23rd October 1919.

No. 2293-T.R.—The following agreement made under section 41 of the Land Acquisition Act, I of 1894, is published for general information.

M. C. McALPIN,
Secretary to the Government of Bengal.

MEMORANDUM of agreement made this 22nd day of August 1919 between the Burmah Oil Co., Ltd. a joint stock Company with limited liability, a Company incorporated under the English Companies Act, and having its registered office at Glasgow in Scotland (hereinafter called the Company) of the one part and the Secretary of State for India in Council (hereinafter called the Secretary of State) of the other part.

Whereas for the purpose of the construction of a pipe line the Company has applied to the Government of Bengal for the acquisition under the provisions of the Land Acquisition Act, 1894, of the piece or parcel of land containing 56 acre or thereabout situate in the village of Patenga in the district of Chittagong and more particularly described in the schedule below.

And whereas the said Government of Bengal, being satisfied by an enquiry held under section 40 of the said Act that the proposed acquisition is needed for the aforesaid purpose and that the said work is likely to prove useful to the public, has consented to acquire on behalf of the Company the piece or parcel of land hereinbefore described.

And whereas the said Government of Bengal has required the Company under the provisions of section 41 of the above mentioned Act to enter into the agreement with the Secretary of State hereinafter contained. Now this Indenture witnesseth that it is hereby agreed and declared as follows :—

1. On demand the Company shall and will pay to the said Government of Bengal a 1 and every compensation in respect of the said land tendered, paid or awarded or to be tendered, paid or awarded by the Collector under the Land Acquisition Act, 1894, or by the Court to which a reference under Part III of the said Act may be made, or by the Court or Courts to which an appeal from the award of the said Court may be preferred, and all costs, charges and expenses of the proceedings in the aforesaid Courts, or otherwise incidental to the proposed acquisition or payable in respect thereof under the provisions of the said Act.

2. On demand made by the said Collector the obligations of the Company under the last preceding clause not being thereby limited, the Company shall and will deposit with the said Collector such sum or sums of money as in his discretion the said Collector may in anticipation estimate to be necessary for the purposes mentioned in the last preceding clause.

3. On payment by the Company of all demands under the foregoing 1st clause, or, in the discretion of the said Government of Bengal (on deposit by the Company of all estimated amounts as provided in the 2nd clause), but not before possession shall have been taken under the provisions of the abovementioned Act, the Secretary of State shall make over possession of the said land to the Company and shall execute and do all such acts and deeds as may be necessary and proper for effectually vesting the same in the Company.

4. The said land shall be held by the Company for the purposes of such a work as is hereinbefore mentioned and without the sanction in writing of the said Government of Bengal first had and obtained for no other purpose whatsoever.

5. The said construction of a pipe line shall be completed (and fully equipped in all respects ready for use) within one year from the date on which possession of the said land shall have been given to the Company.

6. Should the said construction of a pipe line not be completed (and fully equipped in all respect ready for use) within the period stated in the last preceding clause or within such further period as in its discretion may be prescribed or allowed by the said Government of Bengal or should the said land at any time thereafter cease for a period of 12 consecutive months to be held and used, or cease to be required for the purpose or purposes provided for in the foregoing fourth clause, then and in any such case, the said Government may summarily re-enter upon and take possession of the said land, and thereupon the interest of the Company in the said land shall absolutely cease and determine.

7. On taking such possession the said Government may sell or otherwise deal with the said land as it may think proper. Should the said Government sell the said land, the said Government after deducting the expenses incurred in connection with the said taking of possession and with such sale shall pay the proceeds to the Company. Should the said Government, on taking possession, decide not to sell the land, it shall repay to the Company all sums received from the Company in respect of all and every compensation as provided in the foregoing first clause (less the Statutory allowance of 15 per cent) but will not repay any sums paid and received on account of costs, charges and expenses.

8. Should any dispute or difference arise touching or concerning the subject matter of this agreement or any covenant clause or thing herein contained the same shall be referred to the said Government of Bengal and the opinion and decision of the said Government upon such dispute or difference shall be final and conclusive and binding on the parties hereto.

In witness whereof the Manager for the time being in Chittagong of the Burmah Oil Company Limited (the duly constituted Attorney of the Burmah Oil Company Limited) and the Secretary of State for India in Council have hereunto set their respective hands and seals the day and year first above written.

SUPPLEMENT TO

The Gazette of India.

No. 44. } CALCUTTA, SATURDAY, NOVEMBER 1, 1919.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time containing such official papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of Rupees five per annum if delivered in Calcutta, or Rupees eight if sent by post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

WHOLESALE AND RETAIL (FORTNIGHTLY) PRICES

RETURN SHOWING the WHOLESALE and RETAIL PRICES of CEREALS, PULSES, OILSEEDS, SUGAR (RAW), SALT, ETC., in INDIA by DISTRICTS for the FORTNIGHT ENDING THE 30TH SEPTEMBER, 1919

DEPARTMENT OF STATISTICS, INDIA }

October 29, 1919

G. FINDLAY SHIRRAS,

Director of Statistics

Published by order of the Governor-General in Council

PREFATORY NOTE.

Prices of Country Produce and Salt in India at the end of September, 1919.

(a) *The last fortnight of September, 1919, as compared with the preceding fortnight.*

The wholesale prices of cereals and pulses in India at the end of September, 1919, were on an average 3 per cent lower than those in the preceding fortnight. Prices of rice, barley and jawar decreased by 3 per cent, wheat by 4 per cent, bajra by 6 per cent, and maize and arhar dāl by 1 per cent, while the price of gram showed no change. Prices of ghi and raw sugar (gūr) were also the same as in the last fortnight, but salt showed a slight rise (1 per cent). The all-India fluctuation is stated below :—

Article	PREVIOUS FORTNIGHT (15TH SEPTEMBER 1919)		THIS FORTNIGHT (30TH SEPTEMBER 1919)	
	Unweighted	Weighted	Unweighted	Weighted
Rice	100	100	97	97
Wheat	100	100	96	96
Barley	100	100	97	97
Jawar	100	100	97	93
Bajra	100	100	94	92
Maize	100	100	99	94
Gram	100	100	100	98
Arhar dāl	100	—	99	—
Ghi	100	—	100	—
Raw Sugar (gūr)	100	100	100	101
Salt	100	—	101	—

The noteworthy fluctuations in provincial prices are : a fall of 20 per cent in rice in Assam, of 15 per cent in bajra in the Madras Presidency, of 17 per cent in maize in Bihar and Orissa, and of 16 per cent in arhar dāl in Delhi. The price of maize, however, showed a rise of 30 per cent in the North-West Frontier Province. There was a fall of one per cent in the price of rice in Bengal as compared with the previous fortnight's quotation.

(b) *The last fortnight of September, 1919, as compared with the average of the preceding three years at corresponding date.*

Compared with the average of the prices which prevailed at the corresponding date in the last three years, wholesale prices of food grains and pulses in India at the end of September, 1919 showed a rise of 57 per cent. The increase in the price of rice was 49 per cent (unweighted average), the weighted average showing a rise of 66 per cent. The rise in Bengal was 77 per cent, in Bihar and Orissa 95 per cent, in the Madras Presidency 60 per cent, and in Burma 45 per cent. Wheat prices advanced by 32 per cent, showing a rise of 22 per cent in the Punjab, 33 per cent in the United Provinces, 37 per cent in the Central Provinces and Berar, and 32 per cent in the Bombay Presidency. The unweighted average price of barley increased by 38 per cent ; of jawar 73 per cent, of bajra 58 per cent, and of maize 49 per cent. Gram and arhar dāl showed a rise of 72 and 82 per cent respectively. The price of ghi increased by 32 per cent and that of raw sugar (gūr) by 60 per cent, but salt prices fell by 5 per cent in India.

IMPORTS INTO CHIEF PORTS DURING AUGUST, 1919

RETURN SHOWING the QUANTITIES of the PRINCIPAL STAPLES OF AGRICULTURAL
PRODUCE IMPORTED into CALCUTTA, BOMBAY, KARACHI, and MADRAS
PORTS by RAIL, RIVER, and SEA during the month of AUGUST, 1919

DEPARTMENT OF STATISTICS, INDIA

October 30, 1919

}

G. FINDLAY SHIRRAS,

Director of Statistics.

Published by order of the Governor-General in Council.

DEPARTMENT OF STATISTICS, INDIA.

TRADE FLUCTUATIONS IN SELECTED ARTICLES IN AUGUST, 1919.

The object of the tables appended is to show the quantities of the principal staples of agricultural produce imported from the various provinces and Indian States and from foreign countries into the ports of Calcutta, Bombay, and Karachi, and into the Madras ports during the month of August, 1919, and for the five months, April to August, 1919, as compared with the corresponding periods of 1918. The statistics include sea-borne foreign and coasting trade as well as inland (rail and river-borne) trade. They have been furnished by Collectors of Customs, Steamer Companies, Railway Audit Officers, and the Commissioners for the Port of Calcutta.

TRADE FLUCTUATIONS IN AUGUST, 1918 AND 1919.

It will be seen from Table I that the imports by rail, river, and sea in August, 1919, as against the corresponding month of 1918, show (in round numbers) a decrease of—

- 63 per cent in gram and pulse
(31,500 tons as against 90,500 tons last year),
- 39 per cent in jute
(347,500 bales as against 565,300 bales last year),
- 33 per cent in wheat (excluding wheat flour)
(36,900 tons as against 55,100 tons last year),
- 22 per cent in linseed
(26,400 tons as against 33,600 tons last year), and
- 9 per cent in tea
(29,496,800 lbs as against 32,482,200 lbs last year).

The imports of rape and mustard seed by rail, river, and sea into ports show an increase of 29 per cent (9,800 tons as against 7,600 tons last year), owing mainly to larger exports from the United Provinces and Bihar and Orissa. There was a rise of 16 per cent (104,700 tons as against 90,400 tons last year) in the imports of rice (including paddy), due to larger shipments from Madras, although there were smaller exports from Bihar and Orissa and Bengal. Notwithstanding heavy decreases in shipments from non-British ports in India and exports from Bombay, the total imports of raw cotton show an increase of one per cent (166,800 bales as against 165,700 bales last year), due mainly to increased exports from the Punjab, Rajputana and Central India, and the Central Provinces and Berar.

It will be seen from Table IV (wheat, excluding wheat flour) that in August, 1918, the principal sources of the imports were the Punjab (40 per cent) and the United Provinces (31 per cent of the total). During August, 1919, the ports received their supplies chiefly from the Punjab (41 per cent), the United Provinces (29 per cent), and foreign countries (19 per cent of the total). Table XI shows the *exports* from India by sea of wheat (including wheat flour) during each month of the six official years, 1913-14 to 1918-19, and from April to August, 1919.

NOTE.—One bale of cotton or jute is equivalent to 400 lbs.

One maund is equivalent to 82½ lbs.

One maund of paddy is taken as equivalent to 25 seers of rice.

GENERAL RESULTS—FIVE MONTHS' IMPORTS INTO THE PORTS BY RAIL, RIVER,
AND SEA THIS YEAR AND LAST YEAR.

The five months' figures in table I show (in round numbers) an increase of—

- 50 per cent in rice (including paddy)
(610,800 tons as against 406,300 tons last year),
- 43 per cent in linseed
(174,100 tons as against 121,500 tons last year),
- 16 per cent in rape and mustard seed
(63,200 tons as against 54,700 tons last year), and
- 6 per cent in raw cotton
(1,314,600 bales as against 1,262,800 bales last year).

The imports of wheat (excluding wheat flour) by rail, river, and sea into ports show a decrease of 60 per cent (257,500 tons as against 612,500 tons last year), mainly on account of smaller exports from the Punjab and the United Provinces. The fall of 55 per cent (208,100 tons as against 460,000 tons last year) in gram and pulse is accounted for by smaller exports into the ports from the Punjab and the United Provinces. The decrease of 21 per cent (1,541,100 bales as against 1,957,300 bales last year) in jute is chiefly due to smaller exports from Bengal. There was a fall of 5 per cent (93,905,800 lbs as against 99,043,300 lbs last year) in tea on account of smaller exports from Bengal.

TRADE FLUCTUATIONS IN AUGUST, 1919, AS COMPARED WITH THE PREVIOUS MONTH.

As compared with July, 1919, the imports in August, 1919, into the ports referred to above show (in round numbers) an increase of—

- 62 per cent in jute
(317,500 bales as against 214,700 bales previous month),
- 32 per cent in tea
(29,496,800 lbs as against 22,297,800 lbs previous month),
- 7 per cent in gram and pulse
(33,500 tons as against 31,200 tons previous month), and
- 1 per cent in wheat, excluding wheat flour
(36,900 tons as against 36,600 tons previous month),

and a decrease of—

- 45 per cent in linseed
(26,400 tons as against 48,200 tons previous month),
- 41 per cent in raw cotton
(166,800 bales as against 283,800 bales previous month),
- 26 per cent in rape and mustard seed
(9,800 tons as against 13,400 tons previous month), and
- 19 per cent in rice, including paddy
(104,700 tons as against 128,900 tons previous month).

The statistics for August, 1918 and 1919, as also for the five months ending August, 1918 and 1919, together with those for July and August, 1919, are summarised below :—

SUMMARY TABLE I.

NOTE.—(1) One bale of jute is equivalent to 400 lbs.

(2) By "Calcutta" is meant the town of Calcutta with Howrah and the Kidderpore Docks. The imports exclude, therefore, imports into those jute mills which are outside this area. Such mills form the large majority of the total number of mills manufacturing jute.

TABLE XI.

The following statements show the exports of (1) wheat, (2) wheat flour, and (3) Total (wheat and wheat flour) from British India by sea to foreign countries during each month of the six official years, 1913-14 to 1918-19, and from April to August, 1919. The figures are in thousands of tons :—

1.—Wheat.

Months.	1913-14.	1914-15.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	000's of tons.	000's of tons.	000's of tons.	000's of tons.	000's of tons.	000's of tons.	000's of tons.
April	27	9	11	3	93	56	(a)
May	166	24	105	2	209	64	1
June	260	169	292	42	164	76	1
July	318	169	187	44	278	76	1
August	135	43	18	75	154	126	1
September	135	56	6	139	153	47	...
October	53	88	...	151	164	17	...

* 5% barley, 3% dirt, and 30% red.

NOTE.—These statistics are compiled from fortnightly returns furnished by Local Governments and Administrations. They relate to the wholesale prices in the markets referred to above, which prevailed on the last (or nearest mart) day of each fortnight. The statistics for Karachi, Bombay, and Calcutta are compiled from the Chambers of Commerce Market Reports.

(a) Based on the price for the fortnight ending the 31st July 1914 which is taken as 100.

India per maund of 82½ lbs

NOTE—These statistics are entirely compiled from returns furnished fortnightly by Local Governments and Administrations. They relate to the retail prices in the head quarters of the districts and in the ports referred to above.

(a) Based on the price for the fortnight ending the 31st July 1914, which is taken as 100.
Relates to Khandwa wheat.

[The figures state quantity per rupee in seers of 80 tolas.]

COTTON PRESS RETURN.

No. 24 of 1918-19.

PREFATORY NOTE.

THE COTTON SEASON, 1918-19.

In the Final Cotton Forecast, published on the 19th. February, 1919, the yield of the crop of 1918-19 was estimated at 3,671,000 bales on an area of 20,497,000 acres, as compared with 4,065,000* bales on an area of 25,298,000 acres, the final (revised) estimates of the preceding year, a decrease of 10 per cent in the outturn. There were 1,946,000 bales of cotton pressed in the pressing factories, and 464,000 bales of unpressed cotton received in the spinning mills, from 1st September, 1918, to 31st August, 1919, as against 1,661,000 bales and 552,000 bales, respectively, during the corresponding period of last year, showing an increase of 17 per cent in the case of presses, but a decrease of 16 per cent in the case of mills. Too much stress should not be laid on the accuracy of these returns as a means of checking the forecast estimates of outturn, as there is at present no system in vogue of furnishing complete returns from all the presses and mills in India. The figures for the Indian States are, as will be seen from the footnotes to the tables, generally incomplete, and have therefore been excluded for the purpose of comparison.

* The trade estimate is, however, 4,204,000 bales. (Net exports 1,410,000 bales, mill consumption 2,044,000 bales and extra-factory consumption 750,000 bales.) The estimate of mill consumption is based on returns furnished by mills to the Millowners' Association, Bombay. The previous method of calculating mill consumption from the returns of yarn produced by mills, and furnished under the Cotton Excise Duties Act, has been discarded in favour of the Millowners' returns.

I.—Cotton Press Return for India in the half-month ending 31st August, 1919.
(Season 1918-19, i.e., from 1st September, 1918, to 31st August, 1919.)

Province or State	Total estimated outturn of cotton crop (bales of 400 lbs each) (a)	Percentage to total for India	Total number of presses in the Province or State	Number of presses for which returns have been received for the half-month	Quantity of cotton pressed in the half-month (bales of 400 lbs each)	TOTAL QUANTITY PRESSED FROM 1st SEPTEMBER TO 31st AUGUST (BALES OF 400 LBS EACH)

(f) Revised figure.

(g) Of this number 1 presses worked during the half-month.

(h) As reported by the Director of Agriculture, Bombay.

(i) For quarter ending 31st August.

which is attributed to insufficient rain and want of seedlings. The weather conditions have been generally very favourable, especially in the early part of the season, although transplanting operations were interrupted in parts of north Bihar by deficient rainfall in June and July. The average outturn for the province is estimated at 115 per cent of the normal.

(iii) An area of 38,000 acres was reported in March last to be under summer rice, which is 5 per cent below the corresponding estimate of last year. The outturn was estimated at 12,000 tons, as compared with 14,000 tons last year.

Madras (14.2 per cent of the total area under rice in British India).—The area sown up to the end of September is estimated at 7,337,000 acres, which is 21 per cent above the estimate on the corresponding date last year. The increase is due to good early rains which gave the crop a good start. The only exception is Guntur where the season has so far been bad.

Burma (13.4 per cent of the total area under rice in British India).—The area sown is estimated at 10,384,000 acres, which is 2 per cent below the corresponding estimate of last year. Heavy floods in Maubin, Thaton, Amherst and Tavoy have done considerable damage, but replanting is in progress in parts. In Lower Burma early rainfall was moderate and in several districts ploughing was somewhat late. In Upper Burma early rainfall was scanty, but middle rains were good. On the whole crop prospects are good throughout the province.

United Provinces (8.4 per cent of the total area under rice in British India).—(i) The total area sown with autumn (early) and winter (late) rice is estimated at 7,075,000 acres, being 22 per cent above the corresponding estimate of last year. Rainfall was generally light until the arrival of the monsoon in July when good rain was received. August was a month of heavy rainfall, but the showers were comparatively light in the submontane districts, and transplantation of late rice was delayed. The deficiency in these tracts was, however, made good in the earlier part of September. In the beginning of October also there were heavy showers in the east of the provinces. On the whole most of the rice-growing districts have received sufficient rain for the crop, although more is wanted in parts of Rohilkhand. Germination has been good, and the prospects of the crop are so far favourable.

(ii) In addition to the above the estimates for hot weather rice are 17,000 acres and 3,000 tons, as against 25,000 acres and 12,000 tons last year.

Central Provinces and Berar (6.4 per cent of the total area under rice in British India).—The area

under rice is estimated at 5,146,000 acres (42,000 acres being in Berar) which is about 1 per cent less than the area estimated at this date last year. The climatic conditions at sowing time were favourable, and germination was successful. No resowing was required except in parts of Drug. The crop standing on lowlying and rich land suffered from excessive rain which fell during August in Jubbulpore, Narsinghpur, and Hoshangabad districts. The Berar districts, however, required more rain. Elsewhere, prospects of the crop are good. Eight of the twelve Feudatory States have for the first time reported an area of 938,000 acres, and the crop promises at least a normal outturn.

Assam (6 per cent of the total area under rice in British India).—(i) The total area under autumn rice is estimated at 718,090 acres against 769,000 acres (revised area) of last year, or a decrease of 7 per cent attributed to scanty rainfall. The weather was unsuitably dry at the beginning of the season and the sowing of autumn rice was delayed. The rainfall in July and August fell short of the average, particularly in the latter month and retarded the growth of the crop.

(ii) The area under winter rice is estimated at 3,127,000 acres, against 3,290,000 acres (revised figure) of last year, or a decrease of nearly 5 per cent. The season has been unfavourable for winter rice owing to continued drought in the spring when the broadcast crop is sown and subsequent scanty rain in the transplanting season. The rain since September has, however, improved the prospects of the crop. The average outturn for the province is provisionally estimated at 72 per cent of the normal, against 80 per cent at this time last year.

(iii) An area of 251,000 acres was reported in March last to be under summer rice, against 250,000 acres of last year. The outturn was estimated at 79,000 tons, as against 90,000 tons last year.

Bombay and Sind (3.9 per cent of the total area under rice in British India).—The area sown in the British districts is estimated at 2,788,000 acres (1,088,000 acres being in Sind) which is 28 per cent above the corresponding estimate of last year. Indian States report a total area of 534,000 acres (9,000 acres being in Sind), as against 520,000 acres at this time last year. The information is, however, incomplete. Favourable early rains following a year of scarcity induced larger sowings everywhere in the Presidency. Early inundation and good water supply brought about the same result in Sind. Scanty rains after sowing in north Gujarat and Karnatak and their excess in parts of south Gujarat and Konkan delayed transplantation in places. Later on, however, the season has been quite favourable, and the crop is thriving everywhere.

Chart.—The chart below illustrates the variations in the preliminary estimates of area as compared with those in the final figures of the last ten years. It should, however, be remembered that the large increase during 1911-12 to 1913-14 was largely due to the addition of reporting tracts from year to year.

Rice Crop in Foreign Countries.—From information especially obtained from the British Consulates it appears that the yield of the rice crop in Japan in 1919 is expected to amount to 8,534,000 tons, which is 11 per cent over the average. In Indo-China the area in 1919 is estimated at 12,083,000 acres.

G. FINDLAY SHIRRAS,
Director of Statistics.

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA, OCTOBER 21, 1919. .

Second SESAMUM Forecast, 1919-20.

THIS forecast is based upon reports received from provinces, which contain on an average 76 per cent of the total area under sesamum in British India. The returns in this forecast exclude the estimates for the "mixed" crop of the United Provinces, and for the late crop of Bengal and Madras. The final memorandum, which will be published in January, will include, as usual, returns for these crops.

The total area so far reported for the present season is 2,170,000 acres, as against 1,603,000 acres (revised figure) at this time last year, or an increase of 35 per cent. Details of the area by provinces are given below :—

Second forecast, October

Provinces	1919-20	1918-19	Increase + or Decrease —
United Provinces (unmixed crop)	175,000	125,000	+50,000
Madras	616,000	400,000	+216,000
Central Provinces and Berar	463,000	(a) 491,000	—28,000
Bombay (including Indian States)	455,000	190,000	+265,000
Bengal (early crop)	167,000	169,000	—2,000
Bihar and Orissa	168,000	138,000	+30,000
Punjab	82,000	67,000	+15,000
Sind (including the Khairpur State)	32,000	20,000	+12,000
Ajmer-Merwara	12,000	3,000	+9,000
TOTAL	2,170,000	(a) 1,603,000	+567,000

Weather conditions have not been quite favourable for the crop which suffered from heavy and continuous rain in the important sesamum growing tracts of the Central and the United Provinces; and the present condition of the crop, on the whole, is reported to be fair.

The provincial reports are summarised below :—

United Provinces (25·1 per cent of the total area under sesamum in British India).—The area sown with the "unmixed crop" is estimated at 175,000 acres, which is 40 per cent above the area reported at this time last year. Owing to heavy and continuous rain in August sowings were restricted in Bundelkhand, the principal sesamum growing tract in the province. The crop in this tract suffered from excessive rain in August, which interfered with weeding operations, and the outturn is estimated at about 75 per cent of the normal, as against 40 per

cent at this time last year. Elsewhere it is estimated at about 85 to 95 per cent.

Madras (16·4 per cent of the total area under sesamum in British India).—The area sown up to the 1st October is estimated at 616,000 acres, which is 54 per cent above the corresponding estimate of last year. The increase is almost universal, but large areas still remain to be sown later in the year.

Central Provinces and Berar (15·1 per cent of the total area under sesamum in British India).—The area sown is now estimated at 463,000 acres, which is 6 per cent below the revised area at the corresponding period of last year. The area decreased in the Nerbudda and Chattisgarh divisions on account of continuous rain at sowing time and want of seed grain. Elsewhere there has been an increase. Germination was everywhere good and no re-sowing was necessary. Continuous and excessive rains in August and September damaged the crop in places and reduced its outturn, which is estimated at 97 per cent of the normal, as against a normal outturn reported at this time last year.

Bombay (5·1 per cent of the total area under sesamum in British India).—The area sown is estimated at 455,000 acres (330,000 acres being in the Indian States), which is 139 per cent over the corresponding area of last year. The extended cultivation of the crop is almost general and has been brought about by seasonable sowing rains and good prices fetched by the crop last year; but the acreage is still far short of the normal owing to the devotion of more area to food crops. In Gujarat the early crop is doing well except in Panch Mahals, where it suffered from heavy rains. The late crop has germinated well. In the Deccan the crop is doing fairly well in Khandesh and Nasik; elsewhere it suffered over a large area owing to the absence of rain in July-August, and, although the recent rains have improved the surviving crop, its yield will be poor. In the eastern parts of the Karnatak the long drought in July-August caused the crop to wither in many places; elsewhere it is in fair condition. In the Konkan the crop has generally done well.

Bengal (4·9 per cent of the total area under sesamum in British India).—No report is furnished by the province in October. The figure reported in the August forecast for the early crop was 167,000 acres, as against 169,000 acres for the corresponding period of last year.

Bihar and Orissa (4·4 per cent of the total area under sesamum in British India).—The area sown is estimated at 168,000 acres, which is 22 per cent above the estimate made at this time last year. The prospects of the crop are on the whole good.

(a) Revised figure.

Punjab (3·5 per cent of the total area under sesamum in British India).—The area sown up to the end of September is estimated at 82,000 acres, which is 22 per cent over the corresponding estimate of last year. The condition of the irrigated crop is generally good, and that of the unirrigated average. But for want of rain in September the yield would have been much above the average.

Sind (1 per cent of the total area under sesamum in British India).—The area sown up to 1st October is estimated at 32,000 acres (1,000 acres in the Khairpur State), which is 60 per cent larger than the area reported at this time last year. The crop is reported to have been partially damaged by hill torrents in Karachi, and in the desert

portion of Thar and Parker it is suffering from want of sufficient moisture. Elsewhere it is doing well.

Ajmer-Merwara (0·4 per cent of the total area under sesamum in British India).—The total area is estimated at 12,000 acres, as against 3,000 acres reported in the corresponding forecast of last year. The condition of the crop is reported to be fair.

Chart.—The chart below illustrates the variations in the second estimates of acreage in the last ten years, as compared with those in the final figures. The second estimates, it should be remembered, exclude the "mixed" crop (*i.e.*, sesamum grown in combination with other crops) of the United Provinces, and the late crop of Bengal and Madras, for which no estimate is made at this stage.

G. FINDLAY SHIRRAS,

Director of Statistics.

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA, OCTOBER 27, 1919.

Second COTTON Forecast, 1919-20.

THIS forecast is based on reports furnished by Provinces and States, which comprise the entire cotton crop of India. It relates generally to sowings made up to the 1st October.

The total area so far reported this year amounts to 18,822,000 acres, which is 19 per cent above the estimate at this time last year. The increase, which is due to favourable weather conditions at sowing time, and to the high prices fetched by the crop last year, occurs in Ajmer-Merwara (63 per cent), Rajputana (48 per cent), the United Provinces (46 per cent), Hyderabad (41 per cent), Sind (26 per cent), Bombay (23 per cent), Burma (22 per cent), the Punjab (14 per cent), Central India (9 per cent), and the Central Provinces and Berar (6 per cent). On the other hand, the North-West Frontier Province shows a decrease of 10 per cent, Madras 6 per cent, and Bengal and Bihar and Orissa 3 per cent each.

Weather conditions have, on the whole, been favourable, and the present condition of the crop is reported to be good.

The detailed figures for the provinces and states are given below :—

Second forecast, October.

Provinces and States	ACRES (THOUSANDS)		
	1919-20	1918-19	1917-18

Grand Total	18,822	15,814

The provincial reports are summarised below :—

Bombay and Baroda (31·2 per cent of the total area under cotton in India).—The total area sown up to the 1st October with both early and late varieties of cotton is estimated at 4,944,000 acres (2,157,000 acres being in the Indian States) which is 23 per cent above the area reported at the corresponding date of last year. The increase is almost general, and is mainly due to the high prices fetched by the crop last year and favourable weather conditions at sowing time. In Gujarat the condition of the crop is satisfactory. In the Deccan prospects are on the whole good, and the Khandesh crop is maturing. In the Karnatak sowing was delayed owing to the absence of rain, but with the September rains it is being pushed on. The crop is germinating.

(a) Includes the whole of the cotton grown in the Hyderabad State.

Central Provinces and Berar (19·7 per cent of the total area under cotton in India).—The total area sown is estimated at 4,499,000 acres (3,082,000 acres being in Berar), which is 6 per cent above the corresponding estimate of last year. The increase is attributed partly to favourable conditions at sowing time, and partly to high prices obtained last year. The rainfall was heavy and continuous in the north of the Central Provinces during August, and weeding operations were slightly delayed. The districts of Berar, on the other hand, required at this time some more rain. An opportune break and bright sunshine in the northern districts, and a few timely showers in Berar in September considerably improved the situation, and in all the important cotton growing districts prospects are excellent. The average outturn for the Central Provinces is at present estimated at 112 per cent, and that for Berar at 113 per cent of the normal, as against 120 and 90 per cent. respectively, reported at this time last year.

Madras (10·1 per cent of the total area under cotton in India).—The area sown up to the end of September is estimated at 753,000 acres, which is 6 per cent less than the area reported at this time last year. The greatest decrease is in the "Coconadas" tract, where there has been a big drop in Guntur owing to want of sowing rains.

Punjab (6·7 per cent of the total area under cotton in India).—The area sown is estimated at 1,775,000 acres (131,000 acres being in the Indian States), which is 14 per cent greater than the corresponding estimate of last year. The rainfall in July and August was beneficial, although the crop on lowlying lands suffered slightly in a few districts. The season, on the whole, has been favourable for the crop, which is in good condition; but more rain is urgently wanted. The American cotton is doing better than the country cotton.

United Provinces (5·6 per cent of the total area under cotton in India).—According to the returns furnished by the village accountants of selected circles the total area under cotton is at present estimated at 1,150,000 acres, which is 46 per cent more than the area reported at this time last year. There was excessive rain in August throughout the cotton growing tract. Difficulty was experienced in weeding the crop and owing to waterlogging of the soil growth was retarded. Rainfall was again general and heavy in most districts in the first week of September, but the crop improved greatly with the fine weather which followed. The probable outturn for the provinces is at present estimated at about 85 to 90 per cent of the normal, as against 40 to 60 per cent reported at this time last year.

Sind (1·1 per cent of the total area under cotton in India).—The area is estimated at 328,000 acres, which is 26 per cent above the area reported at this time last year. Cultivation extended under a steady and plentiful supply of water and the incentive of good prices. The condition of the crop is generally good.

Burma (1·1 per cent of the total area under cotton in India).—The total area is estimated at 375,000 acres, which is 22 per cent greater than that reported at the corresponding date last year. In the dry zone the crop suffered for want of rain at the commencement of the monsoon, but the middle rains have been satisfactory, and the crop prospects are favourable.

Bengal (0·3 per cent of the total area under cotton in India).—The area sown with both early and late cotton is reported to be 70,000 acres, as against 72,000 acres, the corresponding estimate of last year. The weather at sowing time was generally unfavourable owing to insufficient rain. Subsequent rainfall, which was generally moderate up till the end of June, greatly improved the prospects. Heavy rain in July and August affected the crop in the Chittagong Hill Tracts. The present prospects are reported to be on the whole fair.

Bihar and Orissa (0·3 per cent of the total area under cotton in India).—The area sown up to date with both early and late crop is estimated at 74,000 acres, as against 76,000 acres reported at this time last year. The weather conditions have been favourable for the early crop, and the present condition of it is reported to be generally good. Fair progress has been made with the sowings of the late variety, for which the weather conditions have so far been favourable.

North-West Frontier Province (0·2 per cent of the total area under cotton in India).—The area sown up to the end of September is estimated at 34,000 acres, which is 10 per cent below the area reported at this time last year. The decrease is attributed to drought at sowing time. The condition of the standing crop is on the whole good, and an average outturn may be expected.

Assam (0·2 per cent of the total area under cotton in India).—The estimated area under cotton is 33,000 acres, the same as reported at this time last year. The prospects of the crop continue to be fair.

Ajmer-Merwara (0·2 per cent of the total area under cotton in India).—The area sown is reported to be 31,000 acres, which is 63 per cent larger than the estimate at the corresponding period of last year. The condition of the crop is good.

Hyderabad (14·7 per cent of the total area under cotton in India).—The total area under both early and late cotton is estimated at 2,956,000 acres, which is 41 per cent above the area reported at this time last year. The monsoon was unsettled. The rainfall during the first two weeks of August was light and insufficient, but fairly good and general in the latter part of that month. It was again scanty during the early part of September, and this retarded the late sowings to a great extent. With the general and copious rainfall in the last two weeks of September, the sowings of the late crop commenced, and were in general progress at the date of report. On the whole, the season has not been unfavourable, and the condition of the

standing early crop is generally good. The detailed figures are as follows:—

	1919-20 Acres	1918-19 Acres
Aurangabad	353,920	209,928
Bir	345,225	109,617
Parbhani	641,318	741,013
Nander	378,118	312,336
Gulbarga	31,085	12,706
Raichur	366,713	94,776
Usmanabad	20,302	10,599
Bidar	78,461	151,090
Medak	2,119	1,391
Mahboobnagar	7,362	4,744
Nalgunda	3,829	5,220
Nizamabad	18,616	10,895
Warangal	46,183	20,430
Adilabad	132,695	111,198
Karimnagar	50,862	43,261
Non-Government estates	473,876	251,988
TOTAL	2,955,714	2,091,750

Central India (6 per cent of the total area under cotton in India).—The total area sown is estimated at 1,388,000 acres, which is 9 per cent above the corresponding estimate of last year. The detailed figures are as follows:—

	1919-20 Acres	1918-19 Acres
Gwalior	463,400	467,686
Indore	464,000	429,214
Bhopal	168,300	150,744
Pandekhand	19,700	15,945
Baghelkhand	24,600	23,831
Malwa	118,500	66,291
Southern States	129,600	120,926
TOTAL	1,388,100	1,274,637

Rajputana (1·7 per cent of the total area under cotton in India).—The total area sown amounts to 358,000 acres, which is 48 per cent more than the area reported at this date last year. The condition and

prospects of the crop are reported to be generally good. The detailed figures are as follows:—

	1919-20 Acres	1918-19 Acres
Bikaner	4
Marwar	37,000	28,898
Sirohi	355	260
Mowar	100,000	70,000
Dungarpur	729	338
Banswara	1,280	...
Partabgarh	5,975	3,782
Kushalgarh	268	38
Shahpura	11,840	10,096
Tonk	27,068	27,778
Bundi	7,152	1,860
Kotah	29,499	17,024
Jhalawar	18,532	14,831
Kishangarh	7,280	3,282
Jaipur	43,410	33,082
Alwar	12,000	9,632
Karauli	4,046	2,062
Bharatpur	34,366	11,914
Dholpur	17,353	6,365
TOTAL	357,952	241,245

Mysore (0·5 per cent of the total area under cotton in India).—The total area is estimated at 54,000 acres, as against 17,000 acres, reported at this time last year. The district details are as follows:—

	1919-20 Acres	1918-19 Acres
Kolar	10	18
Tumkur	7,222	879
Mysore	2,485	2,895
Hassan	3,318	2,040
Shimoga	3,913	3,126

APPENDIX XI.

PRINCIPAL STEAMER SERVICES.

By the British India Steam Navigation Company.

- (1) Direct communication three times a week between Calcutta and Rangoon.
- (2) Weekly communication between Chittagong, Akyab, Kyaukpyu, Sandoway (during fair season only) and Rangoon.
- (3) Weekly communication (during fair season only) between Chittagong, Akyab and Rangoon.
- (4) Weekly direct communication between Madras and Rangoon.
- (5) Weekly communication between Rangoon, Tavoy and Mergui.
- (6) Fortnightly communication between Moulmein, Yeu, Tavoy, Mergui, Victoria Point and Penang.
- (7) Fortnightly communication between Rangoon, Tavoy, Palaw, Mergui, Kamaw, Bokpyin, Karathuri, Victoria Point and Maliwun.
- (8) Weekly direct communication between Bombay and Karachi.
- (9) Weekly communication between Bombay and Karachi *via* the Coast ports.
- (10) Weekly communication between Karachi and Basra *via* the principal Persian Gulf ports.
- (11) Fortnightly communication between Karachi and Basra *via* the Persian Gulf ports.
- (12) Fortnightly communication between Karachi and Bushire *via* the Persian Gulf ports.
- (13) Weekly communication from Negapatam to the Straits.
- (14) Direct weekly communication between Rangoon and Penang.
- (15) Fortnightly communication between Bombay, Mombasa, Zanzibar, Beira, Delagoa Bay and Durban with calls on the outward voyage every four weeks at the Seychelles, Lamu, Mozambique and Dar-es-Salaam.
- (16) Additional services between any of the ports served by the above-mentioned lines and between any of the ports on the Coromandel Coast and Rangoon.

Under contract with the Post Office from 1st February 1913 on an annual subsidy of Rs. 10,12,000.

By the Asiatic Steam Navigation Company.

- (17) Six-weekly communication between Calcutta and Port Blair, with extensions to Madras and Rangoon.

Was under contract with the Post Office for five years from 1st July 1909 and thereafter was terminable at six months' notice. The consideration was not in the form of a money subsidy, but of guaranteed rates for the transport of Government stores. The contract was terminated in April 1916 and the mail service to and from the Andamans is since being performed under special arrangements made by Government.

APPENDIX XI.—*contd.*

- (18) Communication three times a week between Rangoon and Bassein.
- (19) Daily communication (Sundays excepted) between Bassein and Myaungmya.
- (20) Daily communication (Wednesdays excepted on the up trip and Thursdays excepted on the down trip) between Prome and Thayetmyo and Minbu.
- (21) Communication twice a week between Thayetmyo and Pakokku.
- (22) Daily communication (Sundays excepted) between Magwe and Sale.
- (23) Daily communication (Saturdays excepted) between Sale and Pakokku.
- (24) Daily communication (Saturdays excepted) between Myingyan and Pakokku.
- (25) Weekly communication between Pakokku and Kindat.
- (26) Weekly communication (provided the depth of the water permits) between Kindat and Homalin.
- (27) Daily communication between Katha and Bhamo.
- (28) Daily communication between Rangoon and Kyauktan.
- (29) Daily communication between Kyauktan and Thongwa.
- (30) Daily communication between Rangoon and Pyapon.
- (31) Daily communication (Sundays excepted) between Yandoon and Pyapon.
- (32) Daily communication (Sundays excepted) between Wakema and Myaungmya.
- (33) Daily communication (Sundays excepted) between Myaungmya and Moulmeingyun.
- (34) Daily communication (Sundays excepted) between Wakema and Moulmeingyun.
- (35) Daily communication (Sundays excepted) between Wakema and Kyonmangne.
- (36) Daily communication (Sundays excepted) between Yandoon and Moulmeingyun.
- (37) Daily communication (Sundays excepted) between Myaungmya and Eime.
- (38) Daily communication (Sundays excepted) between Kyauklat and Kyawzan.
- (39) Daily communication (Sundays excepted) between Henzada and Yandoon, *via* Zalun, Apyauk and Danubyn.
- (40) Daily communication (Sundays excepted) between Prome and Henzada.
- (41) Daily communication (Sundays excepted) between Moulmein and Kaya-in.
- (42) Daily communication (Sundays excepted on the up trip and Mondays excepted on the down trip) between Moulmein and Kyondo.
- (43) Daily communication between Moulmein and Kado.
- (44) Daily communication between Moulmein and Natmaw.
- (45) Daily communication (Sundays excepted on the up trip and Mondays excepted on the down trip) between Moulmein and Shwegun.
- (46) Communication three times a week between Bassein, Ngaputaw and Pyinkaynaing.

Under contract with the Burma Government for a period of six years from 1st January 1914. The annual subsidy is Rs. 1,82,540 of which Rs. 57,682 is paid by the Post Office.

APPENDIX XI.—*contd.*

PRINCIPAL STEAMER SERVICES—*contd.*

By the Arracan Company, Limited.

- (47) Communication three times a week between Akyab and Buthidaung.
- (48) Communication twice a week between Akyab and Paletwa.
- (49) Communication twice a week between Akyab and Kyauktaw.
- (50) Communication once a week between Akyab and Myaungbwe.
- (51) Weekly communication between Akyab and Sakanmaw *via* Myebon and Kyaukpyu.
- (52) Weekly communication between Akyab and Kyaukpyu.
- (53) Weekly communication between Kyaukpyu and Cheduba *via* Ramree.
- (54) Weekly communication between Sandoway and Kyaukpyu *via* Ramree and Taungup.
- (55) Weekly communication between Kyaukpyu and Sandoway *via* Ramree.

Under contract with the Burma Government for five years from 1st April 1915. The subsidy which is Rs. 1,05,200 a year, is paid by the Burma Government.

By the British India Steam Navigation Company and the Indo-China Steam Navigation Company.

- (56) Communication at irregular intervals between Calcutta and the Straits Settlements and Hong Kong.

The consideration is not in the form of a money subsidy but of a guarantee of certain concessions.

By other Agencies.

- (57) By the Bombay Steam Navigation Company—Daily communication between Bombay and Goa.

Under annual contract with the Post Office from 1st October to 31st May. The monthly subsidy paid by the Post Office is Rs. 3,000, towards which the Government of Portuguese India contributes Rs. 200.

- (58) By Messrs. Cowasjee, Dinshaw and Brothers—Weekly communication between Aden, Berbera and Zeyla.

Under arrangement with the Government of the Somaliland Protectorate for 12 months from 1st April 1918 to 31st March 1919. The monthly subsidy is Rs. 1,050, of which Rs. 300 is at the sole charge of the Protectorate Government and the balance Rs. 750 is paid in equal shares by that Government and the Indian Post Office.

- (59) By the Retriever Flotilla Company—Communication four times a week between Chittagong and Cox' Bazar, and also between Cox' Bazar and Maungdaw during fair season only (provided weather permits).

Under contract with the Post Office for three years from 1st January 1914 and terminable at six months' notice. Subsidy Rs. 6,000 a year.

- (60) By Babu C. K. Paul—Weekly communication between Mergui, Palaw and Palauk and between Mergui and Tagu *via* Tenasserim.

Under contract with the Post Office for two years from 1st November 1916 on an annual subsidy of Rs. 7,200.

APPENDIX XII.

Total number of sent telegrams, total number of signalling operations entailed in their despatch from the office of origin to destination, with the necessary repetition of intermediate offices, and average number of signalling operations per sent telegram, for the last five years.

Year.	Total Number of sent telegrams—paid and free.	Total number of signalling operations.	Average number of signalling operations per sent telegram.

GOVERNMENT OF INDIA.

ARMY DEPARTMENT.

Simla, the 5th November 1919.

SPECIAL AND MISCELLANEOUS.

No. 3205.—The Governor-General in Council is pleased to direct the publication, for general information, of the following telegraphic correspondence with the Secretary of State for India :—

Dated Simla, the 26th September 1919.

From—The Viceroy,

To—The Secretary of State for India.

Following Resolution carried unanimously in Imperial Legislative Council on 10th September :—

“ This Council requests the Governor-General in Council—

- (a) to convey to the King-Emperor the humble message of the people of India assuring him of their enthusiastic and loyal devotion and allegiance to His Majesty's person and throne and tendering their warm congratulations on the conclusion of a victorious peace ;
- (b) to convey to His Majesty's Naval, Military and Air Forces, British and Indian, including the Royal Indian Marine and the members of the Mercantile Marine, the grateful appreciation and heartfelt thanks of India's citizens for their pre-eminently valuable services and heroic deeds of daring, endurance, skill and cheerful sacrifice which have enabled the British Empire and its allies to crush Prussian Militarism and autocracy and inaugurate an era of orderly progressive Self-Government on a truly democratic basis under the guidance and protection of a League of Nations ;

- (c) to convey to His Majesty's Civil Services, especially to the officers and men employed in the Munitions, Railway and Post and Telegraphs Departments, the sincere thanks of the country for their untiring energy and zeal and supreme devotion to duty during a prolonged and trying period of more than four years of active warfare."

Governor-General of India in Council strongly recommends that necessary steps may be taken for communicating Resolution to His Majesty and all concerned at Home if you see no objection. Papers will follow.

Dated London, the 24th October 1919.

From—The Secretary of State for India,

To—The Viceroy.

I have laid the message of the Legislative Council before His Majesty the King-Emperor, who desires me to request that you will convey to Members of Council an expression of the pleasure and satisfaction with which he has accepted their congratulations on the conclusion of a victorious peace, and their inspiring assurance of loyalty. By His Majesty's Command I have communicated the message to the Prime Minister, and to Parliament, to ensure that the terms of its generous appreciation reached all to whom they extend, and I am authorised to ask that you will express the deep admiration felt by this country at large for the great services rendered by India in the prosecution of the war, and for the successful heroism of her soldiers and sustained co-operation of her citizens in efforts which have brought the great struggle to a triumphant conclusion.

Van Haeften, Probationary Extra Assistant Conservator of Forests, for the words "with effect from the 21st July 1919 and until further orders" *substitute* "from the forenoon of the 20th July 1919 to the afternoon of the 19th September 1919."

No. 1115.*The 3rd November, 1919.*

RESOLUTION—By the Government of India, Department of Revenue and Agriculture.

As a result of their examination, in consultation with local Governments and Administrations, of the proposals of the Public Services Commission regarding the Imperial Forest Service, the Government of India recently addressed His Majesty's Secretary of State for India on the subject of the pay which, in their opinion, should be fixed for members of that service in order to maintain its efficiency. The Secretary of State has now sanctioned the following revised scales of pay for present and future members of the service:—

(a) For Assistant and Deputy Conservators—

						Rs.
In the 1st year of service	450 per mensem.
" 2nd "	500 "
" 3rd "	550 "
" 4th "	600 "
" 5th "	650 "
" 6th "	700 "
" 7th "	750 "
" 8th "	800 "
" 9th "	850 "
" 10th "	1,000 "
" 11th "	1,050 "
" 12th "	1,100 "
" 13th "	1,150 "
" 14th "	1,200 "
" 15th "	1,250 "
" 16th "	1,300 "
" 17th "	1,350 "
" 18th "	1,400 "
" 19th "	1,450 "
" 20th "	1,500 "
" 21st "	1,500 "
" 22nd "	1,500 "
" 23rd "	1,600 "

- (i) Officers drawing Rs. 650 a month, or less, will be styled "Assistant Conservators," those drawing Rs. 700 and upwards will rank as "Deputy Conservators."
- (ii) Until he has passed the examinations prescribed in Article 40 of the Forest Department Code, an Assistant Conservator may not draw pay at a higher rate than Rs. 550. On passing the examinations he will resume drawing pay under the time scale at the rate to which his length of service entitles him.
- (iii) A local Government or Administration is authorized to stop the incremental rise of pay of any officer whose work, in its opinion, is not of a satisfactory nature.
- (iv) No officer will be permitted to draw more than Rs. 850 a month until he is declared by the local Government to be fit to hold one of the heaviest major charges in the province in which he is serving. This will apply only to officers who may draw Rs. 850 per mensem or less under the new scale.

(b) *For Conservators—*

It has been decided to abolish the system of payment by grades, and to establish in its place an incremental scale, commencing on Rs. 1,750 and rising by annual increments of Rs. 50 to Rs. 2,000.

Permanent service only will count for increments.

(c) *For Chief Conservators—*

The former fixed pay has been altered to an incremental scale commencing at Rs. 2,500 and rising by annual increments of Rs. 125 to Rs. 2,750.

Permanent service only will count for increments.

(d) *For the Inspector General—*

The pay of the Inspector General of Forests has been fixed at Rs. 3,250.

The orders contained in this Resolution will have effect from the 27th July 1919.

* To His Majesty's Secretary of State, dated April 16th, 1919.
From His Majesty's Secretary of State, dated July 24th, 1919.
To His Majesty's Secretary of State, dated September 11th, 1919.
From His Majesty's Secretary of State, dated October 16th, 1919.

Ordered, that a copy of the above Resolution, with copies of the telegrams* to and from the Secretary of State, be forwarded, for information and guidance, to the local Governments and Administrations noted in the margin, the Inspector General of Forests and the

Accountant General, Central Revenues.

Ordered also that a copy be forwarded to the Finance Department, for information, and that the Resolution be published in the Gazette of India.

The 5th November, 1919.

No. 1122-76,17.—In continuation of this Department Notification No. 958, dated 23rd September 1919, Mr. W. F. Perrée, C.I.E., Conservator of Forests, Officiating President, Forest Research Institute and College, Dehra Dun, is confirmed in that post, with effect from the 1st September 1919.

R. A. MANT,

Secretary to the Government of India.

DEPARTMENT OF COMMERCE AND INDUSTRY.

NOTIFICATIONS.

CUSTOMS—WAR.

Simla, the 8th November, 1919.

No. 9216.—In exercise of the powers conferred by section 3 of the Import and Export of Goods Act, 1916 (XI of 1916), the Governor General in Council is pleased to direct that the following amendments shall be made in the Notification in this Department No. 7822, dated the 27th September 1919, as subsequently amended :—

- (i) From the third proviso of the preamble, *delete* the words “ kerosene oil.”
- (ii) From the Schedule *delete* the words “ (A) Kerosene oil.”

No. 9291.—The following extract from the Board of Trade Journal, dated the 2nd October 1919, is published for general information :—

GOVERNMENT NOTICES AFFECTING TRADE.

EXPORT SECTION.

TRADING WITH LATE ENEMY AND OTHER COUNTRIES.

The following notes on trading conditions as affected by the raising of the blockade, the authorisation of the resumption of trade with Germany and other countries, and the removal of United Kingdom import restrictions, are published by the Board of Trade for the information of British traders. These notes supersede those published in July last as Parliamentary Return “Cmd. 274.”

During the war it has been necessary to prohibit all trading with the enemy; but with the conclusion of peace with Germany the necessity for this prohibition has ceased. It may be expected that there will be a considerable demand in the late enemy countries for all kinds of goods; as this market is now open to all the world, it is no part of the policy of His Majesty's Government to discourage British traders from competing therein, and it is desirable that British traders should make every effort to secure a proper footing in Central Europe.

I.—GERMANY.

Exports.—Any goods may be sent to Germany without licence, except goods on Lists “A” and “B” of prohibited exports. Applications for export licences in respect of goods included in those lists should be addressed to the Export Licence Department, 1, Queen Anne's Gate Buildings, Westminster, S.W. 1. It is understood that at present the import of all goods into unoccupied Germany is subject to import licence, for which the German consignee has to make application to the competent authority in Berlin.

Imports.—Any goods may be imported from Germany, and paid for, without licence, except goods whose importation from all foreign countries is prohibited. Import prohibitions now apply only to a small number of goods, a list of which will be found in the “Board of Trade Journal” of the 28th August, 1919.

Other transactions.—Other transactions of a commercial or financial nature with firms in Germany are permissible without further licence, provided they do not involve any of the following matters, namely :—

- (a) the payment of money arising out of pre-war transactions;
- (b) the delivery of or dealing with property held in this country for persons in Germany since before the outbreak of war;
- (c) the transfer of securities by or on behalf of a person in Germany;
- (d) the allotment or transfer of securities issued by a company to or for the benefit of a German subject;
- (e) the transfer of any debt or other obligation due to a person in Germany.

It should, of course, be understood that, as regards the financing of transactions, traders must make the best arrangements they can, and, in case of uncertainty as to the best mode of procedure, they should consult their bankers.

II.—THE TERRITORIES PREVIOUSLY INCLUDED IN THE AUSTRO-HUNGARIAN DOMINIONS.

The British regulations are the same as those set out above in the case of Germany, except that List “D” applies in the case of exports to Austria and Jugo-Slavia.

III.—TURKEY AND BULGARIA.

Except that List “D” of prohibited exports applies to Turkey, and Lists “D” and “E” to Bulgaria, the British regulations are the same as for Germany.

IV.—NORWAY, SWEDEN, DENMARK, HOLLAND AND SWITZERLAND.

It is no longer necessary to obtain certificates from Importing Associations in these countries, or to procure other forms of guarantee, or to consign goods to such Associations. Export licences, for which application should be made to the Export Licence Department at the address given above, are required only for goods on Lists “A” and “B” of prohibited exports.

V.—POLAND, FINLAND, ESTHONIA, LETTLAND, LITHUANIA.

So far as British regulations are concerned, there are no special restrictions on trade with these countries, but as in the case of other foreign countries export licences are required for goods on Lists "A" and "B" and general prohibitions of import apply to these as to other countries.

Further information regarding the export of goods to the above and other countries will be found in the "List of Export Prohibited Goods," which is published fortnightly by the Export Licence Department of the Board of Trade, 1, Queen Anne's Gate Buildings, Westminster, S.W.1.

Consular Certificates of Origin and Interest.—These certificates are no longer required for goods imported into this country.

Declarations of Ultimate Destination and Disclosure of Names of Consignees.—These declarations will no longer be required to be made in respect of exports from the United Kingdom, and disclosure of the name of the consignee on Bills of Lading or Shipping Manifests is unnecessary, except in a limited number of cases where the Export Licence Department may continue to specify on an export licence the name of the consignee.

No. 9295.—The following Board of Trade list, dated the 10th October 1919, on the subject of prohibitions of export from the United Kingdom, is published for general information :—

BOARD OF TRADE,
EXPORT LICENCE DEPARTMENT,
1, QUEEN ANNE'S GATE BUILDINGS,
WESTMINSTER, S. W. 1.

LIST OF EXPORT PROHIBITED GOODS, &c., 10TH OCTOBER 1919.

This List cancels all similar lists and supplements issued by the Export Licence Department prior to the above date.

	PAGE.
List A. and B.	2164
List C.	2167
List D. and E.	2168
Open General Licences for Exports :	
APPENDIX No. 1	2168
General Information with regard to Export Regulations to certain countries in Europe and on the Mediterranean	2170
Trade with Germany and Austria-Hungary	2174
Transshipment in the United Kingdom	2175

This consolidated "List of Export Prohibited Goods" is amended and issued fortnightly. Exporters who desire to have copies of each list posted to them during the current year can do so on payment of a registration fee of 2s. 6d. for one copy of each issue. Should more than one copy of each issue be required an additional payment should be made at the rate of 2d. per copy for each month up to the end of the current year.

Exporters who desire to have their names placed on the register should make application to the Stationery Clerk, Export Licence Department, enclosing Money Orders payable to the Export Licence Department, Board of Trade.

IMPORTANT NOTICE.

Application Form A. for Licence to Export.

The Export Licence Department, having regard to the circumstances now existing, and subject to any further notification which it may hereafter become necessary to make, notifies Exporters that answers need only be given to the undermentioned questions which are set forth in the above-mentioned form of application.

- (a) Full name and address of consignor.
- (b) Name and address of person or company to whom the licence is to be sent.
- (c)—1. Proposed date of despatch of goods.
2. Port of intended shipment in this country or post office of despatch.
- (d) Prospective port and country to which the goods are to be exported.
- (e) Route by which the goods are to be forwarded to ultimate destination.
- (f) Full name and address of consignee abroad.
- (k) State whether previous application has been made for all or part of the consignment, &c.
- (l) Full description of goods—quantity, weight, value, number and description of packages and the shipping marks.
- (t) Any special reasons in support of your request for a licence to export these goods.

Instructions Nos. 1, 6, 7, 9 and 12 on page 4 of Application Form A. are now cancelled.

P. S.—Should it be desired that in any exceptional case an answer should be given to any questions set forth in the Application Form but not appearing above, a notification will be addressed to the applicant concerned after the receipt of the relative application.

Application Form B. for General Licences.

The use of Application Form B. for making application for licence to export goods in several consignments over a certain period is no longer necessary. Form A. can now be used when making application for either specific or general licence, provided that if a general licence is required a statement to that effect is endorsed on the Application Form A.

Applications for licences and all correspondence should be addressed to :—

**The Controller, Export Licence Department,
1, Queen Anne's Gate Buildings,
Westminster, S. W. 1.**

List A. and B.

List of goods the export of which is prohibited by the Royal Proclamation of the 10th May, 1917, as amended by Orders of Council of the 22nd June, 1917, the 13th July, 1917, the 14th August, 1917, the 28th August, 1917, the 18th October, 1917, the 27th November, 1917, the 18th December, 1917, the 22nd January, 1918, the 8th February, 1918, the 26th February, 1918, the 8th March, 1918, the 12th April, 1918, the 25th April, 1918, the 14th May, 1918, the 11th June, 1918, the 2nd July, 1918, the 30th July, 1918, the 6th August, 1918, the 27th August, 1918, the 1st October, 1918, the 15th October, 1918, the 19th November, 1918, the 29th November, 1918, the 6th December, 1918, the 13th December, 1918, the 20th December, 1918, the 24th December, 1918, the 27th December, 1918, the 3rd January, 1919, the 7th January, 1919, the 10th January, 1919, the 17th January, 1919, the 24th January, 1919, the 31st January, 1919, the 7th February, 1919, the 14th February, 1919, the 21st February, 1919, the 28th February, 1919, the 7th March, 1919, the 14th March, 1919, the 21st March, 1919, the 28th March, 1919, the 4th April, 1919, the 11th April, 1919, the 15th April, 1919, the 25th April, 1919, the 2nd May, 1919, the 9th May, 1919, the 16th May, 1919, the 30th May, 1919, the 20th June, 1919, and the 8th July, 1919, to be exported from the United Kingdom to the following destinations, viz. :—

List A. and B.—Goods marked (A) to All Destinations.

Goods marked (B) to All Ports and Destinations Abroad other than Ports and Destinations in British Possessions and Protectorates.

A licence is required to export goods marked (A) to any destination abroad.

A licence is required to export goods marked (B) to any destination abroad, except British Possessions and Protectorates, to which goods marked (B) can be exported without licence, providing the goods are not transhipped at foreign ports.

- (B) Accoutrements, not otherwise prohibited ; (14-8-17).
- (p) Aeroplane engines and their component parts. (See, however, page 2169.)
- (s) Aircraft other than balloons, of all kinds and their component parts, together with accessories and articles suitable for use in connection with aircraft ; (20-6-19). (See, however, page 2169.)
- Alumina, see Phosphate Rock.
- (A) Ammonia, sulphate of, and mixtures containing sulphate of ammonia ; (19-1-17) (22-1-18) (6-8-18) (24-1-19).
- (A)* Animals, living, for food ; (12-12-16).
- (A)* Animals, pack, saddle and draught, suitable, or which may become suitable, for use in war ; (8-1-15).
- Apatites, see Phosphate Rock.
- (A) Armour plates, armour quality castings, and similar protective material.
- (A) Arms, not being Firearms and their component parts.

B.

Bacon, see Meat.
Bags, see Nitrate.

Banknotes, see Notes.

- (A) Barley and barley meal ; (11-2-15).
- (B) Barographs, suitable for aircraft ; (6-12-18).
- (A) Basic slag ; (23-10-16).
- (A) Bayonets and their component parts.
- (A) Beans of all kinds, including haricots ; (12-12-16) (27-11-17). (See, however, Appendix No. 1.)
- (A) Bean flour and meal.
- (A) Boats and craft ; (10-5-17) (18-12-17).
- Bran, see Offals of Corn.
- (A) Bread.
- Brewers' grains, see Grains.
- (B) Bristles, of European origin ; (26-6-16) (8-3-18) (2-7-18) (17-1-19).
- (A) Buckwheat ; (12-12-16).
- Bullion, see Gold.
- (A) Butter.

C.

- (A) Cakes and Meals (which may be used as forage or food for animals), the following :—
Calf meal ;

*Application for licence to export live stock should be made on application form "L," copies of which can be obtained from the Stationery Clerk, Export Licence Department.

Coconut and poonac cake ;
Compound cakes and meal ;
Cotton seed cake and cotton seed meal ;
Gluten meal or gluten feed ;
Ground nut or earth nut cake and meal ;
Hemp seed cake and meal ;
Husk meal ;
Linseed cake and meal ;
Locust bean meal ;
Maize germ meal ;
Maize meal and flour ;
Meat meal ;
Palm nut cake and meal ;
Poppy seed cake and meal ;
Rapeseed or colza seed cake and meal ;
Sesame seed cake and meal ;
Soya bean cake and meal ;
Sunflower seed cake and meal ;
Whale cake.

Calf meal, *see* Cakes and Meals.

(A) Calfskins.

(A) Cannon and other ordnance, and their component parts.

(A) Carriages and mountings for cannon and other ordnance and their component parts.

(A) Cartridges, charges of all kinds, and their component parts, and tools, appurtenances and accessories for the filling and repair of rifle and shot-gun cartridges. (See however, page 2169.)

Castings, *see* Armour Plates.

Cattle foods, *see* Cakes and Meals.

Cattle foods patent and proprietary, *see* Patent.

Cattle hides, *see* Hides.

Caustic Potash, *see* Potash.

(A) Cement for building and engineering purposes ; (14-5-18). (See, however, Appendix No. 1)

(A) Cheese.

(A) Chicory ; (30-3-17) (27-11-17).

(A) Chick peas ; (12-12-16).

(A) Coal, except coal allowed by the Commissioners of Customs and Excise to be shipped as bunker coal ; (27-11-17).

(A) Coal tar, all products obtainable from and derivatives thereof (except solvent naphtha, cresylic acid and mixtures containing cresylic acid), suitable for use in the manufacture of dyes and explosives, whether obtained from coal tar or other sources, and mixtures and preparations containing such products or derivatives ; (26-7-16) (29-11-18) (20-12-18).

(A) Cocaine and its salts and preparations ; (17-11-16).

Coconut cake, *see* Cakes and Meals.

(A) Cocoa, raw, and manufactures thereof, except cocoa butter and cocoa powder ; (19-2-17) (20-12-18).

(B) Cocoa butter ; (20-12-18).

(A) Cocoa husks ; (19-2-17).

(A) Cocoa shells ; (19-2-17).

(A) Cod liver oil and preparations containing cod liver oil ; (4-4-19).

(A) Coffee ; (19-2-17). (See, however, Appendix No. 1.)

Coin, *see* Gold ; Silver.

(A) Coke and manufactured fuel ; (18-12-17).

Combings, *see* Malt.

Compound cakes and meal, *see* Cakes and Meals.

(A) Confectionery manufactured wholly or partly of sugar ; (12-3-17) (14-3-19).

Corn offals ; *see* Offals.

Cotton seed cake and cotton seed meal ; *see* Cakes and Meals.

Cows, bulls, etc. ; *see* Animals.

Craft ; *see* Boats.

Culms ; *see* Malt.

D.

(A) Dari.

Dhol ; *see* Gram.

Distillers' grains ; *see* Grains, &c.

(B) Docks, floating, and their component parts.

(A) *Dyes and dvestuffs manufactured from coal tar products, and articles containing such dyes and dyestuffs.

E.

Earth nut cake and meal ; *see* Cakes and Meals.

(A) Eggs in shells.

Engines ; *see* Aeroplane.

Equipment web ; *see* Web.

(A) Ergot of rye, and the liquid extract of ergot ; (10-5-17) (12-4-18) (15-10-18).

(A) Explosives *see*, however, page 2169 (19-11-18) (15-4-19).

F.

Fats, edible ; *see* Oils.

(A) Feeding stuffs containing molasses ; (21-2-19).

(A) Firearms and their component parts ; (8-2-18) (29-11-18). (See, however, page 2169)

(A) Fish, except the following tinned, preserved or frozen fish, chinchids, sprats and herrings and crayfish ; (27-12-18) (30-5-19).

(A) Salmon, tinned.

(A) Flax, raw.

Flour, *see* Bean ; Lentil ; Malt ; Maize, Pea ; Rice ; Rye ; Wheat.

Foodstuffs ; *see* specific headings.

Forage and food which may be used for animals ; *see* specific headings as, e.g., Beans ; Cakes ; Hay ; Oats ; &c.

(A) Forage ; green.

(A) Fruit and fruit preserves, except olives ; and except the following fresh fruit which may be exported without licence to all destinations with which trading is permitted :—

Apricots, grape fruit, green figs, grapes, peaches, pears, pineapples, nectarines, imported plums (South African), and imported melons ; (29-9-16) (15-1-17) (19-2-17) (10-1-19).

Fuel, manufactured ; *see* Coke.

G.

(A) Game.

Gluten meal, or gluten feed ; *see* Cakes and Meals.

(A) Gold, coin and bullion.

*The following proprietary dyes may, however, be exported without licence to all destinations with which trading is permitted :—

Dolly dyes.

Diamond dyes.

Drummer dyes.

Dixon's home dyes.

Maypole dyes.

(A) Grains, Brewers' and Distillers'; (12-12-16).

(A) Grain or dhol; (12-12-16).

(A) Green forage; (12-12-16).

(A) Grenades and component parts thereof; (10-5-17).

Ground nut, or earth nut cake and meal; see Cakes and Meals.

(A) Guanos, except whale guano; (2-2-17) (3-1-19).

Guns; see Cannon, Firearms, Machine.

H.

Haricots; see Beans.

(A) Hay.

(A) Heliographs and their component parts; (2-7-18).

Hempseed cake and meal; see Cakes and Meals.

(A) Hides, British and Irish, cattle; (28-2-19) (8-7-19).

Horses; see Animals.

Hosiery needles; see Needles.

Husk meal; see Cakes and Meals.

I.

(A) Indigo, synthetic; (6-8-18).

Iron (1-5-17) the following:—

Castings; see Armour plates.

(A) Pig.

(A) Scrap.

J.

(A) Jute, raw and carded; (12-3-17).

L.

(A) Lard of all kinds and imitation lard; (19-2-17) (10-5-17).

Latch needles; see Needles.

(A) Lentil flour and meal

Lime phosphate; see Phosphate Rock.

Linseed cake and meal; see Cakes and Meals.

Livestock; see Animals.

Locust bean meal; see Cakes and Meals.

(A) Lupin seed; (12-12-16).

M.

(A) Machine guns, mountings, for machine guns, and component parts thereof.

(A) Maize; (12-12-16).

(A) Maize germs; (12-12-16).

Maize germ meal; see Cakes and Meals.

Maize meal and flour; see Cakes and Meals.

(A) Malt dust, malt flour, culms, sprouts or combings; (12-12-16).

(A) Manures, compound, containing either sulphate of ammonia, superphosphate of lime, or potash; (2-1-17) (31-1-19).

(A) Margarine; (19-2-17).

Meals; see Barley; Bean; Cakes; Lentil; Pea; Rye; Wheat.

(A) Meat of all kinds, except turtle meat, horse flesh and except tinned or potted meat, other than tinned bacon and tinned ham; (19-2-17) (7-2-19).

Meat meal; see Cakes and Meals.

(A) Mica block, mica sheets, and mica splittings; (22-6-17) (27-11-17).

Middlings; see Offals of Corn.

(A) Milk, condensed or preserved; (15-4-19).

Mill dust and screenings; see Offals of Corn.

(A) Millet; (12-12-16).

(B) Mines and their component parts.

Molasses; see Feeding Stuffs.

N.

(A) Needles, hosiery machine, latch; (23-10-16) (18-10-17) (29-11-18).

(A) Nicotine and its compounds; (6-8-18).

(B) Nitrate bags; (17-1-19).

*Notes of the Bank of France; (27-8-18).

(A) Notes, Russian rouble; (26-2-18).

Nuts; see Ground Nut; Oleaginous.

O.

(A) Oats.

Offals of corn and grain which may be used as food for animals, the following:—

(A) Bran.

(A) Middlings.

(A) Mill dust and screenings.

(A) Pollard.

(A) Rice meal (or bran) and dust.

(A) Sharps.

(A) Oils and fats, edible, including blends of two or more edible oils or fats, except the following (which come under List C.):—

Hemp seed oil;

Kapoc seed oil;

Maize oil;

Morah seed oil;

Niger seed oil;

Olive oil;

Poppy seed oil;

Rape seed oil;

Shea butter;

Sunflower oil;

Dripping;

Premier jus;

(7-3-19) (28-3-19).

Oil, cod liver; see Cod Liver Oil.

(A) Oleaginous kernels, nuts, seeds, and products of all kinds; (12-3-17) (27-11-17).

(A) Oleo-margarine; (19-2-17).

(A) Onions.

(A) Opium and its preparations.

(A) Opium alkaloids and their salts and preparations.

Ordnance; see Cannon; Carriages.

P.

Palmut cake and meal; see Cakes and Meals.

(A) Patent and proprietary cattle foods of all kinds.

(A) Pea flour and meal.

(A) Peas; other than split peas; (2-2-17) (25-4-19).

(A) Periscopes and their component parts; (10-5-17).

(A) Phosphate rock, namely:—Apatites; Phosphates of lime and alumina; (2-2-17).

(A) Pigeon peas; (12-12-16).

Pistols; see Firearms.

Pollard; see Offals of Corn.

Poonac cake; see Cakes and Meals.

Poppy seed cake, and meal; see Cakes and Meals.

(A) Potash, caustic, and articles containing caustic potash.

(A) Potash, muriate, sulphate, and crude manurial potash salts, and mixtures containing any of these substances; (19-2-17) (17-1-19).

*Notes of the Bank of France are prohibited to all destinations except to destinations in France.

- (A) Potassium carbonate and mixtures containing potassium carbonate; (22-6-17).
 (B) Potassium permanganate.
 (A) Potatoes.
 (A) Poultry; (4-7-16) (29-9-16) (19-2-17).
 Preserves, *see* Fruit.
 (A) Projectiles of all kinds and their component parts.

Q.

- (A) Quinine sulphate; (20-6-19).

R.

- (A) Range-finders and their component parts.
 Rapeseed, or colza seed cake, and meal, *see* Cakes.
 Rice meal (or bran) and dust, *see* Offals of Corn.
 (A) Rice and rice flour; (21-3-19).
 Rifles, *see* Firearms.
 Russian rouble notes, *see* Notes.
 (A) Rye, rye flour and meal.

S.

- Salmon, tinned, *see* Fish.
 (A) Sausages, except tinned sausages; (2-2-17) (7-2-19).
 Screenings, *see* Offals of Corn.
 Scrap metal, *see* Iron; Steel.
 (B) Searchlights, and their component parts; (1-5-17).
 Seeds, *see* Lupin; Mustard, Beans, Peas and Cereals mentioned by name.
 Seeds, oleaginous, *see* Oleaginous.
 (A) Semolina.
 Sesame seed cake, and meal, *see* Cakes and Meals.
 Sharps, *see* Offals of Corn.
 Sheep, *see* Animals.
 Signalling apparatus, *see* Submarine.
 (A) Silver coin, British; (12-4-18) (29-11-18) (30-5-19).
 Skins, *see* Calf; Hides.
 Soya bean cake and meal, *see* Cakes and Meals.
 Spirits, *see* Whisky.
 (A) Steel, scrap; (1-5-17) (10-5-17).
 (B) Submarine sound signalling apparatus.
 (A) Sugar, cane and beet; (10-5-17) (14-3-19); *see also* Confectionery.
 Sunflower seed cake, and meal, *see* Cakes and Meals.

- (A) Superphosphates.
 (A) Swords and their component parts.

T.

- (A) Tea other than green tea; (28-6-16) (19-2-17) (2-7-18) (14-2-19) (28-2-19).
 (A) Tomatoes, fresh; (8-7-19).
 (B) Torpedoes and their component parts.
 (B) Torpedo nets.
 (B) Torpedo tubes.

U.

- (A) Uniform clothing, naval, military and Air Force; (15-10-18) (7-3-19).

V.

- Vegetables, *see* Onions; Potatoes; Tomatoes.
 Venison, *see* Game.
 (A) Vessels; (18-12-17).

W.

- (B) Web equipment.
 (A) Whalebone; (1-5-17).
 Whale cake, *see* Cakes and Meals.
 (A) Whale fins; (1-5-17).
 (A) Wheat, wheat flour and wheat meal, and all articles, mixtures and preparations containing wheat, wheat flour, or wheat meal.
 (A) Whisky.
Wool and Woollen Goods :—
 (A) Wool, raw, and mixtures thereof; (8-9-16) (18-10-17).
 (See also Appendix No. 1 for camel hair, cashmere, alpaca and mohair.)
 (A) Wool tops and mixtures thereof; (18-10-17).
 (A) Wool noils and wool waste and mixtures thereof; (18-10-17).
 (A) Woollen and worsted yarn and mixtures thereof; (18-10-17).

Y.

- Yarns, *see* Wool.
 (A) Yeast; (8-9-16) (22-6-17) (28-2-19).

LIST C.

By Order of Council dated 1st October, 1918, as amended by Order of Council of the 24th December, 1918, the 7th January, 1919, the 7th February, 1919, the 11th February, 1919, the 28th February, 1919, the 11th April, 1919, the 29th April, 1919, and the 16th May, 1919, ALL GOODS [other than (1) printed matter and (2) personal effects accompanied by their owners] are prohibited from export to All Destinations in European Russia (except Russian ports on the Black Sea) and in other Foreign Countries in Europe and on the Mediterranean, except France and French Possessions, Italy and Italian Possessions, Belgium, Portugal, Greece, Serbia, Roumania, Iceland and the Faroe Islands, Spain, Morocco, Palestine and Syria as far north as a line from Alexandretta to Aleppo inclusive, and as far east as the Hedjaz railway inclusive, Czecho-Slovakia, Alsace-Lorraine, Luxembourg and the portions of Austria-Hungary in the

occupation of the Armies of the Associated Governments, Occupied Rhineland territory, and to all Ports in any such Foreign Countries.

LIST C comprises **ALL GOODS** not included in List A or B, excepting the following goods, which may be exported without licence :—

- (1) Printed matter ;
- (2) Personal effects accompanied by their owners.

In addition to the above countries, trading is permitted with the following countries, to which List C goods may be exported without licence (*see, however, Lists D and E, below*) :—

Turkey, Bulgaria, Russian Black Sea ports, Austria-Hungary, Jugo-Slavia, Montenegro, Albania, Bosnia, Herzegovina, Dalmatia, and Arabia.

Goods on List C may also be exported to the following countries without licence (*see page 2170*) :—

Denmark, Holland, Norway, Sweden, Switzerland, Esthonia, Finland, Germany, Lettland, Lithuania, and Poland.

List D.

By Order of Council dated 21st March, 1919, as amended by Order of Council of the 11th April, 1919, the 15th April, 1919, and the 9th May, 1919, the following goods on List D* are prohibited from export to Turkey, Bulgaria, ports on the Black Sea (not including Roumanian ports), Austria-Hungary, Jugo-Slavia, Montenegro, Albania, Bosnia, Herzegovina, Dalmatia, and Arabia.

Aircraft of all kinds, including aeroplanes, airships, balloons and their component parts, together with accessories and articles suitable for use in connection with aircraft.	Field-glasses.
Apparatus which can be used for the storage or projection of compressed or liquefied gases, flame, acids or other destructive agents capable of use in warlike operations and their component parts.	Gases for war purposes.
Armour plates.	Guns and machine guns.
Armoured motor-cars.	Gun mountings.
Arms of all kinds, including arms for sporting purposes and their component parts.	Limbers, military wagons of all descriptions.
Barbed wire and implements for fixing and cutting same.	Harness or horse equipment of a military character.
Camp equipment, articles of, and their component parts.	Implements and apparatus designed exclusively for the manufacture of munitions of war or for the manufacture or repair of arms or of war material for use on land or sea.
Clothing and equipment of a distinctively military character.	Minors, submarines and their component parts.
Electrical appliances, adapted for use in war, and their component parts.	Projectiles, charges, cartridges and grenades of all kinds and their component parts.
Explosives specially prepared for use in war.	Range-finders and their component parts.
	Searchlights and their component parts.
	Submarine sound signalling apparatus.
	Materials for wireless telegraphs.
	Torpedoes.
	Warships, including boats and their component parts of such a nature that they can only be used on a vessel of war.

LIST E.

In addition to the goods contained in List D, the following goods on List E* are prohibited from export to Bulgaria.

All articles for use in transportation on land.	Locomotives and rolling stock.
Saddle or pack animals, vehicles, motor-cars, bicycles, and their component parts.	Telegraphs and telephones and their component parts, and materials for use therewith.

APPENDIX No. 1.

GENERAL LICENCES FOR EXPORTS.

An Open General Licence has been issued, permitting the exportation of the following goods (without application to the Export Licence Department) to all destinations except those foreign destinations to which goods on List C (*see page 2167*) are prohibited from export.

Alpaca, and noils, waste and yarns thereof.	Bird seed.
Beans, imported, other than Soya, Locust or Chinese horse beans.	Blanc-mange powder.

* Many goods on the above Lists are already on List A or B.

Cake mixture.
 Camel hair, and noils, waste and yarns thereof.
 Cashmere, and noils, waste and yarns thereof.
 Cement for building and engineering purposes.
 Chillies.
 Cocoa and milk, coffee and milk, chocolate and milk, sweetened or unsweetened, in tins.
 Coffee, the following varieties :—
 Pernambuco.
 West African.
 Liberian.
 Rio.
 Bahia.
 Victorian.
 Custard powder.
 Dates.

Gloy.
 Horsecflesh.
 Koffio.
 Lactol.
 Lactogel.
 Mango chutney, tomato chutney, and tomato ketchup.
 Marmite.
 Mince-meat and mince pies.
 Mixtures and preparations containing not more than 10 per cent. aniline colour, not otherwise prohibited.
 Mohair and noils, waste and yarns thereof.
 Paisley flour.
 Paint, other than gold paint.
 "Phosto" animal food.
 Pudding powder.
 Puddings.
 Vanilla custard.

SAMPLES.

An open general licence has been issued which permits the free export of all *bond-fide* samples of prohibited goods to all non-enemy destinations, and to enemy territory with which trade is now permitted (see page 2167). Samples exported under this licence may be used only for genuine sample purposes, i.e., for obtaining orders from foreign buyers, and may not be sold except with the written consent of the Export Licence Department, but such consent may be dispensed with when it is desired to sell the articles in the country of destination after they have fulfilled their purpose as samples. Exporters will be required to satisfy the Customs Authorities that the goods presented for export under this licence are *bond-fide* samples, and to make a declaration to that effect on the relative shipping documents.

This notice only applies to samples of goods which require licences for export to the particular destination concerned.

In addition, the consent of the Export Licence Department is not required for the sale of samples which, though within this scheme at the actual time they were exported, could be exported outside the scheme at the actual time of the proposed sale.

OPEN GENERAL LICENCE FOR THE EXPORT OF EXPLOSIVES, DOUBLE-BARRELLED GUNS, &c.

An Open General Licence has been issued for the export of cartridges, charges, &c., industrial explosives, double-barrelled guns and sporting rifles, to the destinations given below, to which, therefore, exports may be made subject to the usual Customs formalities without applications for specific licences to the Export Licence Department :—

British Possessions and Protectorates.
 French Possessions and Protectorates.
 United States of America.
 South America.
 Africa.
 Japan and Korea.
 Asiatic Russia.
 France, Belgium, Spain, Portugal, Greece, Italy, Serbia, Roumania, Norway, Sweden and Denmark.

The issue of this licence does not relieve exporters from the necessity of obtaining import permits from the country of destination in cases where local regulations render such a course necessary.

OPEN GENERAL LICENCE FOR THE EXPORT OF AIRCRAFT, &c.

An Open General Licence has been issued for the export of the undermentioned goods to all destinations except Russia, Germany, Hungary, Austria, Turkey and Bulgaria. Applications are no longer to be made to the Export Licence Department in respect of the export of these goods to countries other than those mentioned :—“Aeroplane engines and their component parts. Aircraft, other than balloons of all kinds, and their component parts, together with accessories and articles suitable for use in connection with aircraft.”

Licences are only required for goods on Lists A, B and D. Licences will not, as a rule, be granted for goods on List D except as provided in Note (iii), page 2173. Any available route may be adopted at the option of the exporter.

There is no parcel post service at present.

Alsace-Lorraine.

Licences are only required for goods on Lists A and B. Goods may be exported by any available route at the option of the exporter.

There is no parcel post service at present.

Arabia.

Licences are only required for goods on Lists A, B and D. Licences will not, as a rule, be granted for goods on List D (except as indicated in note (iii), page 2173).

See page 2173.

Asia Minor (*see* Turkey).

Austria, Hungary.

Trade is now permitted with all portions of the late Austro-Hungarian Empire.

Licences are only required for goods on Lists A, B and D. Licences will not, as a rule, be granted for goods on List D (except as indicated in note (iii), page 2173).

Goods may be exported *via* any available route.

Parcels will now be accepted by the Post Office for transmission to Austria (States of Upper and Lower Austria, Styria, Carinthia, Salzburg, Northern Tyrol, Vorarlberg and Liechtenstein, Trentino, Istria and Dalmatia).

For the portions of the late Austro-Hungarian Empire now incorporated in Italy, Czecho-Slovakia, Poland and Jugo-Slavia, *see* notes applicable to those countries.

See also page 2173.

Belgium.

Licences are only required for goods on Lists A and B.

Belgian import licences are required in respect of arms of all kinds, sugar, wheat (grain and flour) and coal.

Bulgaria.

Licences are required for goods on Lists A, B, D and E. Licences will not, as a rule, be granted for goods on Lists D and E except as provided in Note (v).

Any available route may be adopted at the option of the exporter.

Czecho-Slovakia (*including any portions of Silesia and Galicia allotted to Czecho-Slovakia*).

This territory consists, broadly speaking, of the former Austrian provinces of Bohemia and Moravia and the northern part of Hungary-Slovakia.

Licences are only required for goods on Lists A and B.

Goods may be exported *via* Hamburg and the Elbe, provided they are consigned to the Czechoslovak Government's Trade Office, Welserhaus 12, Schaarsteinwegsbrücke, Hamburg, for further transshipment to the actual consignee in Czechoslovakia. Czechoslovak Import Licences should reach the Hamburg Office from the consignee previous to the shipment of goods. A duplicate set of shipping documents should be forwarded in advance to that Office. Goods may also be exported *via* any other available route.

All shipments to Czechoslovakia are subject to Import Licences issued by the Import and Export Commission in Prague. Applications have to be made to the consignees.

Denmark.

Licences are only required for goods on Lists A and B.

No certificates from the Danish Associations need be produced.

Exporters should satisfy themselves in all cases that the goods are not subject to any Danish import prohibition.

Estonia (principal port—Reval).

Licences are only required for goods on Lists A and B. The support of the Estonian Legation is no longer required.

There is no parcel post service at present.

Finland.

Licences are only required for goods on Lists A and B. Exporters should instruct their consignees to obtain any import licence that may be necessary.

Any available route may be adopted at the option of the exporter.

France.

Licences for exports are only required for goods on Lists A and B. Exporters are warned that French import licences are required for many classes of goods. Full information may be obtained from the French Customs Office, Bank Buildings, Kingsway, London, W.C. 2.

Germany.

Licences are only required for goods on Lists A and B.

Goods may be exported by any available route at the option of the exporter.

An import licence is required for the importation into unoccupied Germany of goods other than newspapers, periodicals, books, and foodstuffs. Before goods other than those mentioned are despatched, therefore, the sender should apply to the Imperial Commissary for Export and Import Licences, Lützowufer 6-8 Berlin, W. 10, with a view to ascertaining whether the German Authorities are actually prepared to admit the goods.

For the occupied territory in the Rhineland (*see* Note (ii), page 2173)

See also page 2173.

Greece.

Licences are only required for goods on Lists A or B. Any available route may be adopted at the option of the exporter.

Holland.

Licences are only required for goods on Lists A and B.

Consignment to the Netherlands Oversea Trust is no longer necessary.

Italy.

Licences are only required for goods on Lists A and B. Exporters are warned that Italian import licences are required for many classes of goods, full information may be obtained from the Italian Government Commission, West Africa House, Kingsway, W.C. 2.

Any available route to Italy may be adopted at the option of the exporter.

Jugo-Slavia.

Licences are only required for goods on Lists A, B and D. Licences will not, as a rule, be granted for goods on List D (except as indicated in Note (iii), page 2173).

Any available route may be adopted at the option of the exporter.

There is no parcel post service at present, except to Dalmatia.

Letland (Latvia) (principal port—Libau).

Licences are only required for goods on Lists A and B. Applications to export goods on Lists A and B will be considered in the usual way.

There is no parcel post service at present.

Lithuania (principal port—Riga).

Licences are only required for goods on Lists A and B. Applications to export goods on Lists A and B will be considered in the usual way.

There is no parcel post service at present.

Luxembourg.

Licences are only required for goods on Lists A and B.

Goods may be exported by any available route at the option of the exporter.

Montenegro (see Jugo-Slavia).**Norway.**

Licences are only required for goods on Lists A and B.

No certificates from the Norwegian Associations, or other form of guarantee, need be produced.

Exporters should satisfy themselves in all cases that the goods are not subject to any Norwegian import prohibition.

Palestine.

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

Poland (including any portions of Silesia and Galicia allotted to Poland).

Licences are only required for goods on Lists A and B.

Exporters should satisfy themselves in all cases that the goods are not subject to any Polish import prohibition, see note (iv), page 2173.

There is no parcel post service at present.

Portugal.

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

Roumania

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

Exporters should satisfy themselves in all cases that the goods are not subject to any Roumanian import prohibition.

Russia (Asiatic).

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

Russia (European).

(a) *Northern District—approached via Archangel* or the Murman Coast.*

Licences are required for all goods, except "free" goods (a list of which can be had on application to the Stationery Clerk, Export Licence Dept.) except "foodstuffs" on List C. All goods imported into Northern Russia must be for consumption in the districts of Archangel and Murmansk, and they must be consigned to the British Supply Mission at Archangel or Murmansk for account of a sub-consignee. Exporters are warned that import licences must be obtained by consignees from the Archangel Government before they can take delivery of the goods.

(b) *Southern District—approached via Batoum and Novorossisk on the Black Sea and Taganrog on the Sea of Azov.*

Licences are only required for goods on Lists A, B and D.

There is no parcel post service at present.

(c) *Other Districts.*

No licences are being granted at present.

Serbia.

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

There is no parcel post service at present.

Spain.

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

Sweden.

Licences are only required for goods on Lists A and B. No certificates from the Swedish Handels Kommission, or other forms of guarantee, need be produced.

Exporters should satisfy themselves in all cases that the goods are not subject to any Swedish import prohibition.

Switzerland.

Licences are only required for goods on lists A and B. Consignment to the Société Suisse de Surveillance Economique is no longer necessary.

Any available route may be adopted at the option of the exporter.

With regard to exports to Switzerland under the British Re-export Scheme, goods may now be exported without licences, and without consignment to H. M. Consul at St. Gall, but it will be necessary for exporters to communicate with the Department of Import Restriction, 22, Carlisle Place, S.W.1, in connection with the necessary import certificate for the re-admission of the goods into this country.

* It is understood that there are no shipping facilities for Archangel at present.

Syria (as far north as a line from Alexandretta to Aleppo inclusive, and as far east as the Hedjaz railway inclusive).

Licences are only required for goods on Lists A and B. Any available route may be adopted at the option of the exporter.

A Parcel Post Service is in operation as far north as Alexandretta but not east of Aleppo.

Turkey (including Asia Minor).

Licences are only required for goods on Lists A, B and D. Licences will not, as a rule, be granted for goods on List D except as provided in Note (iii), page 2173.

Any available route may be adopted at the option of the exporter.

Parcels for civilians in European Turkey (Constantinople) are accepted if they are addressed "Poste Restante, British Army Post Office, Constantinople," and parcels for civilians in Smyrna are accepted if they are addressed "Poste Restante, British Post Office, Smyrna."

Notes.

GOODS ON LIST D.

(iii) Consideration will be given to applications in respect of the following goods on List D, if there is clear evidence that the shipments are destined for commercial purposes:—

Barbed wire and implements for fixing and cutting same.

Camp equipment, articles of, and their component parts.

Clothing and equipment of a distinctly military character.

Electrical appliances, adapted for use in war, and their component parts.

Military wagons of all descriptions.

Harness or horse equipment of a military character.

EXPORTS TO POLAND.

(iv) In order to facilitate the re-establishment of commercial relations between Great Britain and Poland, the Polish Commercial and Financial Agency, 88, Kingsway, London W.C.-2, has been duly authorised to issue Import Permits. The applicant for an Import Permit must fill in the four forms with which he will be supplied, and return them with the original invoice and four copies thereof.

It must be noted that all goods intended for Poland must be addressed to:—

The Polish Government Import and Export Commission, Elektoralna 2, Warsaw (for the ultimate consignee).

The charges for this Import Permit are five shillings stamp duty, and £1 per thousand pounds sterling of the total value of the goods to be imported, which must be paid upon receipt of the Permit.

The Import Permit does not exempt the goods from any Customs dues or other taxes imposed by the Polish Government.

Due notification will be given of any alteration in these regulations.

TRADE WITH GERMANY, AUSTRIA, HUNGARY AND ARABIA.

In view of the raising of the blockade, the Board of Trade have issued General Licences under the Trading with the Enemy legislation authorising, with certain reservations, the resumption of trade with Germany, Austria, Hungary, and Arabia.

The Licences do not remove the existing restrictions upon the payment of debts and the return of property due or deliverable to persons in Germany, Austria, Hungary, and Arabia in respect of pre-war transactions.

The Licences do not permit the importation from Germany, Austria, Hungary or Arabia of any goods included in the Prohibition of Import Proclamations and not covered by a General Licence issued under those Proclamations. Information with regard to imports into the United Kingdom can be obtained from the Import Restrictions Department, 22, Carlisle Place, S.W. 1. Further, Export Licences must be obtained from the Export Licence Department, 1, Queen Anne's Gate, Westminster, S.W. 1, before goods included in Lists A and B of prohibited exports are shipped to those countries, but no licences are required in respect of goods included in List C.

The text of these General Licences is as follows:—

The Board of Trade, on behalf of His Majesty, and in pursuance of the powers reserved in the Trading with the Enemy Proclamations and all other powers thereunto them enabling, do hereby give and grant licence to all persons and bodies of persons resident, carrying on business, or being in the United Kingdom, to trade and have commercial and financial transactions with persons or bodies of persons resident or carrying on business in Germany-Austria-Hungary:

Provided always that any licence which may be necessary in respect of any transaction under any prohibition of export or prohibition of import for the time being in force in the United Kingdom or in respect of any remittance of money out of the United Kingdom covered by * Regulation 41D of the Defence of the Realm Regulations is first obtained:

Provided also that this licence shall not permit any person or body of persons to pay to or for the benefit of any person or body of persons resident or carrying on business in Germany-Austria-Hungary any sum of money which by the terms of the Trading with the Enemy Amendment Acts, 1914 and 1915, or either of them, is required to be paid to the Custodian appointed under the Trading with the Enemy Amendment Act, 1914, but such sums of money must be paid to the said Custodian:

Provided further that this licence shall not permit any person or body of persons to pay or deliver any sum of money or property which is, or but for the war, would have been due or deliverable to any person or body of persons resident or carrying on business in Germany-Austria-Hungary in respect of a transaction entered into before the outbreak of war.

A General Licence with regard to Arabia has been issued, dated the 19th August 1919.

URGENT ORDERS.

The Board of Trade, Export Licence Department, announces that, in collaboration with the Department of Overseas Trade, an arrangement has been made whereby firms receiving orders which require immediate acceptance may telegraph details of any such order to the Department of Overseas Trade in order to ascertain whether a licence will be granted for the export of the goods if the order is accepted.

In the event of an applicant being promised a licence he will be enabled to deal with the order straightaway with the knowledge that upon application being made in the proper form to the Export Licence Department the licence will be granted.

The telegrams should be addressed to "Orders, c/o Advantage, Stock, London." They should give in each case in addition to the name and postal or telegraphic address of the applicant the quantity and description of the goods comprised in the order and the name and address of the ultimate consignee if the goods are destined for a neutral country. In the case of orders from Allied or British Territory or from Territory in the occupation of troops of the Associated Governments, the consignee need not be stated; and it will be sufficient merely to give the country of destination. A reply of 24 words (1/3) must be prepaid.

* Regulation 41D of the Defence of the Realm Regulations is now cancelled.

Applicants are requested in their own interest to confine their enquiries to orders needing a very urgent decision, since the fewer the enquiries the more promptly can answers be given.

Any subsequent correspondence that is necessary in connection with the telegraphic enquiries should be addressed to the Comptroller General, Department of Overseas Trade (Export Facilities Section), 4, Queen Anne's Gate Buildings, Westminster, S.W. 1.

Transshipment in the United Kingdom.

The provisional approval of the Export Licence Department should be obtained before the following goods are brought to this country for transshipment :—

Bacon, ham and lard of all kinds.

Butter and Cheese.

Cereals on Section "A" of the list of prohibited exports.

Animal feeding stuffs on Section "A" of the list of prohibited exports.

Seeds, oils and fats on Section "A" of the list of prohibited exports.

It is not now necessary to make application to the Collector of Customs at the transshipment ports on Form S. 90 for the transshipment of any goods except those specified in the following list :—

Foodstuffs for animal or human consumption which are on Section "A" or "B" of the list of prohibited exports (including tea, coffee and cocoa).

Seeds, oils and fats on Section "A" of the list of prohibited exports.

Synthetic dyestuffs.

Ergot.

Quinine sulphate.

Caustic potash.

Potassium carbonate.

Wool, raw, and mixtures thereof.

Wool-tops and mixtures thereof.

Woollen and worsted yarn and mixtures thereof.

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 6th November 1919, based on the Indian Daily Weather Reports of the period.

1. Rainfall was of daily occurrence in the south of the Peninsula, and extended into the north of it between the 2nd and 5th November. A storm formed in the Bay off Negapatam on the 31st October and, crossing the south Coromandel coast early on the morning of the 2nd November, passed out into the Arabian Sea during the course of that day. During its passage across the south of the Peninsula some heavy falls of rain were recorded. At the end of the week weather was again disturbed in the south of the Bay and some moderately heavy rain was falling on the east Madras coast south of Nellore.

2. *Burma*.—In Lower Burma a few scattered falls occurred during the week, while in Upper Burma weather was dry except for a light fall at Lashio.

Northeast India, including Orissa.—In Assam rainfall was local on the 31st October and 1st November. Over the rest of the division there was no rain.

The United Provinces, Central India and the Central Provinces.— { The week was rain-
Northwest India.— less.

The Peninsula.—Nearly general rain fell in southeast Madras throughout the week and in Malabar except on the 1st and 4th November. Rainfall was nearly general in the Konkan on the 3rd, in Mysore on the 3rd and 5th, and in the Madras Deccan and on the north Madras coast on the 2nd; it occurred locally or at a few stations on four other days on the north Madras coast, on three other days in Mysore, on two other days in the Madras Deccan, and on one other day in the Konkan. In the Bombay Deccan local rain fell on the 3rd and there were a few falls on the 4th, while in Hyderabad rain was limited to a moderate fall at Nizamabad and a light fall at Hyderabad.

3. The chief amounts of rainfall reported were as follows :—

October 30th.	Pamban 1.74", Negapatam 0.93", Cuddalore 1.36" and Kodaikanal 1.29".
" 31st.	Calicut 3.34", Cochin 1.01", Pamban 2.85", Madura 0.91", Negapatam 2.94", Trichinopoly 1.18" and Madras 2.22".
November 1st.	Negapatam 8.09", Trichinopoly 1.61", Salem 2.16", Cuddalore 4.63", Madras 1.88", Ootacamund 1.76", Cuddapah 0.80" and Nellore 1.12".
" 2nd.	Mysore 2.54", Mercara 3.13", Mangalore 1.52", Calicut 5.62", Pamban 1.05", Ootacamund 4.30" and Nellore 1.11".
" 3rd.	Calicut 1.06", Cochin 0.99", Ahmadnagar 1.42", Poona 0.80", Mercara 1.90", Pamban 1.23", Negapatam 2.65", Trichinopoly 1.11", Coimbatore and Salem each 1.10", Cuddalore 3.70", Madras 1.01", Ootacamund 2.13" and Nellore 0.91".
" 4th.	Diamond Island 2.93", Pamban 1.90", Cuddalore 1.35" and Nellore 1.21".
" 5th.	Mangalore 1.17", Pamban 1.02", Negapatam 1.49", Trichinopoly 1.76", Salem 0.92", Cuddalore 2.61", Madras 4.29", Cuddapah 1.55" and Nellore 3.86".

4. The week's rainfall was 20 per cent or more in excess in Mysore, Malabar, Madras Southeast and the Madras Deccan; and was 20 per cent or more in defect in the Bay Islands, Burma, Assam, Bengal, Bihar and Orissa, the United Provinces, Kashmir, Central India East, Berar, the Central Provinces and Hyderabad South. It was either equal to the normal or differed from it by less than 20 per cent in the Konkan, the Bombay Deccan, Hyderabad North and the Madras Coast North. No rain usually falls at this time of year in the Punjab, the North-West Frontier Province, Baluchistan, Sind, Rajputana, Gujarat and Central India West.

The rainfall from the 2nd May to date is 20 per cent or more in defect in the Bay Islands, Kashmir, Sind and Hyderabad North; and is 20 per cent or more in excess in Chota Nagpur, Baluchistan, Rajputana West, Central India and the Central Provinces West. In the remaining divisions the rainfall of the period differs from the normal by less than 20 per cent.

Offg. Director General of Observatories.

R. A. MANT,

Secretary to the Government of India.

SIMLA ;
The 6th November 1919.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
1st November 1919.

Burma.—In Lower Burma light showers fell in a few districts and in the dry zone good rain was received in three districts. Elsewhere the rainfall was light. In Lower Burma agricultural operations for the cultivation of winter rice have been completed. Cultivation of dry crops continues in Upper Burma. Gathering of groundnuts and plucking of cotton are progressing. Standing crops are generally in good condition except in a few districts of both Lower and Upper Burma. Live stock is generally healthy. The price of unhusked rice at Rangoon remained unchanged at Rs. 150 and that of white rice (specials) at Rs. 385. These prices are the same as control prices and are much above normal.

Assam.—During the week the weather was seasonable. Ploughing for mustard, sowing of pulses, and plucking of tea are in progress. Prospects of pulses are fair. Rice, sugarcane and other crops are in fair to good condition. Cattle disease is reported from two districts. The price of common rice continues to fall.

Bengal.—The rainfall during the week was generally light excepting in northern Bengal where there was no rain. More rain is needed for winter paddy, especially in certain western districts. Ploughing for and sowing of spring crops continue. Harvesting of early winter paddy is proceeding. Prospects of standing crops are generally satisfactory. The average price of common rice has fallen by about 3·12 per cent. One thousand nine hundred and fifty persons received gratuitous relief in the Bahmanbaria Subdivision of Tippera.

Report on famine in Bankura was not received.

Bihar and Orissa.—Light rain fell in Singhbhum and in parts of Shahabad, Balasore, Angul, Hazaribagh and Ranchi. There was no rain in the rest of the Provinces. Sowing for spring crops is in progress. Harvesting of early winter paddy continues in Orissa and Chota Nagpur. Standing crops are doing well. More rain is wanted in parts of Saran, Darbhanga, Furna, Balasore and Singhbhum. Gratuitous relief was given to 18,782 persons in Bhagalpur, 3,912 in the Santal Parganas, 8,111 in Angul, 4,575 in Cuttack, 7,917 in Puri and 567 in Hazaribagh. The number of persons attending relief works was 508 in Bhagalpur and 372 in the Santal Parganas. The price of common rice has risen in six districts, fallen in seven and remained stationary in the remaining districts as compared with that of the preceding week. The average price of local common rice at headquarters was 5·83 seers a rupee against 5·42 in the preceding week and that of maize 7·70 seers against 7·97 seers of the preceding week. Cattle disease is reported from twelve districts. During the week ending the 25th October, 13,256 persons were given gratuitous relief and 4,451 attended test works in nine Feudatory States of Orissa—viz.:—Athgarh, Baramba, Dhukanal, Hindol, Narsinghpur, Nayagarh, Banira, Dasapalla and Khandpara.

*The weekly report on famine is as follows :—*Famine tracts unchanged. In Angul including undeclared area the number of persons gratuitously relieved was 8,111. In Bhagalpur *sadar* relief workers were 277 and persons gratuitously relieved by poor houses, orphanages, village doles and kitchens 4,533, total under relief 4,810. In Banka relief workers were 229 and persons gratuitously relieved by poor houses, kitchens and village doles 14,039, total under relief 14,269. In Deghar relief workers were 372 and persons gratuitously relieved by village doles 4,895, total under relief 4,267. Grand total under relief 29,427. The price of rice is as reported before. Relief operations are being gradually closed everywhere.

United Provinces.—No rain fell during the week. Preparation of land for spring crops and popy, sowing of spring crops, harvesting of autumn crops, irrigation of late rice and picking of cotton continue. The condition of standing crops is good. Prospects are favourable. The condition of agricultural stock is generally good. Fodder, water and market supplies are sufficient. Prices are generally stationary.

Punjab.—During the week the weather remained dry. Rain is urgently wanted everywhere for standing crops which are suffering from drought, specially on unirrigated areas, and for spring sowings. The condition of standing irrigated crops is average to good and of unirrigated crops below average to average. Picking of cotton and harvesting of other autumn crops are in progress. The yield is normal to good on irrigated and below normal to normal on unirrigated areas. Spring crops are being sown. The area sown is

below normal to normal. Cattle are healthy and fodder and water are generally sufficient. Prices have risen slightly in some districts and are stationary in others. They are generally above scarcity rates. Prices of wheat:—Rawalpindi 6, Lyallpur 6½, Ambala and Ferozepore 6½ and Lahore 7 seers per rupee.

North-West Frontier Province.—The week was rainless. Sowing of spring and harvesting of certain autumn crops are in progress. The outturn of cotton is below average in Peshawar. Standing crops are generally average but prospects of crops on unirrigated areas in one district are reported to be poor. The price of wheat in Peshawar was 7½ and in Dera Ismail Khan 6½ seers per rupee.

Jammu.—No rain fell during the week. Prices are stationary. Fodder is sufficient.

Kashmir.—The week was generally dry and cold. Fodder is sufficient. Cattle disease in Gurez is subsiding and cholera in Handwara has disappeared. Prices are fluctuating.

Rajputana.—The weather is clear and getting cooler. Harvesting of autumn crops is nearing completion. Sowings for spring crops continue. Standing crops are in fair to good condition and their probable outturn is fair to good. Pasturage and water are sufficient. The condition of agricultural stock is generally good. Prices are steady. Autumn grains show a tendency to fall.

Central India.—Rainfall nil. Harvesting of autumn crops and ploughing for and sowing of spring crops are in progress. Standing crops and their probable outturn are fair to good except in Bhilsa where they are bad. Agricultural stock is generally in good condition except for cattle disease in parts of Gwalior, Indore, Baghelkhand, Malwa and the Southern States. Prices are high.

The weekly report on famine in Bundelkhand is as follows:—Distress not acute. Numbers on relief are decreasing. People are reverting to agricultural operations. There is no wandering or emaciation. Relief measures are adequate. Suspensions of land revenue are being granted and takavi advances are sufficient. The public health is generally good. Prices 5½ to 7½ seers per rupee. Numbers on relief in thousands:—works 3.4, gratuitous relief 5.5, total 8.9.

Central Provinces.—The weather has been generally clear and cool. Reaping of autumn crops and picking of cotton are in progress. Sowings for spring crops continue under favourable conditions and germination of crops already sown is successful. Fodder and water are sufficient. Cattle are generally healthy. Gram in Hoshangabad, rice in Chanda and *juar* in Amraoti rose by one seer per rupee. *Juar* sells cheaper by 1½ seers in Chanda. Elsewhere prices remained steady or varied slightly.

Feudatory States:—Harvesting of autumn crops and sowing of spring crops continue.

The weekly report on scarcity is as follows:—Numbers on works in scarcity districts were 3,148 and on gratuitous relief 3,449. Relief operations have been closed from the end of October. No further telegrams will be submitted.

Bombay.—Slight rain fell during the week in parts of the Konkan, the Deccan, the Karnatak and Kolhapur. Standing crops are in good condition except in parts of Bijapur where seedlings have been damaged slightly by insects. Harvesting of autumn crops and sowings for spring crops generally continue. Cotton picking is in progress in parts of Sind and the Deccan. The supply of fodder and water is adequate. Agricultural stock is sufficient. Cattle are in good condition. Prices of food grains are still high. Relief operations have ceased in the Poona district and in the Kathiawar Agency. The number of persons on gratuitous relief during week ending 1st November was:—Ahmednagar 1,150 and Bijapur 689, total 1,839. These operations have since ceased in Ahmednagar.

Hyderabad.—Report not received.

Mysore.—During the week the rainfall was light to fair. Standing crops are in fair condition. Cattle are generally healthy. Water and fodder are available. Prices are high but are generally falling. Prospects of the season are fair. Harvesting of rice and *ragi* is proceeding with outturn fair.

Coorg.—Report not received.

Madras.—The rainfall during the week was heavy in Madras, Tanjore, Ramnad, Tinnevely, Malabar and Cochin, good in Chingleput, South Arcot, North Arcot, Salem,

Coimbatore, Trichinopoly, Fudukottai, South Kanara, Travancore and the hills, fair in Ganjam, Guntur, Nellore and Chittoor and light or *nil* elsewhere. Standing crops are in fair condition generally but *ragi* in parts of one taluka in Chittoor is withering. The outturn of harvested paddy and dry crops is generally fair. Fresh sowings of paddy and dry crops are progressing. The condition of cattle is generally good. Water is sufficient except in parts of twelve districts. Pasture and fodder are sufficient generally. Prices continue falling. Prospects are fair generally.

*The weekly report on famine in Ganjam is as follows:—*Relief works 30 in Goomsur, 4 in Udayagiri, 25 in Kallikota and Attagada, 3 in Humma, Biridi and Palur and 1 in Ronabha are in progress. Labourers and small agriculturists are mostly affected. People are resorting freely to works. Their physical condition is generally fair. Relief measures are adequate. Cloth distribution is being provided by private charity. Prices of rice in Goomsur 4.84, in Udayagiri 7.00, in Kallikota and Attagada 5.00 and in Chatrapur 4.80 seers per rupee and of *ragi* in Kallikota and Attagada 6.57 and in Chatrapur 7.60 seers per rupee. Numbers on relief works 59,100 and on gratuitous relief 85,804, total 1,44,904.

R. A. MANT,

Secretary to the Government of India.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, NOVEMBER 8, 1919.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller-General, etc.

GAZETTE OF INDIA.

NOTICE.

The 8th November 1919.

On and after 15th November and until further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published in Delhi, Parts II and III will continue to be published in Calcutta. All notifications and other matter intended for publication in those Parts should be addressed to the Publisher at Delhi and Calcutta, respectively.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette* and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India."

PATENTS and DESIGNS.

Calcutta, the 8th November 1919.

APPLICATIONS FOR PATENTS UNDER SECTION 3.

October 27.

4965. Texas Company. *Improvements in or relating to the cracking of hydro-carbon oils.*

October 28.

4966. International General Electric Co. Inc. *Improvements in or relating to high frequency alternators.*

4967. O. Englebert. *Improved means for preventing damage to pneumatic tyres when deflated.*

4968. A. E. Trimmings. *Improvements in or relating to presses for tennis and the like rackets.*

4969. A. E. Trimmings. *Improvements in or relating to tennis and the like rackets.*

October 29.

4970. P. H. Metcalfe. *Machinery gland packing extractor.*

October 31.

4971. K. M. Satin. *Tyre protectors.*

4972. K. M. Satin. *Pneumatic hub and blocks tyre wheel.*

November 1.

4973. Das & Co. *'Mercantile' letter file.*

APPLICATIONS ACCEPTED AND ADVERTISED UNDER SECTION 6.

Notice is hereby given that all persons interested in opposing the grant of a Patent on any one of the applications, referred to below, may, at any time within three months of the date of this *Gazette of India*, give notice at the Patent Office in the prescribed form No. 5 of such opposition.

Printed copies of the specifications in the following list will be on sale at the Patent Office, 1, Council House Street, Calcutta, within about three weeks.

Any one desiring a copy posted to an address in British India should send to the Patent Office the sum of annas eight by money-order on which the number of the application should be stated on the coupon at the foot of the order.

4093. The Luokenbach Processes, Incorporated. *Improvements in or relating to contact methods of ore concentration.*

4585. Norsk Hydro-Elektrisk Kvaestofaktieselskab. *Improvements in production of reactions of gases.*

4700. C. Roy. *Improvements relating to rendering wood impermeable and recovering liquids contained therein.*

4878. J. M. Larsen. *Improved process of storing fish.*

4891. Roneo Ltd., and W. Chipperfield. *Improvements in or relating to means or devices for supporting drawers, shelves and other sliding structures.*

4892. T. Kiriaco. *Improvements in pumps or centrifugal distributors for irrigation purposes and the like.*

4893. C. R. Madgwick. *Improvements in collapsible crates and boxes.*

4898. A. R. Khan. *Undetachable double swivel hinge for axle box face plates or covers of railway vehicles and the like.*

4899. J. S. Island. *Method and apparatus for the fixation of atmospheric nitrogen.*

4900. J. H. Everingham. *Improvements in or relating to portable carriages for children.*

4907. A. Somasundaram. *Compact steam cooker.*

4908. J. E. Calverley and W. E. Highfield. *Improvements in or relating to apparatus for transforming electrical energy.*

4914. J. Jackson. *Improvements in windmills.*

PRINTED SPECIFICATIONS PUBLISHED.

Printed copies of the undernoted specifications may be purchased at the Patent Office, 1, Council House Street, Calcutta, annas eight each.

3936. G. Smith *Improvements in furniture for troopships.*
 4368. C. Ellis. *A catalyzer and process of making the same.*
 4474. Electro-Agricultur Aktiobolaget. *Improvements in cables for electrical machines adapted to be coiled and uncoiled.*
 4525. A. P. Morris. *Process for the use of paddy husk in the manufacture of glass.*
 4733. Efficient Gas Power Co., Ltd. *Improvements in and relating to suction gas generators.*
 4742. British Westinghouse Electric and Manufacturing Co., Ltd. *Improvements in fluid pressure turbines*
 4755. Marconi's Wireless Telegraph Co., Ltd. *Improvements in receivers for wireless telegraphy.*
 4775. E. S. Luard and V. P. Rawlings. *Improvements in and relating to couplings for flexible pipes.*
 4776. A. E. Ford. *Improvements in and connected with collapsible or folding boats.*
 4781. International de Lavaud Manufacturing Corporation, Ltd. *Improvements in process and apparatus for the manufacture of metal articles by rotary or centrifugal means.*
 4782. F. O. Bynoe. *Improvements in and connected with superheaters for air vapour or gas.*
 4786. T. H. Palmer, H. V. Seale and R. V. Nevell. *Improvements in flotation separation of mineral substances.*
 4792. British Westinghouse Electric and Manufacturing Co., Ltd. *Improvements in or relating to steam turbines.*
 4794. H. E. Geer. *Improvements in or relating to steam superheaters for marine, locomotive and like boilers.*
 4796. Standard Oil Co. *Improvements in or relating to petroleum distillation for the production of low-boiling-point hydrocarbons.*
 4798. J. White, and H. H. Payne. *Improvements in or relating to guns and rifles.*
 4802. R. A. Mehta. *An improved preparation or paint for preserving wood against white ants.*
 4807. W. Stocks. *Improvements in and relating to vehicle wheels.*
 4811. S. D. Master. *Lamp chimney.*
 4815. S. M. B. P. Mendis. *Method of treating hoofs and horns of animals so as to render them easily reducible to powder suitable for use as a horticultural and agricultural manure.*
 4816. Benham & Sons, Ltd., and C. R. Allensby. *Improvements in steam heated radiators.*
 4818. E. S. P. Carrad. *Improvements in apparatus for increasing the efficiency of internal combustion engines.*
 4819. C. A. Collett and L. de Dombal. *Improvements in vacuum brake gear for railway rolling stock and the like.*
 4822. P. Poore. *Improvements relating to the distillation of wood, woody fibre, and similar carbonaceous substances.*

SEALING FEES DUE UNDER SECTION 10.

AMENDMENT ALLOWED UNDER SECTION 17.

No. 3803 of 1918. In pursuance of leave granted on 28th October 1919, the above numbered specification has been amended in the manner set forth in the *Gazette of India* dated the 19th July 1919.

CESSATION OF EXCLUSIVE PRIVILEGES.

The public are warned that entries under this heading must not be accepted as final, as under the provisions of Rules 9 and 11 of "The Indian Patents and Designs (Temporary) Rules, 1915," the Controller may extend the time prescribed by the Indian Patents and Designs Act, 1911, and by the Inventions and Designs Act, 1888, for paying the necessary renewal fees.

The Patent Office will supply on request definite information, so far as possible, as to the position of any particular Patent or Exclusive Privilege.

DESIGNS ENTERED ON THE REGISTER.

From October 27th to November 1st. 1919.

Class. 1. Nos. 8939 and 8940. Nursing Sahay Mudun Gopal, of 12 Portuguese Church Street, Calcutta. September 27, 1919.

NOTICES.**THE PATENT OFFICE, 1, COUNCIL HOUSE STREET, CALCUTTA.**

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. *All communications* relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (II of 1911), or in continuation of applications under the Inventions and Designs Act (V of 1888) must be made in English and addressed to the Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed and a full address given in all communications.

2. *Directions* for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Temporary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1915, together with current regulations and instructions. *These should be consulted before an application is made to the Controller.*

3. *Advice.* The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs

or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inventions. Models are not required unless specially asked for. Drawings must be on tracing cloth and the Rules and Instructions for the preparation of drawings as given in the Handbook should be strictly followed. A provisional patent cannot be secured under the Indian Patents and Designs Act, 1911.

4. Applicants are warned that the Indian Patents and Designs Act, 1911, is in force in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. The International Convention for the Protection of Industrial Property does not include India. For information regarding patents in countries other than India application should be made to the patent offices in the countries concerned.

5. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission for which due allowance should be made. In cases where it is not possible to have the fees handed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

6. *Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. There is no provision of Law in British India for their registration. Neither does this Act deal with *pictures, photographs, etc.*, for which copyright is obtainable under the Indian Copyright Act, 1914.

7. *Printed Specifications* of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*. These specifications can be purchased at the Patent Office at a uniform price of 8 annas per copy; and may be seen free of charge, together with other publications of the Patent Office, at the following places:—

AHMEDABAD . . .	R. C. Technical Institute.	HYDERABAD . . .	Revenue Department of His Highness the Nizam's Government.

 CINCHONA FEBRIFUGE, RESIDUAL ALKALOID
 AND QUINOIDINE.**

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona Alkaloids. QUININE can be purchased by Government officers, District and Local Boards for Hospitals and Dispensaries in the Provinces of Bengal, Bihar, Punjab and Assam on indents duly countersigned by the Civil Surgeon of their Districts. It can also be purchased by Missionaries for *bond fide* public purposes. It is never sold to private persons or firms. CINCHONA FEBRIFUGE both in powder and $3\frac{1}{2}$ grain tablet forms and CINCHONIDINE can be purchased by Government officers and the general public. It is also sold by the Principal Druggists in Calcutta. QUINOIDINE or *Pure Amorphous Alkaloid* and *Residual Alkaloid* or *Amorphous Cinchona Alkaloid*, which contains about 40 per cent. of *Pure Amorphous Alkaloid*, are for sale to Missionaries and Government Institutions only. *These drugs are sold strictly cash and in advance but private purchasers may use the V. P. P. system*, and are obtainable from the SUPERINTENDENT, JUVENILE JAIL, ALIPORE.

The rates for these drugs from 16th May 1919 are as follows:—

SULPHATE OF QUININE.

For quantities 60 lbs. and above in one delivery	Rs. 24 per lb.
For quantities of not less than 6 lbs. but below 60 lbs. in one delivery	" 25 "
For any quantity less than 6 lbs.	" 26 "

SULPHATE OF CINCHONIDINE.

For quantities of not less than 6 lbs. in one delivery	Rs. 11 per lb.
For any quantity less than 6 lbs.	" 12 "
(Only small quantities available when in stock.)	

CINCHONA FEBRIFUGE.

For quantities of not less than 6 lbs. in one delivery	Rs. 5 per lb.
For quantities less than 6 lbs. (when in stock)	" 6 "

CINCHONA FEBRIFUGE TABLETS.

For quantities of not less than 6 lbs. in one delivery	Rs. 6 per lb.
For any quantity less than 6 lbs. (when in stock)	" 7 "

QUINOIDINE in non Tablet form (when in stock) and Residual Alkaloids.

QUINOIDINE TABLETS.

For quantities of not less than 6 lbs. in one delivery	Rs. 6 per lb.
For quantities less than 6 lbs. in one delivery (when in stock)	" 7 "

Quinine is available in 1-oz., $\frac{1}{2}$ -lb., $\frac{1}{4}$ -lb., 1-lb., 4-lb., and 6 $\frac{1}{2}$ -lb. tins.

Cinchonidine is available in $\frac{1}{2}$ -lb., $\frac{1}{4}$ -lb. and 1-lb. boxes.

Cinchona Febrifuge is available in $\frac{1}{2}$ -lb., $\frac{1}{4}$ -lb. and 1-lb. boxes.

Residual Alkaloid is available in 1-lb., 5-lb. and 10-lb. boxes.

Principal, Thomason College, Roorkee.

**DEPARTMENT OF MINES IN INDIA, DHANBAD P. O.,
MANBHUM.****Indian Mines Act, 1901.****NOTICE.**

An examination for First Class Coal Mine Managers' Certificates of Competency under the rules applicable to coal mines will be held on the 16th, 17th and 18th February 1920. An examination for Second Class Coal Mine Managers' Certificates of Competency will be held on the 23rd, 24th and 25th February 1920. Both examinations will be held at the Railway Institute, Dhanbad.

Rules 32 and 33 of the Indian Mines Act, 1901, require that a candidate for a first class certificate must be at least 23 years of age and have had at least five years' practical experience in a coal mine, and for a second class certificate be at least 21 years of age and have had at least three years' practical experience in a coal mine. The periods of practical experience may be reduced to three years and one year respectively, in the case of a candidate who has received a diploma in scientific and mining subjects after a course of study of at least two years at an educational institution approved in this behalf by the Governor-General in Council, or who has taken a degree in scientific and mining subjects at a University approved in this behalf by the Governor-General in Council.

The fees are Rs. 15 in the case of first class certificates and Rs. 8 in the case of second class certificates. By rule 34 of Government of India, Department of Commerce and Industry, Notification No. 2968—82, dated the 21st April 1906, "these fees shall be paid, not less than one month prior to the date of the examination, to the Chief Inspector of Mines at his office." The fees may be remitted by money order or paid in any other manner.

Applications and fees should be addressed to the Chief Inspector of Mines in India, Dhanbad P.O., E. I. Railway, and not to any Officer by name. No candidate will be permitted to sit at the examination unless his application, supported by original certificates as to experience and character, and fee, is received, in the case of a candidate for the first class certificate examination on or before the 15th January 1920, and, in the case of a candidate for the second class certificate examination on or before the 22nd January 1920. Candidates are advised to send all papers under registered cover.

G. F. ADAMS,

Chief Inspector of Mines in India,
and *ex-officio* President of the Board of Examiners.

DHANBAD,
The 13th October 1919.

Inspector, Burma Railways, Malagon, by whom it was never endorsed to any other person, having been lost, notice is hereby given that payment has been stopped at the Public Debt Office, Bank of Bengal, Calcutta, and that application is about to be made for the duplicate in favour of the proprietor. The Public are warned regarding dealing with the abovementioned security.

I. L. GARLICK, Loco Inspector,
Burma Railway, Malagon, Rangoon, Burma.

SUPPLEMENT TO
The Gazette of India.

No. 45. } CALCUTTA, SATURDAY, NOVEMBER 8, 1919.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time containing such official papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of Rupees five per annum if delivered in Calcutta, or Rupees eight if sent by post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

FOREIGN SEA-BORNE TRADE DURING SEPTEMBER, 1919.

REVIEW of the SEA-BORNE TRADE of BRITISH INDIA for the month of September, 1919, and for the six months ended September, 1919.

FOREIGN COMMERCE.

SEPTEMBER AND THE SIX MONTHS ENDED SEPTEMBER, 1919.

A new high record for exports.

Large imports of piecegoods and kerosene.

Large favourable balance of trade.

The trade returns of British India for September, 1919, as compared with those of its immediate predecessor, showed increases in the import, export, and re-export trade. The total imports of merchandise in September, 1919, were valued at R16,80 lakhs as against R16,15 lakhs in the preceding month, and the value of the exports, which surpassed all previous monthly records, was R29,80 lakhs as against R25,61 lakhs and of the re-exports R1,17 lakhs as against R1,09 lakhs. Imports increased by 4 per cent, exports by 16 per cent, and re-exports by 7 per cent. As compared with September, 1918, imports and exports showed increases of 17 per cent and 64 per cent respectively, but re-exports decreased by 7 per cent. A review of the trade of the six months ended September, 1919, will be found on page 7.

The most interesting features of the month, as compared with the corresponding month of the previous year, were (1) a large decrease in the exports of rice, wheat, barley, gram, tea, castor seed, raw wool, and gunny bags, (2) a considerable increase in the shipments of raw and tanned hides and skins, lac, raw cotton, raw jute, cotton seed, groundnuts, linseed, gunny cloth, and cotton twist and yarn, (3) a large increase in the imports of wheat, kerosene oil, and cotton piecegoods (grey), and (4) a large decrease in the imports of cotton yarns and coloured piecegoods.

The quantity of wheat shipped in September, 1919, was only 770 tons as against 47,217 tons in September, 1918. The shipments were made mainly to Persia, Bahrein Islands, and Hongkong. Shipments of rice not in the husk decreased to 36,108 tons from 183,387 tons in September, 1918. The imports of kerosene oil increased to nearly 15 million gallons from only 1 million gallons in September, 1918.

The following statement shows the monthly imports and exports of merchandise during April to September, 1919, as compared with the corresponding months of the preceding year :—

	IMPORTS				EXPORTS, INCLUDING RE-EXPORTS			
	1919	1918	Increase (+) or decrease (-) in 1919 as compared with 1918.	Per cent	1919	1918	Increase (+) or decrease (-) in 1919 as compared with 1918	Per cent

April	14,38	13,72	+ 66	+ 5	22,58	18,21	+ 4,37	+ 24
May	13,80	10,02	+ 3,78	+ 38	21,52	21,78	—26	—1
June	11,83	14,45	—2,62	—18	20,48	20,34	+ 14	+ 1
July	14,94	17,54	—2,60	—15	27,89	20,35	+ 7,54	+ 37
August	16,15	12,41	+ 3,74	+ 30	26,70	25,00	+ 1,70	+ 7
September	16,80	14,36	+ 2,44	+ 17	30,97	19,87	+ 11,10	+ 56
TOTAL (6 months)	87,90	82,50	+ 5,40	+ 7	150,04	125,05	+ 24,99	+ 20

The chart showing the course of monthly imports and exports, including re-exports, from April, 1918, to September 1919, as compared with the pre-war average, is appended below :—

MONTHLY IMPORTS AND EXPORTS (INCLUDING RE-EXPORTS) FROM APRIL, 1918, TO SEPTEMBER, 1919, AS COMPARED WITH THE PRE-WAR AVERAGE (1911-12 TO 1913-14).

(Private merchandise only.)

NOTE.—The numerical figure at the end of each vertical line represents the month beginning from January.

The actual net excess of exports, including re-exports, over imports was R14,17 lakhs in September, as against R10,55 lakhs in August, 1919. The statement below shows the figures of imports and exports, including re-exports, during August and September of the years 1917, 1918, and 1919, and the actual net excess of exports over imports during the same periods :—

	1917		1918		1919		Actual net excess of exports over imports		
	Imports	Exports, including re-exports	Imports	Exports, including re-exports	Imports	Exports, including re-exports	1917	1918	1919
	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)
August . . .	14,51	19,13	12,41	25,00	16,15	26,70	4,82	12,59	10,55
September . . .	12,91	18,89	14,36	19,37	16,80	30,97	5,78	5,01	14,17

Comparisons with August, 1919.—As compared with August, 1919, the most noticeable changes * were :—

Under imports : *increases* under spices—cloves (+R10 lakhs), kerosene oil (+R95 lakhs), raw cotton (+R10 lakhs), cotton piecegoods, grey (+R77 lakhs), and white and coloured piecegoods (+R20 lakhs each), but *decreases* under sugar 16 D. S. and above (—R12 lakhs), other mineral oils (—R10 lakhs), raw silk (—R30 lakhs), railway carriages (—R21 lakhs), and silk piecegoods (—R11 lakhs).

Under exports : *increases* under raw hides (+R23 lakhs), lac (+R34 lakhs), raw skins (+R84 lakhs), coconut oils (+R22 lakhs), copra seed (+R12 lakhs), groundnuts (+R28 lakhs), raw jute (+R1,14 lakhs), raw cotton (+R1,79 lakhs), jute, gunny cloth (+R53 lakhs), and cotton twist and yarn (+R11 lakhs), but *decreases* under raw wool and oilcakes (—R17 lakhs each), linseed (—R1,19 lakhs), and teakwood (—R10 lakhs).

* The articles of which the fluctuations were less than R10 lakhs are not specially noticed.

Comparisons with September, 1918.—As compared with September, 1918, the most noticeable changes * were :—

Under imports: *increases* under wheat (+R20 lakhs), sugar, 16 D. S. and above (a) (+R47 lakhs), cloves (+R11 lakhs), motor cars and motor cycles (+R21 lakhs), iron or steel, sheets and plates (+R19 lakhs), kerosene oil (+R94 lakhs), railway materials for construction (+R11 lakhs), jute mill machinery (+R12 lakhs), raw cotton (+R14 lakhs), cotton piecegoods, grey (+R50 lakhs), and silk piecegoods (+R29 lakhs), but *decreases* under tea (—R11 lakhs), bars and channel (steel) (—R15 lakhs), paper (—R12 lakhs), cotton yarn (—R49 lakhs), and cotton piecegoods, coloured (—R55 lakhs).

Under exports: *increases* under lac (+R97 lakhs), raw hides (+R87 lakhs), coconut oils (+R15 lakhs), raw skins (+R1,86 lakhs), cotton seed (+R56 lakhs), groundnuts (+R62 lakhs), linseed (+R75 lakhs), rape seed (a) (+R11 lakhs), sesamum (+R19 lakhs), raw cotton (+R3,80 lakhs), raw jute (+R1,94 lakhs), hides, tanned (+R66 lakhs), skins, tanned (+R52 lakhs), cotton twist and yarn (+R1,52 lakhs), hemp, raw (+R23 lakhs), cotton piecegoods (+R15 lakhs), wheat flour (+R13 lakhs), copra (+R17 lakhs), and jute gunny cloth (+R58 lakhs), but *decreases* under barley (—R27 lakhs), gram (—R41 lakhs), rice (—R1,61 lakhs), wheat (—R72 lakhs), tea, black (—R68 lakhs), castor seed (—R26 lakhs), jute, gunny bags and raw wool (—R35 lakhs each).

VARIATIONS IN CLASSES.

The variations in September, 1918 and 1919, as compared with August, 1918 and 1919, respectively, according to the four main classes of merchandise, are as follows :—

	August, 1918	September, 1918	Increase (+) or decrease (—)	August, 1919	September, 1919	Increase (+) or decrease (—)

(a) Quantity decreased

COMPARISON WITH THE IMPORTS AND EXPORTS OF THE
PRECEDING MONTH (AUGUST, 1919)*

I.—Imports.

AN INCREASE IN THE IMPORTS OF WHEAT BUT A SLIGHT DECREASE IN THE
IMPORTS OF SUGAR.

The imports of Food, drink, and tobacco in September, 1919, increased by R21 lakhs, as compared with the preceding month, to R3,42 lakhs. The imports of wheat in September, 1919, increased to 10,520 tons, valued at R20 lakhs, consigned entirely from Australia. The imports of sugar, 16 D. S. and above, in September, 1919, decreased in quantity by 3 per cent to 35,393 tons and the value (R1,78 lakhs) by 6 per cent, as compared with the preceding month (August, 1919). Imports from Java decreased, while those from China and the Straits Settlements increased. In the six months ended September 1919, the imports of sugar, 16 D. S. and above, amounted to 173,630 tons, valued at R8,01 lakhs, as against 218,038 tons, valued at R6,36 lakhs, in the corresponding period of the previous year.

AN INCREASE IN THE IMPORTS OF KEROSENE OIL AND RAW COTTON AND A
DECREASE IN THE IMPORTS OF RAW SILK.

The value of the imports of Raw materials in September, 1919, increased by R51 lakhs to R1,92 lakhs. The quantity of raw cotton, imported in September, 1919, increased by 8,073 cwts as compared with the preceding month, to 13,865 cwts, while that of raw silk decreased to 168,137 lbs. from 552,117 lbs. The quantity of kerosene oil imported rose to nearly 15 million gallons from only 2 million gallons in August, 1919.

AN INCREASE IN THE IMPORTS OF COTTON YARN AND COTTON PIECEGOODS.

The value of the imports of Manufactured articles in September, 1919, decreased by only R1 lakh to R11,30 lakhs. The quantity of cotton yarn imported in September, 1919, increased by 31 per cent to 1,149,814 lbs. The imports of cotton piecegoods, including fents, in September, 1919, increased by 30 million yards to 91 million yards, and the value (R4,06 lakhs) by 41 per cent, as compared with the preceding month. Grey goods increased by 21 million yards or 60 per cent to 56 million yards, white goods by 6 million yards or 44 per cent to 21 million yards, and coloured goods by nearly 4 million yards or 40 per cent to 13 million yards. In the six months ended September, 1919, the total imports of cotton piecegoods amounted to 371 million yards, valued at R17,43 lakhs, as against 604 million yards, valued at R27,16 lakhs, in the corresponding period of the previous year.

II.—Exports.

A SLIGHT DECREASE IN THE EXPORTS OF RICE AND WHEAT.

The exports of Food, drink, and tobacco decreased in September, 1919, by R10 lakhs, as compared with the preceding month, to R2,76 lakhs. Exports of rice, not in the husk, amounted to 36,108 tons in September, 1919, as

Exports of Rice, not in the husk

	August, 1919 Tons	September, 1919 Tons
To United Kingdom	2,045	27
" Turkey, Asiatic	8,638	14
" Mauritius	7,763	1,487
" Ceylon	2,535	18,564
" Straits Settlements	3,544	9,214
Total (including other countries)	36,193	36,108

against 36,193 tons in the preceding month, and the value decreased by 12 per cent. The marginal table shows the exports to the principal countries. Exports to Ceylon and the Straits Settlements increased, while those to the United Kingdom, Turkey, Asiatic, and Mauritius decreased. In the six months ended September, 1919, the exports of rice amounted to 228,012 tons, valued at R3,49 lakhs, as against 1,253,675 tons, valued at R13,37 lakhs, in the corresponding period of the previous year. Exports of wheat decreased by 56 tons to 770 tons, valued at R1,75,000. In the six months ended September 1919, the total exports of wheat amounted to 4,297 tons, as against 445,866 tons in the corresponding period of the previous year.

* Comparison is made with the previous month, and not with the corresponding month of last year, owing to the present abnormal circumstances brought about by the war.

A DECREASE IN THE EXPORTS OF TEA.

Tea.

Shipments of tea in September, 1919, decreased by 7 per cent to 27 million lbs, as compared with those of the preceding month. The United Kingdom took 24 million lbs as against 28 million lbs in August, 1919. The total exports in the six months ended September, 1919, amounted to 142 million lbs, as against 167 million lbs in the corresponding period of 1918.

AN INCREASE IN THE EXPORTS OF RAW COTTON AND RAW JUTE BUT A LARGE DECREASE IN THE EXPORTS OF RAW WOOL.

The value of the exports of Raw materials increased by R3,71 lakhs to R16,26

Raw cotton.

<i>Exports of raw cotton</i>		August, 1919	September, 1919

„ Italy		357	1,060
Total (including other countries)		25,014	37,319

lakhs. The marginal table shows the exports of raw cotton and jute to the principal countries. The shipments of raw cotton increased in September, 1919, by 49 per cent to 37,319 tons, valued at R5,01 lakhs. Exports to Japan, and Italy increased, while those to the United Kingdom, France, and Spain decreased. In the six months ended September, 1919, the exports rose by 77 per cent to 162,012 tons, valued at R22,24 lakhs. The exports of raw jute in September, 1919, increased by 64 per cent, to 54,234 tons, valued at R2,47 lakhs. Exports to the United Kingdom, France, Spain, the United States, and Japan increased, while those to Italy decreased. In the six months ended September, 1919, the exports amounted to 200,651 tons, valued at R8,13 lakhs, as against 188,450 tons, valued at R4,52 lakhs, in the corresponding period of the previous year. The exports of raw wool in September, 1919, decreased to 1,594,992 lbs from 3,675,542 lbs in the preceding month.

decreased. In the six months ended September, 1919, the exports increased by 45 million yards, while the value thereof decreased by 18 per cent.

SIX MONTHS ENDED SEPTEMBER, 1919.

The summary of the results for the six months ended September, 1919, as compared with the corresponding period of 1913 (pre-war six months) and of 1918 is as follows :—

	April to September 1913 (Pre-war six months).	April to September 1918.	April to September 1919.	Increase (+) or decrease (—) per cent as compared with 1913.
Merchandise (private)—	R (lakhs)	R (lakhs)	R (lakhs)	
Exports, including re-exports	1,17,06	1,25,05	1,50,04	+30.
Imports	88,83	83,50	87,90	+7.
Actual net excess of exports over imports	28,23	41,55	62,14	+45.

In the six months ended September, 1919, exports, including re-exports, were higher by R24,99 lakhs or 20 per cent than in 1918, and by R32,99 lakhs or 28 per cent than in 1913. In the same period imports were higher by R5,40 lakhs or 7 per cent than in 1918, but were less by R93 lakhs or 1 per cent than in 1913. The net excess of exports over imports in these six months was R62,14 lakhs, as compared with R42,55 lakhs in 1918 and R28,22 lakhs in 1913. The total value of merchandise increased by R30 crores, or 14 per cent, to R238 crores.

TRADE IN THE SIX MONTHS ENDED SEPTEMBER, 1919.

In the six months ended September, 1919, as compared with the corresponding period of the preceding year, the quantity of imported cotton piece-goods decreased by 2,33 million yards or 38 per cent to 3,71 million yards, and the value (R17 crores) was less by 37 per cent. The value of cotton twist and yarn imported decreased by R2,74 lakhs to R1,52 lakhs, of articles imported by post by R79 lakhs, of woollen piecegoods by R48 lakhs, of salt by R47 lakhs, of raw cotton by R45 lakhs, and of chemicals by R30 lakhs. Wheat increased by R2,42 lakhs, sugar, 16 D. S. and above, by R1,66 lakhs, kerosene oil by R1,94 lakhs, lubricating oils by R34 lakhs, raw silk by R53 lakhs, motor cars and motor cycles by R1,13 lakhs, hardware by R68 lakhs, railway carriages and wagons by R86 lakhs, electrical machinery by R63 lakhs, jute mill machinery by R53 lakhs, sheets and plates (iron or steel) by R1,59 lakhs, and silk piecegoods by R90 lakhs. Under exports, the quantity of rice not in the husk decreased by 1,025,663 tons to 228,012 tons and the value by R9,88 lakhs to R3,19 lakhs, while wheat showed a decrease of 441,569 tons to 4,297 tons in quantity and of R6,12 lakhs to R10 lakhs in value. The quantity of raw cotton exported increased by 70,665 tons and the value by R6,49 lakhs. The quantity of raw jute exported showed an increase of 12,201 tons or 6 per cent. The value of coffee exported increased by R75 lakhs, of cotton twist and yarn by R5,94 lakhs and piecegoods by R1,80 lakhs, of raw hides by R3,62 lakhs, of raw skins by R6,27 lakhs, of skins, tanned, by R2,47 lakhs, of hides, tanned, by R2,40 lakhs, and of seeds by R12,70 lakhs, while the value of barley decreased by R1,99 lakhs, of gram by R2,52 lakhs, of castor seed by R1,22 lakhs, of tea, black, by R1,69 lakhs, of gunny cloth by R2,97 lakhs, and of gunny bags by R2,13 lakhs.

Comparing the values of the imports and exports during the six months ended September, 1919, with those in the corresponding period of 1918, the chief increases and decreases are as follows:—

I.—Imports.

Increases

	R (thousands)		R (thousands)
Wheat	2,42,24	Electrical machinery	62,65
Kerosene oil	1,93,93	Railway materials for construction	58,38
Sugar, 16 D. S. and above	1,65,52	Silk, raw	52,56
Iron or steel, sheets and plates	1,58,81	Jute mill machinery	52,54
Motor cars and motor cycles	1,13,05	Mineral oil, other than kerosene	42,41
Silk piecegoods	89,78	Spices—cloves	33,30
Railway carriages, etc.	85,94	Wood (timber)	31,90
Hardware	67,57		

Decreases

Cotton piece goods, coloured.	3,64,03	Wool piecegoods	47,71
" " grey	2,91,25	Salt	47,25
" " white	2,81,61	Cotton, raw	44,61
" yarn	2,73,68	Chemicals	29,81
Articles imported by post	78,74	Matches	27,27

I.—Exports.

Increases

	R (thousands)		R (thousands)
Linseed	7,18,43	Hides, tanned	2,39,61
Cotton, raw	6,49,36	Rape seed	2,07,20

TRADE BY PROVINCES.

The total imports and exports, including re-exports, of private merchandise into and from the several maritime provinces during the month of September, 1919, as compared with those of August, 1919, are stated below :—

	IMPORTS		EXPORTS, INCLUDING RE-EXPORTS	
	August, 1919	September, 1919	August, 1919	September, 1919
	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)
Bengal	6.85	7.28	12.46	13.98
Bombay	6.00	6.23	9.42	10.77
Sind	1.32	1.08	.83	1.58
Madras	.87	1.07	2.64	3.72
Burma	1.11	1.14	1.85	1.02
Total	16.15	16.80	26.70	30.67

Under imports, Bengal showed an increase of 6 per cent, Bombay of 4 per cent, Madras of 23 per cent and Burma of 3 per cent; while Sind showed a decrease of 18 per cent. Under exports, Bengal showed an increase of 12 per cent, Bombay of 14 per cent, Sind of 84 per cent, and Madras of 41 per cent, while Burma showed a decrease of 24 per cent. These comparisons are with the preceding month (August, 1919).

BALANCE OF TRADE.

India's balance of trade during the six months ended September, 1919, as compared with the corresponding period of 1918, is shown in the appended table. The table takes into account the imports and exports of merchandise, and the net imports of treasure, on private account only :—

	Six months, April to September, 1918	Six months, April to September, 1919
	R (lakhs)	R (lakhs)
Exports of Merchandise, including Re-exports *	125.05	150.04
Imports	82.50	87.90
Excess of Exports over Imports	42.55	62.14
Net imports of Gold (private)†	3	1.25
„ „ Silver (private)†	2	—6
Net Imports of Treasure (private)†	5	1.19
Net (private) Exports of Merchandise and Treasure	42.50	60.95
Council Bills and Telegraphic Transfers paid in India	28.18	19.96
Sterling Bills on London sold in India	..	20
Enfaced Rupee paper (net imports)	4	82
Interest on Enfaced Rupee paper	13	14
Net Balance of Trade in favour of India	14.15	40.73
Average rate of exchange	September, 1918 17.91	September, 1919 22.99(α)

In the six months ended September, 1919, the excess of exports over imports of private merchandise was R62.14 lakhs, as against R42.55 lakhs in the corresponding period of 1918, and the net imports of treasure on private account (excluding transactions which do not enter into the balance of trade) were R1.19 lakhs, as against R5 lakhs last year. The net exports (merchandise and treasure) were thus R60.95 lakhs, as against R42.50 lakhs in 1918. The balance of trade, so far as shown by the statistics of merchandise, treasure, Council Bills, and Enfaced Rupee paper, was R40.73 lakhs in favour of India in the six months, April to September, 1919, as compared with R14.15 lakhs in the corresponding period of 1918.

The amount of Council Bills and Telegraphic Transfers paid in India in the six months ended September, 1919, was R19.96 lakhs, all of which were paid through the Treasuries, except R9,000 which were paid through the Paper Currency Reserve, but Reverse Council Bills were sold to the extent of R20 lakhs during the period, the net imports of funds by Council Bills thus amounting to R19.76 lakhs. In the six months ended September, 1918, the amount was R28.18 lakhs, of which R21.51 lakhs were paid through the Paper Currency Reserve and R6.67 lakhs through the Treasuries. In the six months ended September, 1917, the amount of Council Bills paid was R31.27 lakhs. As regards Enfaced Rupee paper, over R2 lakhs represented the amount of paper enfaced to London and about R35 lakhs the amount re-transferred from London in the six months April to September, 1919, while in the corresponding period of 1918, about R10 lakhs represented the amount of paper enfaced to London and over R13 lakhs the amount re-transferred from London.

* Exclusive of Government transactions.

† Exclude transactions which do not enter into the balance of trade.

(α) Subject to correction.

MOVEMENTS OF GOLD AND SILVER (PRIVATE AND GOVERNMENT).

In the month of September, 1919, the imports of gold were valued at nearly R42 lakhs and the exports at R7½ lakhs, as against over R5 lakhs and nil respectively in the preceding month. Of the imports in September, 1919, R30 lakhs were in the form of bullion and nearly R12 lakhs in sovereigns, while the exports were in the form of sovereigns only.

The imports of silver during the month of report were valued at R9½ lakhs, of which over R8 lakhs were on Government account, as against over R1.43 lakhs on both private and Government account in August, 1919. The exports of silver in September, 1919, were valued at over R4 lakhs, of which nearly R1 lakh was on Government account, as against R19½ lakhs, both on private and Government account, in the preceding month.

DECLARED VALUE PER UNIT OF SELECTED ARTICLES.

The declared values per unit of certain selected articles imported and exported during September, 1913, 1918, and 1919, are noted below :—

Imports	SEPTEMBER									Exports	SEPTEMBER

										" gunny bags	0	5	6	0	5	1	0	9	7
										" gunny cloth	0	2	4	0	5	6	0	4	3

As compared with the corresponding month of the previous year (September, 1918), under imports, the declared unit value of cotton piecegoods, coloured, rose in September, 1919, by 5 per cent, of cotton twist and yarn by 28 per cent, of sugar by 73 per cent, while that of coal decreased by 20 per cent and grey piecegoods by 17 per cent, and white by 20 per cent. Under exports, raw jute showed an increase of 62 per cent, coffee of 38 per cent, rice of 27 per cent, coal of 12 per cent, tea of 6 per cent, indigo of 5 per cent, and wheat of 45 per cent, while manganese ore showed a decrease of 11 per cent, jute, gunny cloth of 23 per cent and cotton, raw of 31 per cent.

CUSTOMS REVENUE.*

The following table shows the gross Indian sea customs revenue (excluding salt revenue) collected on principal articles in September, 1919, as compared with August, 1919, and September, 1918 and 1913 :—

IMPORT DUTY	September, 1913 (pre-war month)	September, 1918	August, 1919	September, 1919	Increase (+) or decrease (—) in September, 1919, as compared with

* The Indian Trade (Amendment) Act, IV of 1916, took effect from 1st March, 1916.

† Subject to duty from 11th September, 1919.

(a) Includes the ½ per cent duty on explosives.

(b) Includes the ½ per cent duty on petroleum.

(c) Duty collected during the period from the 11th to 30th September, 1919.

The customs duty figures are an index to the volume of the import trade only, since under exports hides and skins (raw), jute, rice, and tea only are now subject to duty. In the six months ended September, 1919, the import duties increased to about R6,25 lakhs from nearly R6,24 lakhs in the same period of 1918, while the export duties fell to R1,68 lakhs from nearly R1,90 lakhs. The grand total of gross Indian sea and land customs revenue (excluding salt revenue) in the six months, April to September, 1919, amounted to about R8,86½ lakhs, as compared with nearly R9,06½ lakhs in the corresponding period of last year.

SHIPPING.

The following table shows the number and tonnage (net register tonnage) of vessels which entered and cleared with cargoes at ports in British India during September, 1919, as compared with August, 1919, and September, 1918 and 1913 :—

Entered with cargoes.

	STEAMERS.		SAILING VESSELS.		TOTAL.	
	No.	Tons.	No.	Tons.	No.	Tons.
September, 1919	170	428,566	47	4,451	217	428,017
August, 1919	163	394,141	37	3,397	202	397,538
September, 1918	188	331,071	67	6,523	255	337,594
September, 1913 (pre-war month)	193	534,152	41	3,136	234	537,288

Cleared with cargoes.

September, 1919	216	527,707	97	12,635	313	540,342
August, 1919	189	456,725	34	2,754	223	459,479
September, 1918	225	395,580	156	17,355	381	412,935
September, 1913 (pre-war month)	212	601,602	74	5,571	286	607,173

The total tonnage entered and cleared with cargoes in September, 1919, as compared with that in the preceding month (August, 1919) and in the corresponding month of 1913 and 1918, is shown in the last column of the table above. In the month of September, 1919, there were 217 arrivals* and 313 sailings† with cargoes in and from India. As regards tonnage, if a comparison be made with September, 1913, the corresponding pre-war month, it will be seen that there was a decrease in the tonnage of vessels cleared with cargoes of 66,831 tons or 11 per cent. The decrease in the entries (with cargoes) amounted to 109,271 tons or 20 per cent.

The shipping clearances with cargoes in the foreign trade from the ports of British India in the six months, April to September, 1919, as compared with the corresponding period of 1913, i.e., before the war broke out, were as follows :—

	TONNAGE (NET REGISTER TONNAGE) CLEARANCES IN THE SIX MONTHS, APRIL TO SEPTEMBER	
	1913 (Pre-war period)	1919
British ships (including British Indian)	3,227,915	2,214,769
Foreign ships	890,443	429,184
TOTAL	4,118,358	2,643,953

In 1919, as against 1913, the total tonnage clearances with cargoes declined 36 per cent. In 1913 the British (including British Indian) tonnage was 78 per cent and foreign tonnage 22 per cent of the total, while in 1919 the British (including British Indian) tonnage was 84 per cent and foreign tonnage 16 per cent.

* The details were as follows :—Bengal 38, Bombay 58, Sind 21, Madras 83, and Burma 17.

† The details were as follows :—Bengal 55, Bombay 72, Sind 32, Madras 83, and Burma 21.

RAILWAY STATISTICS.

Railway statistics, like the import and export statistics above, are a valuable index to the general movement of trade throughout the country, and show that the earnings from 1st April to 30th September, 1919, were R42,71 lakhs, as against R43,43 lakhs in the corresponding period of 1918, or a decrease of R72 lakhs.

TRADE OF ADEN IN SEPTEMBER, 1919.

The grand total value of the imports and exports of merchandise, by sea, into and from the port of Aden amounted to R1,29 lakhs in the month of September and R8,92 lakhs in the six months ended September, 1919. The value of the principal articles of import and export was as follows:—

	SEPTEMBER, 1919		SIX MONTHS, APRIL TO SEPTEMBER, 1919	
	Imports into Aden	Exports from Aden	Imports into Aden	Exports from Aden
	R (thousands)	R (thousands)	R (thousands)	R (thousands)
Cotton manufactures	11,85	13,43	1,47,90	1,54,66
Hides and skins, raw	23,89	21,63	91,59	1,43,96
Grain and pulse	5,66	3,48	33,13	17,61
Coffee	4,01	5,27	28,23	41,15
Coal	8,81	—	40,93	—
Tobacco, unmanufactured	1,74	1,54	12,66	14,74
Provisions	41	21	4,05	84
Sugar	1,91	—	9,08	—
Spices	1,77	—	6,90	—
Salt	—	2,06	—	6,90
Kerosene oil	3,53	—	8,33	—
Other articles	8,96	8,77	68,16	61,67
TOTAL VALUE	72,54	56,39	4,50,96	4,41,53

SHIPPING AT THE PORT OF ADEN IN SEPTEMBER, 1919.

In September, 1919, 90 steamers with an aggregate tonnage of 218,477 entered at the port of Aden, while 85 steamers with 207,841 tons cleared from the port, and 41 sailing vessels (country craft) with 1,631 tons entered and 37 vessels with 1,266 tons cleared. These figures exclude Government vessels and vessels in ballast.

SUMMARY.

The paralysis of War is disappearing. A new high record for exports in any one month was reached. Imports of two important necessities—piece-goods and kerosene—increased by Rs. 1,18 lakhs and Rs. 95 lakhs respectively. There was too a large favourable balance of trade.

The 11th November 1919.

No. 2759-G.—Whereas jurisdiction to make an order for the detention of any of their subjects who are, or who may hereafter become, lunatics has been transferred to the Governor-General in Council by the Durbars of the States named in the accompanying schedule.

Now, therefore, the Governor-General in Council, in exercise of the powers conferred by the Indian (Foreign Jurisdiction) Order in Council, 1902, and of all other powers enabling him in this behalf, is pleased to prescribe the following procedure for observance by Political Officers in connection with the making of orders and warrants for the detention of lunatics from the said States in asylums in British India.

1. In the case of a criminal lunatic, in respect of whom an order or warrant for detention in an asylum has been made or issued by a court established under the authority of the Durbar of any of the said States, the Political Officer may, on application by such Durbar, endorse such order or warrant of execution in an asylum in British India.

2. In the case of any other lunatic, in respect of whom an application to that effect has been made by any such Durbar, the Political Officer may make an order for the detention of such lunatic in an asylum in British India.

The notification by the Government of India in the Foreign Department, No. 1524-I.A., dated the 28th April 1905, is hereby cancelled.

SCHEDULE.

Name of State.	Designation of Political Officer.

ACCOUNTS AND FINANCE.

MINT.

Delhi, the 18th November 1919.

No. 2918-F.—In pursuance of sub-section 2 of section 3 of the Gold (Import) Act, 1917, the Governor General in Council is pleased to prescribe the following rates at which payment shall be made for gold taken possession of under the provisions of the said Act :—

Class of gold.	Rate.
(1) Gold coins coined at His Majesty's Royal Mint in England or at any mint established in pursuance of a Proclamation of His Majesty as a branch of His Majesty's Royal Mint.	Rs. 11-18-0 per sovereign.
Provided that such coins have not been called in by any Proclamation made in pursuance of the Coinage Act, 1870, or have not lost weight so as to be of less weight than that for the time being prescribed for like coins by or under the said statute as the least current weight.	
(2) All other gold not included in entry No. 1	Rs. 1 for every 9.57 grains troy of fine gold.

2. The notification by the Government of India in the Finance Department, No. 2728-F., dated the 18th October 1919, is hereby cancelled.

(Note 1.—Gold shipped to India on a through bill of lading before the 14th November 1919 will be paid for at the rates hitherto in force.)

Note 2.—When firms or institutions have arranged to import gold into India and wish to avoid risks from possible variations in the acquisition rate before it is delivered to the Government of India, the Controller of Currency or, in the case of gold delivered at Bombay, the Accountant General, Bombay, will be prepared to contract on behalf of the Government of India to pay for the gold on delivery at the acquisition rate prevailing at the time the gold was purchased for shipment. Firms or institutions wishing to take advantage of this arrangement must declare the fact and date of purchase to the above officers without delay and as soon as they have received intimation thereof. The officer making the contract will take such undertaking as he thinks fit from the firm or institution to ship and deliver gold with all possible expedition for payment at the rate stated.

The India Office is prepared to make a similar arrangement with firms and institutions who find it more convenient to submit in London evidence of their having engaged gold for shipment to India.)

LEAVE AND APPOINTMENTS.

No. 965 1st Class Sub-Assistant Surgeon Muhammad Hussain, Indian Medical Department.

No. 1088 1st Class Sub-Assistant Surgeon Sewa Singh, Indian Medical Department.

No. 297 1st Class Sub-Assistant Surgeon Shaikh Ahmad, Indian Medical Department.

No. 462 3rd Class Sub-Assistant Surgeon Hanamant Dattatraya Bedekar, Indian Medical Department.

No. 3291.—The following rewards have been granted to the undermentioned for acts of gallantry or devotion to duty in the field while serving with the Waziristan Force :—

Awarded the Indian Order of Merit (2nd Class).

Ressaidar Bharat Singh, 27th Light Cavalry.

For conspicuous gallantry on the 19th September 1919. When a British officer's horse was shot and fell, pinning the officer down, Ressaidar Bharat Singh dismounted, and with great difficulty extricated the officer. His own horse was hit three times and broke away. Later, when the same British officer was hit, this Indian officer remained with him until he died, although they were under heavy fire from the enemy at 150 yards' range.

Awarded the Indian Distinguished Service Medal.

No. 1746 Lance Dafadar Chhotu Singh, 27th Light Cavalry.

No. 1120 Acting Lance Dafadar Idan Singh, 27th Light Cavalry.

No. 3292.—The Governor General in Council is pleased to sanction the grant of the Meritorious Service Medal (without annuity) to the undermentioned non-commissioned officer for gallant conduct otherwise than in action :—

No. 1727 Havildar Arjan Singh, 2nd Battalion, 34th Sikh Pioneers.

LONDON GAZETTE.

Second Supplement, dated the 4th October, 1919, to the London Gazette of the 3rd October, 1919, pages 12213, 12214, 12215, 12216, 12219, 12221, 12225, 12228, 12230, 12236, 12241, 12244, 12245, 12255, 12265, 12266, 12272, 12271, 12275, 12276, 12283, 12291, 12293, 12295, 12296, 12301, 12304, 12305, 12306, 12308, 12309, 12310, 12311, 12313, 12315, 12316, 12317, 12318, 12322, 12323, 12331, 12332, 12325, 12338, 12339, 12341, 12343 and 12344.

War Office,
4th October, 1919.

With reference to the Awards conferred as announced in the London Gazette, dated 8th March, 1919, the following are the statements of services for which the decorations were conferred :—

* * * *

AWARDED A SECOND BAR TO THE DISTINGUISHED SERVICE ORDER.

* * * *

Maj. Walter John Lambert, D.S.O., 29th Lrs., I. A., attd. Mysore Imp. Serv. Lrs.

(Egypt.)

On the 23rd Sept., 1918, during the attack on Haifa, Major Lambert commanded the advanced guard of the 15th Imperial Service Cavalry Brigade. He pushed forward and occupied all tactical points close to the enemy's position and led the Mysore Lancers in the attack with great gallantry.

(D.S.O. gazetted 1st January, 1917.)

(1st Bar gazetted 2nd December, 1918.)

Maj. Arthur Mordaunt Mills, D.S.O., 18th Lrs., I. A.

(Egypt.)

On the night of the 21st-22nd September, 1918, during the attack on Nazareth, he organised and led a counter-attack, which he carried through with twenty-nine Indian other ranks in the face of rifle and machine gun fire against 300 of the enemy. This counter-attack was completely successful, several of the enemy being killed and 100 prisoners captured. He did fine work.

(D.S.O. gazetted 1st January, 1917.)

(1st Bar gazetted 4th February, 1918.)

* * * *

AWARDED A FIRST BAR TO THE DISTINGUISHED SERVICE ORDER.

* * * *

Lt.-Col. Hyla Napier Holden, D.S.O., 5th Cav., I. A., Sen. Spec. Serv. Officer, empld. Jodhpur Imp. Serv. Lrs.

(Egypt.)

For conspicuous gallantry and brilliant leadership at Haifa on the 23rd September, 1918. He personally led the Jodhpur Lancers in a mounted attack by which the town was captured. He galloped his regiment through a narrow defile under heavy fire at close range, directing two squadrons upon certain enemy positions and leading the remainder of the regiment straight through the town. He maintained complete control of his men throughout, and proved himself a most dashing and capable cavalry leader.

(D.S.O. gazetted 1st January, 1919.)

* * * *

AWARDED THE DISTINGUISHED SERVICE ORDER.

* * * *

Capt. Mansel Halket Jackson, M.C., 29th Lrs., I. A.

(Egypt.)

On the 23rd September, 1918, while his brigade was advancing down the right bank of the Jordan from Baisan towards Jisr ed Damie, the advanced guard was held up by a large enemy detachment. After a personal reconnaissance of the enemy formation, Capt. Jackson made a wide outflanking movement round the enemy's left, then charging home, under heavy rifle and machine gun fire, he succeeded in capturing the position held by about 1,000 infantry, eighteen machine guns and twelve automatic rifles. Capt. Jackson led the charge and behaved with most conspicuous personal gallantry, and handled his detachment throughout with great skill and coolness. The captures included a Divisional General.

* * * *

Lt.-Col. Donald Hugh McNeile, 19th Lrs., I. A.

(Egypt.)

On the 19th-20th September, 1918, he, with his regiment, covered a distance of some 90 miles from Selmeih to Jisr Mujamia, within 18 hours, during which he seized and prepared for the demolition of the bridge at Jisr Mujamia by daylight. This performance included two consecutive all-night marches over difficult country, and during the whole period there was practically no rest for man or horse. He did fine work.

* * * *

Maj. Francis Lionel Tayler, Deoli R., I. A.

(Egypt.)

For conspicuous gallantry on the 20th September, 1918, while in command of the leading three companies in the attack on Ras Aish, when, unsupported by artillery fire, he gained his objective after heavy casualties under very heavy shell and machine gun fire. He personally conducted the attack, being cut off for some time from all communication with battalion headquarters. His splendid devotion to duty inspired all ranks with that fortitude and endurance which eventually enabled them to reach their objective.

* * * *

Maj. Mervyn Doyne Vigors, M.C., 9th Hodson's Horse, I. A. (Egypt.)

On the 30th September, 1918, at Kiswe, when vanguard commander, with only one squadron and two machine guns, he attacked a column of 1,500 of the enemy, capturing 650 prisoners and four guns. It was greatly due to his resolution, quick decision, dash and gallantry that the advance of the whole Corps was so rapid and successful.

* * * *

Capt. (T.-Maj.) Hubert Winthrop Young, 1.6th Mahratta L. I., I. A. (Egypt.)

For gallantry and coolness under fire in the attack by the Arab forces on Mezerib on 17th September, 1918. Having gained the station buildings he organised and personally directed the destruction of the enemy's railway and telegraph communications at that place. He also rendered consistent good service during subsequent engagements in which he acted as adviser to the Arab regular army.

* * * *

AWARDED A FIRST BAR TO THE MILITARY CROSS.

* * * *

Capt. Lancelot Ernest Dennys, M.C., 54th Sikhs, I. A. (Egypt.)

At Shejarhar Ridge, on the 20th September, 1918, he led his company through an intense cross machine gun barrage and took his objective with the utmost determination and dash. His personal gallantry and disregard of danger greatly inspired all ranks. Although severely wounded, he endeavoured to crawl and continue commanding, but finally had to be carried back by his orderly.

(M.C. gazetted 1st January, 1919.)

* * * *

Capt. Charles Offley Harvey, M.C., 38th C. Ind. Horse (Bde. Maj., 15th Imp. Serv. Cav. Bde.). (Egypt.)

During the action of the 26th October, 1918, four miles north of Aleppo, he displayed great coolness and courage under intense fire, and set a magnificent example to those around him. On three occasions he carried despatches across a fire-swept zone. On the third occasion, during which he was wounded, he had volunteered to relieve another officer.

(M. C. gazetted 3rd June, 1918.)

* * * *

Lt. Henry Horsman, M.C., I.A.R.O., attd. Mysore Imp. Serv. Lrs. (Egypt.)

On 26th October, 1918, four miles north of Aleppo, he led his squadron in a charge against a strongly held enemy position. He showed the greatest gallantry under intense artillery, machine gun and rifle fire, and still carried on after being wounded and having had two horses shot under him. He set a very fine example of courage and devotion to duty to his men.

(M.C. gazetted in this Gazette.)

* * * *

Capt. Francis Benton Newport Tinley, M.C., 20th Deccan Horse, I.A. (Egypt.)

For personal gallantry and skilful leading of his squadron, which, in spite of considerable machine gun and rifle fire, captured El Afoule Station on the 20th September, 1918, thus enabling two squadrons of the 4th Cavalry Division to pass through it unopposed. The squadron captured 296 prisoners, one loaded train, four motor-cars, and much valuable material.

(M.C. gazetted 23rd June, 1915.)

* * * *

AWARDED THE MILITARY CROSS.

Lt. John Robertson Abercrombie, I.A.R.O., attd. 18th Lrs. (Egypt.)

For conspicuous gallantry and initiative. On the afternoon of the 20th September, 1918, he was holding El Mejeidal with a fighting personnel which had been reduced to three Hotchkiss guns and twelve Indian other ranks. On the approach of four lorries with tenders containing 100 of the enemy and three machine guns from Haifa he promptly attacked and dispersed the enemy force, thereby saving many wounded and 1,200 prisoners, who were being evacuated, from falling into the enemy's hand.

* * * *

2nd Lt. Noel Stanley Alington, 38th C. I. Horse, I.A.

(Egypt.)

On 27th September, 1918, at El Rente, his regiment was ordered to attack and cut off the enemy rearguard. With great dash and fine leadership he led his squadron under heavy machine-gun and rifle fire, and captured three machine guns and over 100 prisoners. He approached to within a mile of Deraa, and inflicted heavy casualties on the retreating enemy with his Hotchkiss gun.

* * * * *

Subadar Bhagat Singh, I.O.M., 27th Punjabis, I.A.

(Egypt.)

For marked courage and initiative throughout the attack of the 19th Sept., 1918, near Sabieh. When advancing on an enemy post his company was heavily fired at by machine guns from another post on the right flank. He took his platoon and captured the enemy garrison of sixty men and two machine guns. Later, when four enemy guns were located, he took up his Lewis guns and, under cover of their fire, pushed forward and captured the battery, killing part of the gun team and capturing the remainder.

Subadar Bhikham Singh, I.D.S.M., 54th Sikhs, I.A.

(Egypt.)

For conspicuous gallantry and devotion to duty at Shejarah Ridge on the 20th Sept. 1918. Without hesitating, he led his platoon through an intense cross machine-gun barrage and captured an enemy post strongly held by machine guns. Though wounded three times he continued to command and inspire his men for four hours, until the position was everywhere secure.

* * * * *

T.-Lt. Frank Lugard Brayne, 18th Lrs., I.A.

(Egypt.)

For conspicuous gallantry and initiative. On the morning of the 20th Sept., 1918, when ordered to take the hill south-east of Nazareth, commanding the Afulch-Nazareth road, he captured the position under heavy machine-gun fire, and by his quick appreciation of the situation he captured, in addition, 350 prisoners, and a convoy of lorries, out of which he salvaged £20,000 in Turkish gold.

* * * * *

Capt. Augustine Henry Brooke, 18th Lrs., I.A.

(Egypt.)

For conspicuous gallantry. On the morning of the 23rd September, 1918, when in command of the vanguard near Acre, he was ordered to pursue the enemy who were retiring to the north. With two weak troops he promptly attacked 180 of the enemy who had taken up position in gardens and groves, killing a few and capturing the remainder.

* * * * *

Capt. Bertie Arthur Stephen Brunskill, 79th Infy., I.A., attd. 3rd Bn, 152nd Infy.

(Egypt.)

For gallantry at Kh. Abu Malul on the 19th September, 1918. Although wounded in several places, and unable to walk, he refused to be evacuated, and continued to command his company until the final withdrawal from the position. He displayed great determination and devotion to duty.

* * * * *

Lt. (A.-Capt.) George Byron, I.A.R.O., attd. 27th Punjabis, I.A.

(Egypt.)

For conspicuous gallantry and devotion to duty in the attack near Sabieh on the 19th September, 1918. In command of his company he carried his two objectives in spite of heavy casualties. During the further advance he handled his company with marked ability, engaging artillery with Lewis guns, his company capturing six guns.

* * * * *

Capt. William Bruce Cunningham, Dogra, I.A.

(Egypt.)

On the 21st September 1918, near Huwarah, whilst in command of the advanced guard he showed great gallantry and personal disregard of danger. He led his men through very heavy and continuous machine-gun and other fire, and, though wounded himself, continued at his post. He exhibited the greatest devotion to duty, and leading his company forward with calmness and skill.

* * * * *

Temp. Capt. Codanda Madieh Ganapathy, M.B., I.M.S., attd. Gren., I.A.

(Egypt.)

On the 20th September, 1918, north-east of Selfit, he showed great gallantry in attending to the wounded under heavy artillery and machine-gun fire throughout the day, showing complete disregard of personal danger. To his untiring efforts many men owe their lives.

* * * * *

Lt. (A./Capt.) Norman Ingerfield Graham, 91st Punjabi, I.A.

(Egypt.)

For marked gallantry and coolness in the attack on Tel Mansif, on the evening of the 19th September, 1918, in leading his company. He was on the right flank, and it was largely due to his skill and courage in constantly outflanking the enemy that the battalion was able to drive the enemy off the hill by dark.

* * * * *

Capt. Eustace Hammick, 17th Infy., I.A.

(Egypt.)

For most conspicuous gallantry and devotion to duty. He commanded the advanced guard of the covering force on the night of the 18th/19th September, 1918, across the Wadi Samieh, and led his company in a successful charge against the enemy's position. On the 20th September he led his company to the attack on Kh. Jibeit, and although severely wounded he remained with his company until he was too weak to carry on. He did fine work.

* * * * *

Subadar Harnam Singh, 93rd Burma Inf., I.A.

(Egypt.)

For marked gallantry in action on the 19th September, 1918, near Sabieh. The rapid advance of his battalion was largely due to his fearless leading. He captured several enemy machine-gun posts, and greatly assisted the troops on the left of his battalion by charging fifty Turks in position on his flank.

* * * * *

Capt. Henry Fyshe-Palmer Hornsby, 5th Cav., I.A., attd. Mysore Imp. Serv. Lrs.

(Egypt.)

During the action of the 26th October, 1918, north of Aleppo, when his commanding officer was wounded, he went to his assistance. Finding him dead he attempted to recover his horse, but was shot through the neck and rendered unconscious. On recovering consciousness he found himself alone a few yards in rear of the enemy line. He remained concealed until dark and then made his way back through the enemy outposts to our camp, bringing in most valuable information.

* * * * *

Lt. Henry Horsman, I.A.R.O., attd. Mysore I.S. Lrs.

(Egypt.)

In front of Haifa, on the 23rd September, 1918, he led his squadron under great difficulties over the top of Mount Carmel, placed his automatic guns in position, and delivered a mounted attack from the flank over very rocky and difficult country, capturing two guns, two machine guns and seventy-six prisoners. With the utmost gallantry he personally led the charge, and by his skilful leadership contributed largely to the capture of Haifa.

* * * * *

Jemadar Jai Lal, 29th Lrs., I.A.

(Egypt.)

On the 23rd September, 1918, between the Jordan River and Kh. es Samariyeh Village he accompanied Ressaidar Badlu Singh and helped to capture a position from which seven machine guns and about 200 infantry were harassing the outflanking movement of the 29th Lancers. He charged right up to the machine guns under very heavy fire and assisted in their capture. During the charge he was badly wounded in the arm and leg. He showed marked courage and determination.

* * * * *

Subadar Jangia Rana, I.D.S.M., Gurkha Rif.

(Egypt.)

For conspicuous gallantry on the 19th September, 1918, near Sabieh. Seeing his company enfiladed by a machinegun and an automatic rifle, he at once on his own initiative diverted his platoon and, working round the flank, surprised and captured the crews. Later in the day he again worked round an enemy machine-gun detachment, which was holding up his company.

* * * * *

Subadar Jiwan Khan, Grenadiers, I.A.

(Egypt.)

For conspicuous gallantry and the magnificent example he set to all ranks during the attack on Sh. Othman and Kefr Haris on the 20th September, 1918. He was continually under very heavy and accurate rifle and machine-gun fire for nearly nine hours, and never stopped a moment to rest. He was not content with the capture of Sh. Othman, the objective allotted to his company, but by pressing on materially aided in the capture of Kefr Haris. His coolness and clearheadedness were as remarkable as his courage.

* * * * *

Subadar Kahar Sing Ale, 1st Gurkha Rif.

(Egypt)

For conspicuous gallantry in action on the 19th September, 1918, near Sabieh. A party of the enemy were in position so as to hold up his battalion. However, he moved out to the flank, and, after working round them, captured the whole party, thus allowing the battalion to continue the advance and saving many casualties.

* * * *

Lt. Austen Bertram Knight, 4th Cav., I.A., empld. Spec. Serv. Officer, Jodhpur I. S. Lrs.

(Egypt.)

For conspicuous gallantry and devotion to duty. On the 23rd September, 1918, during the attack on Haifa, he went out twice under heavy fire on reconnaissance duty to discover if the Wadis in front were passable. He gained valuable information about the ground and the enemy's dispositions, locating accurately the position of four guns and several machine guns.

2nd Lieut. Kunwar Sagat Singh, Jodhpur I. S. Lrs., I.A.

(Egypt.)

For gallantry and devotion to duty. On the 23rd September, 1918, during the advance on Haifa, he twice went back under heavy fire to give orders to squadrons in the rear, afterwards rejoining the head of the regiment. Throughout the action he gave an example of complete disregard of danger and showed great coolness.

* * * *

Lt. (A./Capt.) Roger Eustace Le Fleming, Grenadiers, I.A.

(Egypt.)

On the 20th September, 1918, near Selfit, he displayed great gallantry in maintaining his position, with a handful of men, on the crest of a hill, the loss of which would have endangered the whole of the position of his battalion. During the whole day, he was under heavy artillery, machine-gun and rifle fire, and his cool behaviour and fearlessness had a splendid effect on his men.

* * * *

Lt. (A./Capt.) Arthur Garland Lester-Garland, I.A., attd. 1st Bn., 153rd Infy.

(Egypt.)

For conspicuous gallantry on the night of 18th/19th September, 1918, on Bidston Hill, near Kh. Abu Felah. Although severely wounded he carried on, twice rallying his company under heavy machine-gun fire, and captured the enemy position before he fainted from loss of blood. He behaved splendidly.

* * * *

Lt. William Herbert Horatio Lindquist, Unattd. List, attd. 10th Gurkha Rif., I.A.

(Egypt.)

For great gallantry on the 19th September, 1918, at Sabieh. Finding that he had lost touch with the battalion on his right and that the enemy were about to counter-attack, he collected the nearest men and charged the enemy, thus breaking up the counter-attack.

* * * *

Subadar Mahomed Khan, 3rd Bn., 152nd Infy., I.A.

(Egypt.)

For conspicuous gallantry on the 19th September, 1918, when at Khan Abu Malul he took command of a company, his company commander having become a casualty. He showed great coolness, moving up and down the line under heavy fire, encouraging the men after they had been checked in the first assault. He organised a second attack, but was wounded at the outset.

* * * *

Lt. (A./Capt.) Gerald Beverley Matthewman, Unattd. List, I.A., attd. 3rd Bn., 154th Infy.

(Egypt.)

For conspicuous gallantry in action in the attack on Akrabeh and Kh. el Kernm on the 21st September, 1918. He guided the battalion in the attack, and under heavy fire showed great courage. It was largely due to his dash and resource in collecting men and capturing ridge after ridge that the position was so speedily taken.

* * * *

Lt. Percy John Warren McClenaghan, 129th Baluchis, I.A.

(Egypt.)

On the 19th September, 1918, near Sabieh, he led his company with the greatest dash and gallantry, capturing about 200 prisoners, a battery of artillery, and many machine guns. Through his great personal gallantry he set a very fine example to his men.

* * * *

Lt. Dudley Gerald Mein, 31st Lrs., I.A. (attd. Mysore, I. S. Lrs.). (Egypt.)

For gallantry and skilful leadership before Haifa on 23rd September, 1918. He worked his squadron round to the coast about two miles east of Haifa, and charged the enemy simultaneously with the Jodhpur Lancers, capturing two guns, two machine guns, and 110 prisoners. He showed himself to be an officer of exceptional gallantry and coolness under fire.

* * * *

Lt. Maurice Neville Meredith, I.A.R.O., attd. Mysore I. S. Lrs. (Egypt.)

For conspicuous gallantry in front of Haifa, on the 23rd September, 1918. As Special Service officer with the advanced squadron he showed skill and determination under heavy fire, and gained much valuable information. Under his leadership his men—who had to remain in the open for four hours under shell fire—captured two guns.

* * * *

Lt. Alexander Albert Nicholas, 27th Punjabis, I.A. (Egypt.)

For conspicuously gallant leading in the attack on the Sabieh position on the 19th September, 1918. When going through the enemy barrage he was knocked senseless by a shell splinter. On coming to, he immediately rejoined his company and continued to lead it, capturing all objectives allotted to him. He handled his company with skill and judgment in the subsequent advance, capturing four guns. Later in the day he was blown up by a shell, but continued to command his company, and by his fine example gave all ranks an excellent lead.

* * * *

Risaldar Nur Ahmed Khan, I.O.M., 9th Hodson's Horse, Ind. Army. (Egypt.)

On the 19th September, 1918, he was in charge of the advance troop and acted with the greatest dash and gallantry. He made several personal reconnaissances and sent back clear information. When checked by fire from the orchard just north of Wadi Falik he collected his troop and cleared the place, securing 2 guns, 1 machine gun, some transport, 3 officers and about 40 other ranks. He did splendid work.

* * * *

Lt. (A./Capt.) Alfred John Hume Ross, 7th Gurkha Rif., I.A. (Egypt.)

Early in the attack on Sabieh on the 19th September, 1918, the commanding officer was wounded. Lient. Ross took over command and led the battalion with much gallantry, determination and initiative, carrying all objectives.

* * * *

Lt. (A./Capt.) Dudley Russell, 2nd Bn., 97th Deccan Inf., I.A. (Egypt.)

In the attack on the Tabor system of trenches on the 19th September, 1918, he displayed conspicuous gallantry and leadership. His personal example of coolness, the marked skill with which he led his company under very heavy artillery and machine-gun fire, and his initiative in locating the objective, enabled the two attacking companies to capture the position with promptness and very few casualties.

* * * *

Lt. Sohan Lall Bhatia, I.M.S., attd. Inf., I. A. (Egypt.)

Near Sabieh, on the 19th September, 1918, for conspicuous gallantry under intense fire. The enemy put down a heavy barrage where he had established his aid post. In the midst of this he carried out his work with an absolute disregard of his personal safety. The skilful way the wounded were dressed by him, in spite of the adverse conditions, afterwards elicited the admiration of the medical officers in the dressing stations.

* * * *

2nd Lt. Arthur Stevens Sullivan, I.A.R.O., attd. 71st Punjabis, I. A. (Egypt.)

For marked gallantry and initiative during the advance from Kalkilieh to Azzun on the 19th and 20th Sept., 1918. During the attack on Azzun he led his company under close rifle and machine-gun fire from three sides. Although the company on his right was held up, and that on the left was not then up in strength, he led his platoon on and captured Azzun, immediately pushing on and seizing the hills commanding it, thereby enabling the advance of the battalion to be resumed.

* * * *

Lt. (A./Capt.) Oliver Dudley Sutcliffe, U. L., attd. 1st Bn., 153rd Infy., I. A. (Egypt.)

For conspicuous gallantry on the night of 18th/19th September, 1918, on Bidston Hill, near Kh. Abu Falah. Immediately he heard that all the four company commanders had been wounded, he went forward and rallied disorganised groups of men and led them most gallantly, capturing the enemy's position.

* * * *

Captain Thakur Anop Singh, Bahadur, I.O.M., Jodhpur Imp. Serv. Lrs., I. A. (Egypt.)

On the 23rd September, 1918, during the attack on Haifa, he led his squadron with the greatest dash and ability, when he successfully charged the enemy's position behind a wadi, capturing three guns, four machine guns, and many of the enemy. He then led his squadron through the north portion of the town, capturing many more prisoners, and rejoined the regiment at the final objective. He showed throughout the utmost contempt for danger.

* * * * *

Capt. Reginald Magnus Trail, Dogras, I. A. (Egypt.)

During the action of the 21st September, 1918, near Huwarah, Capt. Trail brought his company up under heavy machine-gun and other fire to support the advanced guard. He led his men with determination and gallantry, turning the enemy off a rocky knoll, and showed high qualities as a leader.

* * * * *

Risaldar B. P. Krishne Urs, I.D.S.M., Mysore Imp. Serv. Lrs. (Egypt.)

During the action of the 26th October, 1918, four miles north of Aleppo this Indian officer showed great gallantry while leading his squadron in a charge against a strongly-held enemy position under very heavy fire. He was severely wounded in the hand and chest, but continued to lead his squadron until exhaustion compelled him to fall out. His splendid example inspired all ranks.

* * * * *

A. H. BINGLEY, *Major-General,*
Secretary to the Government of India.

MARINE DEPARTMENT.

Delhi, the 14th November 1919.

RESIGNATIONS.

RAILWAY DEPARTMENT.

(RAILWAY BOARD.)

NOTIFICATIONS.*Simla, the 8th November 1919.*

No. 798-P.-16.—The Senior Government Inspector of Railways, Circle No. 4, Lahore, having inspected the Ahmadwal-Dalbandin Section of the Nushki Extension Railway authorised its opening for passenger traffic on 1st October 1919.

The Railway Board, after considering his report, have confirmed his action.

The 12th November 1919.

No. 884-E.-19.—On return from military duty, Mr. F. S. Bond, Executive Engineer, State Railways, was employed on special duty under the Railway Board from the 3rd to the 6th October 1919.

No. 884-E.-19.—Mr. F. S. Bond, Executive Engineer, State Railways, is granted combined leave for 1 year and 5 months, *viz.*, privilege leave due and furlough for the remaining period, with effect from the 7th October 1919, under Articles 246, 233 and 300 (b), Civil Service Regulations, and Finance Department letter No. 168-C. S. R., dated 21st February 1919.

No. 2062-E.-19.—Mr. F. W. Allam, C.B.E., Engineer-in-Chief, Nushki Extension Railway, is appointed Engineer-in-Chief, Hukong Valley Railway Survey.

No. 2062-E.-19—1.—Mr. W. H. Gorton, Executive Engineer, Eastern Bengal Railway, is posted to the Hukong Valley Railway Survey.

The 13th November 1919.

No. 1776-E.-19.—Mr. C. A. H. Edwards, Officiating Junior Government Inspector of Railways, Circle No. 6, Bombay, is appointed Executive Engineer, Neemuch-Pachpahar-Goonu Railway Survey and Kotah feeder railways.

No. 2002-E.-19.—The services of Mr. E. A. Scott, O.B.E., Signal Engineer, North Western Railway, are placed at the disposal of the Punjab Government for a period of three years with effect from the 16th October 1919.

No. 2002-1-E.-19.—With reference to Railway Board's Notification No. 2002-E.-19, dated the 13th November 1919, Mr. J. A. Lawton, Senior Assistant Signal Engineer, North Western Railway, is appointed to officiate as Signal Engineer of that Railway until further orders.

No. 2188-E.-19.—With reference to Railway Board's notification No. 507-E.-19, dated the 23rd April 1919, and No. 2188-E.-19, dated the 24th October 1919, Mr. A. T. Stowell will hold temporary rank as Traffic Manager, Oudh and Rohilkhand Railway, with effect from the 29th October 1919 and until further orders.

From the 11th to the 28th October Mr. Stowell held that rank as a supernumerary.

No. 2188-E.-2-18.—With reference to Railway Board's notification No. 1176-E.-19, dated the 6th June 1919, Mr. A. Watson held temporary rank as Traffic Manager, Oudh and Rohilkhand Railway, from the 11th to 28th October 1919.

No. 2188-E.-3-18.—With reference to Railway Board's notification No. 1176-E.-2-19, dated the 6th June 1919, Mr. R. J. Collett-White held temporary rank as a Deputy Traffic Manager in class I of the Superior Revenue Establishment from the 11th to the 28th October 1919.

No. 2291-E.-19.—Mr. H. M. Jameson, Assistant Engineer, Eastern Bengal Railway, is permitted to resign the service of Government with effect from the 1st August 1919.

R. McLEAN,
Secretary, Railway Board.

INDIAN MUNITIONS BOARD.

NOTIFICATION.

Simla, the 10th November 1919.

No. G.-379. — Major W. S. Stafford, 1-25th Battalion, The London Regiment, is appointed as Engineering Manager, Government Acetone Factory, Nasik Road, with effect from the 30th October 1919.

This cancels the Indian Munitions Board's Notification No. G.-379, dated the 7th November 1919.

F. R. R. RUDMAN,
Secretary, Indian Munitions Board.

SUPPLEMENT TO
The Gazette of India.

No. 46.] DELHI, SATURDAY, NOVEMBER 15, 1919.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time containing such official papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Proceedings of the Indian Legislative Council will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five rupees per annum if delivered in Calcutta, or eight rupees if sent by post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of rupees six per annum if delivered in Calcutta, or rupees nine if sent by post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

No. 81-D.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

Delhi, the 15th November 1919.

**RESOLUTION ON THE REPORT OF THE INDIAN INDUSTRIAL COMMISSION
REGARDING THE CREATION OF A CHEMICAL SERVICE AND OF AN INDIAN
STORE DEPARTMENT.**

RESOLUTION.

(INDUSTRIES).

THE Government of India received the report of the Indian Industrial Commission on the 29th October 1918. Local Governments were addressed on 7th December 1918, when their views on certain questions of principle were asked for. On receipt of these, the Government of India placed their opinions and proposals before the Secretary of State in their despatch No. 15 (Industries), dated the 4th June 1919. The Secretary of State's reply, in his despatch No. 86 (Revenue), dated the 25th September 1919, has since been received; and the above correspondence is herewith published for general

information. The report itself has been in the hands of the public since November 1918, and has formed the subject of numerous comments and discussions, both in India and in England.

2. The Government of India are arranging to constitute committees to deal with the proposals of the Industrial Commission for the creation of a Chemical Service and of an Indian Stores Department. The terms of reference and personnel of each of these committees will shortly be announced. With the Secretary of State's sanction the Government of India have ordered the reconstitution of the Indian Munitions Board, as a Board of Industries and Munitions, to perform the duties described in paragraph 6 of the Secretary of State's despatch. The Government of India have expressed in paragraph 85 of their despatch their high appreciation of the services of the Indian Industrial Commission, with which they are glad to find that the Secretary of State associates himself. The thanks of the Government of India are hereby conveyed to the Commission and to its President, Sir Thomas Holland, K.C.S.I., K.C.I.E., F.R.S., for their labours and for the comprehensive and well-considered scheme set forth in their report. The Government of India are confident that the Members of the Commission will be able to look back to their work, in years to come, as the starting point of a new era of co-operation between Government and the industrial public for the economic advancement of India, and that their zealous endeavour to this end will find its best reward in the results which the Government of India confidently anticipate from it.

ORDERED that a copy of this Resolution be forwarded to all Local Governments and Administrations, to all Departments of the Government of India and the Indian Munitions Board, to all heads of departments subordinate to this Department, to the President and Members of the Indian Industrial Commission, and that the Resolution be published in the Supplement to the *Gazette of India*.

A. H. LEY,
Secretary to the Government of India.

No. 15 of 1919.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

INDUSTRIES.

To

THE RIGHT HONOURABLE EDWIN MONTAGU,

His Majesty's Secretary of State for India.

Simla, the 4th June 1919.

SIR,

In our despatch No. 51 (Industries), dated 26th November 1915, we set forth the reasons which led us to propose the appointment of the Indian Industrial Commission. The Commission submitted their report on the 29th October last. Their recommendations were unanimous, except for the dissenting note of one member. The few definite suggestions that emerge from his note are, however, not of a nature that we can accept, and have therefore not been dealt with by us in this despatch, though his arguments against some of the Commission's proposals which we support are generally covered, we believe, by our statement of the case.

After the issue of Mr. Ley's letter No. 589-D., dated 7th December 1918, to Local Governments (annexure I), inviting their views on the main principles laid down in the report, we deputed Mr. Low, Secretary in the Department of Commerce and Industry, who had been a member of the Commission, to visit Local Governments, in order that their attention might be focussed, by free and informal discussion of the somewhat complex questions involved, on the main points at issue, and their replies might be expedited.

2. There are four cardinal points which require to be settled before definite progress can be made in giving effect to the Commission's recommendations:—*viz.*, the proposals:—

- (1) to constitute provincial departments of industries;
- (2) to constitute a central department of industries;
- (3) to create all-India scientific and technical services;
- (4) to create an agency for the purchase and inspection of stores in India.

We shall place before you in this despatch our views on each of the above points, and ask for your general approval of our proposals in each case. The replies of the Local Governments whom we consulted on the above points, are annexed to this despatch.

PROVINCIAL DEPARTMENTS OF INDUSTRIES.

3. In paragraphs 303 to 306 of their report the Commission recite their reasons for proposing the creation of provincial departments of industries, and we need not repeat them here. The duties of the provincial departments as

suggested by the Commission in paragraph 306 of their report are as follows :—

- “(a) The direct encouragement of industries, including a large share in industrial research work, the provision of technical advice and assistance to industrialists, the examination of applications for special concessions, and the grant of loans to small and cottage industries.
- “(b) The collection and distribution of commercial and industrial intelligence; the work of passing Government indents and of purchasing and inspecting certain classes of Government stores; the organisation of markets for local products; the conduct of special enquiries and industrial surveys; the holding of industrial exhibitions and the management of commercial and industrial museums.
- “(c) The control of technical and industrial education. This would necessitate the training of staff for, and the inspection of, industrial schools; the organisation and inspection of apprentice classes attached to large works, and the provision of the staff for the necessary theoretical teaching. The Director would also have to take his share in the control of the higher institutions for technical training. Funds for technical and industrial education would be provided from his budget.
- “(d) The control of the staff employed for the local administration of the Electricity, Factories and Boiler Acts; and the furnishing of advice to Government on the industrial and commercial aspects of the Mines Act and of the rules for mining leases and prospecting licenses.”

The Commission also drew attention to the necessity for some means of exchanging information regarding the experience gained in different provinces. Even in respect of cottage industries they considered this to be necessary.

The provincial departments would thus be the mechanism through which the motive force contained in the technical, scientific, educational and financial proposals of the Commission would be applied in the way in which they can be most effective; viz., through an agency under the complete control of Local Governments. Promising results, though necessarily on a most inadequate scale, have already been obtained from the operations of such local departments of industries as already exist in the Central Provinces, the United Provinces and especially in Madras, in spite of their lack of technical equipment and of the absence of a correlating central agency. The organisation proposed by the Commission follows the existing lines of these provincial departments, but strengthened in such directions as experience has been able to suggest. It is with confidence that we invite your approval of the proposal to institute provincial departments of industries on the general lines laid down by the Commission, subject to such further applications for detailed financial sanction as the powers which may be exercised by the Government of India or the Local Governments, respectively, may necessitate, and to such further consideration in points of detail as may be found requisite. The principle has been supported by all Local Governments, although certain of the Commission's detailed proposals are not unanimously accepted, and the Burma Government make certain suggestions for the control of the department of industries and its co-ordination with the departments of agriculture and co-operative credit, that are dependent on a scheme of provincial reforms which they are about to put forward. These proposals will however receive further consideration on receipt of your reply.

AN IMPERIAL DEPARTMENT OF INDUSTRIES.

4. The necessity for a central agency to co-ordinate and supplement the efforts of the local departments is obvious. Industry follows economic, not provincial, boundaries; individual undertakings compete for their raw materials, and for the sale of their products, within areas limited only by the cost of transport; information regarding the nature of raw materials and of industrial

processes is of far more than provincial application ; some of the raw materials required for the completion of industrial operations in one province are often derived from another ; industrial labour now moves more and more freely from one province to another. If the Government organisations for the development of industries work in water-tight compartments, or depend for the exchange of information solely on spontaneous and undirected co-operation, progress will be limited by the comparatively small power of the local agency ; and much even of that small power will be wasted.

A central co-ordinating agency is thus clearly needed. It will fulfil its responsibility by keeping closely in touch with the work being done by provincial departments ; by offering from time to time its advice, based on the opinions of appropriate specialists, regarding the conduct of that work ; and by ensuring that the experience of the more progressive provinces is placed freely at the disposal of the more backward ones. Personal discussion between Local Governments and the higher officers of the central department of industries, men who have built up business and administrative experience in handling technical subjects, on a basis of technical knowledge, will be invaluable in supplementing the inevitable deficiencies in experience, qualifications and equipment that will characterise most, if not all, of the provincial departments of industries for a long time to come. Several of the Local Governments, it will be noticed, specifically mention the advantages which they hope to derive from the creation of a central organisation capable of creating such relations with Local Governments. A central agency is also needed to supplement certain inevitable deficiencies in provincial departments, in respect of special research problems that have a bearing on the development of industries, in the laboratory or experimental factory.

5. It is true that we propose to leave entire freedom to Local Governments, subject to a few restrictions of very limited scope, in respect of the above functions. But various considerations will in practice prevent Local Governments from making complete use of this liberty. Research is expensive, and it is slow in producing results that will appeal to the public whose support the Local Governments must secure. The tendency will thus be for Local Governments to concentrate on exploiting the results of research, while much of the actual work of research will be left to the central Government. That Government, dealing in one or other of its departments with matters like the manufacture of munitions, the Geological Survey, the proposed purchase and inspection of stores in India, at any rate on behalf of the large central consuming agencies, and the production of salt in Northern India, will be compelled in any case to maintain a far larger staff of technical experts and scientists than any Local Government. In addition to this, it must have a large share in the administration of central institutes for research and for professional and technical training. It is of paramount importance to recollect that specialisation is the key-note of all modern science and technology, and, without a far higher degree of specialisation than has hitherto been attempted in India, research work will be infructuous and attempts at development wasteful and dangerous. We must proceed in future on an entirely different principle, and the qualifications, numbers and organisation of the staff must be adjusted with reference to the work to be done. It is obvious that no Local Government can afford more than a fraction of the equipment required ; and, though the Commission contemplate the services of scientific specialists being placed freely at the disposal of Local Governments, the technical side of their work must even in such cases be assisted by an expert central agency.

6. There will be many industries of which the possibilities will have to be investigated on a minimum commercial scale before private enterprise is willing to come forward and undertake their further development. Such investigations sometimes involve considerable expenditure for longer or shorter periods. Local Governments have to carry on a number of minor industrial activities, such as the encouragement of cottage and small local industries, as well as industrial and technical education, matters which in the aggregate involve large amounts of recurring expenditure, and render local resources relatively less elastic than those of the Government of India. Financial limitations, therefore, will often render it impossible for Local Governments to undertake the more extensive and ambitious lines of development. Reference to Appendix E.

of the report, for instance, shows the variety of specialists necessary in glass manufacture and explains the consistent series of failures that in their absence have followed the attempts to manufacture glass in India. On the other hand, no individual undertaking could be worked on a scale which would recoup a private concern for the initial expenditure of so general an investigation. Moreover, it is necessary, when factors of national safety are involved, and very desirable, when the question is merely one of high economic importance, to secure the development, on a suitable scale and at the right time, of each link in a chain of inter-dependent industries, instead of, as in the past, relying on imports to fill the gaps. The links of such a chain will often have to be located in different provinces; and in any case the necessity of any particular link is not always clearly visible or specially urgent from any one provincial point of view. There should be a central agency, in a position to create or encourage, failing adequate action by Local Governments, industries needed to fill such gaps. This principle is generally accepted by the Local Governments. As the Bombay Government remark, research experiment and demonstration undertaken within their Presidency will have to be supplemented by further research and experiments either within or without that Presidency, in the general interests of India.

7. One of the most potent instruments for the encouragement of new undertakings is the guarantee by the Government of the purchase of manufactured products for a term of years. It is obvious that in hardly any instance would a single Local Government be in a position to give a purchasing order large enough to be of the slightest assistance to a big undertaking. Not only are the individual requirements of Local Governments small, but the large purchasing departments which use manufactured articles, such as the Army, the Railways, the Posts and Telegraphs, are all under the Government of India.

8. There is a further reason why a central agency is needed. The Commission enumerate in paragraph 324 of their report certain subjects, in addition to their two headings 9 and 10, which relate directly to the encouragement of industries by Government, as suitable for inclusion under a central department of industries. These are at present all dealt with by departments of the Government of India.

1. Geology and Minerals (including the Geological Survey of India and the administration of the Indian Mines Act).
2. Salt.
3. Indian Explosives Act and the Indian Petroleum Act.
4. Stationery and Printing.
5. Inventions and Designs.
6. The collection and distribution of commercial and industrial intelligence.
7. The supply of stores.
8. The Indian Factories Act.
11. The administration of the various Acts relating to steam boilers.
12. Electricity.

In addition to these the inclusion of two additional subjects is suggested, if it be decided to place them under the control of a civil department.

13. Ordnance Factories.
14. The inspection of Ordnance manufactures.

Though the Committee for the Division of Functions recommend that one or two of these heads should be definitely placed under the control of provincial Governments, subject to all-India legislation, this proposal will affect the existing practice but little. Subject to the above qualification, all these heads have been recognised by the Committee for the Division of Functions as falling within the proper sphere of the Central Government, and they can be controlled more appropriately by a central agency which is concerned with industrial matters, than by the unspecialised departments to which they at present belong.

9. Finally, the Imperial Government cannot divest itself of responsibility for the Industrial progress of the country, and for its economic and military safety, so far as the latter can be secured by the supply of munitions and stores. It will in any case maintain almost exclusive control of the tariff policy, shipping, foreign trade relations, ports, waterways and railways, matters of which industry throughout the country can never be independent, and it will retain certain important responsibilities in respect of minerals the property of the State. Moreover, the fact that Government are embarking on a new and very important line of policy postulates the necessity of a sufficient degree of central co-ordination to ensure that the whole resources of the country are, as far as may be, utilised in the pursuit of that policy. It is in the first few years that the success of the policy will be determined; and it is in those years that the task of the central agency will be the heaviest, and the necessity for its existence strongest.

10. We will now explain our reasons for holding that, during at any rate the initial stages of our new industrial policy, the proposed central agency must be a special department of the Government of India in charge of a separate Member of Council. On this point we are in general agreement, though some of us hold that the development of industries will always require to be a separate charge. We may point out, in the first place, that the Commerce and Industry Department is at present, and for some years to come, at any rate, will be so heavily overburdened with work, as to render it incapable of undertaking such important additional responsibilities; while the nature of these responsibilities and the character of the personnel required for their performance is, in most cases, in no way akin to the personnel employed under the Department of Commerce and Industry, or to the functions that it exercises. The relief afforded to the present Department of Commerce and Industry by the transfer of heads 1-11 mentioned in paragraph 8 above will reduce the number of receipts dealt with by it by less than one-seventh; and we do not consider that, even with the very small amount of devolution in respect of the remaining subjects dealt with in that department which has been proposed by the Committee on the Division of Functions, the remaining work will be less than that department as at present constituted, or the Member-in-charge of it, can properly undertake.

11. We may exemplify our reasons for not entrusting the carrying out of the new policy to the Department of Commerce and Industry by a reference to the position in the United Kingdom. There the newly established State agencies for research are not placed under the Board of Trade, but under a special Committee of the Privy Council. This work, in India, in the utter absence of private or commercial agencies for research, will fall for a long time almost entirely upon the State.

In addition to this, two still more important classes of activity have to be undertaken by the Indian Government, for which in England the necessity and even the occasion are almost entirely absent, namely, the stimulation of private enterprise and the exploitation of the great State properties. The present unsatisfactory position in India is almost entirely due to the lack of private enterprise; this has to be built up and encouraged by the provision of technical information, the training of consultants, technologists and artisans, the offer of Government orders, concessions and guarantees, and by the creation of a system of finance which will afford to industries the facilities which have hitherto been concentrated on trade. In England most of these advantages have long existed; they have been created by private enterprise and in turn they have reacted on it, and extended its scope. In the next place, the Indian Government possesses and is responsible for the economic utilisation of a very potent instrument of aid to industries, which in England is lacking; *viz.*, the State ownership of extensive forest areas, mineral and water rights. But to make this instrument effective, it will have to be wielded with far greater skill and purpose than heretofore; and must therefore be directed by an agency which is designed to stimulate and assist industries, rather than by one which is well adapted, indeed, to assist commerce, but whose relations with industries have hitherto been mainly restrictive.

The Department of Commerce and Industry was, it is true, intended to benefit industry as well as commerce. But the absence of a definite industrial policy has left that department without the expert staff which could alone affect the latter object. Even if that deficiency were supplemented, the additional load of responsibility would entail the risk of paralysing an already overburdened department.

12. It is indeed possible to bring forward a further reason for separating the function of Government in relation to trade from those which concern industry. The future economic policy of India will be affected by two forces, which will often be in opposition; the wish to protect home industries by fiscal measures, and the necessity of maintaining the free movement of trade and of securing to the consumer goods at a reasonable price. It would be, we think, a serious mistake to confuse the issue by placing the interests of industry and commerce, which respectively represent these two conflicting forces, under a single representative. Each interest should have its own line of action clearly before it; in any case where these lines diverge, the course must be settled after a full and clear consideration of all the factors in that case, and should not depend on whether the member who may be at the time in charge of both interests happens to favour protection or free trade.

13. In forming a decision on the necessity of a separate department, popular sentiment and expectation cannot be ignored. As the Industrial Commission have said in paragraph 320 of their report, the duties of a central industrial agency "are sufficiently important and sufficiently correlated, both in themselves, and in the public mind, to justify special treatment, and they involve interests which deserve separate representation in the Viceroy's Executive Council." This view was anticipated in paragraph 340 of the Report on Indian Constitutional Reforms. The importance to India of definite policy for the improvement of her industries is based on the strongest economic, political and military reasons; for years past it has been prominently in the public mind and is now urged still more forcibly by all classes of Indian opinion as an indispensable condition of the future political progress of the country. Anything short of the creation of a central department of industries will be generally considered an inadequate expression of that policy. Popular opinion will look to the central department of industries for the fulfilment of India's hopes for a great industrial future; and will regard it, in fact, as the pre-eminently *swadeshi* department.

For these reasons we agree that a central department of industries is, at any rate, during the initial stages of the new policy, the necessary and appropriate agency for stimulating, guiding and co-ordinating all forms of Government effort for the development of industries, and to this view we ask you to give your approval in principle.

14. The proposal of the Commission is that the Member-in-charge should be assisted by a board. We do not wish to be understood as endorsing this particular proposal as the ultimate constitution of the new Department. It is probable that the initial organisation of the Department will have to be on somewhat informal lines, depending for its success as it must do more on men than on mere system. The Member-in-charge will require the help and advice of officers with various qualifications and experience. Whether these officers can be most helpful as heads of subordinate departments, as secretaries, or as members of a board, can be most fittingly determined by actual experience.

15. If you approve in principle of the necessity of a separate department of industries, we propose to begin with a short-time *interim* scheme.

It will in any case be impossible to create, without amendment of the Government of India Act, 1915, a new post of a Member of the Governor-General's Executive Council. Legislation has recently been undertaken in connection with the scheme of Constitutional Reforms, which is designed to delegate to the Government of India power to modify the number of members of that Council. It would be impossible to submit before that date detailed proposals for a department exercising such entirely novel functions, but we think that a few months' *interim* experience with the temporary organisation

which we explain below, should enable us to form a much more accurate idea than is at present possible of the establishment required; and we hope to be in a position, if our present proposals are approved in principle, to submit a detailed scheme for sanction in a few months time.

We propose on receipt of your sanction to hand over to the Indian Munitions Board, which may be appropriately renamed "The Board of Industries and Munitions," the subjects and subordinate departments enumerated in paragraph 324 of the Commission's report, except Nos. 6 and 14, regarding which we reserve our opinion.

Some of this work has hitherto been undertaken under war conditions and for purposes connected with the war, by the Munitions Board. This organisation has throughout been in more intimate touch with the industries of the country than any department of Government has ever been before; and with a little re-adjustment can do what is needed for the present, while winding up the remains of its war work. The department so constituted should retain the powers at present possessed by the Munitions Board, but answerable through its President direct to His Excellency the Viceroy.

To do this in addition to its existing task of closing its war commitments, will necessitate the employment of certain establishment, and the incurring of certain expenditure to initiate work on various schemes which have been considered by the Munitions Board for some time past, for which we shall, when necessary, request your sanction.

16. To recapitulate, we ask you—

- (1) to approve in principle of the creation of a Department of Industries, to be placed under the charge of a Member when a vacancy occurs or can be created, in order to deal, generally speaking, with the subjects recommended by the Commission;
- (2) to agree that the Indian Munitions Board should, for the present, carry on the initial work of organisation, and, in particular, should frame proposals in detail for the new Department.

RELATIONS BETWEEN PROVINCIAL AND IMPERIAL DEPARTMENTS OF INDUSTRIES.

17. We shall now explain what in our opinion should be the relations between the central and the provincial departments of industries. In paragraphs 3 and 5-9 of this despatch we have generally indicated what we think should be their respective duties. But we desire to leave the fullest liberty to the Local Governments in respect of the functions and responsibilities to be exercised by their departments of industries. They should, we think, be free to conduct any form of research or experiment, to initiate any industries on experimental lines, or to encourage the starting of any industrial undertaking, by any means that lies within the general financial and other powers that may be conferred on them from time to time. The various possible methods of encouragement are more particularly indicated in Chapters XIV and XX of the Commission's report; and though some of the proposals set forth in the latter chapter will need further consideration and perhaps further reference to yourself, we wish to state here that, whatever conclusion may be reached regarding their adoption, we do not propose to restrict the employment by the Local Governments of any particular form of authorised assistance or to reserve any such form for the exclusive use of the Government of India.

It is therefore necessary, as we explained in paragraph 118 of our despatch on the Report of the Committee on the Division of Functions, that the duties and activities of Local Governments and of the Government of India, must in some respects be concurrent, but we do not think that this should give rise to difficulties which, indeed, are not anticipated by Local Governments, who fully concur in the above general proposals. We assume that there will be a free exchange of information regarding the activities of the respective agencies. In considering the steps to be taken for the development of any important industry, the advice and aid of the central department's experts are certain to be invited, while they will be, it must also be assumed, fully aware of any important industrial inquiries that Local Governments may be carrying on.

The relative advantages of imperial and provincial action will be thoroughly discussed from a technical point of view before definite proposals are presented to the Governments concerned; the abilities of Local Governments will be limited in respect of financial resources and staff; and it should seldom be difficult to come to a conclusion as to which authority should undertake the work.

As an alternative, such operations might be undertaken jointly on the lines indicated in paragraph 23 of Annexure V to the Functions Committee's Report, "as a business arrangement with a Local Government by which it will take a subsidy from central funds for carrying on some work in which the central and provincial authorities are interested."

The few cases of overlapping that will actually occur in practice will not necessarily mean a waste of money, and are in any case not too high a price to pay for the only satisfactory solution of a very real difficulty, a solution which, as we have said, is generally accepted by Local Governments.

18. The above proposals are, however, necessarily subject to certain reservations. In the first place cases may occur in which the action of a Local Government, in initiating or assisting any industry, is likely to come into conflict with other important interests in the rest of India. In these cases, which, though important in principle, are not likely to occur often in practice, we desire to reserve to the Government of India, a power of veto. We have in mind the danger to Indian interests which would arise if a Local Government proposed to encourage a form of industry which entailed the disposal of a raw material limited in quantity, in such a way as to deprive the rest of India of the advantage arising from its manufacture in the country. Supposing, for instance, the Government of Burma thought fit to encourage the exports of its zinc sulphide ores, the only adequate Indian source of sulphuric acid, or their reduction by a process which would involve the waste of the whole of their sulphur contents, then we think the resulting injury to the rest of India from the loss of an indigenous supply of this vitally important chemical would be so serious as to require the interference of the Government of India. We have given as an instance the possible misuse by a Local Government of the monopoly of a raw material; but we consider that the same considerations should apply to the misuse of monopolies of sites which could produce large quantities of water power at exceptionally low cost; such sites would necessarily be very few and the application of the resulting power must be a matter of national policy.

The necessity of the Government of India retaining a power of interference in cases like these is specifically recognised by those Local Governments which have dealt with this point, and is accepted by the Government of Burma, for so long as that province forms a part of the Indian Empire.

19. Apart from cases where actual interference by the Government of India may be necessary in the general interest, cases will doubtless occur where the interests of two or more Local Governments in the establishment of rival industrial undertakings are at variance, and our intervention would be required, in order to avoid needless competition and loss.

20. We do not consider it necessary for Local Governments to submit their schemes for the approval of the Government of India, merely that the latter may assure themselves that the schemes do not contravene any of the above criteria. Such submission, as the Governments of Bombay and the United Provinces point out, would cause undesirable delay; and the Government of India can place themselves in a position to interfere in the rare cases where interference will be necessary, by regularly receiving information from Local Governments regarding the schemes they have in hand, an arrangement which will indeed be necessary to enable the country generally to pool its knowledge and to secure the necessary co-operation between the central and local organizations.

21. The above restrictions on the liberty of action otherwise possessed by Local Governments are particular applications of the general principles laid down in paragraphs 5 and 6 of our despatch on the report of the Committee on the Division of Functions.

THE SCIENTIFIC SERVICES.

22. The third of the main proposals refers to the constitution of scientific services and of an industrial service. The Commission draw attention to the extreme importance of research under modern industrial conditions, and to the especial needs of India, in view of her vast unexploited resources in raw material and of the paucity of her scientific workers. They criticise the complete lack of organisation among scientists employed by Government and describe the difficulties, both administrative and technical, to which this gives rise. The Commission recommend as a remedy the creation of a similar mechanism to that through which the Central and Local Governments have hitherto carried out almost all their most important activities, especially those requiring technical knowledge, *viz.*, all-India services; and they discuss the basis on which these services should be constituted. The Commission propose the creation, not of scientific departments, but of scientific services, an essential distinction which has been clearly brought out in the replies of Local Governments, though it has not been so clearly apprehended by critics of the proposal. The Commission contemplate the recruitment of officers into separate scientific services, such as a chemical, botanical or zoological service, for employment under imperial and provincial departments, such as Forests and Agriculture, which deal with the application of a number of separate sciences. They propose that scientific officers in the employ of Government, instead of being recruited in small numbers or single units into the different services which happen to require them, should be recruited as experts in their several sciences, into scientific services, each with its appropriate conditions of qualification, pay, pension and promotion. Although the services will be distinct entities for the above purposes, yet the only members of those services that will not be actually employed under the various departments that require their services, will consist of a central staff, engaged under such officers, for instance, as Deputy Chief Chemists, at research centres, in scientific work. This central agency will also serve as a reservoir to meet the demands that may be put forward by other departments or by Local Governments for men to undertake temporary special investigations, to fill new posts or leave vacancies, or for the replacement of existing officers.

The head of each scientific service would thus exercise an influence over the members of his service in matters scientific, by the check of scientific results and by the provision of advice and criticism on scientific work, whether for Local Governments or for research workers. It is not, we understand, proposed by the Commission, nor do we ourselves contemplate, that he should actually control research work in the sense of ordering definite problems to be taken up by officers serving under Local Governments, or should turn his department into a gang of hack researchers. We rely on constant correspondence between scientific officers of the same cast and periodical conferences as sufficient to correlate research programmes.

23. With the Commission's view of the very unsatisfactory nature of the present position as set forth in paragraphs 116 and 117 of their report, we are in complete accord.

Local Governments and Heads of Departments find the greatest difficulty in forming an opinion of the work done by scientists employed under them; or of the probable value of lines of research proposed by their officers. Should the administrative authority consider the results obtained by a scientist unsatisfactory, it is almost impossible to obtain an authoritative opinion on his work and qualifications; or to say whether he might not do better in another post; or to find such a post for him. The difficulties arising from the existence of isolated specialists in a department are in fact notorious. Local Governments constantly find themselves saddled with unsatisfactory men for long periods. The Chief Commissioner of the Central Provinces, for instance, specifically alludes to his own experience of these difficulties.

The impossibility of applying any common measure in determining the respective claims to promotion of a botanist, a chemist, an engineer and a political economist has been recognised in the existing services by the creation of separate posts on a time-scale. But this does not get over the difficulties already indi-

cated, nor supply the proper incentive to the research worker, nor afford scope or prospects for men of more than average ability. The absence of such prospects is bound to militate against our chances of obtaining good recruits, to render our staff discontented, and to prevent our securing the best work from the best men.

Moreover, so long as students of a particular science are recruited sporadically on behalf of different departments as vacancies occur, Government will have to accept the men that happen to be left over, whatever their qualifications, after other and more regular demands have been supplied. The prospect of regular annual recruitment will enable the Government of India to fill its future demands for scientists, as it has hitherto done for engineers, forest officers and medical men.

24. The present system, under which the only chemists employed by the State are scattered through numerous departments without any organisation that can marshal the chemical forces of the country to attack problems of national importance, can give no help towards an active industrial policy.

We might quote as illustrating the inspiring value of a central co-ordinating authority, the work undertaken by the Munitions Board through its chemical adviser. The report of the conference of chemists at Lahore, which we append to this despatch, shows that even our isolated and scattered chemists can be moulded into one team for the purpose of suggesting new lines of research and means for turning the results to practical account, without overlapping and consequent waste of effort.

This experience, in the light of the magnificent results obtained in England by the Research Committee of the Privy Council, shows clearly how much may be expected from a system which provides a permanent organic connection between all chemists in Government employ.

25. The importance of a common system of recruitment and of a common service has recently been recognised by the Council of the Institute of Chemistry in the United Kingdom, (*vide* proceedings of the Institute of Chemistry, 1918, part IV, page 14), in a representation submitted by them to all Government departments in which chemists are employed; they state their opinion that "the time is opportune for taking steps to secure for the provision of chemistry a position corresponding to that occupied by the learned professions, and they feel that much would be accomplished towards the attainment of that end if, in the first place, adequate and uniform conditions of appointment were accorded to chemists directly engaged in the service of the State. The necessity for a definitely organised chemical service (both in peace and war) for all purposes of the State on which the science of chemistry has a bearing, has long been recognised in the chemical profession."

Conditions in India render the services of chemists employed under Government of even greater relative importance than in England. India is far more deficient than England in the knowledge of its raw materials and of the appropriate industrial processes; consulting chemists and chemists in private employ are almost entirely absent here, and this deficiency is not likely soon to be remedied. Research institutes with special reference to a particular industry in England, it would seem, will usually be financed and controlled by the industry itself, with a Government grant-in-aid, whereas in India the position will be precisely the opposite, and the industry will rely primarily on State chemists. We therefore agree with the Commission that the advancement of industries in India must depend for scientific assistance almost entirely on State-employed men, and these men will be far more concerned with the initiation of important new lines of development and research and far less with merely routine work, than is the case in England. The need of organisation is the greater, in that the functions of Indian State chemists are more important to the country; while their greater isolation and the consequent absence of a scientific atmosphere furnish an additional argument. The case for a State chemical service is thus even stronger in India than in England.

26. We are much influenced by the prospects which the proposed system affords of increasing the number of Indians in the scientific services. An

Indian appointed to an isolated post, or as an assistant to an isolated professor in a country where the scientific atmosphere is non-existent, or at the best exceedingly attenuated, lacks guidance and the stimulus of his fellows in the pursuit of scientific knowledge. His ambitions tend to become limited to the improvement of his pay and prospects, rather than of his professional attainments. His membership of an all-India service, based on the pursuit of a common science will increase the prestige of that science in his eyes and in those of the Indian public; the existence of the proposed imperial nucleus of scientists under a distinguished chief will provide him with an incitement to excel with assistance in his studies and with opportunity for training if he desires it.

27. The Commission propose that, if the principle of scientific services is approved, committees should be appointed to formulate proposals for the permanent organisation and the terms of employment of each such service, and for the location and equipment of research laboratories. We support this recommendation, subject to the condition that the terms of reference to each committee should include a direction to report as to the advisability of constituting all-India services for each well-defined science.

28. Without anticipating the conclusions of the proposed committee, we think it desirable, in view of criticisms which have been expressed in some of the annexures to this despatch, to indicate certain principles in the general administration of these services which should govern the relations between the members of the scientific services and the heads of departments and Provincial Governments, under whom many of them will be employed.

We do not think that members of scientific services should be seconded by the method which the Commission propose, *viz.*, by deputation for periods of 5 years at a time; but we consider that, as in the case of other services, an officer when once placed permanently under the orders of a Local Government, should remain with the Government for the rest of his service, unless the Government under which he is serving itself desires his transfer; or unless his services are required in a higher post or in a post requiring special qualifications outside the province, in which case the Local Government will recognise that the Imperial Government have a claim on them. This is the system which exists at present in respect of all similar services.

Local Governments would have complete liberty to appoint, after consulting the head of the service, to any post in their industrial or scientific cadre, any available member of the respective services; they would also be at liberty, in the special circumstances arising during the initial stages, to appoint to such posts men outside the service; but the subsequent admission to the all-India service of men so appointed would be entirely controlled by the Secretary of State. The Local Governments universally support the proposed scheme of scientific services, and though the Governments of the Punjab, the United Provinces and Bombay and the officers and public bodies consulted by them put forward certain criticisms of the scheme, especially with reference to the position of scientists in the Education Department, these criticisms are, we think, fully met by the foregoing explanation of the lines on which we think the proposed services should be administered.

29. We desire, however, to add a few remarks with special reference to the case of science teachers. We fully recognise that much is required of a scientific professor in a college, outside his scientific work. He must look on himself as a member of the body responsible for the tone of the college and for its general success. It will, therefore, we agree, be most undesirable that such a man should continuously have in mind the possibility of promotion outside his own department. We think, however, that this difficulty will be obviated by the general principle laid down by us above, *viz.*, that members of scientific services serving under the Department of Education should not be removed from that department, unless at the request of the educational authorities, or for posts requiring high administrative capacity, or special scientific qualifications.

The advantage to the Education Department of a system of scientific services will still be very considerable. In the first place, we consider that, though University and college science workers should be by no means entirely

divorced from technical research, their main sphere of activity should lie among problems of pure science. The proposed central scientific organisation should afford a means whereby such problems arising in the course of technical research can be referred to University and college laboratories.

Such co-ordination, both in respect of pure science problems and technical problems, can be most readily effected in cases where the educational researchers are themselves members of a scientific service. This policy will doubtless stimulate the interest in research work taken by students and professors. Officers who have entered the educational service as teachers may be in some cases expected to develop as research workers. The existence of all-India scientific services will afford a ready means for accommodating men whose aims in life have thus been diverted from one form of work to another. In the next place, the present system of recruitment of scientists into the Educational Service is capable of improvement, and far better results could be obtained with the aid and advice of watchful central agencies in India. The absence of a scientific atmosphere again has been particularly injurious to scientific officers in the Educational Service, and has led to great stagnation in respect of research work. This atmosphere will in future reach individual officers by the numerous channels of communication which will be created between them and the central agency on technical subjects, whether by way of correspondence, conferences and scientific publications, by the central staff's tours of inspection, or by officers spending some portion of their vacations at research institutes. The case of scientists at present employed under the Department of Education will obviously require careful treatment; such men should not be allowed to join the scientific services as a matter of course, but each case will have to be considered on its merits and there may still be classes of appointments for which men will have to be recruited independently. Further, the whole question, so far as it affects the employment of officers with scientific qualifications in colleges and universities, will have to be reviewed in connection with the proposals of the Calcutta University Commission regarding recruitment.

30. In addition to the opinions expressed in the letters received from Local Governments, two important conferences of chemists have recently put forward their views on the Commission's proposals. A record of their discussions is appended. A full meeting of the Sectional Conference of Agricultural Chemists at Pusa in February passed the following resolution:—

"That this Conference considers that in view of the intense local knowledge required for effective work for agricultural improvement by chemical methods, it is not desirable that the chemists in the Agricultural Departments should be formed into a service apart from the ordinary agricultural service in which the bond of union would be the science rather than its application. On the other hand, in addition to agricultural chemists attached to the Provincial Departments, this Conference is definitely of opinion that a strong central body of chemists should be maintained by the Imperial Department of Agriculture from whom Provincial Departments could draw for the investigation of special problems."

The main objection taken was, it will be observed, based on the idea that men would usually be transferred after 5 years periods. We have explained already that such idea forms no part of the system which we contemplate. It is also significant that the same resolution declared the necessity of a strong central body of chemists for the department of agriculture; and it may be added, the same meeting pointed out the desirability of equipping the agricultural research organisation to deal with certain industrial problems arising out of agricultural research. The sum of these conclusions seems to point to the desirability of supplying some agency which can correlate chemical research with agricultural and industrial problems, and of avoiding the needless expense of creating separate research *nuclei* for dealing with each separate class of chemical problems.

A conference of chemists was convened in Lahore in January 1919 by the Indian Munitions Board. It included not only Government officers, but also chemists attached to missionary colleges and employed under private firms. The

Conference passed no formal resolution, but strongly supported the proposed system of scientific services.

THE INDUSTRIAL SERVICE.

31. The position in respect of the proposed industrial service is somewhat different. In the first place, there are few, if any, existing officers, who correspond to the class of man whom it is proposed to recruit into the industrial service. In the second place, the question is here not of a science, but of a group of professions, among which that of mechanical engineering and its various specialised forms greatly predominates. The advantages to be derived from an expert central agency do not exist in the case of an industrial service to the same extent as in that of a scientific one; though the proposed central institutes of technical research will no doubt be of help to industrial officers of all classes. The advantages claimed for the proposal are mainly administrative, and will be best perceived by an examination of the disadvantages of any alternative system. The officers filling the higher posts must possess administrative capacity and business qualifications built up on a basis of technical knowledge. These necessary qualifications can only be obtained by training and experience in the lower ranks of the service, where the work will be mainly technical, but where there will be ample opportunities for the acquisition of business and administrative experience.

The alternatives to a service are, the engagement of men on short-time contracts, or the creation of a number of separate appointments, unconnected, unless possibly in small provincial departments of, at the most, half a dozen officers. In the case of the first system, though it is appropriate enough to engage highly qualified men on short-time contracts for specific enquiries, or other isolated pieces of work, it is clearly unwise to offer such terms to men who are to be engaged on duties which involve the application of a progressive and consistent policy over a long period, and the existence of close acquaintance and personal confidence between the public and Government officials. The first two or three years of an officer's career are spent in making himself familiar with local conditions; if he departs at the end of a five-year agreement, Government loses a trained man and has to replace him by an untrained successor. With regard to the second course, we can state definitely from our experience of applications for employment already received, that the best candidates greatly prefer an all-India service to a system of isolated posts. Such a system will labour under most of the administrative disadvantages which, we have already pointed out, attend the employment of isolated scientific officers. It will, in fact, practically mean a perpetuation of the admittedly unsatisfactory *ad interim* scheme proposed by the Commission, under which men will have to be sought wherever they may be found, with many probable failures; and it will be very much more expensive than a service, since, in the absence of settled prospects, members of the industrial department, unless retained by very high salaries, will be continually tempted to take up private employment. The institution of an industrial service seems to us also the best, if not the only means of training Indians of the right type to fill the higher industrial posts, whereas the alternative system of employing temporary experts must necessarily perpetuate the employment of Europeans.

The Government of the United Provinces dissent from the Commission's proposals, which are, however, accepted by all other Local Governments, notably by that of Madras, whose comparatively advanced experience in the actual working of a department of industries renders their opinion of special value, and by that of Burma, subject to the proviso, which they apply also to the case of the chemical service, that Indian members of such services should not be posted to Burma.

32. The arguments given by the Commission for the constitution of an all-India industrial service will be found in paragraphs 330-334 of their report; and those arguments have our concurrence, except that, though we agree that a training in some form of mechanical engineering will be in most cases the best basis of recruitment, we should not make this the

absolute rule. We think it may prove convenient to include in some cases men with other technical qualifications, who cannot appropriately be engaged on short-term contracts, but may possess or acquire business or administrative aptitude that may fit them for higher promotion. We also contemplate the necessity of engaging consulting experts on short-term agreements for definite pieces of special work. The position of members of the industrial service employed under Local Governments should be, in our opinion, as nearly as possible analogous with that already suggested by us for members of the chemical service.

We do not desire to formulate the conditions of the industrial service, until we have discussed the matter with Local Governments and received their proposals for their provincial establishments. By that time we hope to be in possession of the recommendations of the committee on the chemical service, which will doubtless afford a useful analogy. We wish, however, meanwhile to be in a position to offer and to allow Local Governments to offer the prospect of suitable posts in the future industrial service to recruits, most of whom will have, as recognised by the Commission, to be brought in at first on special terms; the engagement of such men will, it is presumed, be as a rule subject to some probationary period, by the expiry of which we hope to be in a position to include in the industrial service those of them who prove satisfactory.

AGENCY FOR THE PURCHASE AND INSPECTION OF STORES IN INDIA.

33. The remaining point, *viz.*, the purchase of stores in India, may be more briefly dealt with.

The present system under which the only specific organisation for the purchase of stores required for the use of Government is situated in London, has long been the subject of serious criticism both by politicians and by business men in this country. It is alleged, and not without reason, that this system discourages the purchase of Government stores manufactured in India and thus tends to perpetuate itself by withdrawing an important form of stimulus from nascent industries. We agree that this is not the spirit or intention of the rules, which give considerable scope for the purchase of Indian made articles. But in actual practice the absence of an expert buying and inspecting agency in India makes indenting officers unwilling to take the responsibility for the purchase of locally made articles, and inevitably leads to their placing their orders with the only Government agency properly equipped for purchase and inspection, *viz.*, the Stores Department of the India Office. A departure from this system is urgently and universally demanded; and its continuance would be looked on as an instance of the alleged economic selfishness of the British nation who, it will be said, are prepared to give away political concessions, but to part with nothing that touches their pockets.

The history of the past three years has shown some unexpected capabilities of India for local manufacture, even in face of the lack of expert workers and of essential plant arising out of war conditions; it has also shown the beneficial effect of Government purchase and inspection in encouraging Indian industries and inducing them to improve their methods and strike out fresh lines. A rough and ready system of purchase and inspection by expert officers, so far as these were available, was created, and will serve as a useful guide in working out the details of the future system which the Commission propose. Several provincial Governments, in particular those of Burma and the United Provinces, have pressed for a considerable degree of independence in respect of the purchase of stores. The former Government, indeed, ask for complete freedom from any control by the central Stores Department in India in respect of their power of purchase of Government stores for provincial use, and liberty to deal direct with the purchasing agency of any other Local Government. We doubt whether Local Governments, in the absence of actual experience in these matters, fully realise the waste of money that is bound to result from a system of isolated purchases by separate, and therefore competing, Government agencies without expert market knowledge; and the absolute

necessity of an expert and specialised inspecting agency, not only for finished articles, but, in many important cases, for raw material and processes of manufacture. At the same time, we fully appreciate the desire of Local Governments to encourage, as far as possible, their own local industries, and the necessity for the greatest degree of decentralisation that is practicable and economically safe. In this as in other matters, some system of compromise is necessary; but the ultimate decision must depend largely on the relative extent of imperial and provincial demands for the different classes of articles and of their production in the different provinces. We trust we may receive your approval of the general principle of a purchasing and inspecting agency in India for goods manufactured in India, when we propose at once to appoint a committee to work out a detailed scheme.

You will doubtless, when the probable effect of the new system has become apparent, consider the desirability of a reduction of the staff of the Stores Department of the India Office; and we shall probably also address you at a later stage regarding the desirability of including members of the technical personnel of some of our consuming departments in that staff.

COLLECTION OF COMMERCIAL AND INDUSTRIAL INTELLIGENCE.

34. In our letter No. 589-D. to Local Governments, dated 7th December 1918, we consulted them regarding the Commission's scheme for the collation and dissemination of commercial and industrial intelligence, which had a certain bearing on the important question of the relation of the central and provincial departments. No Local Government raises any objection to the scheme; but we do not put it forward for your approval at this stage, since it is not of the same importance or urgency as the four matters already dealt with; and we have not yet decided finally on the structure of the proposed agency, nor as to the department which should control it.

CONCLUSION.

35. We cannot conclude without placing on record our appreciation of the very thorough treatment accorded by the Commission to the difficult and highly technical subjects dealt with in their report. Many of them fall entirely outside the range of ordinary official work, and could not have been discussed save by persons with special qualifications and experience, who had made a prolonged and careful study of the subject. We esteem ourselves fortunate in having been able to secure the services of gentlemen with an extensive range of Indian business experience, who were ready to devote much valuable time to the work, and have brought into the enquiry a wholly fresh atmosphere. We think that the labours of the Commission have resulted in well considered and practical proposals for an active industrial policy, for which the report abundantly proves the necessity.

36. Our proposals for the present are, shortly:—

- (1) that your approval in principle be accorded to the proposed provincial departments of industries, on the general lines set forth by the Industrial Commission, but subject to further consideration in respect of details and to any sanction in respect of particular proposals, whether by yourself or by the Government of India, that may be required;
- (2) that your approval in principle be accorded to the proposed Imperial Department of Industries on the general lines set forth in this despatch, subject to the submission of detailed proposals later on. The relations of the Imperial and Provincial Departments of Industries should be on the lines indicated in this despatch;
- (3) that for the present, and until a vacancy occurs or is created in our Council, the development of the scheme be made over to the Indian Munitions Board, modified as may appear necessary, and placed under the direct control of His Excellency the Viceroy;

- (4) that your approval in principle be accorded to the creation of all-India scientific services, and of an all-India industrial service; of an organisation for the purchase and inspections of stores in India; of the appointment of a committee to consider the lines on which an all-India chemical service should be constituted; and of a committee to work out the detailed organisation for an Indian Stores Department.

37. Nearly all the most important recommendations of the Commission depend on the main principles to which we request your approval in this despatch. There are, however, certain proposals which can be taken up independently, and with these we are proceeding as rapidly as possible. The statement appended (Annexure 5) will show the extent to which action has already been taken, either while the Commission were sitting or since their report has been received.

We have the honour to be,

SIR,

Your most obedient, humble Servants,

CHELMSFORD.

LIST OF ANNEXURES.

1. Letter No. 589-D. of 7th December 1918, from the Government of India to Local Governments inviting their opinions on the report of the Indian Industrial Commission.

2. Replies from the—

(a) Officiating Chief Commissioner, Delhi, No. 757-C. and I., dated the 6th February 1919.

(b) Chief Commissioner of Assam, No. 880-R., dated the 18th March 1919.

(c) Government of Bihar and Orissa, No. 136-F. T., dated the 19th March 1919.

(d) Chief Commissioner, Central Provinces, No. 1415-A.-XIII, dated the 19th March 1919.

(e) Government of the Punjab, No. 8976 (C. and I.), dated the 1st April 1919, and enclosures, namely :—

(i) Memorandum on the proposed Imperial Chemical Service by Mr. H. J. Maynard, Financial Commissioner, dated the 24th January 1919.

(ii) Memorandum on the proposed Imperial Chemical Service by Messrs. Wilsdon (Agricultural Chemist), Carter Speers (Professor of Chemistry, Forman Christian College) and Rai Sahib Ruchi Ram Sahni (*ex*-Professor of Chemistry, Government College).

(f) Government of the United Provinces, No. 704, dated the 4th April 1919, and enclosures, namely :—

(i) Local Government's Resolution No. 994-XVIII, dated the 14th May 1918.

(ii) Letter from the Upper India Chamber of Commerce, Cawnpore, dated the 26th February 1919.

(iii) Letter from the United Provinces Chamber of Commerce, Cawnpore, No. 6806, dated the 3rd March 1919.

(iv) Extract from the Proceedings of the Provincial Legislative Council, dated the 24th January 1919.

(g) Government of Bombay, No. 3726, dated the 10th April 1919.

(h) Government of Madras, No. 792, dated the 28th April 1919, and enclosure, namely :—

Letter from the Director of Industries, Madras, No. G. C.-295, dated the 20th January 1919.

(i) Chief Commissioner and Agent to the Governor General, North-West Frontier Province, No. 1621-Ag. (Revenue), dated the 1st May 1919.

- (j) Government of Bengal, No. 2050-Com., dated the 3rd May 1919, with enclosure, namely :—

Statement showing the expenditure involved in connection with the proposed Department of Industries, Bengal.

- (k) Government of Burma, No. 739-M., dated the 19th May 1919.

- (l) Précis of foregoing replies.

3. Proceedings of a conference for the consideration of the organisation of Chemical Research in India, held at Lahore, January 8th, 1918.

4. Proceedings of a Sectional Meeting of Agricultural Chemists held at Pusa in February 1919.

5. Statement showing action taken on Commission's recommendations.

No. 589-D., dated Delhi, the 7th December 1918.

From—A. H. LAY, Esq., C.I.E., I.C.S., Joint Secretary to the Government of India,
Department of Commerce and Industry,

To—All Local Governments and the Hon'ble the Chief Commissioners of the
Central Provinces, Assam, North-West Frontier Province and Delhi.

I AM directed to address you on the proposals made in the Report of the Indian Industrial Commission for the establishment of an Imperial and Provincial Departments of Industries. The report covers a wide range of subjects and includes a number of incidental recommendations which, though important in themselves, can be reserved for separate consideration in due course. The basis of the main proposals, however, may be summed up in the following three general propositions:—

- (1) That the improvement of Indian Industries is of vital importance to the future of the country; that it will throw on Government many new and serious responsibilities, and requires a consistent and co-ordinated effort for its achievement. These considerations appear to necessitate the creation of a special department of the Government of India to formulate and direct the new policy:
- (2) That for obvious reasons the actual execution of the policy must mainly be effected by authorities under the control of Local Governments:
- (3) That, in view of the past history of Indian Industrial development and of the present conditions of industrial success in other countries, no real progress can be expected without an expert study of industrial possibilities and expert advice and assistance in undertaking the solution of industrial problems, and that the necessary staff can be best obtained and most advantageously employed by the creation of organised services.

2. With these three basic propositions the Government of India are in general agreement; but the principles on which the functions of the imperial and the provincial departments should be correlated require some further discussion in the light of considerations arising out of the report on Indian Constitutional Reforms. The Government of India do not wish at the moment to commit themselves to any definite view as to the exact division of functions between the Imperial and Provincial Governments. It appears to them obvious, however, that in certain directions the Government of India will not be able to divest themselves of responsibility. Industries, for instance, the development of which is necessary in order to secure national safety; industries, again, which though not perhaps essential from the point of view of national safety, yet affect materially such wide economic interests that their development in any particular direction is a matter of more than provincial importance; possibly industries for which no form of assistance will be of real value which does not involve serious financial responsibility, or industries which can only be developed by the employment of a wide range of technical staff; these suggest themselves as matters which may have to be regarded as of imperial concern.

3. While, however, the Government of India feel that they cannot divest themselves of the grave responsibility which is entailed by the decision to accept the policy of attempting the improvement of the industries of the country on the widest possible scale, they fully recognise that the actual development of industries must in the main be carried out by local authorities. It is particularly, therefore, with regard to the proposals contained in Chapter XXI of the Report, on provincial department of Industries, that I am now to address you. It will be realised that a volume of work, which will be extensive, will, in any case, even from the beginning, have to be entrusted to Local Governments, to many of whom the problems to be dealt with will be entirely new, and the work will entail on them responsibilities which cannot be performed without the assistance of a wide range of technical advice and experience.

4. In some provinces the nucleus of a provincial department of industries already exists; in others this still remains to be created; in all alike, as it seems to the Government of India, there is great scope for fresh activities and an urgent necessity for the employment of a considerably extended staff. Without at the moment discussing the precise proposals for the organisation of a provincial department which have been made by the Commission, I am directed to draw your special attention to the recommendation that the staff employed should form part of an Indian Industrial service, which will in the main be composed of men whose training has qualified them as mechanical engineers. There appear to the Government of India to be three possible methods of recruiting the men required for the work of industrial development in the provinces :

- (a) they may be casually recruited on terms special to themselves ;
- (b) they may form part of an organised provincial service ; or
- (c) they may form part of an organised all-India service.

Casual recruitment will, in the view of the Government of India, unquestionably entail unnecessary expenditure, while at the same time it will fail to afford sufficient incentive to the training of Indians in the higher forms of scientific and technical education. It is likely, moreover, to give rise to discontent on the part of officers in regular services who would in general be employed on a lower rate of pay than men recruited on terms special to themselves. These objections would be partially, but not wholly, removed, if there could be in each province a separate organised industrial service. On the other hand, it seems clear that even the most advanced province could not provide for more than a small expert cadre, which would afford inadequate scope and insufficient prospects to ensure the recruitment of the right type of men at a reasonable cost; while in any event there would have to be a nucleus of experts employed under the Central Government. The Government of India are provisionally of opinion, therefore, that the most promising line of advance will be found in the direction of creating in the beginning a well-equipped central organisation and decentralising its functions as rapidly as the progress made and the experience gained will permit.

5. The Commission's scheme for an industrial service contemplates the recruitment of its members into an all-India service, and their employment mainly under Local Governments. There would, however, be some experts, who would either be lent for particular pieces of work to Local Governments, or retained directly under the Government of India for researches in which more than one province may be simultaneously interested. The men employed under the Local Governments would ordinarily be retained by them, as is usual in the case of the Agricultural, Forests and other Imperial Services; but Local Governments would be entitled to ask the Government of India to replace men who were not found suitable for the work required of them, and the Government of India might equally find it necessary to ask occasionally for the surrender of men to meet the needs of other provinces or to fill higher posts under the Central Government. It must be remembered that in the interests of the staff no less than in that of the work itself scope must be provided for the promotion of men whose experience and qualifications render them suitable for higher responsibilities than the continued performance of mere laboratory work; a purely provincial service may not be able to provide such opportunities without unjustifiable expense, while to withhold them will lead to discontent and waste of power. Some such system appears *prima facie* to the Government of India to afford the form of organisation most suitable to the growing industrial requirements of the country as a whole.

6. Much the same remarks apply to the Commission's proposal to create an Imperial Chemical Service. The Government of India do not contemplate interference with the activities of Local Governments in research work, but they consider it important to provide an agency by which Local Governments can be assured that the officers engaged in research are keeping up to the required standard. They believe that a properly equipped central research organisation will be of great value in the advice and assistance which it will be able to afford to Local Governments, and that the waste which the

duplication of equipment and the overlapping of research work on some questions involve, when carried to an extent which results in the neglect of others, affords substantial reasons for the creation of an effective agency for securing a full and free exchange of information and the correlation of results.

7. An important part of the Commission's recommendations relates to an alteration in the existing system for the purchase of Government stores. The suggestion for a central purchasing department has been made before, even in the period prior to the war, while, since the war broke out, the functions of such a department have in fact been exercised in a large measure by the Indian Munitions Board. It may be urged that the existence of a central purchasing department in this country may lead to increased delays in obtaining stores from England. On the other hand, it may reasonably be anticipated that with the encouragement and development of industries in this country there will be a great reduction in purchases from England, while the advantages of central control in securing economy by amalgamating indents and purchasing in bulk—advantages which have been proved beyond question under war conditions—seem to outweigh any of the reasons which may be urged in favour of a continuance of the system existing prior to the war, by which individual officers indent on the Stores Department of the India Office for stores required from England. The Government of India believe the Commission's recommendation to establish a central organisation in India for the purchase of Government stores (a recommendation which was also made in the Report of the Public Works Department Reorganisation Committee) to be one of the most valuable of their proposals for the development of Indian industries. The Commission at the same time contemplate considerable decentralisation from the Central Stores Department to Provincial agencies, which will be a necessary part of the provincial departments of industries, and propose that the degree of decentralization should be examined by a small expert committee.

8. It will be observed that among the subsidiary activities of the Provincial Departments of Industries the Commission include the collection of local commercial and industrial intelligence. In this respect their proposals seem to be generally consonant with the views of Local Governments expressed in reply to Mr. Enthoven's letter No. 5256-5264—10, dated the 29th of June 1914, on the subject of the re-organization of the Commercial Intelligence Department.

9. I am now to ask for an early expression ^{of the views of His Excellency the Governor.} ^{His Honour the Lieutenant-Governor} of your

nor in Council

nant-Governor (in Council), on these general proposals, viz.:—

views

- (a) whether Provincial Departments of Industries should be created, or developed, on the lines suggested by the Commission ;
- (b) whether the responsibilities of these Departments should include—
 - (1) the local purchase of Government stores, subject to such degree of centralization as may be decided upon after consideration of the report of a special committee, and
 - (2) the collection of local commercial and industrial intelligence ;
- (c) what arrangements are most suitable for utilizing the officers of the proposed Indian services, industrial and chemical, in order to combine the advantages of a common system of recruitment, and central criticism in wider questions of research, with the control which Local Governments must necessarily exercise in executive and administrative matters and to secure the fullest utilisation by the Local Governments of their own staff on local problems ; and
- (d) what generally should be the relations between the Imperial and Provincial Departments.

The Government of India trust that the views of the Local Government may be forwarded to them not later than March next.

10. If the principle of Indian industrial and chemical services is accepted questions will arise with regard to the manner in which specialists, already employed under the Government of India or under Local Governments, are to be brought into the services, as well as with regard to the staff to be recruited in the near future, the method of recruitment and the status and emoluments of individual officers. For the immediate purpose of an answer to this letter these matters need not be discussed, though, no doubt, ^{you} the Local Government will begin without delay to take them into consideration. The immediate intention of this reference is merely to obtain the general views of the Local Government on the main principles involved. Meanwhile the Government of India intend to work out a scheme for giving such effect to the principle of an Imperial Department of Industries as can be given without an immediate alteration of the law governing their constitution. It will be the duty of this Central Department, as soon as it is formed, to consult the Local Governments on the numerous incidental proposals made by the Commission, which, however important in themselves, it is unnecessary to discuss for the immediate purpose of coming to a decision on the proposal to establish Provincial Departments of Industries. Such are the proposals in Chapter X on technical and industrial education, those in Chapter XX on industrial finance, the suggested increase of the Forest Department by the addition of forest engineers, the proposals regarding the inspection of Government mining concessions by the Geological Survey Department and the simplification of the mining rules, suggestions with regard to the acquisition of land on behalf of industrial concerns, the welfare of labour, the transfer of the preventive work of the Northern India Salt Revenue Department to the Local Governments concerned, and sundry other matters.

-No. 590-D.

COPY forwarded to all Departments of the Government of India.

By order, etc.,

G. S. HARDY,

Under Secretary to the Government of India.

No. 757-C. & I., dated Delhi, the 6th February 1919.

From—The Hon'ble Mr. C. A. BARRON, C.I.E., I.C.S., Officiating Chief Commissioner, Delhi,

To—The Joint Secretary to the Government of India, Department of Commerce and Industry.

I HAVE the honour to refer to your letter No. 589-D., dated the 7th December 1918, regarding the proposals made in the report of the Indian Industrial Commission for the establishment of an Imperial and Provincial Department of Industries.

As there is no scope for the creation of a Provincial Department of Industries in Delhi which will presumably be the home of the Imperial Department, I regret that I am not in a position to offer any useful suggestions on the proposals enumerated in paragraph 9 of the letter under reply.

No. 880-R., dated Shillong, the 18th March 1919.

From—The Hon'ble Mr. A. W. BORNHAM, C.I.E., I.C.S., Second Secretary to the Chief Commissioner of Assam, Revenue Department,

To—The Secretary to the Government of India, Department of Commerce and Industry.

I AM directed to refer to the Government of India's letter No. 589-D., dated the 7th December 1918, on the subject of the proposals made in the report of the Indian Industrial Commission for the establishment of an Imperial and Provincial Department of Industries.

2. The Chief Commissioner agrees that Provincial Departments of Industries should be created on the lines suggested by the Commission. He accepts the view that the provincial Director of Industries should ultimately be an expert officer of the department, and he approves of the Commission's proposals in connection with a provincial Board.

3. As regards the purchase of Government stores, Sir Nicholas Beatson Bell is strongly in favour of purchase in India. It is already, he believes, the declared policy of the Government of India, that all stores should be purchased in India provided that they can be obtained of the requisite quality at a price not materially higher than the price at which they can be obtained from Home. He hopes that this policy will be steadily and strenuously maintained in spite of all opposition. At present, however, he is not prepared to express a definite opinion on the specific proposals of the Commission for a central purchasing organisation in India. He is inclined to advocate a more elastic system, but he reserves his final recommendation.

4. The Chief Commissioner agrees that the collection of local commercial and industrial intelligence should be included amongst the responsibilities of the provincial departments. It is probable that in Assam the Director would at the outset have to depend on the existing machinery for the collection of such information, but the department would, as its activities extend, gradually acquire its own channels of information.

5. The arrangements under which officers of the proposed Indian services should be utilised by Local Governments should, in the Chief Commissioner's opinion, be much the same as those now in force in the case of officers of the Imperial Agricultural and Forest services. A Local Government should borrow such officers as it requires from the Imperial service, and during their service on the provincial staff, they should be entirely under the administrative control of the Local Government.

6. The Chief Commissioner considers that the officers of the Imperial department should be advisory in their relations with the provincial departments. The provincial department should look to the Local Government for orders, though its officers might suitably correspond direct with the Imperial department on professional matters.

No. 1367-F. T., dated Patna, the 19th March 1919.

From—The Hon'ble Mr. J. D. SIFFON, I.C.S., Secretary to the Government of Bihar and Orissa, Financial Department,

To—The Secretary to the Government of India, Department of Commerce and Industry.

I AM directed to refer to your letter No. 589-D., dated the 7th December 1918, in which the Government of India intimate their intention to organize an Imperial Department of Industries as recommended by the Indian Industrial Commission and ask for an expression of the views of the Lieutenant-Governor in Council regarding the creation of a Provincial Department of Industries, its functions and relations with the Imperial Department and other connected matters.

2. Early in the history of this province the need was felt for an officer to study and develop its industries; and in Mr. McPherson's letter No. 1269-E, dated the 30th June 1915, it was proposed that such an officer should be appointed. The shortage of officers during the war and the appointment of the Industrial Commission led to the postponement of the scheme, but the Lieutenant-Governor in Council is strongly of opinion that a department of industries of the kind contemplated by the Commission is likely to be of great advantage not only to Bihar and Orissa but also to other provinces which draw from it the material of their industries. But while giving a theoretical approval to the creation of such a department, His Honour in Council wishes to make it clear that the revenues at present available for provincial expenditure are altogether inadequate for giving effect in Bihar and Orissa to the proposals of the Industrial Commission. In the present temporary financial settlement no allowance was made for such a department and the small normal expansion under that settlement is not sufficient to provide for the development of other indispensable

branches of administration. It has been calculated that the recurring cost of the superior staff alone required at the outset for a department of industries without any provision for office establishment, contingencies and travelling allowance will be between Rs. 1,00,000 and Rs. 1,23,000 while the detailed statement of

Paragraph 359 Jamalpur School of Engineering	2,75*
" 361 School of Mines	5,56
" 361 Evening Mining Classes	1,51
" 371 Technological Institute, Patna	6,00
" 372 Training of Mechanical Engineers	4,00
" 374 Metallurgical Institute at Sakchi	16,00
Total	35,82

* Partly defrayed by East Indian Railway.

expenditure given on page 227 of the Commission's report contemplates, for technical education alone, recurring charges of over ten lakhs in this province, exclusive of a capital outlay of nearly 36 lakhs. The statement includes the present cost of technical and industrial education, which is approximately Rs. 1,10,000. It is presumed that the School of Mines and the Metallurgical Research Institute will be established and maintained by the Imperial Government in the same way as the Agricultural Research Institute at Pusa. But it is clear that even without these institutions the Commission's proposals involve heavy and continuous additional expenditure which cannot be met from provincial revenues on their present basis. And it is also to be remarked that from the point of view of provincial finance the outlay would be unremunerative. The prosperity, which would ensue from industrial development, would not be reflected to any great extent in the revenues which it is proposed to assign to the provincial Governments, such as registration, excise and court-fees, though it would lead to large increases in the customs, income-tax and railway receipts, all of which will go to swell imperial and not provincial resources. The only direct profit, which the Bihar and Orissa finances will reap from industrial advance will take the form of small local taxes which must be spent on the specific objects for which they are collected. The Lieutenant-Governor in Council, therefore, does not see any practical scope for a progressive Industrial Department unless liberal allowance for such expenditure is made in the coming financial settlement for the province.

3 Apart from the question of finance on which the whole scheme depends, the Local Government agree generally to the proposals in your letter. For the time being it may be necessary to appoint a Director of Industries from the Indian Civil Service, as suggested in paragraph 311 of the report, but this officer and other officers of the superior staff would eventually be replaced by members of an Imperial Industrial Service or be absorbed in it. The balance of advantage seems also to be in favour of an Imperial Chemical Service. Appointments such as circle officers should be made by the Local Government and the posts so created formed in time into a provincial service.

4. The Lieutenant-Governor in Council does not approve of the proposal that the Director should also be a Secretary to Government. The Director will be a touring officer and head of a department and it is necessary that he should be free to move about the province; and, although like other heads of departments he should have free access to Government, it is desirable that his administrative proposals should be subjected to independent criticism in the Secretariat, nor is it apparent why the proposals of the Director of Industries should require such examination less than those of other heads of Departments such as the Inspector-Generals of Police, Prisons, or Hospitals. When the Director of Industries ceases to be a Civilian officer and is chosen, as he presumably will be, from the ranks of outside business men such examination will become particularly desirable.

5. Imperial Service officers should be lent to the provinces on conditions similar to those obtaining in the Agricultural and Forest Departments; that is, the Local Government through the Director should have complete control over them but the Director and, with his cognizance, his subordinates should be encouraged to maintain relations with the heads of their services and the research institutes with a view only to obtaining technical assistance and advice.

6. The collection of commercial and industrial intelligence will necessarily be undertaken by the Director and on all questions of fact, as opposed to those

of policy and administration, he should be allowed to communicate with the officers of the Imperial departments direct. This will not only enable the Imperial department to keep in touch with what is going on in the provinces but be of great assistance to the provincial Director himself.

7. The Lieutenant-Governor in Council approves in principle the creation of a central purchasing agency, provided that the Local Government has power to purchase direct all articles that may be obtained in India. In practice the provincial Director would usually avail himself of the advice of the Imperial expert and, where economy could be effected, would readily place his orders in the hands of the Controller of Stores, especially when articles had to be procured from distant parts of India. But complete freedom for the provinces to buy direct is essential, partly in order that local manufacturers may be encouraged, where desirable, partly that time may be saved in cases of urgency and partly that the Imperial department may itself reap the benefit of constant competition from without. On the other hand, there seems to be no objection to all ordinary, as opposed to emergent, indents on the Director General of Stores at the India Office passing through the hands of the Controller in this country. The Local Government have, however, not yet been able to collect full information on the purchase of stores by its departments and would prefer that these views should be regarded as provisional, pending the appointment of the committee suggested by the Commission.

No. 1415-A—XIII of 1918, dated Nagpur, the 19th March 1919.

From—The Hon'ble Mr. J. F. DYER, I.C.S., Third Secretary to the Chief Commissioner, Central Provinces, Commerce and Industry Department,

To—The Secretary to the Government of India, Commerce and Industry Department.

I AM directed to reply to the Government of India's letter No. 589-D, dated the 7th December 1918, in the Department of Commerce and Industry, in which the opinion of this Administration is invited on certain general proposals arising from the report of the Indian Industrial Commission. These proposals are specified in paragraph 9 of the letter, and in paragraph 10 it is stated that the Government of India merely wish the Chief Commissioner to submit his general views upon the main principles involved.

2. The first proposal is that a Provincial Department of Industries should be created or developed on the lines suggested by the Commission. To this proposal Sir Benjamin Robertson gives his full support based, as it is, upon practical experience gained since the appointment of a Director of Industries for the Central Provinces in 1911, from the working of a small nucleus organisation which now consists of a Director advised by a Board of Industries and assisted by a small staff of experts. The functions of this Department have included the control of factory and boiler inspection, the improvement of cottage industries, industrial education in schools of handicrafts, and the furnishing of advice to Government on commercial and industrial matters. These functions had been extended by the temporary necessities of war time, and a whole-time officer had for some time been employed as Director of Industries and Controller of Munitions. The Chief Commissioner, subject to what is said in the next paragraph as to filling the appointment in the immediate future, will ask that this whole-time post should be made permanent; and he will also propose the creation of a post of Deputy Director of Industries. This initial machinery is, in his opinion, necessary to work out the future detailed organisation of the department after an examination of the economic possibilities of the Province.

3. Sir Benjamin Robertson considers that to begin with it will be preferable to appoint as Director of Industries an officer of the Commission, who would carry through the work of organisation and give the necessary training in mastering administrative procedure and in acquiring local knowledge to the technically qualified officer whom it is hoped to secure as Deputy Director. This latter officer should be a man of the educational and other qualifications which will, in due time, fit him for the post of Director. At the present time, on account of the number of officers to whom leave must be given, it will not be possible to

get an officer of the Commission as whole-time Director, and the Chief Commissioner therefore has appointed Mr. Crosthwaite, Registrar of Co-operative Credit Societies, to be Director in addition to his other duties. For the next two months, however, Mr. Crosthwaite will be on special duty to make himself acquainted with the problems that are likely to arise.

4. When the changes now contemplated in the constitutional structure of the Imperial and Provincial Governments have been introduced, the Chief Commissioner will consider how best to co-ordinate the activities of the Department of Industries with those of the Departments of Forests, Irrigation, Agriculture and Co-operative Societies.

5. The Government of India enquire whether the responsibilities of the Imperial and Provincial Departments should include:—

(1) the local purchase of Government stores, subject to such degree of centralisation as may be decided upon after consideration of the report of a special committee, and

(2) the collection of local commercial and industrial intelligence.

Subject to such conclusions as he may arrive at after considering the report of the proposed special committee, Sir Benjamin Robertson is disposed to favour the proposals made by the Commission with regard to the purchase of stores. He considers, however, that every opportunity should be taken to encourage the local production of manufactured articles by means of local purchase. It would, in the Chief Commissioner's opinion, be an advantage to place the Director of Industries, by virtue of his responsibility for the purchase of stores, in a position which would carry weight with local manufacturers. He thinks also that the proposals of the Commission will, if properly worked, reduce the long delays which occur under the present system of supply.

6. As regards the collection of local commercial and industrial intelligence, Sir Benjamin Robertson approves of a system which assigns to the Director of Industries the responsibility for collection and commenting on statistics of rail-borne traffic, and which leaves him free to receive and utilise statistics collected and commented on by the heads of the other administrative departments. The Chief Commissioner would emphasise the desirability of retaining a close connection between commerce and industry and he accepts, generally, the proposals made by the Commission.

7. Next, as regards the questions raised in paragraph 9 (c) of the letter under reply, I am to say that, with the example of the Geological Survey in view, there can be no doubt of the advantages of a common system of recruitment, while the prestige of an Indian Service is a very valuable factor in building up a scientific and expert staff. Sir Benjamin Robertson is convinced that without such a staff the new policy formulated by the Commission cannot be successful; he has himself experienced some of the difficulties to which the Commission allude in paragraph 120 of their report as inseparable from the existing arrangements. At the same time he favours the adoption of a system by which the experts allotted to Local Governments should ordinarily and normally remain so attached during their service, in the same way as the officers of the Agricultural Service are at present attached. The Chief Commissioner considers, moreover, that the appointment of officers belonging to the Imperial Services to posts within the Provincial Industrial Department, as well as the promotion of such officers while thus employed, should be matters entirely within the Local Government's own control. Nor would he allow any position to arise under which the seniority of an officer in one Province might be supposed to give him some sort of claim to appointment to a higher administrative post in another province; otherwise he generally accepts the suggestions contained in paragraph 5 of the letter under reply. It is also in the Chief Commissioner's opinion desirable (i) that a Local Government should be allowed to recruit men on special conditions, not necessarily with a view to their ultimate absorption in the Imperial Services but on the understanding that they might, subject to the agreement of the Government of India, be so absorbed; and (ii) that it should be open to a Local Government to initiate any fresh lines of research that it may consider necessary, though in this connection Sir Benjamin Robertson quite agrees that the

advice of the chief scientific officers of the Imperial Government should be obtained on such proposals. He is convinced of the general soundness of the idea of scientific services on the lines proposed by the Commission, and he has not thought it desirable to consult the local officers who would be affected by the proposals, as the opinions of two or three isolated officers are not likely to be representative. He understands, moreover, that the question has been discussed by scientists at Lahore, Bombay and Pusa during the last fourteen months, and that the Government of India are in possession of the results of those discussions.

8. As regards the relations between the Imperial and Provincial Departments, I am to say that the Chief Commissioner recognises that a general responsibility attaches to the Government of India in respect of the new policy. He thinks, however, that this responsibility should be fulfilled by the provision of advice, and that it should not extend to interference in matters of executive detail within a province, save in exceptional circumstances where it is necessary to safeguard extra-provincial interests from serious loss. Sir Benjamin Robertson would welcome the fullest assistance from the Imperial Department and its officers by way of advice and personal discussion; indeed, without such assistance and advice he is unable to see how the Provincial Department of Industries can properly exercise its functions. But, on the other hand, if schemes framed by Local Governments, within their general competence, have to be submitted in all cases to the Government of India to ensure that they do not offend against certain principles, he fears that delay and friction will result and will impede work very seriously.

No. 8976 (C. & I.), dated Lahore, the 1st April 1919.

From—The Hon'ble Mr. O. F. LUMSDEN, I.C.S., Financial Secretary to the Government of the Punjab, Department of Commerce and Industry,

To—The Secretary to the Government of India, Department of Commerce and Industry.

I AM directed to invite a reference to Mr. Ley's letter No. 589-D., dated the 7th December 1918, asking for the views of this Government on certain general proposals made in the report of the Indian Industries Commission. In order that the subject might receive the most careful attention a representative committee consisting both of officials and non-officials was assembled to discuss the proposals; while the Lieutenant-Governor has also enjoyed the advantage of an informal discussion with Mr. Low who was deputed by the Government of India to explain to Local Governments the Commission's recommendations.

2. In connection with the first general proposition laid down by the Government of India in paragraph 9 (a) of their letter the primary suggestion that there should be a provincial department of industries is one which has already been referred to the Government of India by this Government and its utility is so apparent that further comment is unnecessary. The place which this department will take in the general scheme of Government cannot of course be properly determined until any constitutional changes consequent on the joint report of the Secretary of State and His Excellency the Viceroy have been finally settled, but His Honour is confident that there are few measures so likely to receive the support of all classes as one which aims at the general improvement of industry in India.

3. The Lieutenant-Governor is prepared to accept generally the Industries Commission's definition of the functions of the new provincial department as laid down in paragraph 306 of the Report and would also offer one or two suggestions. The Indian members of the committee referred to above were impressed by the fact that the catalogue of the department's duties did not comprise any which would bring the department directly into touch with banking and joint stock company organization. They urged that the recent history of such institutions in the Punjab pointed to the desirability of close contact and sympathetic and helpful control. It is understood that the Commission hope to establish contact between the department and the various business organizations through the Board of Industries which would include a

number of non-officials, merchants and manufacturers. It is open to question, however, whether by this method the Department of Industry could have access to the detailed information regarding banks and joint stock companies which would be necessary if real assistance is to be afforded. In the Punjab the duties of Registrar of Joint Stock Companies do not occupy the whole time of one officer and they are at present performed by the Registrar, Co-operative Societies. Owing to the steady growth of co-operation the Registrar has but little time to devote to company work though this may yearly be expected to become more important. The Lieutenant-Governor is of opinion that the suggestion made on a previous occasion in Punjab Government letter No. 1272-S. (C. & L.), dated the 28th August 1916, that in the Punjab at any rate the definition of the duties of the Industries Department should include those now performed by the Registrar of Joint Stock Companies is deserving of serious consideration.

4. In connection with paragraph 30C-C., the Lieutenant-Governor would enter a *caveat* on behalf of general education which would be in danger of complete exclusion under any system of technical and industrial education superintended solely by the Industries Department. There is no doubt that the Commission realised the supreme importance of general education as for instance in paragraph 142 of the Report. But while maintaining the ultimate responsibility of the Industries Department for administration His Honour would give more specific effect to the recommendation of the Commission made in paragraph 173 of the Report and would safeguard the interests of general education both by prescribing some definite procedure whereby the Education Department could make itself heard in the management of technical and industrial schools and by enjoining a dual responsibility for inspection. In the Punjab the case could be met by the continuance as a governing authority for Technical and Industrial Schools of the body of officials and non-officials which at present exists in the form of an Advisory Committee for Industrial and Technical Education.

5. With regard to the organization and the interior economy of the new department His Honour finds himself in substantial agreement with the recommendations of the Industries Commission except in one or two particulars which will be subsequently discussed. Sir Michael O'Dwyer after appointing a Director and a Board constituted as recommended by the Commission on the model of the United Provinces would entertain the establishment discussed in paragraphs 310—319 of the Report as circumstances from time to time render additions necessary.

6. Certain differences of opinion have been found to exist both in regard to the relations of the Director with the Local Government and the composition of the Board of Industries. With these questions has been discussed another proposal originally mooted by the Public Services Commission (paragraph 4 of annexure I) for the appointment of a special officer—whether an additional member of the Board of Revenue or an additional Financial Commissioner or a Divisional Commissioner—to undertake control of the various development departments. Many objections have been urged against the recommendation that the Director of Industries should be a Secretary to the Local Government. The benefits of independent criticism which follow from the introduction of a third mind must be set against any disadvantages which may arise from diminished expedition in the disposal of work; and under the new constitutional scheme where possibly a minister or councillor without commercial knowledge will be placed in charge of Industries the direct submission of schemes by a Director of perhaps limited general administrative experience might lead to serious consequences. Again the proposals for the composition of the Board of Industries make somewhat inadequate provision for the co-ordination of other departments, *e.g.*, veterinary, agriculture, fisheries, co-operation and forests, though such co-ordination would appear to be essential. The Lieutenant-Governor feels that there is a strong *prima facie* case for the appointment of a Development Commissioner who would act as Secretary to Government and who would be able to bring together, in a way not open to a minister or a member, the various departments specified above. The nomination of this officer as Chairman of the Board of Industries would obviate the

necessity of appointing heads of departments as permanent members of the Board or of co-opting them for special purposes.

7. In this connection His Honour would bring to the notice of the Government of India the fact that the non-official members of the committee consulted did not view with suspicion the appointment of officials as permanent members of the Board but on the contrary considered that where the co-ordination of working was not secured by the appointment of a Development Commissioner the selection of heads of departments for this purpose was absolutely necessary. His Honour would demur to the suggestion that the Board of Industries should control or even advise on the appointment and promotion of the staff as he fears that such an arrangement would introduce an undesirable element into its deliberations. He approves, however, of the delegation of considerable financial powers to the Board so as to give reality to its working and would cite the case of the Sanitary Board which *mutatis mutandis* might suitably be taken as a model for the new creation so far as functions and powers are concerned.

8. It has been accepted without question that the appointment of a Director with the qualifications recommended in paragraph 311 of the Report is an ideal policy, but it is felt that it is very unlikely that any of the existing services could supply an official with these requirements. His Honour believes that it will be a matter of great difficulty to find first class or even second class business men or industrialists willing to accept the appointment on the pay proposed so that it will probably be necessary, at first at any rate, to have recourse to one of the existing services for a Director.

9. The Lieutenant-Governor considers that the proposals in paragraph 9 (b) of the letter under reply are quite unexceptionable and indeed would question whether the collection of local commercial and industrial intelligence can be successfully carried out except by the newly constituted Department of Industries.

10. The proposals to form Indian Services Industrial and Chemical have been subjected to severe criticism. In the case of the former it has been urged that while the higher service will be useful it will not command engineers of sufficient talent to make recourse to independent consulting engineers unnecessary. His Honour cannot, however, accept this as a serious argument against the constitution of such a service since it is obvious that the personnel which the Commission desire to recruit will be possessed of general qualifications enabling them to dispose of the great majority of the problems placed before them, which will ordinarily not require any specialised knowledge. Somewhat more weighty is the argument that the foundation of a service of experts will tend to discourage the activities of the private consulting expert. But although this reason may have weight 20 years hence it has little force to-day. The opposition to the formation of an Imperial Chemical Service is much more serious and to secure a complete presentation of the case copies of two notes, one by Mr. Maynard, Financial Commissioner, and the other by Messrs. Wilsdon (Agricultural Chemist), Carter Speers (Professor of Chemistry, Forman Christian College) and Rai Sahib Ruchi Ram Sahni (ex-Professor of Chemistry, Government College) are forwarded for the information of the Government of India. His Honour is not inclined wholly to accept the position taken up by these gentlemen as he considers that there is a distinct tendency to view the subject too much from the purely educationalist standpoint. He understands that the periods of deputation to the various Provinces will not be so short as is apparently imagined while too much stress has been laid on the argument that members of the Imperial Service will look for promotion outside the Province to which they are attached. He is not aware that these disadvantages have been experienced in the case of other "India" Services and he finds it difficult to believe that the fact that the research worker will not have a personal share in the fruits of his work will operate to bring about inefficiency in the case of the Chemical Service to a greater extent than it does in the case of other Services. It seems to him that in their opposition to the bureaucratisation of research the chemists claim for their peculiar qualifications a somewhat anomalous position similar to one which might be put forward on behalf of poets or artists, and that this is rather a

commentary on the paucity of qualified chemists than a serious argument against the Chemical Service. His Honour would agree, however, that there will be a grave danger of failure if selection for this new service is confined to the young and inexperienced chemist, from whose equipment industrial experience and business instinct is likely to be lacking. Further he believes that while research into larger industrial questions will be better conducted at a large institute such as the Tata Science Institute at Bangalore all the smaller problems involving less elaborate machinery may more advantageously be investigated in the province concerned, and to this extent he would support Mr. Maynard's proposal to institute a really strong school of Chemistry both for research and for teaching in connection with the local University. On the whole, however, it would appear that the system contemplated by the Industries Commission and favoured by the Government of India whereby the Local Government obtains for its Industries Department the services of experts recruited for Imperial Services is sound. Experts for special purposes might occasionally have to be casually recruited as circumstances dictated.

11. As has been already mentioned His Honour finds it difficult at this stage to reach a conclusion regarding the relations between Imperial and Provincial Departments. *Prima facie* it would appear that while in matters of general administration the control of the Local Government should be paramount the Imperial Department of Industries should exercise a very close supervision in all technical matters where expert knowledge is necessary.

Proposed Imperial Chemical Service.

1. The objects which the Industries Commission has in view are these—

- (1) The creation of a central reservoir of specialists which no Local Government could afford to entertain or fully employ.
- (2) An authority which will advise on the organisation of research, so that it may cover the whole field and prevent overlapping and omissions.
- (3) An authority which can criticise and check the work done by the researcher in Chemistry. Incidental to this object is the establishment of a journal to which all papers on such work must be submitted, and in which they will be published if the authority thinks desirable.
- (4) An atmosphere of science for the Chemist, with a complete library of research.
- (5) Means of applying a commercial test to the results of research (page 80).
- (6) To make the teaching and research staffs interchangeable, so that teachers may direct their teaching to the forwarding of practical needs.
- (7) Better pay and prospects for the Chemist.

2. The fourth of these objects could only be attained completely if the majority of the Chemical Service were located together for long periods at some central institute, an arrangement hardly to be reconciled with the needs of Local Governments. It can be attained partially by measures falling a long way short of the creation of an Imperial Chemical Service including all chemists in Government service, and lending chemists for 5-year periods to Local Governments.

3. The fifth of the objects does not appear to be connected in any way with the organisation of the Chemical Service as an Imperial Service or otherwise. It seems to postulate something other than purely scientific knowledge: the sort of business aptitude which a chemist might or might not have and would be as likely to have under one form of organisation as another. In practice I should have supposed that it would be supplied by the prospector who is engaged in investigating the prospect of a business, getting his scientific facts from the chemist, and supplying the business facts (*e.g.*, as to the availability in commercial quantities of the material concerned) from statistics, or from inspections of his own, or from his business sense.

4. The first, second, and third of the objects would be met by creating an office somewhat similar to that of the Agricultural Adviser to the Government of India, at some particularly favourable centre, with a body of very special experts about him, a Reference library and suitable laboratories, and an editing staff for an Indian Chemical Journal. This would be the gathering place for regular Chemists Conferences and (if it were at a fairly cool place such as Dehra Dun) a place at which teaching Chemists might be encouraged to spend vacations. It is not necessary for these purposes that the chemists should form a single service from which short term loans of particular officers would be made to Local Governments and Departments. The Adviser will point out gaps and overlapping in local research work.

5. The sixth object is a most desirable one: but, in so far as it is unattainable with a service under other than central control, it can be met by the Adviser in chemistry detaching from time to time members of his own special expert staff for teaching work with the assent of the Local Government concerned.

6. In regard to the seventh object, prospects are doubtless at their best when interchangeability is at its maximum. But it seems plain that a very great improvement in pay and prospects, and an opening up of the blind alley of which the Commission complains are possible without the complete imperialisations of the Chemical Service. For instance a liberal time-scale would do much.

7. A dominating factor of the situation is this: that under the impending decentralisation of the reformed Provinces we shall have different Provinces, proceeding with different objects, at different rates of speed and with different scales of expenditure, and demanding a maximum of freedom to determine their own lines of development. This appears incompatible with the supply for short terms of superior scientific officers on loan from a central reservoir: though certain very special experts must be obtained from such a reservoir if they are not obtained direct from abroad. Under a constitution reformed as the Indian constitution seems likely to be reformed, a central Adviser or Chief Chemist cannot hold a position more authoritative than that which is sketched for him in paragraph 4 of this note.

8. Whatever other measures may be taken, the chemical staffs and chemical equipments of the Universities must be very greatly strengthened, in order to provide the teaching required under a system which contemplates recruiting the Chemical Services from young Indian graduates. I give a brief indication of the steps which have been under consideration in the Punjab University, before the question received additional prominence from the Report of the Industries Commission. It was proposed to establish a School of Chemistry, and—if the Colleges would agree to the measure—to pool resources, the assigning one particular branch of chemistry to one particular College and one particular Laboratory. The idea was that the Medical College would undertake Physiological Chemistry, its natural sphere: that the Government College would undertake Organic Chemistry: that the Forman Christian College (which has just established an Industrial Chemistry side in its new laboratory) would deal with Inorganic and Technical Chemistry: while Physical Chemistry would be undertaken by a new University Professor to be engaged for the purpose and to work in a new University Laboratory to be built when funds could be arranged. This is not a matured scheme: but shows the lines on which plans were likely to be worked out, and the sort of help (*viz.*, the cost of a University Professor and a very substantial contribution towards a University Laboratory) for which Government was likely to be asked.

9. In order to combine effectively research with teaching and to use staff and equipment in the manner most economical and most advantageous for both, a very considerable proportion of the Chemical staff ought to have its headquarters at the places where the Universities have theirs. This is clearer in the instance of the Punjab University than elsewhere: because, here, the location of a number of Colleges and a substantial proportion of the Science students within the limits of what is virtually a University quarter, make it easy to concentrate the laboratories and the teaching of Chemistry at Lahore. But the same object could be attained, though less easily, in other Universities also, by establishing the University Department of Chemistry in a particular centre,

and leaving it to attract by its superior advantages the students of Chemistry to that centre from outlying Colleges. By means of underground chambers kept at a suitable temperature (such as that now contemplated at Lyallpur) some climatic difficulties can, it is understood, be neutralised.

10. A School of Chemistry, forming part of the University, and combining research with teaching, would enjoy some of that liberty of research which Messrs. Wilsdon and Speers postulate: at the same time that Government, the supplier of the major portion of the funds, would have a powerful voice in determining the direction of the work. With a staff substantially strengthened, we might even attain to something of that atmosphere of scientific interest which the Commission postulates, at the same time that we should escape from that isolation from other interests which is the bane of such an institution as Pusa.

11. What I would urge therefore is that Government should begin by helping the Punjab University to establish a really strong School of Chemistry both for research and for teaching with a special, but not an exclusive, attention to Technical and Industrial Chemistry: and that the formations of direction contemplated in the Commission's report be discharged by Chemists to be employed in that School subject to reservation of the Local Government's power to enforce certain conditions of its grants and to the exercise of advisory powers on the lines of paragraph 4 of this note by a central Adviser. From the students of this School will come the young Indians who are postulated for a Chemical Service, but it should be one for employment in the Punjab not for all India.

12. There is nothing unprecedented in the proposal that problems of research, and particularly of industrial research, should be handed over to the Chemical Staffs of Universities for investigation. It is a common practice of business firms in the United States of America. The only danger that suggests itself to me is that the School of Chemistry might find itself snowed under, by reason of the absence of any authority competent to determine when it had as much as it could reasonably undertake. This is one of the matters on which the central Adviser would have a part to play.

13. Under these proposals there will be no Chemical Service (though there will be a Central Chemical Adviser with the Government of India, and a strong School of Chemistry in the University) until the output of competent young graduates from the University School of Chemistry is sufficient to supply personnel for one: and continued control and guidance of the new recruits by the Chemists of the School of Chemistry for a considerable time is evidently postulated. It is even unnecessary to determine at this stage whether there should at any time be such a service. The course of development might show that it would be better to leave a profession of consulting chemists to grow up while providing for immediate needs by extending the School of Chemistry and establishing scholarships in it for post-graduates. One of the advantages of the plan suggested is that it is an extension and improvement of something already existing and already growing: it commits Government to nothing more serious than an increased liberality for a particular purpose towards an existing institution, and enables us to wait and see.

H. J. MAYNARD,

Financial Commissioner.

The 24th January 1919.

*Memorandum on the recommendations of the Indian Industrial Commission
for the institution of an Imperial Chemical Service.*

The proposals of the Commission may be summarised as follows:—

All officers to be recruited to fill chemical posts, and presumably, all officers employed in such capacities at present, are to be placed in one service. Similar procedure is adumbrated for other scientific occupations. The Director of the Service will second officers for employment in Technical or Educational posts under Local Governments for terms of about five years. Recommendations 1, 2 and

Paragraph 121 of Commission's Report.

3 of paragraph 126, page 86, describe the relationship which would exist between an officer seconded for service under a Local Government and the head of his scientific service. Direction and inspection of research work would be continued by the head of the service and through him it would be compulsory to publish all results in the organ of the service. The rest of the scheme in so far as it is concerned with the organisation of Imperial Science Institutes, does not concern us directly, the great majority of officers will necessarily be working in technical or educational capacities under the Local Governments, and it is with respect to them that the scheme must be judged. The provision of Central Science Institutes may be effected without the imposition of an Imperial Service on the whole of India, from which the staff required will be drawn.

Arguments in favour of the scheme are advanced on the scores of administrative efficiency, the co-ordination of scientific effort, and, curiously enough, of educational advantage. In criticising the scheme, we have to bear in mind the requirements of the country—(1) for immediate development, and (2) ultimate progress. On the score of administrative efficiency (paragraph 120, a, b, c) it is emphasized that it has so far been impossible for Local Governments to maintain a sufficient staff and equipment in order to provide a specialist for the solution of every occurring problem; rather, the tendency has been to exalt one or two unfortunate and overworked individuals to the position of Scientific oracles with consequent unsatisfactory results. It is admitted that it will frequently prove convenient, if Local Governments can requisition the services of the very special specialist whose usual habitat may be some central or special research institute; but this is very far from being a sufficient argument for making Local Governments dependent for all their scientific officers on an Imperial organisation. Moreover, the argument on the score of the financial inability of Local Governments to support the requisite scientific organisation, is largely discounted in view of the recommendations for provincial financial autonomy contained in the Montagu-Chelmsford Report. The awakening of local interest in the potentialities of the application of scientific endeavour, together with the sense of responsibility going with the power of the purse, may be expected to effect more in the cause of local progress than the less partisan considerations of an Imperial Department.

The argument contained in (f), page 82, is undoubtedly pertinent if the scientific requirements of Local Governments are to be satisfied by the recruitment of the "young and inexperienced"; and would equally be necessary with recruits obtained "at as early an age as possible, preferably not exceeding 25 years" as recommended for the Imperial Chemical Service. If, however, as the Commission admits, recruitment for some time after the war will have to be of a special and therefore necessarily *ad hoc* nature, the likelihood of failures due to unsatisfactory development of a youthful officer is more remote. Moreover, the argument has reference mainly to the recruitment of the European Officer, since, with recruitment in India, it will be possible to institute such a system of apprenticeship or probation, that there will be ample information available as to the suitability of a candidate for recruitment. The Imperial sink proposed, is, moreover, only a remedy for unsatisfactory scientific development; the difficulty of dispensing with the services of an officer whose development is unsatisfactory for other reasons, is common to all Government service.

The disadvantages which, in our opinion, are likely to result from the Imperial nature of the organisation proposed for the chemists of India, are the following:—

- (1) The tendency will be for Imperial officers whose average period of deputation will be only five years, to have their interests not sufficiently identified with local needs. The man, for instance, who regards the subject of leather tanning dispassionately as an all-India problem, is not likely to do much for a province as a man who knows that his success or failure is bound up in his efforts in the locality in which he is stationed.
- (2) The man with his eyes on chances of promotion through the length and breadth of India, will not be likely to give the most patient research on problem of local interests.

- (3) The *esprit de corps* which it is claimed^{*} will arise in the proposed Chemical Service is likely to be an evil rather than a blessing. There is likely to be less harmonious co-operation among seconded members of various scientific services deputed, for instance, to an Agricultural Station, each with his own *esprit de corps* and his eye on promotion in his own service, than among officers recruited more directly for the institution in which they work. What is wanted, and what is unfortunately more difficult to encourage, is the *esprit de corps* of the local research or teaching community, all of which should work with a common ideal.

Our conclusions are, therefore, that as regards the administrative aspects of the proposed Chemical Service, immediate needs cannot be secured under service conditions, and that special recruiting should be resorted to: as regards future needs, when the supply of suitable Indians will be more ample, the springing up of a class of professional consultants and the expansion of the research activities of the Universities and other teaching institutions may altogether obviate the necessity of a Chemical Service.

We may consider the effect of the proposals on the science in its applied and pure aspects. The rôle of a chemist in relation to industry may take the form of a routine control of the processes involved, in which case it is an obvious necessity that the chemist should be on the staff of the factory: it may merely concern the provision of pre-existing knowledge to the industrialist: or it may involve a research proper into new processes. In our opinion it is only in the second, purely consultative capacity, that a Government official could be successfully employed. It is obviously beyond the scope of Government to provide works for chemists. As regards research in any applied science where processes are patentable, a scheme by which a discovery by a Government official is regarded as the property of Government, and this, as the Commission points out, is the only workable arrangement, cannot but be unsatisfactory, firstly on account of lack of trust on the part of the employer, and secondly since the research worker would have no personal share in the fruits of his work. As far as our knowledge goes, an agreement for mutual partnership in the results of a patentable or secret process always exists between a research worker and the firm which employs him. In any case a regulation deterring a discoverer from patenting or withholding essential information regarding a process he may discover, is easily evaded.

As regards pure science the recommendations of the Commission appear to us to tend in a dangerous manner to restrict the latitude which should be allowed to the worker. The result of the war in opening the eyes of the administrator to the benefits to be derived from the encouragement of scientific work may lead to disaster unless some percentage of the workers are spared from the efforts of the co-ordinator. We are of opinion that all scientific work, other than applied, where co-ordination of effort is obviously desirable, and in fact, as in the case of Agriculture, at present exercised, should be completely free. The worker should be free to publish in whatever journal he prefers, since he is frequently the best judge of the most suitable place for attracting the greatest attention and consequent criticism to his results. Even the danger of overlapping may be very greatly exaggerated. Experience has shown that the antagonism of two workers or two schools of thought has been of the utmost benefit to the progress of the science in the fields where both were researching.

The proposals, in so far as they tend to the bureaucratization of research, and a possible over-emphasis of the industrial aspects of Science, will emasculate all individual effort.

The organization of science should be on an essentially democratic basis. An organ of publication should be controlled by elected representatives of an All-India Society, together with officials, and subsidized by Government. Adequate scrutinization of papers submitted for publication would be secured by the selection by the Editorial Committee of suitable referees. It is obviously impossible for one Chief Chemist, no matter how distinguished, to be able to direct, or report in an illuminating manner on all the varied work which would be submitted through him, if the Commission's proposals are carried into effect.

By far the most serious results may be anticipated on the scientific education of the country. It is gravely suggested that education would benefit from the seconding, for a rest cure of five years' duration, of jaded industrialists, who would thus be enabled to renew "in a well proportioned way their general knowledge of their special professional subjects". The aim of the educationalist should be to provide in all our Universities healthy schools of instruction and a real atmosphere of research. This will not be secured by a succession of seconded officers. A permanent policy must be maintained at each University: frequent changes in the instructional staff of a teaching institution all tend to lack of efficiency. The conditions of employment of Professors at the Universities, or lecturers in the Provincial Colleges should be such that a man might look forward with satisfaction to the prospect of finishing the greater part of his life's work in the same surroundings.

The educational policy which will be pursued by Government, as is recognised by the Commission, will have greater effect in determining the future of the industries of the country than any other factor. The educational officer is regarded rather as a by-product of the Chemical Service, of which, however, if the employment of Indians is to become a reality, he must be the father and mother. By immediately strengthening and supplementing the educational institutions of the country, material will be provided at a rate adequate to keep pace with the industrial expansion of the country; the pioneer staff cannot be recruited under ordinary service conditions: for the material turned out a special service will not be necessary.

B. H. WILSDON,
Agricultural Chemist.

P. CARTER SPEERS,
Professor of Chemistry, Forman Christian College.

RUCHI RAM, SAHNI,
ex-Professor of Chemistry, Government College.

(P.S.—In my opinion a few distinguished graduates in Chemistry should be selected in India and sent to England or elsewhere for further study and research in particular lines of work. Recruitment for the Provincial Chemical Service should be made mainly from among these men.)

(Sd.) RUCHI RAM, SAHNI,
ex-Professor of Chemistry, Government College.

No. 704, dated Allahabad, the 4th April 1919.

From—The Hon'ble Mr. A. C. CHATTERJEE, I.C.S., Secretary to the Government of the United Provinces, Industries Department,

To—The Secretary to the Government of India, DEPARTMENT OF COMMERCE AND INDUSTRY.

I AM directed to reply to your letter No. 589-D., dated the 7th December 1918, asking for the opinion of His Honour the Lieutenant-Governor on the general proposals made in the report of the Indian Industrial Commission. I am to embody below the conclusions that Sir Harcourt Butler has arrived at on the specific questions set forth in paragraph 9 of your letter.

2. With regard to the question whether provincial departments of Industries should be created or developed on the lines suggested by the Commission, I am to state that a department of Industries has now existed in this province for nearly ten years. The Industrial Commission has given in paragraph 306, page 189 of their Report, a sketch of the duties which a provincial department of Industries should perform. Of the various heads therein indicated practically all are already included within the duties of

the provincial department of Industries in this province with the exception of:—

- (1) the collection and distribution of commercial and industrial intelligence which is at present largely performed by the Government of India's own agency;
- (2) the work of passing Government indents and of purchasing and inspecting certain classes of Government stores.

This has to a certain extent been done by the Director of Industries during the period of the war as a part of his functions as Controller of Clothing and Controller of Munitions.

- (3) the control of staff employed for the local administration of the Electricity Act.

This duty is at present performed by the Chief Engineer to Government in the Buildings and Roads Branch.

- (4) the furnishing of advice to Government with regard to the Mines Act.

The Director of Industries has not so far been concerned very much with the administration of the Mines Act, inasmuch as owing to the absence of any large mineral deposits in this province the work has not been sufficiently important or specialised and the Act is at present administered through the Revenue authorities.

I am further to state that a Board of Industries was also constituted in this province about five years ago and was reorganised a year ago. A copy of the resolution, dated 14th May 1918, giving the constitution and duties of the Board, is enclosed herewith for the information of the Government of India. It will be found that the composition and strength of the Board as well as its powers are to a large extent identical with the recommendations made by the Industrial Commission.

But Sir Harcourt Butler is impressed with the necessity for progress and development and he thinks that the recommendations of the Commission on this point are generally helpful and sound. He is already considering how to expand the department.

3. In this connection, I am to state that His Honour is not disposed to agree at present with the suggestion made by the Commission that the provincial department of Industries should have control of the work that is now performed by the Agricultural Engineer. The agricultural engineering branch is the most popular and at present one of the most useful of the various activities of the Agricultural department. Sir Harcourt Butler would prefer to leave things as they are until further experience has been accumulated. It is largely a question of men. If there was a Mr. Chatterton in this province, His Honour would gladly follow the policy adopted by the Madras Government.

4. His Honour is of the opinion that it is not desirable to give the Director of Industries the position of a Secretary to the Local Government for commercial and industrial subjects. He is convinced that he should have direct access to Government. But the duties of a Secretary must interfere with the tours of the Director of Industries and it is important that the Director should be a touring officer with a first-hand knowledge of the industrial and commercial needs and conditions of the province. The whole question has been discussed many times in connection with the position of the Director of Public Instruction. Sir Harcourt Butler's experience leads him to think that the head of the department's first duty should be to press the claims of his department and that the Secretary to Government should be the mouthpiece of Government in Council.

5. The Government of India ask whether the responsibilities of the provincial department of Industries include the local purchase of Government stores subject to such degree of centralization as may be decided upon after consideration of the report of a special committee. Sir Harcourt Butler is in complete sympathy with the object aimed at, viz., a reduction in purchases from England and the encouragement of Indian industries. So far as purchases from England are concerned His Honour is willing to accept the suggestions.

made in the Industrial Commission's Report, *viz.*, that all indents on the Stores Department of the India Office should be checked first of all by the provincial department of Industries and again by the Imperial department. His Honour hopes that, if adequate and intelligent staff is appointed, this procedure will not cause any great delay and he agrees with the Government of India that it will secure considerable advantages by amalgamating indents and purchase in bulk. With regard however to the definite proposals made by the Commission for purchase in India in cases where the provincial Director of Industries is not able to arrange for purchase and inspection in his own province, I am to say that His Honour apprehends that the Commission's proposals if adopted may lead to delays and friction and will be against the policy of decentralization which is to be the keynote of administration in the future. It is understood, however, that the Commission did not wish to put forward any definite scheme for the allotment of functions between Imperial and provincial agencies. It seems best that the provinces should be left to determine the organization most suitable for themselves with regard to purchase in India. A central organization is needed to check all indents for the purchase of stores outside India. So far as purchase in India is concerned His Honour's view is that the functions of the central organization should be purely advisory. Subject to these comments His Honour agrees that the provincial department of Industries should have charge and control of the purchase in India of Government stores. He agrees also that a special committee of experts should be called to advise with regard to the degree of centralization that is necessary.

6. The Government of India further enquire whether the provincial department of Industries should be entrusted with the duty of the collection of local commercial and industrial intelligence. I am to say that His Honour is in agreement with these suggestions. A special staff will of course be necessary for the purpose.

7. With regard to question (c), *viz.*, the methods of recruitment and employment of the officers of the proposed scientific and industrial services, I am to state that His Honour the Lieutenant-Governor has perused with some misgiving the actual recommendations made by the Industrial Commission. In paragraph 121, page 82 of the Report, it is stated that "the whole of the chemists would be under the control, for scientific purposes, of a senior officer, who might appropriately be called Chief Chemist to the Government of India. Under him directly will be the staff of the headquarters laboratory, including the physical chemist and the specialists not assigned to provincial branches. The other three groups (agricultural, organic and mineral chemists) would be under the supervision of three Deputy Chief Chemists. Junior members of any of the three groups would be lent to Local Governments and the principal Government departments for terms normally limited to five years. They would carry on the routine duties required, in some cases including teaching, and would undertake certain forms of research with the approval of the head of their service". In paragraph 126 it is further laid down that "the local authority should not sanction a programme of research work without consulting the head of the appropriate scientific service. This will prevent unnecessary overlapping or waste of time in taking up problems that are known to the central authority from wider experience to be infructuous".

8. This raises a very large question on which it is difficult to give an opinion until it is known how far the decentralisation proposals of the Reforms Scheme will go. It all depends in His Honour's experience on individuals and attitude. Sir Harcourt Butler has considerable experience of the Government of India, and does not wish to appear to be in any way in opposition to it. The great difficulty in practice is the congestion and delay which occur in the Government of India. The area which they have to supervise is too vast for any centralised machine. The local differences are also very marked between provinces. For many years His Honour has heard decentralisation preached and has seen centralization grow stronger. It seems to His Honour that the best results will be attained by close and constant contact between imperial and local departments. Both in Burma and in the United Provinces His Honour has received great assistance from the Government of India experts as advisory authorities. They frequently have a wider experience and outlook on which to base advice. But they cannot appreciate local

conditions as local men, who have lived their lives among the people of a province, can do. It seems to be a case for compromise. As regards the Chemical services His Honour recognises that if the men are recruited as part of an organised provincial service or if they are casually recruited on terms special to themselves the prospects will not be sufficiently attractive to ensure the recruitment of the right type of men at a reasonable cost, Sir Harcourt Butler therefore concurs with the suggestion made in paragraph 5 of your letter that the scientific services may be recruited on an all-India basis, but the men should be attached to provincial Governments and should ordinarily be retained by them for the whole of their service as in the case of the Agricultural, Forests and other Imperial services. It is only in exceptional cases that there should be a transfer from one provincial Government to another or to the central Government. Moreover all men belonging to the scientific departments should be under the complete control of the provincial department and of the provincial Government. The functions of the central head of the service who will be attached to the Government of India, in relation to the officers serving under Local Governments, should be purely advisory. The Local Government should be at liberty to ask for advice with regard to the programmes of administration, demonstration or research but should not be compelled to accept the advice. And in all cases the principle of personal conferences between the imperial and provincial heads of departments should be encouraged.

9. The Commission recommend in paragraph 125 of their Report that suitable officers from the scientific services should be seconded to act as professors for say five years in the colleges under Government or University control. It is true that a research officer is all the better for a certain amount of educational experience and that if a scientific man is appointed to an educational post and displays special administrative ability, he ought to have the prospect of rising to high administrative appointment. His Honour is, however, opposed to the system advocated by the Commission. He considers that the qualifications needed in a professor are usually very different from those needed for research and applied science. A teacher should have a vocation. Moreover constant transfers would be injurious. There are high administrative appointments in the Education Department itself. Special cases may arise where transfers between scientific services and the educational service may be desirable but they should be the exception rather than the rule.

10. With regard to an Imperial Industrial service, Sir Harcourt Butler feels very doubtful whether one Imperial service can properly be organised in view of the great variety of duties that would be demanded of its members. The Commission state that the candidates shall be men possessing the qualifications of mechanical engineers. His Honour hardly thinks that the qualifications of a mechanical engineer will be a sufficient grounding for say the duties connected with the collection and dissemination of commercial and industrial intelligence. After all the number of such appointments will not be very large, at least at the beginning, and it is open to question whether the object aimed at, *viz.*, attracting young men to this type of career, cannot best be attained by a time-scale of pay according to the nature of the duties. In this connection, I am to quote the opinion of the Upper India Chamber of Commerce, *viz.*, there should be a provincial staff of industrial and scientific officers and that such staff should be supplemented by the employment of technical experts or industrial advisers to report and advise on matters of special interest and importance. "Such appointments will be of a temporary character and on such terms as would attract the best advice available. The committee of the Chamber attach the very highest value to the employment of expert advisers and they see no reason to apprehend that the recruitment of specialists would give rise to feelings of discontent among members of the permanent staff. They also believe that it will prove more economical to employ experts with the highest qualifications for particular work than to create a large number of appointments to a regular service. The needs of industrialists can only be met by specialists and specialists cannot be obtained by the recruitment into an organised Government service of partly educated students on low salaries with the prospect of eventual promotion to higher appointments". His Honour endorses these views. He would therefore deprecate the organisation of an Imperial Industrial service.

11. The Government of India finally ask what generally should be the relations between the Imperial and Provincial departments of Industries. The recommendations made by the Industrial Commission with regard to the functions of an Imperial department of Industries are set forth in paragraph 322 of their Report. In paragraph 356 the Commission have given instances of experimental factories which could be more appropriately started by Imperial agency and they have stated that in cases where the raw products dealt with are the property of a department like the Forest department it would be necessary to retain it under Imperial control. His Honour understands that the Government of India are ready to accept the view that provincial Governments should have the power to undertake industrial research and enterprise or to encourage the same without previous reference to the Government of India; also that provincial Governments should have an entirely free hand in the matter except in cases where other provinces are likely to be seriously and adversely affected. Where for instance all the raw material for a particular kind of industry is to be found in one province and is limited in quantity the Government of India would have a voice in the inception of any industrial undertaking which will take up all or practically all the raw material available. There is no doubt that in actual practice such cases will be very rare. It is also understood that the Local Government will in all such matters take such action as commends itself to it without being compelled to approach the Government of India for previous sanction. The Government of India will in due course be kept informed of the schemes the Local Government takes up while the constant consultation which will take place between Imperial and provincial experts will remove the risk of a sudden interference by the Government of India. It is further understood that the Government of India will reserve to themselves the right to undertake and assist research and enterprise of their own accord, specially in cases concerning the safety of India and where the Government of India apprehend that the Local Government will not be able to devote sufficient funds for the purpose. As an instance may be mentioned the manufacture of lethal munitions. On the other hand the Government of India may also develop an industry like wood distillation although a Local Government will not be debarred from starting an enterprise in wood distillation on a small scale if it chooses to do so. I am to state that His Honour the Lieutenant-Governor is willing to accept the foregoing definition of the relation between the Imperial and provincial departments of Industries. In short he agrees to the establishment of an Imperial department of Industries if its functions in relation to provincial Governments are advisory and if it is likely to prove helpful. The Local Government will be always glad to have technical and expert advice from officers at the headquarters of the Government of India, but if the creation of an Imperial department means only lengthy correspondence instead of frequent personal discussion His Honour would not welcome the creation of such a department.

12. I am to say that as the Government of India have not asked for the opinion of the Local Government with regard to the constitution of an Indian Industries Board as outlined in paragraphs 322 *et seq.* of the Report His Honour is not expressing any views with regard to this particular matter.

13. I am to enclose for the information of the Government of India copies of letters received from the Upper India Chamber of Commerce, the United Provinces Chamber of Commerce and also a copy of the proceedings of the United Provinces Legislative Council relating to a resolution that was moved there on the subject matter of this letter.

14. In conclusion I am to say that the root of the matter is the creation of a spirit of adjustment and personal consultation. It is impossible to have life in India unless the provinces are left to develop, subject to general control, on their own lines which are understood by the people and which create a feeling of provincial patriotism. On a question of administrative system every doubtful point should be given in favour of the principle of decentralization because India is far too vast for any one Government really to dictate or to exercise more than a general control. His Honour anticipates little practical difficulty if every Local Government is left to settle its practical problems with the Government of India instead of trying to lay down something that may apply to India as a whole.

No. 994-XVIII, dated Naini Tal, the 14th May 1918.

Resolution—By the Government of the United Provinces of Agra and Oudh, Industries Department.

Read—Resolution No. 1354-XVIII—415, dated the 29th August 1914, on the subject of technical education in the United Provinces.

OBSERVATIONS.—The constitution of the Board of Industries, which was established by Sir James Meston in 1914 with a view to co-ordinating industrial work and education in the province, has been for some time under the consideration of the Lieutenant-Governor. The Board has performed a very useful function and has furnished the Government with valuable help and advice, and His Honour wishes to take this opportunity of expressing his appreciation of its work. The experience gained during the last four years has, however, indicated that the constitution of the Board admits of improvement. Owing to the large number of members it is difficult to arrange as frequent meetings of the Board as are necessary in these days for the urgent disposal of matters connected with the organization of all the industrial resources of the province. Also the same Board deals with both industries proper and industrial and technical education. It is evident that members who are interested in industrial education are not always competent to give advice or to take action in matters connected with the organization of industries. It is also desirable that the Board should have a greater power of initiative and more control over detailed administrative work than is now possible with its large membership.

2. His Honour has therefore decided to reconstitute the Board by reducing its membership to fourteen and limiting the tenure of office of each member to two years. The Board will be divided into two sections, one of which will deal with industries and the other with technical and industrial education. Each of these sections will have a chairman and meet separately, but meetings of the full Board should be convened whenever it is found necessary to do so. The Director of Industries will be Secretary to both sections and executive agent to the Board, and he will arrange to hold meetings as frequently as possible.

3. As regards the education section, the practice hitherto has been to place before the advisory committees of the technical and industrial schools all matters relating to those schools, and then to forward their recommendations to Government through the Director of Industries and the Director of Public Instruction. This procedure has not worked satisfactorily and has often resulted in delays. In future, proposals and recommendations of the advisory committees should be sent to the education section of the Board, of which the Director of Public Instruction will be chairman and it will, after due consideration, forward them with the Board's views direct to Government.

4. The Committee of Management of the Thomason College, Rurki, the reconstitution of which is also at present under the consideration of Government, will no longer be a sub-committee of the Board of Industries.

5. Sir Harcourt Butler trusts that the revised constitution of the Board of Industries will enhance its utility and efficiency and will at the same time ensure a more expeditious disposal of business. The following gentlemen have been appointed members of the new Board :—

President.

The Hon'ble Mr. H. R. O. Hailey, C.I.E., I.C.S., Director of Land Records and Agriculture.

Industries section.

1. The Hon'ble Mr. H. R. O. Hailey, C.I.E., I.C.S., Director of Land Records and Agriculture (*Chairman*).
2. Mr. P. H. Clutterbuck, C.I.E., Chief Conservator of Forests.
3. Mr. T. Gavin Jones, of the Empire Engineering Company, Cawnpore.
4. Mr. E. L. Watson, of Messrs. Waldie and Company, Cawnpore.
5. The Hon'ble Mr. C. Y. Chintamani, of Allahabad.
6. Rai Krishnaji, Honorary Magistrate, Benares.

7. Hafiz Muhammad Halim, Merchant and Honorary Magistrate, Cawnpore..
8. Director of Civil Supplies (*ex-officio* member).

Education section.

1. The Hon'ble Mr. C. F. de la Fosse, Director of Public Instruction (*Chairman*).
 2. Mr. J. Waker, Agent, Bengal and North-Western Railway.
 3. Mr. B. R. Briscoe, of the Cawnpore Cotton Mills.
 4. Dr. Zia-ud-din Ahmad, Professor, Muhammadan Anglo-Oriental College, Aligarh.
 5. The Hon'ble Lala Madhusudan Dayal, Honorary Magistrate of Hapur, Meerut District.
 6. Munshi Kunji Lal Sakh, of Farrukhabad.
- Mr. C. R. O'Malley, Director of Industries (*Secretary*).

ORDER.—Ordered that copies of this resolution be forwarded to all Heads of Departments, including the Director of Industries, and Principal, Thomason College, Rurki, Commissioners of Divisions, District Officers, Secretaries to this Government in the Public Works Department, Buildings and Roads and Irrigation Branches, and the Members of the Board of Industries for information.

Ordered also that this resolution be published in the *United Provinces Government Gazette* for general information.

By order,

A. C. CHATTERJEE,
Officer on special duty.

Copy of a letter dated the 26th February 1919, from the Secretary, Upper India Chamber of Commerce, Cawnpore, to the Secretary to Government, United Provinces, Industries Department, Allahabad.

I am directed to refer to your letter No. 174-XVIII-624 of the 23rd January and to the copy, forwarded thereunder, of letter No. 589-D. of the 7th December 1918, from the Government of India, Department of Commerce and Industry, on the subject of the proposals made in the Report of the Indian Industrial Commission for the establishment of an Imperial and Provincial Department of Industries.

My Committee desire in the present communication to express their views on the points dealt with in the Government of India's letter. Their general views on the report of the Industrial Commission will be the subject of a subsequent letter.

As a preliminary to the present expression of the views on the points under reference my committee desire to quote in detail the recommendations bearing on these points made by the Chamber before the Industrial Commission.

Referring to "Technical Aid to Industries" my Committee said :—

"In considering the broad question of Government technical aid to industries the Committee note a reference to Government experts and in this connection they feel that any scheme of assistance based on the importation by Government of an expert must, to be successful, be based on the obtaining by Government of thoroughly practical exponents of the industry on which they are supposed to advise. Mere theoretical knowledge obtained in a laboratory is worse than useless. What is wanted is thorough practical experience under varying conditions, and adaptability to circumstances; failing this the expert can merely serve to experiment and theorise at the expense of the business to which he is attached to assist.

At the present time a feeling prevails that some of the so-called Government experts who have been employed in the past do not seem to have inspired confidence or obtained credence among industrialists".

On the subjects of General Official Administration and of Organisation my Committee advised as follows :—

"The functions of the Board of Industries, in whatever province established, should be purely advisory.

A Board of Industries should be constituted mainly of business men and of the heads of technical departments of Government, and it is in the Committee's opinion, absolutely essential that the President should be a senior business man.

In these Provinces we already have a Director of Industries who is a business man and the work which he has done during his tenure of office absolutely justifies the appointment of a business man as Director of Industries.

The Director of Industries should be a member of and the Executive Agent to the Board of Industries. The Board of Industries should be regarded as the supreme provincial authority on industrial matters and should, through its Executive Agent, have direct access to the head of the Local Government. This would necessitate the opinion of the Director of Industries being equivalent to that of a Secretary to Government.

There should be established an Imperial Department of Industries, separate and entirely distinct from the Department of Commerce. The functions of such a Department of Industries should be, in the main, to correlate the work of the provincial Boards of Industries and to deal with matters of Imperial, as distinct from provincial, importance, e.g., transport.

The Committee advocate the establishment of provincial laboratories to deal with local provincial questions, and of a Central Research Institution to co-ordinate the working of the provincial laboratories and to check their work."

The views which my Committee now desire to submit are, save in one particular, namely the functions of provincial Boards of Industries, consistent with the recommendations previously made.

Of the three basic propositions stated in paragraph 1 of the Government of India's letter my Committee agree in their approval of the first and second. They approve also of the first portion of the third proposition but they are unable to agree that the staff necessary for the provincial and Imperial departments of Industries can be best obtained and most advantageously employed by the creation of organised services.

They endorse the opinion that whatever functions may be deputed to provincial Governments the Government of India will, in certain directions, not be able to divest themselves of responsibility and that certain industries, as indicated in paragraph 2 of the Government of India's letter, will always be matters of Imperial concern.

They desire, however, to emphasise the importance of the principle which has been recognised by Government that the actual development of industries must in the main be carried out by the local authorities and generally they approve of the recommendations made in respect of provincial departments. In place of the suggested Imperial Industrial service a modified staff maintained at the Central Research Institution would provide the equipment necessary for the purpose of correlating the work of the provincial departments, and my Committee consider that greater efficiency will be obtained by concentrating on the establishment of these provincial departments and that by leaving them to exploit their individual provinces a spirit of healthy rivalry will be engendered.

Provincial Department of Industries.—The determination of both administrative and technical staffs should rest entirely with the Local Governments, under the advice of the local Boards of Industries. The retention of scientific or industrial educational staffs for Technical Colleges and Schools must depend on whether such educational institutions are to remain under the Department of Public Instruction or to pass over to the Department of Industries.

It will be necessary, in the opinion of my Committee, to establish provincial staffs of Industrial and Scientific officers such as Industrial Engineers, Inspectors of Factories, Electric Inspectors, Boiler Inspectors and Technological Chemists for provincial laboratories. My Committee would, however, urge that the number of permanent appointments should be restricted to the actual needs of each province and they would emphasise the importance of interchange by provinces of members of their industrial staffs, both administrative and technical, preferably by deputation.

Permanent provincial staffs would be supplemented by the employment of technical experts or Industrial advisers to report and advise on matters of special interest and importance. Such appointments would be of a temporary character and on such terms as would attract the best advice available. My Committee attach the very highest value to the employment of expert advisers and they see no reason to apprehend that the recruitment of specialists would give rise to feelings of discontent among members of the permanent staff. They also believe that it would prove more economical to employ experts with the highest qualifications for particular work than to create a large number of appointments to a regular service. The needs of industrialists can only be met by specialists; and specialists cannot be obtained by the recruitment into an organised Government service of partly educated students on low salaries with the prospect of eventual promotion to higher appointments. The formation of Technological Institutes, Polytechnics and Research laboratories will give the earnest student the full opportunity of qualifying himself as a specialist and until he is so equipped, trained experts must be obtained on terms which will be sufficiently attractive.

My Committee do not approve of the proposal to transfer Agricultural Engineering to the control of the Director of Industries as they feel that the majority of small power plants to be transferred would be needed in agricultural areas for agricultural purposes and that technical advice on the erection and running of such plants would best be afforded by the Agricultural Department.

As regards the creation of an Imperial Chemical Service my Committee see even less justification for this than for an Imperial Industrial Service. Their recommendations on this point have already been quoted. They would like to see the establishment of provincial laboratories to deal with local provincial questions and of a Central Research Institution to co-ordinate the working of provincial laboratories and to check their work.

My Committee are fully agreed as to the necessity for the creation of an agency for securing a full and free exchange of information and a correlation of results between the various provincial departments of Industries and provincial laboratories. This agency can be provided without an Imperial service whether of Industry or of Chemistry.

The recommendation made in paragraph 7 of the Government of India's letter to establish a central organisation in India for the purchase of Government stores is warmly endorsed and my Committee desire to say that they attach great weight to this proposal as an extremely valuable means of developing the industries of the country. They also approve entirely of the proposal made for decentralisation by the establishment of provincial agencies for the purchase of stores and they emphasise the necessity for the appointment of an expert committee to examine the details of this proposal.

The establishment of provincial agencies for commercial and industrial intelligence is essential to the prompt dissemination to the public of reliable information collected by experts.

An Imperial Industrial Service.—In making the recommendation in their evidence before the Industrial Commission that there should be an Imperial department of Industries my Committee did not contemplate the erection of the huge and complicated structure which is described in Chapter XXII of the Industrial Commission's report. They approve of the creation of an Imperial department of Industries in charge of a Member with a seat on the Viceroy's Executive Council but they cannot agree that it is necessary to establish a Board of three additional members each with separate charges and each equipped with a complete secretarial and clerical staff. What my Committee

did contemplate was a department to correlate the work of the provincial departments of Industries and to deal with matters of Imperial, as distinct from provincial, importance.

In conclusion, the views of my Committee on the proposals as summarised in paragraph 9 of the Government of India's letter, are :—

- (a) that provincial departments of Industries should be created or developed on the lines suggested by the Commission, subject to the proviso that the provincial Board of Industries, or provincial Governments shall determine the staff ;
- (b) that the responsibilities of provincial departments of Industries should include—
 - (1) the local purchase of Government stores subject to such degree of centralisation as may be decided on after consideration of the report of a special committee, and
 - (2) the collection and prompt publication of local commercial and industrial intelligence ;
- (c) that there is no justification for the establishment of all-India services, Industrial or Chemical, or for a common system of recruitment ;

Provincial departments of Industries should have absolute discretion to recruit their staffs, administrative and technical, on special terms and to engage temporarily experts for the peculiar industrial necessities of the province ;

- (d) that there should be machinery for the full exchange of information and the correlation of results by provincial departments of Industries to prevent overlapping of research or waste of effort or information ; and
- (e) that generally the relation between the Imperial and provincial departments should be as set forth in the Committee's statement submitted to the Industrial Commission, *i.e.*, that the functions of the Imperial department of Industries should be, in the main, to correlate the work of the provincial Boards of Industries and to deal with matters of Imperial, as distinct from provincial, importance.

Copy of a letter from the Secretary, United Provinces Chamber of Commerce, Cawnpore, to the Secretary to Government, United Provinces, Industries Department, Allahabad, No. 6806, dated the 3rd March 1919.

With reference to your letter No. 174-XVIII-624, dated the 23rd January 1919, forwarding copy of the Government of India's letter No. 589-D., dated the 7th December 1918, on the subject of the proposed establishment of an Imperial and Provincial Departments of Industries for the views of this Chamber I am directed to say as under :—

My Committee are in hearty accord with the Industrial Commission on the principle that in future Government must play an active part in the industrial development of the country, but are strongly opposed to the creation of an Imperial Department of Industries in which is proposed to be centralised the control and direction of the advocated policy. In this vast country every province has industrial problems which are peculiar to itself and to handle and solve which the Local Governments are naturally in a better position than the Central Government. In their letter the Government of India express themselves in agreement with the proposition that "for obvious reasons the actual execution of the policy must mainly be affected by authorities under the control of the Local Governments." That being so, it stands to reason that these Local Governments on whom will devolve the bulk of the work of industrial development must be left reasonable freedom of action and initiative and not be hampered by the necessity of constant reference to, and direction from, the Central authority. It is somewhat surprising that the Commission contemplating all the

time the "utmost possible decentralisation"—*vide* paragraph 214, page 140 of their report—should make recommendations which run in a quite contrary direction. It is unnecessary here to descant on the evils of over-centralisation in the Government of this country which has so often been described as top-heavy. The Secretary of State and the Viceroy in their report on Constitutional Reforms fully recognise these evils and base their proposals on a policy of decentralisation. The recommendations of the Industrial Commission have, as already pointed out, quite the opposite tendency.

One of the reasons why the Commission would leave the control and direction in the hands of the Central authority is their anxiety to "secure the maintenance of a uniform industrial policy." Now the policy enunciated by the Commission is that of active participation of the State in the country's industrial development. The Government of India accept this basic principle. The actual work of development is in any case to rest with the Local Governments. The particular directions this development would take would vary with the varying needs and possibilities of the different provinces. What then is exactly meant by the "uniformity of policy" is not clearly understood; unless, of course, it be apprehended that without the strict supervision and tutelage of the Central authority the Local Governments would lapse into inactivity or be otherwise incapable of carrying on a vigorous industrial campaign. There appear to be no grounds for that apprehension. Past experience at any rate tells quite a different story. It was only a few years back that the useful activities of the Madras Department of Industries were summarily put an end to by the higher authorities. In these provinces the Local Government's proposals for a technological institute met with a similar fate. Now with the changed policy of the supreme Government matters will, no doubt, be different, but there are no reasons to suppose that the Local Governments will in any way be less anxious than the Government of India to make up for past indifference and inaction. Nor is there any justification for doubting the former's capacity to do so.

As regards the financial resources of the Provincial Governments these will be vastly improved under the new system of finance, which it may safely be assumed, will shortly be introduced. It is the Government of India who will then look to the provinces for the making up of its own revenue deficit. That leaves no force in the argument that the Provincial Governments will lack the requisite financial resources.

Now remains the question of inter-provincial problems, and military and other requirements of an Imperial nature. These, my Committee agree, can rest only with an Imperial agency, but they submit that the existing Department of Commerce and Industry should be quite sufficient to deal with these questions.

My Committee are, therefore, strongly of opinion that the idea of a new Imperial Department of Industries should be altogether abandoned and that industrial development should be entirely a provincial concern, for which the Local Governments, in their respective Departments of Industries, should be wholly responsible and in respect of which they should enjoy the greatest possible freedom of action and initiative. It is impossible to anticipate in what shape the Reform Scheme will emerge from the British Parliament, but it seems abundantly clear that under the new régime the Local Governments would be more popular than the Central Government. That is another reason why my Committee would have industrial development as wholly a provincial subject because of all matters in the administration of which the people of the land should be given the greatest voice, that of Industries stands foremost.

My Committee are also strongly opposed to the creation of the various Imperial India services recommended. They fully associate themselves with the view that importation being necessary only recognised experts and specialists should be engaged on special terms and short contracts and on the express condition that the training of our own young men would form an important part of their work here. My Committee repeat that the matter should be left entirely in the hands of the Provincial Governments. If the latter find the establishment of regular Industrial or Scientific services indispensable at any later stage let them organise the same. There will then be provincial and not imperial

services and under the control of the Government under which they will be serving. We have had enough of the anomaly of these Imperial services. Besides the proposed services will be prohibitively expensive. My Committee are, therefore, opposed to their creation on both administrative and financial grounds.

Extract from Proceedings of the Legislative Council for the United Provinces of Agra and Oudh, assembled for the purpose of making Laws and Regulations under the provisions of the Government of India Act, 1915, dated Allahabad, the 24th January 1919. -

RESOLUTION.

The Hon'ble Mr. CHINTAMANI moved the following resolution :—

"That this Council requests His Honour the Lieutenant-Governor in Council to represent to the Governor-General in Council and, through him to the Secretary of State for India in Council, its opinion that the development of industries should be a provincial subject with full liberty of action to Local Governments; that Government of India officers should only stand in the relation of advisers to Local Governments, which may freely consult them; and that the recommendations of the Indian Industrial Commission that an additional member for Industries should be appointed in the Governor-General's Executive Council, that an Indian Industries Board should be constituted, and that Imperial Indian Chemical, Industrial and other services should be organized, should not be accepted."

He said :—

"I take it that it is unnecessary for me to detain the Council with any statement of the supreme importance of the Industrial problem to India. The latest pronouncement upon the subject, leaving aside the report of the Indian Industries Commission itself, is to be found in several eloquent passages in the Report on Indian Constitutional Reforms that was recently published over the signatures of the Secretary of State and the Viceroy. There Mr. Montagu and Lord Chelmsford dwelt at length upon the political aspects of the economic question, and in one passage they remarked :—' But on all grounds a forward policy in industrial development is urgently called for, not merely to give India economic stability; but in order to satisfy the aspirations of her people, who desire to see her stand before the world as a well-poised, up-to-date country; in order to provide an outlet for the energies of her young men who are otherwise drawn exclusively to Government service or a few overstocked professions; in order that money now lying unproductive may be applied to the benefit of the whole community; and in order that the too speculative and literary tendencies of Indian thought may be bent to more practical ends and the people may be better qualified to shoulder the new responsibilities which the new constitution will lay upon them.' They then referred to the Industrial Commission and did not wish to anticipate discussion of the Commission's proposals, but they said :—' We may say that our own inquiry leads us to believe that there are many questions of importance waiting to be taken up by a new agency and sufficiently related to each other to form the matter for a new administrative unit.' The recommendations of the Industrial Commission themselves are highly important and far-reaching in character. The Commission definitely abandoned the idea that there could be any development of Indian industries worth the name except with a very active industrial policy by Government to back up private efforts. There are various circumstances that have combined to produce a situation in which the people unassisted by the Government do not find themselves able to go forward very quickly. Even in the materially advanced West, the theory that at one time found favour with a certain school of thinkers that the less the State did for industrial development the better, has been cast to the winds even by the best orthodox doctrinaires. It may be taken to be common ground that State activity for industrial development is essential, not merely unobjectionable and desirable, but very necessary; secondly, that there are circumstances in this country which render it doubly necessary that the State

should pursue an active industrial policy. If this be so, the question arises : what is the administrative machinery ? What is the system that will be best adapted to this new policy that has been followed ? The Industrial Commission bestowed a great deal of attention upon this question. So much indeed, that one of the members, who wrote a dissenting minute, the Hon'ble Pandit Madan Mohan Malaviya, rather complained in that minute that too much importance was given to the question of administrative machinery. I desire, here, to pay my humble tribute to the Commission for the large number of recommendations of a substantive character which prove in various respects the necessity for the development of the existing policy or the inauguration of a new policy. But when I come to recommendations, which deal with this question of administrative machinery, I must take leave to part company with them. The Commission seemed to be obsessed with the idea that if any movement forward is to be at all possible, direction should be centered in the Government of India. The Commission proposed various important duties to be performed by provincial Governments and provincial departments of industries acting under provincial Governments ; but ultimately, as they said of old, 'that all roads lead to Rome,' they seemed to think that nothing effective and nothing useful could be done unless the activity of every province led by some means to Delhi and Simla. I may be accused, Sir, perhaps, of irreverence, but such little knowledge of the methods and the results of the activities of Simla and Delhi, as I can gather as a mere non-official looking at the temple from the outside, does not encourage me to believe that if this series of recommendations of the Commission are to be given effect to, the result will be such as we can congratulate ourselves upon. Confining ourselves for the present to these provinces, and to the proposals made by the Local Government from time to time with regard to industrial development, is it not a fact that our experience is altogether discouraging to the idea that any good can come from this constant reference to Simla and Delhi ? Over eleven years ago one of Your Honour's predecessors held a Conference at Naini Tal which arrived at very important conclusions, the foremost of which was the establishment of a Technological Institute at Cawnpore. Your Honour and the present Secretary to Government in the Industries department were both intimately associated with the Conference in 1907, and it is therefore superfluous for me to say anything by way of commendation of that particular recommendation of the Conference. But now that Your Honour has come back to these provinces after this distance of time in an exalted capacity, I think you have found that, so far as the most material of the recommendations of the Conference is concerned, you are where you were, and that the policy of the Government may best be illustrated by the couplet—'To promise, pause, propose, postpone, and end by letting things alone.' If the Local Government had had more financial resources placed at its disposal and also a reasonable amount of discretion and liberty of action given to it, I feel certain that the record of industrial activity of this Government in these eleven years would have been much more beneficial to the people of this province than it actually happens to be. Some time ago, Your Honour made a speech in Allahabad in the Mayo Hall in which you gave your own view of the Government of India, but possibly now that you happen to be at the head of the provincial Government, although you speak from a knowledge derived from the interior of the Government of India itself, there may be a disposition at Simla and Delhi to discount that opinion. But when an uncomplimentary opinion is expressed of the administrative system and the administrative machinery there by the Viceroy himself and the Secretary of State, that opinion cannot be disposed of in the same manner. Now what do we find in the Montagu-Chelmsford Report with regard to the Government of India as it is at present ? They say in paragraph 266 :—

'We think we have reason for saying that in some respects the machinery is no longer equal to the needs of the time. The normal work of the departments is heavy. The collective responsibility of the Government is weighty, especially in time of war. There is little time or energy left for those activities of a political nature which the new situation in the country demands. A legislative session of the Government of India imposes a serious strain upon the departments, and especially on the members in charge of them. They have not merely to carry on their heavy task of administration and to share in the

discussion and decision of grave matters of policy, but they have to prepare themselves to meet a growing volume of criticism at meetings of the Legislative Council; and when, as has now happened, they are called upon in addition to deal with urgent and complex questions of constitutional reform, the burden becomes one that it is unreasonable to impose on so small and highly-worked a body of men.'

Later on they said :—' We find the necessity for reforms admitted, principles agreed upon, and decision taken, and then long delays in giving effect to them. Difficulties are realized, enquiries are started, commissions report, and then there is a pause.' ' How does it happen that announcements are made that arouse expectations only to defeat them? We know that it is not from any intention of deluding the public. We suggest that it is because the wheels move too slowly for the times; the need for change is realized, but because an examination of details would take too long, promises are made in general terms, which on examination it becomes necessary so to qualify with reservations as to disappoint anticipations and even to lead to charges of breach of faith. We suspect that a root cause of some political discontents lies in such delays.' ' But the Government of India are in the worst case. In all important matters they have to consult Local Governments, and then to secure the approval of the Secretary of State.' ' References to the India Office are a second fruitful cause of delay.' ' A further cause contributing to delay is that the departments at headquarters are now overworked.'

' Now there are two points that emerge from this. In the first place, that, owing to its very structure, delays are inevitable in the Government of India. Is that structure going to be materially modified, so that we may hope that in future that will not happen which has happened in the past? It may be said that the Industrial Commission recommend the appointment of a separate member for Industries with its own Secretariat and all the paraphernalia incidental to it, and that therefore it may be reasonable to expect that there will not be the same cause for complaint for delays in future as there has been in the past. Sir, the Department of Commerce and Industry was established at the end of 1904; fourteen years have elapsed since then. Subsequently another department with a member in charge has been added to the same Government. Does experience encourage the belief that at Simla or Delhi or, mentioning a smaller thing, even in the provinces where the Secretariat establishments have been largely increased, an addition to the number of officers necessarily means a quickening of work? I do not think the Secretaries to the Government themselves will plead guilty to the charge, that because they are more in number now than they were formerly therefore they are in a position to dispose of work more quickly than before. The necessity of references to the India Office and the respective proposals made with regard to the future of Local Governments and the Government of India raise another question. What the fate of this reform scheme will be we do not know now. But assuming for the sake of argument that, whatever modifications are made, some reforms will be carried through both Houses of Parliament this year, and that there will be some alteration, some change, in the constitution of the Local Government as well as in the Government of India, we shall still be left with this that the Government of India will be less popular and more bureaucratic than the Local Government will be. The Local Governments will have much greater need of acting in response to public opinion than the Government of India will have. If the subject of the development of industries is one in which the people are keenly interested, if it is a subject, on the right solution of which the future of the country will depend to a material extent, does it stand to reason that its control should rest with a Government which will be less responsible to public opinion than the Local Governments will be? I think not. This Legislative Council already expressed its opinion on this point in the month of August. It will be remembered that at the special meeting held to consider the Reform Scheme, a resolution was passed by a majority of this Council in favour of the subject of the industrial development being entirely provincial and also transferred, so that the delays incidental in making frequent references to Simla and Delhi may be avoided and, further, that action may be taken in response to, and in sympathy with, the demands of public opinion. The stimulus that has been given to the development of Indian industries by the Department of

Commerce and Industry during the last 14 years does not encourage in me, for one, the belief that the mere fact that the department will be multiplied by two and that there will be one member for Commerce and another for Industries, more will be done than hitherto. The Industrial Commission have enumerated at length the responsible duties that should vest in the provincial Director of Industries. I will read that passage in order to show what an important part the provincial Directors will have to play and how illogical it is for these Directors that the Local Governments should not be in a position to give effect to their opinions. They say :—"Provincial Directors would have a wide range of responsibilities. They would advise and assist local industries of all kinds in technical matters and would in many cases give direct financial aid. They would control industrial and technical education. They would collect industrial and commercial information, and would be the advisers of their Local Governments in industrial and commercial matters. They would arrange for the local purchase and inspection of stores. They would have under them a staff including engineers, technological chemists, specialists in various industries, craftsmen, and technical and industrial teachers of various grades. The Deputy Directors would assist the Directors in most of these functions ; and in particular would themselves inspect institutions for technical education. They would assist the smaller private industrial concerns and supervise the work of engineers and industrial specialists. They would also organize and administer the various forms of assistance to cottage industries. The special intelligence officers at Bombay and Calcutta would collect and supply commercial and industrial intelligence in these cities especially in respect of foreign trade." These will be the duties that provincial Directors will have to perform. They will have to be much more important personages than they are at present, as the salaries that are proposed to be given to them will be much higher than at present. There will be quite an army of officers serving under them. The provincial Governments will be finding the funds that will be needed for them. While even at present the financial assistance which the Government of India has rendered to provincial Governments for industrial development has been exceedingly limited it will be still more so in future, for the very reason that a new system of provincial finance will come into being. The Government of India will be simply living upon the charity of provincial Governments, among which Madras and these provinces will have to pay the largest bounty. The argument that provinces will not have the requisite financial resources cannot, therefore, hold good, nor can the argument that all provincial Governments will be incompetent to manage their affairs ; for the provincial Governments do manage even now much more important affairs and will continue to do so ; and all the praises that are sung of the efficiency of the system are absolutely in vain if we are to be told that this policy of active industrial development requires constant supervision from the Government of India. The length to which the Commission went in this direction is shown by the fact that they want to send down Imperial inspectors even to visit the technological schools which will be under the control of the provincial Directors of industries. Those who remember the memorandum that was laid before the Royal Commission on Decentralization in 1904, by Sir John Hewett with regard to the manner in which these Imperial inspectors in general affect the activities of the Local Government will have no difficulty in concluding that it is a perfectly absurd recommendation that officers of the Government of India should be sent down to inspect even the small technical schools that are maintained in the various provinces.

"The Commission also say that there should be an Indian Board of Industries, an imperial industrial, an imperial chemical, an imperial botanical and God knows how many more imperial other services. Now, Sir, no one who closely studies the Report on Indian Constitutional Reforms and also the Report of the Royal Commission on Public Services will have any difficulty in concluding that the entire tendency of the future will be to minimize, as far as possible, what are called these imperial services and to increase the number and the importance of provincial services controlled entirely by provincial Governments. Are we now to support a proposal that new imperial services should be brought into existence ? The recommendations of the Industrial Commission on this point run directly counter to the whole tendency of the policy that has been enunciated in the Report on Constitutional Reforms. Where imperial service

officers who are not entirely under the control of the Local Governments are appointed, inconveniences arise from time to time to which reference was made in the memorandum of Sir John Hewett placed before the Decentralization Commission which I have already mentioned. I object altogether to this policy of bringing into existence new organized services for the purposes of industrial development and technical education. Informed opinion is against even the present Indian Educational Service. I have heard it said by several educational experts that the wisest policy would be for men to be appointed as occasion arose, specially qualified men, on terms arranged for in each case, so that no vested interests may grow up and the best available talent may be obtained in every case and from anywhere.

"Among the witnesses before the Industrial Commission was Mr. H. I. Gibbs, General Manager of the Tata Hydro and Electric Supply Company. His opinion is worth referring to.

He said:—'No man should be imported into India unless he is a recognized expert in his particular line. He too should be engaged on short term contracts and made to understand that he is being engaged and paid to teach our local men just as much as to introduce and carry on his work. The young man from abroad who is educated but inexperienced should not be brought to India and allowed to get his practice here.'

"Directly the contrary to this is the recommendation of the Commission. They want that recruits for new Imperial services should be obtained at as early an age as possible. (They indicate 25 years.) They will be men who have received theoretical training in England and other countries; they will come here to pick up practical knowledge and they will spend several years in doing that. It will not be any part of their duty to bring up Indians themselves to be able to perform those duties. Japan has followed quite a different policy. She has sent her own sons abroad; she has imported experienced men for temporary periods and with a stipulation that they must teach the Japanese themselves. The result has been that indigenous experts have enormously increased in number and Japan is now able in the main to rely upon her own men for its own purposes. In our country a different policy has been followed. In department after department which requires any technical knowledge or skill we continue to be dependent upon imported agency very much to the same extent as before. Take the Agricultural department for one. There are agricultural colleges in India. How many men have been trained in these colleges who are considered by the Government competent to hold the higher posts in that department? Almost none. I apprehend that if the Commission's recommendations in regard to the organization of these new Imperial services are to be accepted, we shall have a corps of officers being continually imported from abroad and no adequate number of Indians competent to take charge of the work and help in the progress of the country. No doubt the Commission's recommendation was that recruitment should, as far as possible, be in India itself, but they proceed to add that at present it is out of the question and that therefore these services should be manned by men imported from abroad. It is a pious hope that in the space of a few years more Indians will be trained and that more Indians will step into the various departments of Government. Experience has belied such a hope, and I have no reason to think that in the future we shall fare better than we have in the past.

"My own idea is that the Commission having made excellent recommendations with regard to the financial aid that Government should render to industries and with regard to the provision of facilities for technical education, have gone altogether on the wrong track in showing distrust of the capacity of provincial Governments to organize their own departments and to carry on their own work and in suggesting the appointment of a member for Industries and the establishment of Imperial services with headquarters at Simla and Delhi to supervise the work that is done in the provinces. Neither for financial reasons nor for administrative reasons can I reconcile myself to the wisdom of this policy. I think that much better results can be obtained if Provincial Governments are made wholly responsible for the development of industries and if they are allowed reasonable freedom of action with regard to the steps

that should be taken in various directions. The only share of the Government of India in this direction should be where military requirements have to be met and where also arrangements have to be made for the purchase of stores in India in place of the purchases that are now made in England through the Stores Department of the India Office. It is quite possible to circumscribe the limits within which the activities of the Government of India are required, and if this is done, I am confident that it will be found that if the present Department of Commerce and Industry is maintained it will quite suffice to look after all that the Government of India need look after, if necessary, with an increased strength of the establishment under the Member for Commerce and Industry. Beyond that I will not go at all, and I am encouraged to think that I am not altogether wrong, not only because one of the members of the Commission, the Hon'ble Pandit Madan Mohan Malaviya, has largely dissented from the recommendations of the Commission, although I am sorry to say that he has approved of the recommendations that there should be a separate Member for Industries, but also because Your Honour, with the large experience you have, expressed the opinion in a speech delivered at Cawnpore in the end of November last that you were rather alarmed by the recommendations of the Commission to centralize direction and control at Simla and Delhi. We have had experience of over-centralization during the *régime* of Lord Curzon. His successor came only to undo what his distinguished predecessor had done. For a time an effort was made at centralization; but the lesson had to be unlearned and larger powers had to be delegated to Local Governments. Why unlearn the lesson at this time of the day and restart a policy of centralization in respect of a subject in which the people are materially interested and in which it may be hoped more progress will be made if the direction is left to provincial Governments, reconstituted as we believe they will be in accordance with the proposals contained in the Reforms Scheme, than if they are to be centralized in Simla and Delhi.

"It has not been possible for me within the time at my disposal to make any detailed criticism of the reasons that the Commission have advanced for the particular recommendations which they have made, but I think I have not failed to show that the principles underlying their recommendations, namely, that control should be centralized at Delhi and Simla, is altogether wrong and calculated to diminish our hope for the future. In this connection and for the reasons I have stated above, I regret that the Viceroy and Mr. Montagu in their reports showed a distinct bias in favour of the proposal that there should be a Member for Industries in the Government of India. Whether that is so, because they have arrived at the conclusion that the present strength of the Executive Council of the Governor-General was inadequate, that altogether the executive staff of the Government was inadequate to cope with the work that came before them, or whether they arrived at the conclusion that there should be a Member for Industries, on the merits of the recommendation of the Industrial Commission, I cannot tell. In either event it is regrettable that they have shown a distinct bias in favour of a separate Member for Industries. I do hope that they have not hopelessly committed themselves to it, and that they will be open to reason in the light of the public criticism that has been uttered?"

The Hon'ble MR. CHATTARJEE said:—

"The various matters which the honourable mover of the resolution has discussed in the course of his eloquent speech are admittedly distinctly important and Your Honour recognizes that an opportunity should be given to the Council to ventilate these questions before a decision is arrived at either by the Local Government or by the Government of India. But these questions are at present under discussion between the Government of India and the Local Government, and it is not possible for the Local Government to express any opinion on them. The Government will therefore take no part in the debate, but the proceedings will be submitted to the Government of India."

The motion was put and agreed to.

No. 3726, dated Bombay Castle, the 10th April 1919.

From—P. J. MEAD, Esq., C.I.E., I.C.S., Chief Secretary to the Government of Bombay, Revenue Department,

To—The Secretary to the Government of India, Department of Commerce and Industry.

I AM directed to reply to the Government of India's letter No. 589-D., dated December 7th, 1918, on the general proposals summarised in paragraph 9 of their letter under reference.

2. The Governor in Council is in substantial agreement with the general principles underlying these proposals and accepts the various suggestions set forth in these papers, subject to the following remarks.

3. I am to say that it is understood that the analogy between the proposed Imperial services and the Agricultural and Forest services now employed in Bombay will be complete as regards their employment under, and unfettered control by, this Government after recruitment, and that to this extent the original suggestions made in the report of the Indian Industrial Commission as regards loans of expert staff for short periods to Local Governments and the retention of a large measure of control in the hands of the Central Government, should be modified. As regards the position of the Chief Chemist under the Government of India towards research work under this Government, the Governor in Council does not apprehend that there will be any cause for friction, as the purely advisory nature of this officer's functions is clearly set forth in paragraph 126 of the Industrial Commission's report, and he cordially welcomes the valuable assistance which will thus be made available. As regards the power of control to be exercised by the Central Government in respect of industries which fall within the categories laid down in paragraph 2 of the Government of India's letter, the Governor in Council recognises that there may arise rare occasions on which restrictions may have to be imposed on the Local Government's activities in the general interests of India, but subject to this reservation and to such modified limitations as may ultimately be retained for all departments of Local Governments *vis-à-vis* the Central Government, this Government should be free to carry out any measures which may seem to them calculated to promote and assist industries within their administrative limits. Further, the Governor in Council would gravely deprecate any insistence upon the Central Government's sanction before proceeding with any scheme. The Governor in Council considers that a free interchange of information between the Central and Local Governments is of the greatest importance for the effective prosecution of research and experiments throughout India, and agrees that the Central Government should be kept fully informed of any important activities within provincial limits. I am to suggest that this procedure provides adequate opportunity for control by the Central Government in the rare cases when such control may be necessary, and gives such freedom of action as is essential for the prompt despatch of business. On this understanding, I am to say the Governor in Council accepts the principle of control by the Central Government in exceptional circumstances and in the general interests of India. At the same time, the Governor in Council recognises, I am to say, that research experiments and demonstrations undertaken within this Presidency may have to be supplemented by further research and experiments, either within or without the Presidency, in the general interests of India, and while conceding the right of the Central Government to carry out such supplementary work wherever it may seem most desirable, the Governor in Council trusts that any work of special importance to this Presidency will be located in or close to this Government's laboratories or demonstration factories, with a view to afford provincial workers the fullest measure of assistance. The question whether such supplementary workers should remain under the control and in the pay of the Central Government, or be lent for short periods to this Government, is one that may be decided in each case on its merits.

4. The Governor in Council recognises the advantages, and accepts the general principle of Imperial services, but until it is definitely decided which posts will be reserved for these Imperial services and what officers are suitable for absorption into these services, the Governor in Council considers that this Government should not be precluded from recruiting men to fill

existing or proposed posts which are considered necessary for the Department of Industries in this Presidency. He is, however, of opinion that some further consideration will be required before deciding how far it will be desirable to staff educational posts, especially in Arts Colleges, from these services, rather than from the Indian Educational Service, as at present. It is possible, I am to point out, that departmental and collegiate discipline may suffer by too facile prospects of more congenial and remunerative employment in other branches of so wide a service, and there may be a tendency for the members of such a service to fail to identify themselves with their Department or College in all the activities demanded from them. A member of a College staff has other duties besides instruction in his particular subject, and the staff is often only adequate if all members work willingly in the common interests of the College. The Governor in Council would prefer to proceed tentatively in the first instance and while maintaining recruitment for these educational posts with the Educational Department as at present would so adjust the recruitment for the Imperial Scientific Services of the Industries Department as to make it possible to meet a call from the Educational Department for the services of a limited number of the men engaged.

5. In this connection, the Governor in Council would emphasise the paramount necessity for the recognition of the Educational Department's complete control over officers working in their Department, whether they belong to the Imperial Department of Industries or not. The point is emphasised because the proposal has been made to utilise the spare time of science lecturers in certain institutions under the Educational Department for research work on behalf of the Local Department of Industries, and has been tentatively accepted subject to certain conditions. So long as the Educational Department decides what proportion of a lecturer's time can be devoted to industrial work and it is clearly understood that for disciplinary purposes the principal's authority over his staff remains unaffected, the Governor in Council is of opinion that such opportunities of research, to be arranged by agreement between the two departments, may be productive of useful results.

6. The Governor in Council cordially welcomes the proposal for the purchase of Government stores in India. The actual distribution of the work of purchasing and passing such stores between the Imperial and Local Government can well await the report of the expert committee suggested, but it is obvious that any Local Government must depend largely at the outset on the advice and assistance of the central organization, and in the later stages also the business sense of Bombay, which will be well represented on the local Director's Advisory Committee, may be trusted to rely on the best expert advice available, whether local or central, and to buy in the cheapest market with due regard to the quality of the goods.

7. The proposals set forth in the Industrial Commission's Report for the collection and utilisation of commercial intelligence also commend themselves, I am to say, to the Governor in Council. The present understanding between the Local Department of Industries and the Director General of Commercial Intelligence and the Trade Commissioners is that the main function of the Director General is to foster the export trade while the Trade Commissioner pays special attention to India's requirements which can be met from the British Empire, and the Director of Industries concentrates on the possibilities of increasing local manufacture. Each officer or department must have, however, a general grasp of the situation, and the Governor in Council considers that while the above may continue to be accepted as a definition of their main fields of activity, the scheme devised by the Commission will be well calculated to give each officer or department the necessary perspective and to provide the commercial and industrial public with the information which will serve their interests best.

8. To sum up the above conclusions, I am to express the view that:—

- (a) the Provincial Department of Industries should be created for Bombay on the above lines;
- (b) the purchase of stores in India should be accepted in principle and worked out in detail with the help of a committee of experts, and

the collection of local commercial and industrial intelligence should be organised on the lines suggested ;

- (c) the principles of expert criticism and Imperial recruitment on the lines explained in paragraph 3 above, should be accepted, leaving the question of absorption of present or proposed provincial staff into such Imperial services to later consideration ;
- (d) the Imperial control should be limited to such financial and other checks as are finally accepted for all departments of a Provincial Government and to special cases of paramount importance to India as a whole, to be dealt with on their merits as they arise.

No. 792, dated Ootacamund, the 28th April 1919.

From—The Hon'ble Mr. A. Y. G. CAMPBELL, C.I.E., I.C.S., Acting Secretary to the Government of Madras, Revenue (Special) Department,

To—The Secretary to the Government of India, Department of Commerce and Industry.

IN reply to Mr. Ley's letter No. 589-D., dated the 7th December 1918, regarding the proposals made in the report of the Indian Industrial Commission for the establishment of an Imperial and Provincial Departments of Industries, I am directed to enclose a copy of Mr. Innes' letter No. G. C.-295, dated 20th January 1919, in which the various aspects of these proposals are fully discussed. The Government have had the advantage of a conference with Mr. C. E. Low who has cleared up certain doubts which were entertained by the Local Government as to the attitude or intentions of the Government of India as regards certain of the proposals under consideration.

2. In the letter under reply reference is made particularly to the proposals contained in Chapter XXI of the report of the Indian Industrial Commission on the Provincial Departments of Industries and an expression of the views of the Governor in Council is invited on certain proposals which are summarised in paragraph 9. This summary does not cover all the points referred to in Chapter XXI of the report, but it appears from paragraph 10 of the letter under reply that the Government of India do not at present require the Local Government to enter into a discussion of proposals not included in paragraph 9 of Mr. Ley's letter.

3. Subject to these limitations and to the remarks that follow, the Governor in Council accepts generally the recommendations of the Commission for the future development of the Provincial Department of Industries in this Presidency.

4. The Government understand from Mr. Low that questions relating to the powers and functions of the proposed Provincial Board of Industries will be left for decision to the provincial administrations with reference to local conditions.

5. The Governor in Council also presumes with reference to paragraph 312 of the Industrial Commission's report that the relations of the Director of Industries with the Local Government being a purely domestic matter will be left to the discretion of the Local Governments concerned.

6. As regards the responsibility of the Provincial Department of Industries for the local purchase of Government stores, I am to state that the Madras Government are in general agreement with the recommendations of the Commission in paragraphs 197—198 of their report including the proposal that there should be a stores branch in each Provincial Department of Industries. They would, however, suggest that the stores branches should be established in business centres and run on business lines ; the Governor in Council also hopes that he will be given an opportunity of examining the recommendations of the special committee referred to in paragraph 9 (b) (1) of the letter under reply before orders are passed on it.

* 7. With reference to the responsibility of the Provincial Departments of Industries for the collection of local, commercial and industrial intelligence, I am to state that, as pointed out by Mr. Innes in paragraph 28 of his letter, the practical effect of the proposals contained in Chapter XI of the report appears

to be that certain statistics which have hitherto been collected, published and commented on mainly by the Board of Revenue should in future be dealt with by the Department of Industries. These proposals will require detailed examination; but the Governor in Council agrees that the principles on which they are based are sound.

8. In paragraph 306 of the Industrial Commission's report it is proposed that the responsibilities of the Provincial Departments of Industries should include the control of technical and industrial education and the control of the staff employed for the local administration of the Electricity, Factories and Boiler Acts and the furnishing of advice to Government on the industrial and commercial aspects of the Mines Act and of the rules for mining leases and prospecting licenses. As these items are not referred to in paragraph 9 of the letter under reply, and as it is clear from paragraph 10 that the Government of India do not require remarks on technical and industrial education the Madras Government reserve their remarks on these matters in detail and confine themselves to the statement that they are in general agreement with the proposals that the Provincial Department of Industries should have these responsibilities.

9. The next question on which the views of the Local Government are invited is what arrangement is most suitable for utilising the officers of the proposed Indian Industrial and Chemical Services in order to combine the advantages of a common system of recruitment, and central criticism of wider questions of research, with the control which the Local Governments must necessarily exercise in executive and administrative matters and to secure the fullest utilization by the Local Governments of their own staffs on local problems.

10. The Governor in Council recognises that some provincial administrations would be unable individually to offer adequate attractions and suitable careers to the many specialists required to carry out the policy recommended by the Commission, and that from this point of view it is desirable to pool the limited provincial requirements in the matter of staff in order that men with the necessary qualifications may be attracted to the provincial departments at the least possible cost to the State.

11. The Governor in Council understands from Mr. Low that the Indian Chemical and Industrial Services will be similar in constitution to other Indian services such as the Indian Civil Service and the Indian Forest Service. It is also understood that the period for which officers of these services will be placed at the disposal of the Local Government will not, as a matter of practice, be limited to five years, but that they will as a general rule be placed practically at the permanent disposal of the Local Government as is the case with the members of other services, though they would be liable to transfer to other provinces or to service in the Imperial Department. In dealing with the Chemical Service in paragraph 305 of the report, the Industrial Commission suggest that the Imperial Government would be concerned with questions of the promotion and distribution of the staff. The Governor in Council presumes that so long as the services of any member of the Industrial or Chemical Service are placed at the disposal of the Local Government, his promotion and posting will be left to the discretion of that Government. Subject to these remarks the Madras Government would accept the proposals for the creation of Indian Industrial and Chemical Services and for the placing of members of those services under the orders of Local Governments so as to provide the superior staff required for the Provincial Departments of Industries as well as for the Imperial Department of Industries.

12. In order to provide central criticism on wider questions of research the Governor in Council recognises the desirability of the establishment of Imperial research institutes. If, however, officers in Imperial research institutes are given higher pay than the corresponding officers of provincial institutes, the difference in pay should be substantial and should be justified by an increase in responsibilities, so that the officer employed in an Imperial institute may be qualified to advise as to the work done in provincial research institutes if necessary. In this connection I am to invite the attention of the Government of India to the importance of making an equitable distribution of the proposed Imperial research institutes among the several provinces. In deciding the

number and location of Imperial institutes, regard should be had to the essential differences between conditions in Southern India and those which obtain in the north. For example, a single specialised research institute for the group of subjects relating to oil-seeds would not meet the requirements of India as a whole, and if it were decided to establish such an institute in Northern India it is probable that another Imperial institute would have to be established for research in connection with tropical oil-seeds in Southern India. Moreover the usefulness of a research institute to an industry varies inversely with the distance of the institute from the locality in which the industry is established. Mr. Low explained that the question of allocating the research institutes was intentionally left vague by the Commission as they considered it to be a matter that should be considered by a small expert committee. I am to commend these remarks to the notice of the Government of India when the question is under final consideration.

13. As regards the recommendation in paragraph 312 of the Commission's report that Directors of Industries should ultimately be selected from the Indian Industrial Service, I am to say that the Madras Government are in general agreement with the Commission's recommendations, but consider that, if no officer of the Indian Industrial Service serving in the province is considered by the Local Government to be suitable for the appointment of Director, the Local Government should have complete liberty of choice in making the appointment after considering the qualifications of any officer of the service employed elsewhere who may be recommended to them.

14. As regards relations between the Imperial and Provincial Departments the Governor in Council would observe in the first place that the proposals for the creation of an Imperial Department of Industries and for the development of certain industries by the Imperial Department are open to the objection that they will create a tendency towards centralization, and that there will be considerable danger that the industries of one province will be developed by the Imperial Department with money contributed by another province. There was a natural apprehension on the part of the Madras Government that this tendency towards centralization would become more marked in the course of time and might result in the loss of initiative on the part of the Provincial Governments. It was, however, explained by Mr. Low that the Provincial Governments will be given a free hand in the initiation of industrial experiments, provided always that these experiments are not likely to be prejudicial to the interests of India as a whole and that the Provincial Governments will be competent to enter on a course of action even against the advice of the Government of India, provided that the entertainment of the necessary expert staff is within their powers of sanction. In the light of these explanations the Governor in Council would accept the view that it is desirable to entrust to the Imperial Department of Industries the development of certain industries on the lines indicated in paragraph 2 of the letter under reply.

15. It would appear from the official summary of the report that the Commission proposes to lay on the Imperial Department of Industries the responsibility for the "industrial policy of Government and the inauguration and carrying out of a *uniform programme* of industrial development throughout the country." The functions of the Imperial Government as set out in paragraph 214 of the Commission's report include a duty to "watch over provincial administrations in order to secure the maintenance of a uniform industrial policy." The expression "*uniform programme*" is somewhat vague and suggests considerable interference with the programmes of Provincial Governments. The Madras Government, however, understand that the expression need not necessarily be interpreted as indicating any intention on the part of the Commission that the Imperial Department should interfere otherwise than by suggestion and advice in matters within the competence of the Local Government. Mr. Low has informed this Government that the Commission's intention was merely to ensure that one Provincial Government should not lag behind the others in industrial development, and that if one link in a chain was lacking the Government of India might endeavour to persuade the Provincial Government concerned to supply the link or, failing local enterprise, the deficiency might be supplied by the Imperial Department. In view of this explanation, the Governor in Council accepts the proposals of the Commission in this respect.

16. In paragraph 179 of the report the Commission suggests that arrangements should be made for the provision of specialist officers of the Imperial Department of Industries to visit industrial and technical educational institutions and to advise the Local Government regarding the correct methods of imparting such education. While the Governor in Council would welcome such inspection and advice by specialists, he agrees with Mr. Innes that the provincial inspectors of industrial schools should not be replaced by these visiting specialists. The staff under the control of the Local Government should be maintained not only for purposes of inspection of industrial and technical schools but also for the submission of detailed proposals in connection with the management of existing schools and the opening of new schools. The Provincial Director of Industries should have at hand a staff capable of advising him on educational matters and of working out details in connection with new institutions without reference to the Imperial Department of Industries.

17. The functions of the Imperial Department in respect of the work carried out by Provincial Departments of Industries should be mainly advisory. The Imperial research institutes should be so staffed and equipped that the work done in them will be of a higher quality than that which can ordinarily be done in a provincial research institute. The Imperial Department may also, in the opinion of the Madras Government, control the development of certain selected industries for special reasons and, where necessary, take up, in the interests of India as a whole, industrial work which is not taken up by the Provincial Government concerned.

No. G. C.-295, dated the 20th January 1919.

From—C. A. INNES, Esq., I.C.S., Director of Industries, Madras,

To—The Secretary to the Government of Madras, Revenue (Special) Department.

I HAVE the honour to reply to Government's memorandum No. 1293-I.—18-3, dated the 21st December 1918, in which I am directed to report on the proposals of the Indian Industrial Commission specified in paragraph 9 of the Government of India's letter No. 589-D., dated the 7th December 1918. The points on which my opinion is asked are the following:—

- (a) whether Provincial Departments of Industries should be created, or developed, on the lines suggested by the Commission ;
- (b) whether the responsibilities of these departments should include—
 - (1) the local purchase of Government stores, subject to such degree of centralization as may be decided upon after consideration of the report of a special committee, and
 - (2) the collection of local commercial and industrial intelligence ;
- (c) what arrangements are most suitable for utilizing the officers of the proposed Indian services, industrial and chemical, in order to combine the advantages of a common system of recruitment, and central criticism in wider questions of research, with the control which Local Governments must necessarily exercise in executive and administrative matters and to secure the fullest utilization by the Local Governments of their own staff on local problems; and
- (d) what generally should be the relations between the Imperial and Provincial Departments.

2. *General remarks.*—Before dealing with these specific questions, I venture to offer a few general remarks on what is undoubtedly the most prominent feature of the administrative proposals made in the Industrial Commission's report. At the Conference held on the 23rd and 25th November Sir Thomas Holland pointed out that in its report the Commission had been careful to avoid the word "centralization," and claimed that the centralization to which reference was made at the Conference was essentially a centralization of advisory functions, executive and administrative functions being decentralized to Local Governments. I do not think that it is necessary to argue the point. It must be clear to any one who reads the report carefully that throughout

it is centralizing in tendency, and though the Commission claims that its scheme is "in general accord with the administrative changes" proposed in the Reforms Scheme, and though in paragraph 340 of the Reform Report the Viceroy and the Secretary of State certainly give the proposals of the Commission a preliminary benediction, I confess that I do not think that it is possible to square the proposals of the Commission with the second of the four formulæ laid down in paragraphs 188—191 of the Reform Report. It may be admitted that industrial reform is essentially complementary to political reform, but it is equally evident that we have two antagonistic forces at work. The Commission is concerned solely with India's industrial deficiencies, and deliberately it has set itself to devise the most efficient way of remedying those deficiencies. The Reform Scheme, on the other hand, of set purpose, is prepared to sacrifice efficiency to other and wider considerations. Hence the one scheme hinges on centralization and efficiency, the other on decentralization even at the expense of efficiency. Ultimately, therefore, the decision depends on the view taken regarding India's industrial position. If the Commission is right in holding that India's backwardness in industrial development is so serious as to involve political, economic and even national danger, it is justified in asking Local Governments to agree, in the interests of efficiency, to a period of centralized control.

3. Clearly, if it were possible, it would be preferable to leave it to each Local Government to work out its own industrial salvation. India is a continent rather than a country. It is nearly, if not quite, as large as Europe, and it contains upwards of 300 millions of people. The provinces into which it is divided differ widely from one another in the matter of climate, physical characteristics and resources, and whether the test of area or population be applied, the major provinces correspond rather to the larger than the smaller nations of Europe. *Primâ facie*, it seems absurd to endeavour to direct the industrial development of a country of this size and of these varying characteristics from Simla and Delhi, or to prescribe a "uniform programme." The more reasonable course would be for the Government of India to confine itself to the encouragement of such industries as are essential from the point of view of national safety or are of more than provincial importance, and with these reservations to leave it to Local Governments to work out their own problems with their own staff in their own way. There might be inequalities between the different provinces. Some might be more progressive than others, others again might be actually apathetic. But in some at least there would be real live development especially if Local Governments were freed from the paralysing necessity of seeking sanction before they made a new appointment or took a new step. Further there is our own narrow Madras point of view. To put it bluntly, Madras is going to pay the piper, but the Government of India is going to call the tune. From paragraph 206 of the Reform Report, I see that nearly one-third of the gross provincial contributions to the Government of India is to be levied from Madras. On the other hand, industrially the future lies mainly with Bihar and Orissa and Bengal, and there is a considerable danger that Bengal industries will be developed with Madras money.

4. This is one side of the case. On the other hand, it must be remembered that the Commission was appointed to "examine and report upon the possibilities of the further industrial development in India," and it is not surprising that they have considered the question from the point of view of India as a whole. Their examination has shown that India is lamentably deficient not only in certain essential materials but also in the production of certain essential articles. Avowedly their object is to make India self-contained industrially in men as well as materials. Several schemes for industrial reorganization were placed before them. Deliberately they chose the scheme which, in their opinion, was the one most likely to permit of an early start and a rapid advance. It is a compromise necessitated by the conditions of the problem, and though it is not as an ideal scheme, more is not claimed than that it offers the most hopeful line of immediate progress, and that provided that there is co-operation between the Imperial and Local Governments, there is no reason why it should not work well. I am quoting from Sir Thomas Holland's convocation speech. On political, national and every other ground, the need for the

development of Indian industries by Indians is urgent. In the circumstances of India, Government must abandon its *Laissez-faire* policy and must play an active part in this development. But it cannot do so "unless provided with adequate administrative equipment and forearmed with reliable scientific and technical advice." These are the two premises on which the proposals in the Report are based. If they are granted, Sir Thomas Holland has claimed that the rest of the Report in its main outlines follows automatically. It is largely a question of funds. For though they are large, the provinces are poor. The net surplus in each province, if the proposals of the Reforms Report are accepted, will approximately be as below :—

Province.	Surplus in lakhs of rupees.
Madras	63
Bombay	13
Bengal	10
United Provinces	43
Punjab	32
Burma	21
Bihar and Orissa	6
Central Provinces	5

These surpluses do not leave much margin for additional large scale expenditure on industrial development, and it is clear that most Provincial Governments could not afford to employ all the specialists which will be required if Government is properly to play the part marked out for it. Madras might be able to have reasonably good services, but what about Bengal or Bombay? Industries, moreover, so act and react upon one another that from the point of view of Indian development, it would be a mistake to treat the provinces as water-tight compartments. The problem must be treated as a whole. Sulphuric acid is an excellent instance. Sir Thomas Holland once said that the measure of a country's industrial development was to be found in its consumption of sulphuric acid which is merely another way of saying that many industries depend for their existence on cheap sulphuric acid. Sulphuric acid is now made from imported sulphur by more than one firm in India, but it is doubtful whether so long as the sulphur must be imported from Sicily or Japan the acid can ever be produced sufficiently cheap to render economically possible many of the other industries dependent on its use. Consequently steps have been taken by the Indian Munitions Board to encourage the establishment of zinc-smelting works. The zinc ores obtainable in Burma contain large quantities of sulphur, and one of the processes in the works will be the recovery of the sulphur in the form of sulphuric acid. This is an excellent example of good results accruing from a wide view of industrial deficiencies and resources taken by a central authority. A deficiency which hampers progress throughout India is noted. A survey is made of the resources of the country. The necessary raw material is found in Burma. It is decided that it should be worked up in Calcutta where coal is cheap, and in this way the deficiency is in a fair way to be remedied. Similar instances might be multiplied (paragraphs 73—83 and 320 of the Report), and it is clear that there is need for the "wider outlook" of an Imperial Department. Already the Indian Munitions Board has shown how much can be done by a central authority, and to all intents and purposes it is merely proposed to carry on the Indian Munitions Board under another name.

5. Personally, therefore, having regard to the considerations mentioned above, particularly to the general poverty of the country and to the dangers, political and economic, inherent in its present industrial backwardness, I think that the Commission was justified in its treatment of the subject. If any rapid change for the better is to be made in the development of Indian industries, it is necessary to think Imperially instead of Provincially, to consider the problem as a whole and to pool the limited resources available in order that they may be used to the best advantage of India. If these views are accepted, the need for an Imperial Department of Industries requires no further argument. It will initiate the main lines of policy and in matters of lesser importance will co-ordinate the work in the different provinces. At the same time, this stage should be purely transitional, and as in political reform so in

industries the goal should be the largest possible measure of decentralization to Local Governments at the earliest possible date.

6. So far I have endeavoured to deal with the Report on its broadest aspect. It is now necessary to go further and examine in detail the proposals made by the Commission for the administrative machinery required to carry out the policy of the Report. They propose as already mentioned the creation of Imperial and Provincial Departments of Industries, and I propose to take up first the question raised by the Government of India as to the relations between these departments. This question also involves the consideration of the proposals of the Commission in respect of the industrial and chemical services.

7. *The Imperial Department of Industries.*—The proposed Imperial Department of Industries, as I have already pointed out, is practically the Indian Munitions Board under another name. It will consist of a Board of three members with a President who will be a member of Viceroy's Council and who will have power to overrule his colleagues. The Department will be charged "with the direction and co-ordination of the general industrial policy of the country and the proper performance of certain functions of high national importance". It will deal with the following subjects and departments :—

- (1) Geology and minerals (including the Geological Survey of India and the administration of the Indian Mines Act).
- (2) Salt.
- (3) Indian Explosives Act and the Indian Petroleum Act.
- (4) Stationery and Printing.
- (5) Inventions and Designs.
- (6) The collection and distribution of commercial and industrial intelligence.
- (7) The supply of stores and the administration of the Stores Department.
- (8) The Indian Factories Act.
- (9) The general encouragement of industries including the grant of assistance or concessions to industrialists in cases of more than provincial importance.
- (10) Advice to Local Governments regarding the improvement of industries and the conduct of industrial and technical education.
- (11) The administration of the various Acts relating to steam boilers.
- (12) Electricity.
- (13) Ordnance Factories.
- (14) Inspection of Ordnance Stores.
- (15) General direction and application of chemical research and the control of the proposed Chemical Service.
- (16) Imperial factories for research or demonstration. Most of these functions require no comment. The Department of Industries will merely take over functions now belonging to other departments of the Government of India, and in respect of these functions there will presumably be no change in the relations between the Government of India and the Government of Madras. Instances are Nos. 1, 2 (which presumably refers only to the Department of Northern India Salt Revenue), 4, 5, 12 and 14. As regards the various Acts mentioned (Nos. 3, 8, 11 and 12), similarly I presume that no change will be made. The Government of India will lay down principles and policies and will amend the Acts where necessary, but the local application of the Acts will be left to Local Governments. No. 6 (the collection and distribution of commercial intelligence) and No. 7 (the Stores Department) are dealt with, as directed, separately.

8. *Its general control of Industrial policy.*—There remain, however, certain functions proposed for the Imperial Department which are more open to controversy. From the official summary of the Report, it appears that the

Commission proposes to lay on the Imperial Department the responsibility for "the industrial policy of Government and the inauguration and carrying out of a uniform programme of industrial development throughout the country." It is, of course, the function of the Government of India to prescribe general principles and to lay down broad lines of policy, and after reading the Report, I do not think that the "uniform programme" of development referred to mean more than that the Government of India will be expected—

- (1) to take certain steps which will remove some of the most glaring deficiencies of India's industrial position ;
- (2) to initiate certain lines of scientific research ;
- (3) to initiate certain surveys of great economic importance such as the coal survey (paragraph 94) and the hydrographic survey (paragraph 99) ;
- (4) to adopt certain large measures which are likely to be of great benefit to Indian industries in general, as for instance, the arrangements proposed for the purchase of Government stores ; and
- (5) generally to lay down the principles on which Local Governments may suitably assist the development of local industries.

In other words I do not think that the above phrase need necessarily be interpreted as indicating any intention on the part of the Commission that the Imperial Department should interfere otherwise than by suggestion and advice in matters within the competence of Local Governments. Much, however, depends on what the powers of the Local Governments will be in the future especially in regard to the creation of new appointments and to expenditure on new schemes, and how those powers are likely to be affected by the Commission's proposals in respect of the services. I will refer to this point later.

9. *Its functions in regard to the development of Industries.*—Nor do I see much difficulty in the division of functions between the Imperial and Provincial Departments as regards the direct encouragement of industries. Their respective spheres are fairly easily defined (*vide* paragraph 2 of the Government of India's letter and paragraph 320 of the Report), though naturally there may be doubtful cases on the border line. Generally speaking, the Government of India will deal with the development of "key" industries, *i.e.*, industries which are vital for purposes of national defence or are an essential link in a whole chain of other industries. All other industries will be left to the care of the provincial departments and Local Governments concerned. The Imperial and Provincial Departments will naturally be in the closest touch, and there is no danger of overlapping or confusion. There may be cases when the Local Government wishes to encourage an industry, in its province which the Government of India has already taken up. Such cases will be decided on their merits. It may be that the Local Government will decide that the industry in question is of such local importance that it should be encouraged in the Madras Presidency even though arrangements may already have been made to foster it in some other province, and if so, the Local Government's decision, which will be passed after consideration of any arguments which the Government of India may bring to bear, will naturally be final. Similarly, there may be purely local industries which the Local Government may wish to encourage. The Imperial Department will be consulted (since the whole scheme presupposes close co-operation between the Imperial and Provincial Departments) and may disagree either as to the necessity of helping the industry or as to the method of encouragement proposed. Full weight will of course be given to the views of the Government of India, but the decision will rest with the Local Government. The only centralization should be centralization of advisory functions. The Government of India may legitimately ask to be consulted, but it should not force its views on the Local Government. This I believe to be the intention of the Report. At any rate we ought to insist on this interpretation. There is no danger of wild cat schemes being taken up against the advice of the Government of India. There are too many checks. In the first place, a Local Government which disregards the advice of the Imperial Department will incur a considerable responsibility.

Secondly, there is the proposed Board of Industries to say nothing of the Standing Committee proposed in the Reforms Report (paragraph 232). As a matter of fact, if, as I suppose is probable, the Department of Industries is a transferred subject under the Reform Scheme, I regard the advisory functions of the Imperial Department as a valuable safeguard, and I think that it should be a recognized principle that in all schemes of industrial development, the Imperial Department should be freely consulted, provided that the ultimate decision rests with the Local Government.

10. *Scientific research.*—Scientific research, which is perhaps the most hopeful method of encouraging the development of industries, is sufficiently important to be dealt with separately. It opens up of course the whole question of the organization proposed for scientific research, but this question will be dealt with below. For the moment all that it is necessary to say is that the Commission contemplates Imperial Scientific Services in general and in particular an Imperial Chemical Service, the junior members of which will be lent to Local Governments. At the head of this Chemical Service will be a Chief Chemist, and each branch will be supervised by a Deputy Chief Chemist. The functions of these high officers will be to exercise the necessary critical check over the research work of junior officers wherever they may be at work, to prevent overlapping, to correlate the results of scientific research all over India and to arrange for the publication of those results in an authoritative all-India journal. Parenthetically I may remark that I consider that the danger of overlapping may be pressed too far. India is such a big country that there is no reason why the same problem should not be investigated in different parts of it, and personally I should object to the Madras Department of Industries being warned off some particular problem, which may be of great importance to local industries merely because the investigation of that problem has already been taken up in some other province. The Commission's insistence on the danger of overlapping of research however has reference, I imagine, mainly to the existing state of affairs when the number of scientific officers available is ludicrously out of proportion to problems which require investigation and when it is necessary to make the best possible use of our very limited resources in respect of scientific advice.

11. *Imperial Research Institutes.*—What I am chiefly concerned with now is the actual division of scientific research work between the Imperial and Provincial Departments. It was suggested to the Commission by some witnesses that all branches of scientific research should be grouped in a single institute (paragraph 128), but after referring to the Indian Institute of Science at Bangalore, the Commission was "definitely of opinion that its value to the industries of India is reduced by its distance from the places in which they are carried on." Consequently, the Commission very properly declined to contemplate "chemical research for all India in a single institute" (paragraph 129). From paragraph 126 it is clear that the Commission contemplates research by scientific officers lent to Provincial Departments and research naturally implies laboratory equipment. But the Commission also proposes the establishment of specialised Imperial research laboratories (paragraph 130). Incidental references are made to the necessity of research on certain metallurgical and chemical problems at Sakchi (paragraph 130), on tanning (Appendix D, paragraph 11) and on vegetable oils (paragraph 114), but it is suggested that the location of these Imperial research institutes as well as the selection of the groups of subjects should be settled by expert opinion obtained through the medium of the Committees proposed for the purpose of working out the organization of the scientific services (paragraphs 130 and 128). The proposals are a little vague. It may be that the Commission proposes to establish Imperial research institutes only for certain specialised subjects which, though extremely important for Indian industries generally, are only of indirect interest to most Local Governments. The institute proposed for metallurgical problems at Sakchi is a case in point, and if this is the intention, there is nothing to be said. But it is apparently the view of the Committee that Imperial research institutes should be established for such groups of subjects as tanning, tan stuffs and tannin extracts, and oils and fats in which of course nearly all Local Governments are directly interested, and the Commission appears to contemplate an organization of small provincial institutes dealing with research on these

subjects and working in close touch with a large, well equipped central research institute. It is unfair of course to criticize this proposal in the light of the past experience of the Agricultural Department in respect of Pusa or the Forest Department in respect of Dehra Dun. *Ex hypothesi*, the provincial departments will have their own staff of technical and scientific officers, *ex hypothesi* the Chief and Deputy Chief Chemists will exist for the purpose of co-ordinating and correlating research all over India, *ex hypothesi* there will be an all-India journal which will be an authoritative record of research all over India, and it may be admitted that the local Departments of Industries will be in far better position than they have been hitherto to make use of and apply the results of research work done in the Imperial research institutes. On the other hand, provincial jealousies will inevitably be roused when the question comes to be settled where these Central Research Institutes are to be placed. The principle is laid down (paragraph 130) that the institutes should be established in industrial centres in order that the staff may maintain close relations with industrialists and industrial work and that their investigations may be vitalised by the constant presentation of fresh problems of practical interest. Applying these principles, the Tanning Research Institute would probably be established at Cawnpore or Calcutta and the Oils and Fats Institute in Calcutta, Bombay or again Cawnpore. Neither institute will be established, it may be assumed, in Madras, though Madras has more tanneries and is probably richer in oil seeds than any other province. The result must be that provinces which have the good fortune to be selected as the site for one of these specialised Research Institutes will have a great advantage over other provinces. It is well known that Mysore derives incomparably more benefit from the Indian Institute of Science than any other province, and the Commission itself admits that the value of a research institute to industries varies directly with its distance from the industrial centre. The ideal plan of course is for each province to have its own research institute for the problems in which it is interested, especially as in a country so large and with such varied physical and climatic characteristics as India, the problems to be investigated differ naturally from province to province. But probably the answer will be that for financial reasons this solution is not possible, and that it is better to concentrate Imperial funds on the establishment of a few really well equipped and adequately staffed institutes than to fritter away those funds in subsidizing a number of comparatively weak provincial institutes. Most scientists, I think, would take this view, and it may also be admitted that these large institutes offer considerable advantages in the way of training up Indians in research. From the all-India point of view the organization contemplated by the Commission of small provincial research institutes working in close touch with one large central institute is probably right, but if this view is taken, two-points should, I think, be pressed on the Government of India. In the first place, efforts should be made to distribute the proposed Imperial Research Institutes fairly among the provinces. For instance, if the Metallurgical Institute is established at Sakchi, which though not in Bengal is close to Calcutta, and if Cawnpore is selected as the site for the Tanning Research Institute, then the Oils and Fats Institute should be established in Bombay or Madras. Secondly, in deciding as to the number and location of these institutes regard should be had to the fact that conditions in tropical Madras differ essentially from those in the North. A single specialised research institute for the group of subjects based on oil seeds therefore would not satisfy the requirements of India, and if it is decided to establish such an institute in Northern India, it should be considered whether another Imperial institute should not be established for research on the tropical oil seeds of South India. It may be taken for granted of course that the mere fact that an Imperial Institute has been established for research on one group of subjects will not operate as a bar to a Local Government establishing its own provincial Research Institute for the same group of subjects.

12. *Technical and Industrial education.*—It will be seen from paragraph 7 above that the tenth function of the Imperial Department is to advise Local Governments regarding the conduct of industrial and technical education, and from paragraphs 179 and 363 of the Report it appears that this advice is to be tendered through the medium of "thoroughly qualified visiting experts." It is pointed out that separate experts are required for metal working, textile

and wood-working schools, and that no one Local Government would be able to find full-time employment for all these men. It is, therefore, suggested that the ordinary inspection should be done by the Director of Industries and his superior staff, and that the schools should periodically be inspected by itinerant Imperial experts. Apparently it is not contemplated (paragraph 319) that the provincial departments should include the appointment of an Inspector of Industrial Schools, and the suggestion seems to be that this officer should be abolished, and that his place should be taken by itinerant experts. I cannot work up any enthusiasm for this proposal. One of the members of the Indian Industries Board will deal with industrial and technical education (paragraph 325) and will be a touring officer. His advice ought to be invaluable to a Provincial Director of Industries. But I do not agree that the Provincial Inspector of Industrial Schools can adequately be replaced by visiting experts. The value of Mr. Fyfe to me is not merely that he inspects all schools but that he relieves me of a great deal of routine work connected with the Trades School and the working of the Grant-in-aid Code and the Educational Rules. He is always at hand for purposes of consultation on questions of policy and on proposals to open new schools, and I can send him out at any time to inspect any particular school or to make local inquiries into applications for recognition of new schools. I should have no control over the visiting experts and could not use them for any of the above purposes. Nor would their advice be much good except on purely technical questions. They would have no knowledge of school management. I am not in favour of the proposal. As regards weaving schools, it is unnecessary as far as Madras goes. We shall have our own weaving expert. As regards wood-working schools, it is similarly unnecessary. Mr. Fyfe, our present Inspector of Schools, is an expert wood-worker. And as regards metal-working schools, if in the Industrial Service we have no expert metal-worker, at any rate *ex hypothesi* under the Commission's proposals the headmaster or superintendent of Government metal-working schools will be an expert at his job, and I should prefer to use him for the purpose of inspecting, on the technical side, other metal-working schools.

13. *The Services*.—So far in dealing with the relations between the Imperial and Provincial departments, I have proceeded on three assumptions. I have assumed—

(1) that the powers of Local Governments both in creating new appointments and in sanctioning new schemes involving expenditure will be greatly increased,

(2) that the functions of the Imperial Department *vis-à-vis* the Provincial Departments of Industries will be mainly advisory, and

(3) that in the case of a difference of opinion regarding a matter within the power of a Local Government, the advice of the Government of India will be treated with great respect, but in the last resort the decision will rest with the Local Government.

But new schemes or new lines of research may require special officers to deal with them. These officers when recruited will presumably belong to the proposed Imperial Industrial Service or the proposed Indian Chemical Service, and the fact that these services are both to be Imperial services may operate as a serious check on the independence in industrial matters of the Local Governments. The proposals of the Commission in regard to these services are the most difficult part of the Report.

14. *Imperial Industrial Service*.—The organization of the Provincial Departments of Industries contemplated by the Commission will include a Director and Deputy Director of Industries, Industrial Engineers, Principals and Professors of Technical Colleges, Inspectors of Factories, Boiler Inspectors, and Electrical Inspectors. Similarly, the Imperial Department will require controlling and senior officers for the various departments mentioned in paragraph 320 of the Report. The range of functions will be very wide, and the Commission is of opinion that the best way of overcoming this difficulty will be to train up men in an Imperial Service. Ultimately, it is proposed, the service should be recruited from Indians trained as Mechanical Engineers in this country, and a time-scale of pay rising to Rs. 1,500 per mensem is suggested.

The recruitment of the service is to be effected by a committee working under carefully prescribed rules, but the Report is silent as to the authority which will promote and distribute the staff. I gather however that as in the Indian Chemical Service, the Imperial Department will promote and distribute the staff.

15. *The Indian Chemical Service.*—The proposals in regard to the Indian Chemical Service are much the same. The service will be organized into three groups—(a) agricultural, (b) organic and (c) mineral. Each group will be under the “supervision” of a Deputy Chief Chemist, and the whole service will be controlled “for scientific purposes” by a Chief Chemist. Members of the service will be “lent” to Local Governments normally limited to five years, and the recruitment, distribution and promotion of the staff will be the function of the Government of India. It is proposed to appoint an expert committee to formulate proposals for the organization of the service and its terms of employment.

16. These proposals were fully discussed at the conference with Sir Thomas Holland, and it is not necessary to go over the ground again. I note in passing that I do not suppose that it is the intention of the Commission that the Government of India should post officers to different provinces as Directors of Industries. It is true that ultimately it is suggested that these officers should be recruited from the Industrial service and that that service will be an Imperial service. But a Director of Industries will not be like a Postmaster-General or a Collector of Sea Customs. He will be engaged in duties in which Local Governments are vitally interested, and he may even be an ex-officio Secretary to Government. No Local Government could possibly agree to such an officer being appointed by the Government of India, and I take it that the intention is merely (1) that the appointment should ordinarily be filled from the Industrial service and (2) that if no officer of that service serving in the province is considered suitable, the Local Government should consult the Government of India, and while reserving to itself complete liberty of choice, should consider the claims of any officer recommended by the Government of India. At any rate, in my opinion, this is as far as any Local Government can reasonably be expected to go.

17. Even apart from the fact that the services will be controlled by the Government of India in the matter of distribution and recruitment, the mere constitution of these services on an Imperial basis is clearly a centralising measure. As a matter of fact, it will alter fundamentally the relations between the Local Governments and the Industries Department of the Government of India. Local Governments, I believe, are empowered under the Civil Account Code to create permanent appointments (other than those ordinarily held by gazetted civil officers recruited in England), provided that the remuneration of the appointment does not exceed Rs800 per mensem, and they have larger powers in the creation of temporary appointments. These powers moreover, I believe, will shortly be enlarged. But if the Industrial and Chemical services are constituted Imperial services, obviously the Local Governments must surrender these powers. I imagine that a Local Government could not, even temporarily, increase the cadre of a strictly Imperial service. If, therefore, we wished to recruit an additional Industrial Engineer and if we had a suitable Indian for the appointment, we could neither create the appointment nor appoint the Indian. The sanction of the Government of India would be required for the new appointment, and all we could do would be to apply to the Government of India for a man. I have no doubt that the Government of India would readily agree both to the new appointment and to the selection of the man we wanted. But the fact remains that the effect of the proposal to create Imperial services does alter for the worse the position of Local Governments *vis-à-vis* the Industries department of the Government of India. That department's functions will not be essentially advisory except in certain matters expressly reserved to itself. Through its control of the services, it can intervene effectively even in matters which ordinarily would be entirely within the competence of the Local Government.

18. This appears to me to be the main objection to the proposal. For the rest, it is merely a question of balancing advantages and disadvantages. Personally as regards the Indian Chemical Service, I would be prepared to waive even the above objection, and I think the advantages of the Commission's proposal distinctly outweigh the disadvantages. The dangers are that if we get a good man in Madras, he will be caught up aloft just when he is beginning to make himself really useful, and that our scientific officers, unless they are of mere average ability, will be mere birds of passage always hankering to get back to service directly under the Government of India. Nor do I think that any useful purpose would be served by stipulating, as I thought of suggesting, that special allowances should not be given to officers serving in Imperial Research Institutes and that such officers should not be given high sounding titles. Officers of the Indian Chemical Service will look for promotion to the Imperial Department. In Imperial Research Institutes they will come directly under the eye of the Imperial Department, and to the keen scientist, apart from all other considerations, the attraction of working in large well-equipped research institutes will of itself prove irresistible. These institutes therefore inevitably, and from a broad point of view quite rightly, will attract the best men. But I do not see how these disadvantages can be avoided if we admit the Commission's main premise that, in these days of specialization, no Local Government could possibly afford to employ all the chemists and specialists it is likely to require. In my opinion we must accept this proposition, and if we do so, obviously it is the governing factor in the case. The Government of India must have its own staff of chemists and specialists. *Ex hypothesi* that staff will be larger than any that a Local Government can afford to employ. Further, it will work in larger and better-equipped research institutes. For these reasons alone, it seems to me that we must join in with the Government of India. It would never do to have in India a large Imperial Chemical Service plus a number of small separate Provincial services. The latter would be overshadowed. Our officers, besides being expensive to recruit, would never be happy. They would always be scheming for appointments in the larger service with its greater opportunities and its more spacious prospects. If we refused to let them go, there would be discontent and restlessness, and further, without as far as I can see any compensating advantages, we should have all the disadvantages, inseparable from small isolated services. These disadvantages are very serious. I have not the faintest idea, for instance, what we should do if Doctor Marsden fell ill and had to take leave just after starting his dyeing school, and Mr. Nayudu at the Leather Trade School has been in a position to intimidate us just because of the impossibility of replacing him. Difficulties of this kind are unavoidable in the case of isolated specialist appointments, and my conclusion is that it is better to accept the inevitable and adhere to the proposed Indian Chemical Service. But whether Government accept this view or whether they prefer to have their own separate staff of chemists, I am much in favour of the proposals in paragraph 126 of the Report. The Chief Chemist and Deputy Chief Chemists proposed are likely to be most useful in maintaining professional standards, in subjecting local research to a continuous critical check, and in preventing Provincial Chemists from embarking on infructuous lines of work. I agree also that an authoritative chemical journal for all India is most desirable. Whatever method of organization be adopted, therefore, I think that Government should welcome these features of the Report, and it should be noted that it is doubtful whether these appointments can be justified unless the proposals of the Commission for an Indian Chemical Service are adopted in their entirety.

19. The case for an Imperial Industrial Service is very similar. It is unquestionable that the aim and object should be to train up Indians for the Imperial and Provincial Departments of Industries, and it must be admitted that the best way to obtain a continuous supply of adequately trained Indians is to offer a definite career in a regularly constituted service. It is also clear that if we have a service at all it must be an Imperial service, for the various appointments in the Provincial Department could not appropriately be filled from the limited cadre of that department. For instance, the proposal to include factory and boiler inspectors in the service can be justified only on the assumption that these appointments will be held for limited periods by

junior officers! In Madras it is not necessary to pay officers of this type on a scale rising to Rs. 1,500 per mensem (paragraph 334). It is possibly doubtful whether all the different appointments required for the items of work specified in paragraph 330 of the report can usefully be combined in a single service or filled by a uniform system of recruitment. But it is true that the majority of the officers of the service will require engineering experience, and on the whole I consider that it is best to have a single Imperial service. For one thing, if the Chemical service is an Imperial service, the members of the Industrial service will claim the same status, and for another I think that the disadvantages inherent in a small isolated service are greater than those of centralization. On the whole therefore I think, that the idea of an Imperial Industrial Service may be accepted on the understanding that the Local Government will be consulted before any officer is removed from or transferred to its province. The question is not a pressing one, for it will be a long time before arrangements are made for the adequate training of Mechanical Engineers in India, and in the meantime I presume that the service will continue to be recruited by a system of judicious opportunism, the Government of India acting as a sort of central exchange in the matter of appointments.

20. *The Provincial Department of Industries.*—In Madras it is not necessary to argue the general question whether the Department of Industries should be developed. The Government of Madras has always shown the way to other Local Governments and the Government of India in its industrial policy, and the Commission has paid us the compliment of basing its recommendations very largely on the policy hitherto followed in Madras. Nor do I think it necessary (nor indeed proper) to offer any remarks at this stage on the points raised in paragraphs 311 and 313 of the report regarding the qualifications and pay of the Director of Industries. The questions requiring immediate consideration are—

- (1) the functions of the department,
- (2) in particular the proposal that agricultural engineering should be transferred back to the Department of Industries,
- (3) the proposal to establish a Board of Industries, and
- (4) the suggestions of the Commission as regards the relations between the Director of Industries and Government.

It must be obvious that much could be written on each of these questions, but as I have particularly been asked to submit my views at a very early date and as I understand that the Hon'ble Mr. Low will be visiting Madras next month to discuss controversial points with Government, I think that it will be sufficient if I merely indicate my opinion and give very briefly the reasons on which it is based.

21. *Its functions.*—The ideas of the Commission regarding the main heads of work of the Department of Industries are explained in paragraph 306 of the report. (a) calls for no remark at this stage. In (b) the most important proposals relate to the collection and distribution of commercial and industrial information and to work connected with Government stores. These proposals will be dealt with separately.

22. *Industrial and Technical Education.*—(c) is important as it raises the controversial question whether industrial and technical education should be controlled by the Department of Industries or the Department of Public Instruction. The Industrial Conference of 1908 defined industrial instruction as "instruction in the performance of definite operations not necessarily involving the teaching of general principles but only of their application" and stated that the object of technical education was to train students to apply theoretical principles to practical purposes. It recommended that the control of both industrial instruction and technical education should rest with the Department of Industries, but eventually a compromise was effected. It was decided (G. O. No 1625, Revenue, dated 18th June 1909)

- (1) that the School of Arts and the Reformatory School should be retained under the control of the Department of Public Instruction,

(2) that schools where the education was purely of a commercial character should remain under the Education Department, and

(3) that in the case of schools where the instruction was purely intellectual or commercial and partly manual or technical, the principle should be followed that if the training was predominantly intellectual or commercial, the school should remain under the Educational Department, whereas if it was predominantly manual or technical, it should be transferred to the Department of Industries.

As the result of these orders certain schools were made over to the Department of Industries, and the orders have worked quite well. Every now and then a doubtful case has arisen, but the Director of Public Instruction and I have never had any difficulty in coming to a decision. The general effect is that I look after industrial education and as regards technical education (apart from the Engineering College) there is not any. Separate arrangements are proposed for colleges (paragraph 175), and in regard to industrial and technical education, it is evident from Chapter X of the report that the Commission contemplates chiefly handicraft schools and the provision of facilities for training artisans, foremen and mechanical engineers. In the handicraft schools the main object will be the imparting of manipulative skill. In the training of artisans, foremen and mechanical engineers the training will consist partly of workshop training and partly of class instruction. The intensity of the class instruction will naturally vary with the class of student under instruction, but in all these cases stress is laid on the prime necessity of workshop training. The training of craftsmen, artisans and foremen clearly, I consider, should rest with the Department of Industries, and I think myself that the same remark applies to the training of mechanical engineers. The Director of Public Instruction should of course be consulted as regards the class instruction, but the Director of Industries is more likely to be able to arrange for the workshop training. In many ways he will be brought into close touch with the owners of workshops, and his department will be better equipped for the supervision of the workshop training. Further, the provision of proper technical education is one of the first conditions of industrial development in India, and the Director of Industries necessarily will be far more interested in the subject than the Director of Public Instruction. I think therefore that Government may accept generally the proposition that as proposed by the Commission in paragraph 177, the control of Technical and Industrial education should vest in the Department of Industries. Government of course will reserve the right of deciding whether particular schools should be controlled by the Education or Industries Department such as Reformatory schools and the School of Arts.

23. *Administration of Factory, Boiler and Electricity Acts.*—The fourth section of the department's work is the control of the staff employed in the local administration of the Factory, Boiler and Electricity Acts and the furnishing of advice to Government on the industrial and commercial aspects of the Mines Act and Mining rules. It seems unnecessary to discuss these proposals as far as they relate to the administration of the Factory and Boiler Acts. They are obviously proper, and the mineral wealth of a country is such an important factor in industrial development that every one will agree, I think, that the Director of Industries should be consulted to the extent suggested by the Commission. The control of the staff engaged in the local administration of the Electricity Act is a more doubtful question. But personally I agree with Commission for the reasons given in paragraphs 228 and 229 of the report. The Department of Industries exists for the purposes of helping existing industries as well as of fostering new ones and is likely to view the questions that come up from the right point of view.

24. *Agricultural Engineering.*—It will be seen from paragraph 307 of the report that the Commission strongly urges the retransfer of the Pumping and Boring Department to the Department of Industries. This is an important question which Government will no doubt desire to have separately discussed. I note however that I am strongly in favour of the Commission's proposal. The reasons for the transfer to the Agricultural Department are stated in Mr. Chadwick's letter printed in G. O. No. 523, Revenue, dated the 7th March 1916. I am not

prepared to deny that there was strength in the case presented by Mr. Chadwick to Government. But the proof of the pudding is in the eating. Mr. Chadwick based his case largely on the assumption that he would be able to secure an Agricultural Engineer who at once was a highly skilled Mechanical Engineer and possessed expert knowledge of agriculture under Indian conditions. In point of fact he secured a man who occupied, I believe, a comparatively subordinate position in the Drainage Department of the Madras Corporation. Nor do I admit that this was a mere accident. Isolated posts offering no prospects of advancement are always difficult to fill, and even if Mr. Chadwick had secured the type of man he wanted, there would have been perpetual difficulty in replacing him when he went on leave or retired. In my view, an officer must be trained for a job of this kind, a large Mechanical Engineering Department offers the best training ground and a wider field of selection and further overcomes the difficulty of isolation and want of prospects. At any rate the fact remains that now that the Agricultural Department has got its way and has its own Agricultural Engineer, I do not believe that applications for borings or for installations are disposed of with greater promptitude or with greater attention to agricultural conditions than in the days when the Pumping and Boring Department was a branch of the Department of Industries. On the other hand, the present system has led to grave administrative inconveniences. Instead of one large self-contained service, we have two weak services. Both suffer from the inevitable disabilities of small services—want of prospects, discontent and restlessness, and inadequate supervision. Further, as G. O. No. 1275, dated 3rd May 1917, shows, it is difficult precisely to define the limits of the activities of two departments, and there are overlapping and duplication of staff. This is particularly the case in the working of the compounding system. Mr. Stuart has his staff of supervisors and mechanics engaged in inspecting oil-engines driving pumps. I have my staff of supervisors and mechanics engaged in inspecting oil-engines driving rice hullers and cotton gins. The work is identical—either staff could do the other's work. I entirely agree that it is most important that the Agricultural Department should be consulted before pumps are installed. At present, I suppose, that applications are first considered by the circle officer of the Agricultural Department, and then forwarded with his remarks to the Agricultural Engineer. The only difference would be that the applications would be forwarded to an Industrial Engineer. There would be no loss of time, and in all essentials the procedure would be precisely the same. I entirely agree again that there is scope for most useful work in adapting modern agricultural machinery to Indian conditions. The question inevitably will become more and more important as prices rise and wages go up, and I entirely agree that it is sufficiently important to demand the full time of a highly skilled engineer working in the closest possible touch with the Agricultural Department. But if it be granted that the Department of Industries is to be developed into the highly skilled technical department contemplated by the Commission, obviously the Agricultural Engineer instead of being an isolated officer attached to the Agricultural Department should be one of the Industrial Engineers of the Department of Industries who, if they make good, will have the prospect of promotion to high administrative posts. I cannot see that there would be any difficulty in arranging for one or more of these Industrial Engineers to work in collaboration with the Department of Agriculture. One of the most important recommendations of the Commission is that the Department of Industries should be equipped to deal with power plants and machines of all kinds, and it is particularly important in Madras where the trend of industrial development undoubtedly lies in the direction of the supersession of hand labour by small power installations. The present system of splitting up the work which is primarily engineering work between the Department of Agriculture and the Department of Industries is open to the administrative objections I have pointed out, and if the system is continued, the development of the Department of Industries on its natural lines will be stunted and hampered. One large Department independent of the Public Works Department for its staff, offering in itself reasonable prospects of promotion and linked up intimately with other similar departments in India is obviously preferable to two small Departments, and I am strongly of opinion that the Commission's recommendation should be accepted.

of India for such experts as may be required for the development of organized industries or for the investigation of its resources in raw materials. A well-equipped central organization, such as is referred to in paragraph 4 of the letter under reply, is, therefore, the only arrangement which will meet the needs of the North-West Frontier Province.

4. In considering the practical administrative measures which may be taken for the development of the industries of the province with due regard to its circumstances and the resources of the Administration I have, however, had the advantage of the advice of Mr. Low, who visited the province last January and fully discussed the question. The conclusions which were reached as the result of this discussion were that attention might be directed advantageously by this Administration to the improvement of indigenous industries and that an industrial school might be established in Peshawar, with a subsidiary organization for teaching village artisans improved methods and the use of modern tools at their homes. It was also decided that an officer might be appointed for the control of industrial and agricultural work in the province who would supervise the school working under a qualified headmaster and the demonstration parties visiting villages. With regard to the industrial school it was agreed that the Central Provinces Government might be addressed and asked, if possible, to allow the Headmaster of the Nagpur school of the Handicrafts to visit this province and work out proposals for a similar scheme. I have since ascertained that as Mr. Cove, the Headmaster of the Nagpur School, is taking 9 months' leave he cannot be spared to visit Peshawar, but I trust that on his return it may be found practicable for the visit to be arranged. With respect to the appointment of an officer for the control of industrial and agricultural work it must be explained that at present the only officer available in this province for the purpose is the Revenue Commissioner, whose other duties preclude his detailed supervision of industrial education and development. Mr. Low was of opinion that on general grounds the linking of industrial and agricultural work under a single officer is a mistake, yet, in the peculiar circumstances of the North-West Frontier Province, he considered that such a scheme might work very well. He thought that an officer of the type at present working as deputy directors of agriculture in other provinces might be suitable for the above purpose. A man of this class, who had a fair knowledge of mechanical engineering and had had some experience, would be competent to supervise the working of a school of handicraft under a skilled headmaster and of peripatetic parties for demonstrating weaving, carpentry, etc. in the villages, while he would, of course, be fully able to control agricultural work. The appointment of this officer will be considered when the Industrial school is started.

No. 2050-Com., dated Calcutta, the 3rd May 1919.

From—The Hon'ble Mr. C. F. PAYNE, I.C.S., Secretary to the Government of Bengal, Commerce Department,

To—The Secretary to the Government of India, Department of Commerce and Industry.

I AM directed to reply to your letter No. 589-D., dated the 8th December 1918, regarding the report of the Indian Industrial Commission.

2. The Government of India lay emphasis on the vital importance of the development of the industries of this country, and while postulating that certain large questions must be handled by the Central Government, they admit that industrial development will mainly be the concern of the Local Governments. They therefore invite the opinion of the Governor in Council on the proposals made in Chapter XXI of the report of the Commission. Of these the following are more particularly mentioned in your letter under reply:—

- (i) The creation of an Imperial Industrial Service mainly composed of men who have been trained as mechanical engineers.
- (ii) The creation of a similar Imperial Chemical Service.
- (iii) The creation of a central organisation for the purchase of stores under the Central Government, which will be supplemented by

provincial agencies working under the Local Governments. It is suggested that the actual distribution of the organisation between the Central and Local Governments should be left to a small committee to be appointed later.

- (iv) The acceptance by the Local Governments of the responsibility for the collection of local commercial and industrial intelligence.

The Government of India enquire whether these proposals commend themselves to the Governor in Council. They also raise the general questions of (a) the use that can be made of the experts who are to be recruited for the Imperial Service, (b) the relations between the Imperial and provincial Departments of Industries, (c) the status of the expert officers already employed in Government service, and (d) the method and terms of recruitment of those who will be required for the new departments, though this point is reserved for subsequent discussion. It is announced that the Government of India contemplate the creation of a central department, which will consult this Government later with regard to the details of the proposals now made.

3. The recommendations of the Commission as to the organisation required to initiate and carry on the policy advocated by them are contained in Chapters XXI and XXII of their report. Chapter XXII deals with the creation of an Imperial Department of Industries, the duties of which are defined in paragraphs 322 and 324. The Department will consist of a Member in charge, who will be assisted by an Indian Industries Board of three ordinary members, of which he will be the President. The usual secretariat staff, including a Financial Adviser, will be attached to the Department, which will be located at the headquarters of the Government of India. The immediate recruitment of an Imperial Industrial Service to perform the functions enumerated in paragraph 330, and the immediate appointment of provincial Directors and Deputy Directors with subordinate staffs lent from the Imperial Service, are also proposed. Officers of the Industrial Service on recruitment will usually be assigned to a particular province, as in the case of other Indian Services, and will then come under the control of the Local Government. An officer so allotted would apparently serve out his full time in the province to which he is originally posted, unless transferred for special reasons by the Government of India. Apart from experts on particular subjects the rate of salary suggested for the mechanical engineer class is Rs. 450 monthly while on probation, and thereafter Rs. 500 rising by annual increments to Rs. 1,500. It is, however, recognised that, at first, individual selection for particular posts will be necessary until the normal recruitment for the Imperial Service takes effect.

4. Chapter XXI deals with the organisation of the provincial departments, and it is on this that the opinion of this Government is more particularly invited. Briefly, the object aimed at is to bring under the new department all the existing commercial and industrial activities of Government, and to provide it with a staff—that will be adequately equipped in scientific, technical and business knowledge, the administrative experience required being in the first instance furnished by the Director himself. Gradually the experts recruited for the Imperial Service will become trained in administration, and eventually the provincial Directors will be appointed from the ranks of that service. The proposals made for the organisation of the new department are as follows:—

- I.—The control of technical and industrial education will be the concern of the Local Governments, except for two central institutions maintained by the Central Department for high grade engineering, and for metallurgy and mineral technology respectively.
- II.—The existing organisation of the Agricultural and Forest services and the Geological Survey will not be disturbed.
- III.—The department will be entrusted with the collection and distribution of local commercial and industrial intelligence.
- IV.—The department will also take over the local administration of the Electric, Factories and Boilers Acts, and will advise Government

on the industrial and commercial aspects of the Mines Act and of the rules for mining and prospecting leases.

V.—The Co-operative Credit Department will be brought under the provincial Member in charge of Industries. This proposal is presumably open to further examination in the light of the decision as to transferred and reserved subjects under the Reforms Scheme.

5. In addition to the transfer of these activities to the new department, the Provincial Director will assume responsibility for the new work summarised in paragraphs 306 and 331. In order to enable him to deal with this the following staff is suggested. The provincial Director will be a Secretary to Government and will be advised by an Advisory Board, of which he would be Chairman, comprising from six to twelve members, mainly non-official, who would have power to co-opt others and to appoint sub-committees. It is also suggested that local district committees should be constituted which would be in close touch with the Director and the Advisory Board. It is stated that the provincial Director should at first be preferably an industrial or business man, but that ultimately he will be promoted by selection from the Imperial Service. The salary suggested is Rs. 2,500—3,000, though at first a higher salary may have to be paid. He will have under him, in addition to the existing staff to be taken over, a Deputy Director on a salary of Rs. 1,000—1,500, three industrial engineers on salaries of Rs. 1,250 and Rs. 1,000, and a Commercial Intelligence Officer on a salary of Rs. 1,500. Chemists, for whom a salary of Rs. 300—500 is suggested, will be appointed when necessary, but ordinarily the chemical work, which will be mainly of an analytical character, will be done by the professors in technical colleges and schools, who will act as experts and consultants in their special subjects. In addition the department will have under it a certain number of Circle officers with territorial charges throughout the province. These will be men with engineering qualifications, who will be appointed locally on salaries ranging from Rs. 200 to Rs. 700. A senior ministerial officer will be in charge of the office of the Director on a salary of Rs. 500. Ultimately the staff of the provincial department will be as stated in paragraph 319, and detailed estimates of the expenditure are given in statements I and II of Chapter XXIII.

6. The Governor General in Council regards the expediency of encouraging industrial development in this country as an issue which has already been admitted on all sides. The subject is technical and outside the experience of the ordinary officer, and further criticism of it would be a waste of time. It is also, in his opinion, a matter of great importance that something practical should now be done to give effect to the recommendations that have been invited and received not only from officers, committees and commissions specially appointed to report on this matter, but also from the public. Opinion has long been in favour of a forward policy in industrial matters, but hitherto the difficulty has been to determine the exact measures that should be adopted. For this purpose, presumably, the Industrial Commission, which was more or less an expert body, was appointed to advise as to methods. Their recommendations have now been received, and the Governor in Council is willing to accept their advice as better than any alternative that he can suggest. He is prepared to make a beginning on the lines advocated in their report, and wishes to do so as soon as possible, so far as the funds at the disposal of this Government will permit. But he is of opinion that for the future we must be guided by the experience gradually gained and that it will be useless to try to settle every detail before such a beginning is made. The essential matter at present is to create an organisation which can advise Government as to the policy to be followed: developments will follow later. In view of these considerations the Governor in Council proposes to concentrate attention more on the steps that should be taken immediately than on any discussion as to the different points raised. In particular it seems to him that the relations between the provincial and imperial departments will evolve themselves as experience is gained and that it is impossible to define the ideal arrangement *a priori*.

7. Until recently little has been done in the Presidency to assist in the development and encouragement of local industries. The position was surveyed on more than one occasion, but, as has been shown in paragraphs 110 and 111 of the Commission's Report, little of a practical nature was evolved or given effect to. In 1909 sanction was obtained to the appointment of a Superintendent of Industries and Inspector of Technical and Industrial Institutions in Bengal, and it was expected that this step would lead to some industrial development. But from the start the energies of this officer were almost completely absorbed by his educational work. In time the encouragement and development of industries by means other than educational became a question of such outstanding importance that an application was made in this Government's letter No. 9-T.-Com., dated the 8th May 1915, for the appointment of a Director of Industries, who could get into touch with local industries and study their problems, and generally be in a position to give valuable advice and assistance hitherto lacking. Owing, however, to financial exigencies, the consideration of the question was deferred until 1917, when this Government again pressed the proposal of 1915 upon the urgent consideration of the Government of India in their letter No. 35-T.-Com., dated the 15th May. The present appointment of Director of Industries in Bengal was a direct result of the war. The organisation of the Munitions Board, which was created on the 1st of April 1917, required provincial Controllers of Munitions in each circle, and the Government of India suggested that the two appointments should be combined, and that a Director of Industries should be appointed in Bengal who should also be the provincial Controller of Munitions under the Government of India. The proposal was accepted, and this Government agreed to bear the entire charges on account of the salary and allowance of the Director of Industries. The appointment, however, of Director of Industries is only a temporary one, and for the present co-terminous with that of Controller of Munitions.

8. The views of this Government are not invited on the imperial organisation proposed, but on the grounds already stated I am to say that the Governor in Council accepts this as a suitable basis for future development. With regard to the provincial organisation suggested in the report of the Industrial Commission, many of the points raised can appropriately await discussion hereafter. Among these the Governor in Council includes the suggestions that the provincial Director of Industries should take over agricultural engineering, that the Co-operative Credit Department should be placed under the provincial Member or Minister in Charge of Industries, that local district committees should be constituted, and that the provincial Director should occupy the position of a Secretary to the Government. He accepts the main proposition of a provincial Director assisted by an Advisory Board and with functions on the lines suggested, and proposes immediately to concentrate attention on the manner in which the duties stated in paragraph 306 can best be handed over to the new department. These functions may be classified as follows :—

- (a) The encouragement and development of industries on the lines of paragraph 306 (a) and (b) in part.
- (b) The collection and distribution of commercial and industrial intelligence.
- (c) The purchase and inspection of stores.
- (d) The control of technical and industrial education.
- (e) The administration of the Electricity Act.
- (f) The administration of the Factories Act.
- (g) The administration of the Boiler Act.
- (h) The administration of the Mines Act.

The existing position as regards these various branches of provincial activity is indicated briefly below.

9. Such encouragement and development of industries in this Presidency as has hitherto been given was really the direct result of the war. The work of the Munitions Board in Calcutta increased very rapidly after the appointment of the Director of Industries. This work was largely administrative and

generally of great urgency, and the local Director has been almost entirely occupied with work done as Controller of Munitions, and has had no opportunity to organise the local Industrial Department, except in so far as such action was necessary to meet urgent war demands. During the last two years conditions have been abnormal, and the whole manufacturing resources of the province have been directed to supplying the needs of the armies overseas. It is, therefore, very difficult to separate the industrial work done by the Director of Industries in the province from the work done for the Indian Munitions Board. He has been chiefly occupied with the investigation and encouragement of industries brought into prominence by the actual needs of the moment, and more particularly by the increasing demands for the army and the restriction of imports imposed by the priority procedure. For instance, much has been done to encourage the tanning of leather, the manufacture of jute mill and tea-garden stores, and porcelain and pottery, and a great part of the Director's work has been directed towards providing the supply and transport of the raw materials required by the local manufacturers. Practically all essential materials have been controlled, and the assistance of the department has been regularly invoked by firms requiring supplies of these. As a result, manufacturers in this province have made much use of the advice and assistance of the department, and His Excellency in Council considers that advantage should be taken of the confidence which has been established and that a nucleus of the proposed new department of industries should be appointed immediately to carry on the work which would otherwise cease with the demobilisation of the Indian Munitions Board.

10. At present no authority under the Local Government exists for the collection and distribution of commercial and industrial intelligence. The Government of India have an agency for the purpose in this Presidency in the person of the Director-General of Commercial Intelligence, and in connection with the reorganisation of that officer's department this Government in its letter No. 5819-Com., dated the 8th November 1914, made a recommendation for the retention of the central collecting agency with the Government of India and the establishment of a staff of trade correspondents at all trade centres working under the Local Government and supplying information to the central agency ordinarily through the Local Government. It was then contemplated that the provincial Director of Industries should have functions distinct from, though intimately connected with, those of the trade correspondents, but in the light of the proposals now made the Governor in Council sees no reason why the provincial Director of Industries should not assume the responsibility for this particular branch of commercial and industrial work.

11. Prior to the constitution of the Indian Munitions Board and to the difficulties experienced during the war in obtaining articles from the United Kingdom, supplies of stores for the public services were regulated by the rules promulgated by the Government of India, Commerce and Industry Department, Resolution No. 5829—5876-11, dated the 24th July 1913. In accordance with them, provided certain conditions are fulfilled, various articles, whether manufactured in India or not, or whether manufactured from Indian or imported material, should be purchased in India; while other articles not manufactured, or which cannot be purchased, in India should be obtained on indent from the Director-General of Stores, India Office, London. It is also permissible for certain classes of articles to be purchased outside India. Indents for stores on the Director-General have hitherto been submitted through the Government of India, except in the case of those officers to whom the power has been delegated to indent direct on the Director-General, but with the creation of the Indian Munitions Board indents have been submitted through that channel.

In connection with the suggested central stores department the results of the enquiry to be made by the expert committee will be awaited; but the Local Government are of opinion that if the position of the local Director is to be adequately maintained, it is desirable that he should play an important part in the matter of supplies, which should not be unduly centralised.

12. As regards the control of technical and industrial education, this at present rests with the Director of Public Instruction, under whom there is one whole-time officer, known as the Superintendent of Industries and Inspector

of Technical and Industrial Schools, on a salary of R1,000—100—1,500 a month. This officer's duties are to inspect and report on all institutions for technical and industrial instruction. The duties of supervision and inspection exercised by him cover five schools of art, five schools of engineering and surveying, and 67 technical and industrial schools, in addition to the central weaving institute at Serampore, the Principal of which himself supervises generally the work of five minor weaving schools. Among other duties, the Inspector is also (i) Secretary to the Joint Technical Examination Board; (ii) Assistant Director of Public Instruction for technical and industrial instruction, in which capacity he has to formulate all cases connected with these branches of education for submission to the Director of Public Instruction; (iii) a member of the Governing Body of the Board of Visitors of the Civil Engineering College, of the final B Class Examination Board and of the Mining Educational Advisory Board; (iv) Secretary to the Amin Examination Board which has been formed for conducting the examinations of survey schools; and (v) Secretary to the local City and Guilds Technological Examinations Board. The post is outside the cadre of the Indian Educational Service.

13. The Indian Electricity Act, IX of 1910, and the rules framed under the Act at present fall under the administration of the Public Works Department, Roads and Buildings Branch, in Bengal. The inspector under the Act and his staff are also appointed by the Public Works Department. In addition to his duties under the Act and the rules, the inspector is technical adviser to the Local Government in all matters relating to electricity. He is also adviser in all matters connected with electricity schemes for power, lighting and fans in Government buildings *outside* the area of Calcutta; he prepares estimates for, calls for tenders for, and passes, work of this nature carried out on contract. In *Calcutta itself*, however, a separate Electrical Division exists for the work undertaken and maintained by Government in their buildings. The Government of India has already made enquiries in connection with the scheme for the reorganisation of the Public Works Department as to whether this inspector and his establishment should remain subject to the administration of the Public Works Department, and the Governor in Council is considering the matter in that connection, but he would here remark that he sees no objection to transferring the administration of the Act, together with the inspector and his staff, to the proposed Industrial Department. He would, however, leave all matters relating to electric light, fan and power installations in Government buildings in the whole province under the control of the Public Works Department.

14. The administration of the Indian Factories Act, 1911, is at present entrusted to a whole-time staff of factory inspectors with duties extending over Bengal, Bihar and Orissa and Assam, and consisting of a Chief Inspector on a salary of R800—50—1,000 a month, two inspectors on R400—30—700 a month with, at the moment, a temporary inspector on R490 a month. There is also one whole-time certifying surgeon in receipt of R600—20—800 a month, exercising jurisdiction over factories within a certain area in which a large number of children are employed. The department is at present under the direct control of Government, with no intermediate authority between Government and the Chief Inspector. It is the duty of the various officers to examine the premises, machinery and prescribed registers, to take such evidence of persons as may be deemed necessary, and to exercise such other powers as may be required for the purpose of enforcing the provisions of the Act. In short, the inspectors are responsible for the administration of the Act within the area for which they are appointed. They are required to inspect within such area every textile factory at least four times a year, and every other factory at least once a year, and to satisfy themselves that the provisions of the Act and of the rules framed under the Act relating to the health, safety, hours of labour, etc., of the persons employed therein are being observed. The whole-time certifying surgeon, and other medical officers authorised within their jurisdiction to exercise the power of a certifying surgeon under the Act, are required to examine children desirous of being employed in a factory, and to grant them certificates of age and physical fitness for such employment.

15. The Steam Boilers and Prime Movers Act, 1879, is administered at present by the Local Government in the Marine Department through the Steam Boiler Commission. This Commission is a mixed body of officials and non-officials, with the Commissioner of Police as their permanent President. An inspector of factories is Vice-President and Secretary, and receives an allowance for his work with the Commission. There is a staff of eight inspectors, including a senior inspector on R500—20—600, two inspectors on R450—10—500, and five inspectors (one temporary) on R350—10—450. The charges of the department are met from the Boiler Fund, which is a local fund financed by the receipts from fees for the inspection of boilers. The duties of the officers are the inspection of boilers and the grant of certificates as to the fitness of these boilers. It is now proposed to make the Boiler Department a department of Government under the control of the provincial Director of Industries, and pending a full decision on this question a proposal has been submitted to the Government of India for the appointment of a Chief Inspector on R1,000—50—1,250, who will replace the present Vice-President and act as Secretary to the Boiler Commission.

16. The establishment of the Department of Mines, consisting of one Chief Inspector and four inspectors, is under the control of the Government of India. The local jurisdiction of each inspector of mines, other than the Chief Inspector, is, however, detailed by this Government under the Indian Mines Act, 1901, the Chief Inspector having jurisdiction under the Act throughout British India. The duties of the inspectors consist chiefly of investigating the conditions existing within mines. They are also, on the recommendation of the Chief Inspector, appointed by this Government under the Land Acquisition (Mines) Act, 1885, to investigate and report on the working of the minerals under land acquired by Government under the Land Acquisition Act.

17. These are the various activities which would come within the scope of the Department of Industries, and the Governor in Council proposes as a beginning the following permanent arrangements:—

- (1) The creation of a provincial Board of Industries.
- (2) The appointment of a Director of Industries on a salary not exceeding R3,000 a month.
- (3) The appointment of a Deputy Director of Industries on a salary not exceeding R1,500 a month.
- (4) The appointment of five Circle Officers on salaries of R200 to R700 a month.
- (5) The subsequent gradual organisation of the department round this nucleus on the lines advocated in the Commission's Report.

This will be sufficient for a start in the new work to be undertaken by the department including the collection and distribution of commercial and industrial intelligence, and the purchase and inspection of stores; but His Excellency in Council also contemplates the appointment of an industrial engineer on a salary not exceeding R1,250 a month, and a commercial intelligence officer on a salary not exceeding R1,500, as soon as suitable men can be obtained.

At present the existing establishment of the Industrial Department consists only of the temporary Director and his establishment, at a monthly expenditure of R4,050. The appointment of the officers mentioned above, together with their necessary establishments, will involve an additional expenditure of R16,200, as shown in the attached statement, bringing the total expenditure of the department to a sum of approximately R2,43,000 per annum, an annual increase of R1,94,400 on the existing expenditure. Provision sufficient to cover the cost of the whole establishment exists in the budget of the current year; and if sanction be given to the entertainment of the above officers, the Governor in Council will at once proceed to make the necessary arrangements. The proposals, in so far as they cover existing

departments, involve an expenditure, which is shown in the budget of 1919-20, to the following extent :—

	R
Inspector of technical schools	22,000
Engineering and survey schools	56,000
Technical and industrial schools	1,08,000
Department of the Inspector of Factories	74,000
Department of the Electrical Inspector	33,500

The Boiler Inspection Department is now a local fund (though it is proposed to make this a Government) department, the present expenditure of which amounts to Rs5,000, but this will necessarily be increased by the transfer of the department to Government and the further proposals that have been raised by the Public Services Commission. The department of Factories will also require strengthening, while the emoluments of the staff will be increased as a result of the recommendations of the Public Services Commission. In addition it will be necessary to make provision for experiments and demonstrations. The budget of the current year provides for expenditure on a research tannery, which has been established, and an unallotted sum of half a lakh of rupees for schemes of industrial development not yet elaborated.

18. The early orders of the Government of India upon these proposals are now requested in order that the Local Government may proceed with the development of the department.

No. 739-M., dated Maymyo, the 19th May 1919.

From—The Hon'ble Mr. W. J. KATH, C.I.E., I.C.S., Revenue Secretary to the Government of Burma, Development Department,

To—The Secretary to the Government of India, Department of Commerce and Industry.

I am directed to submit the views of the Local Government on the general proposals set forth in paragraph 9 of your letter No. 589-D. of the 7th December 1918 regarding the establishment of an Imperial and Provincial Departments of Industries.

2. (a) *Whether Provincial Departments of Industries should be created or developed on the lines suggested by the Commission.*

The Lieutenant-Governor is entirely in favour of the creation or development of Provincial Departments of Industries, and he approves generally of the recommendations in Chapter XXI of the Report on the Indian Industrial Commission regarding the lines to be followed. He accepts the Commission's list of functions to be assigned to the Department (paragraph 306) and their views in regard to its relations with the Departments of Agriculture and Co-operation (paragraph 307). The necessary co-ordination will be secured in Burma by placing all three departments under a Development Commissioner regarding whose appointment the Lieutenant-Governor is separately addressing the Government of India. This officer will be a member of the Board of Development—one of the four Boards with which His Honour in his Reform Scheme for Burma proposes to carry on the government of the Province. The Board will occupy a place analogous to that of a Member of the Executive Council in other Provinces. His Honour agrees that the Director should be advised and assisted on the lines suggested in paragraph 308 of the Report by an Advisory Body of the strength and composition outlined in paragraph 309 and that the members of this Body should receive travelling allowances and fees for attending meetings (paragraph 310). The nucleus of such a Body already exists in Burma in the Provincial Resources Advisory Committee which was created in connection with the efforts made to develop the material contribution of the Province to the war. As regards the Director of Industries (paragraph 311) the Lieutenant-Governor considers that the first holder of the appointment in Burma will probably have to be an official; he agrees however that ultimately he should be a member of the proposed Imperial Industrial Service. The Commission recommends (paragraph 312) that the Director should be appointed a Secretary to the Local Government for commercial and industrial subjects. Sir Reginald Craddock is not prepared to accept this suggestion offhand. The arguments in its support go too far; they tell equally in favour of every head of a Department being the Secretary to Government in his Department, and if carried to their logical conclusion would involve the inclusion in the Secretariat of every departmental head and the abolition of the present Secretariat system save for subjects not under the charge of any separate officer. It would be difficult to justify any differentiation in this respect between the Director of Industries and the heads of the Departments of Agriculture, Forests and Co-operation, to mention no more. His Honour deprecates the imposition of too many duties on the new appointment at the outset. The Burma Director of Industries, as he conceives him, will for several years after the creation of the Department be mainly a touring officer. If he is also the Secretary to Government in his Department he will either be an inefficient Secretary or an inefficient head of his Department. It may be possible in time to appoint him a Joint Secretary to Government, Development Board, but His Honour is not prepared to make a final pronouncement on this point. It must be remembered that the Director of Industries will ultimately be a member of the Imperial Industrial Service. Members of that service will not necessarily be distinguished by aptitude for Secretariat work, and an inefficient Secretary may easily prove a serious handicap to the Department of Industries. The Director will in any case work in close personal touch with the Development Commissioner and through him with the Development Board. The pay of the post might be fixed at Rs 2,500—100—3,000; the lower salary of Rs 2,000—2,500 suggested in paragraph 313 of the Report will not suffice in Burma. The backward condition of industries both large and small in the Province renders it essential that a detailed survey of the possibilities of industrial development should be started and carried through with reasonable expedition. To assist the Director in this task two Deputy Directors will be needed in Burma from the outset. This is the view of the Provincial Industrial Committee which was created to prepare material for the use of the Industries Commission and the Lieutenant-Governor concurs in it. The incremental pay of Rs 1,000—1,500 suggested in paragraph 314 of the Report will probably suffice for the Deputy Directors, who, at the outset, will be recruited from Government services. The further organization of the Department and the appointment of Industrial Engineers, Chemists and Circle

Officers (paragraphs 315-17) should be postponed until the preliminary examination is complete. The Province already possesses an Agricultural Engineer who is now under the control of the Director of Agriculture; as suggested in paragraph 307 of the Report he will come under the Department of Industries as soon as it is formed.

3 (b) *Whether the responsibilities of Provincial Departments of Industries should include—*

(1) *the local purchase of Government stores, subject to such degree of centralization as may be decided upon after consideration of the report of a special committee; and*

(2) *the collection of local commercial and industrial intelligence.*

(1) Sir Reginald Craddock has no doubt that the local purchase of stores should be one of the duties of the Provincial Department of Industries. This subject is dealt with by the Commission in Chapter XII of their Report where they conclude (paragraph 197) that there should be an Imperial Department of Stores with Provincial agencies forming part of the Provincial Departments of Industries. While they suggest that the whole question should be examined by a small expert committee, they contemplate the following procedure. Indents for stores required by Provincial officers will be examined by the Provincial Director of Industries. He will arrange for the purchase of such items as can be bought with advantage either locally in the Province itself, or in another Province of India through the Provincial Director of Industries, and will forward indents for the remaining items to the Controller-General of Stores who will arrange for their purchase in India or through some buying agency in England as he thinks best. The Lieutenant-Governor apprehends that some modification of this general scheme will prove necessary in the case of Burma. The geographical isolation of the Province differentiates it from the other Provinces of India. Communications between Burma and India are a practical monopoly of one powerful steamship company with the result that the rates of freight between Burmese and Indian ports are out of all proportion high in comparison with rates on lines where competing agencies are available. For this reason it has frequently been found cheaper to purchase through the Stores Department of the India Office many articles which an Indian Province could procure more cheaply in India. So far as Burma is concerned, a central purchasing agency in India is not a necessity. A central agency for the collation and distribution of information would doubtless be useful, but even this is not obligatory if each Provincial Director keeps his fellow-Directors acquainted with the manufacturing resources of his Province. The question whether it is cheaper to purchase in England or in India is one which must be decided with reference to the peculiar position of this Province. English stores are usually shipped direct to Burma and do not pass through an Indian port. Information regarding shipping charges and shipping lines from England to Indian ports is of no value so far as Burma transactions are concerned, and a Controller-General of Stores in India would be in a less favourable position than the Burma Director of Industries for studying the relative advantages of import from England and import from India. His Honour therefore recommends that if the proposed Imperial Department of Stores is created, the Controller-General of Stores in India should not control the purchase of stores for Burma, though he should be prepared to furnish the Burma Director of Industries with advice regarding the most suitable sources of supply in India itself. Liberty should be left to the Burma Director to decide in the case of indents for stores which are not manufactured in Burma whether to obtain them from England or from India, and, in the latter case, to deal directly with the Provincial Director of the Province whence the stores can be most cheaply supplied. The cost of carriage is a very heavy proportion of the total cost of imported stores; and it may frequently be cheaper to purchase higher priced stores at a centre whence the expenses of carriage to Burma are less than to purchase cheaper stores at a centre less favourably situated in regard to carriage.

His Honour concurs in the remarks of the Commission in paragraph 198 of their Report regarding the importance of an efficient Inspecting staff; but this work should, wherever possible, be left to Provincial experts. Imperial

experts will no doubt be required in India where eight Provinces cannot all be provided with expert staffs of their own and where they exist Burma would always be grateful for their help and advice. But no one can live in Burma long without perceiving that experts of this kind are distant, inaccessible and often unappreciative of the local feelings. For example, the Burmans are anxious to see the development of industries in Burma, but they have not the slightest predilection for Indian goods as distinct from British. Economy is no doubt desirable, but circumlocution and delay imposed upon Burma in the mistaken notion that she prefers Indian *Swadeshi* goods will cause irritation instead of gratification.

(2) Sir Reginald Craddock agrees that the collection of local commercial and industrial intelligence should form part of the functions of Provincial Departments of Industries. He does not, however, accept the conclusion of the Commission in paragraph 184 of their Report that outside Calcutta and Bombay the work can be done by the Provincial Director of Industries. He considers that Rangoon, no less than Calcutta and Bombay, requires a special Intelligence Officer. On the one hand the size of the Province and its vast potentialities demand the services of a Director whose duties do not preclude long absences from Rangoon; on the other hand, the importance of the commercial interests centred in Rangoon—after Bombay and Calcutta the chief port in the Indian Empire and the centre of the rice-milling and oil-refining industries in India—to His Honour's mind clearly indicate that the collation of statistics of commercial and industrial intelligence will require the services of a special officer. The special officer might be a Personal Assistant to the Director of Industries, stationed permanently in Rangoon, in touch with all the commercial interests of the Province and ready to attend to enquiries and to supply information in the absence of the Director and of his deputies on tour.

4. (c) *What arrangements are most suitable for utilizing the officers of the proposed Indian services, industrial and chemical, in order to combine the advantages of a common system of recruitment, and central criticism in wider questions of research, with the control which Local Governments necessarily exercise in executive and administrative matters and to secure the fullest utilization by the Local Governments of their own staff on local problems?*

The Lieutenant-Governor considers that the proposed Imperial Industrial and Chemical Services should be organized much on the lines of the Imperial Forest Department. Certain experts directly employed under the Government of India and the high administrative posts in the Provinces would be borne on an India list. The remaining appointments would be on Provincial cadres. Officers on recruitment would be assigned to specific Provinces and would ordinarily be retained in these Provinces throughout their service unless required by the Imperial Government to fill posts in the India list. Indian members of the service should not be posted to Burma. The Provincial Industrial Committee are unanimous on this point and the Lieutenant-Governor concurs with them so far as the Imperial Industrial Service is concerned. There is less objection to the employment of Indians in the Imperial Chemical Service, but even there His Honour would restrict their employment in Burma to very exceptional cases.

5. (d) *What generally should be the relations between the Imperial and Provincial Departments?*

The views of the Commission regarding the necessity for an Imperial Department of Industries and its functions are set out in Chapter XXII of their Report. The Imperial Department is designed to provide the machinery required to ensure the uniform development that alone will make India self-contained both economically and for purposes of defence. It will ensure not only the production of raw materials but the organization on a large scale of manufacturing operations for the production of the articles necessary for this purpose. Sir Reginald Craddock agrees that if the Indian Empire is to be treated as a unit, so long as Burma forms part of that unit the Government of India must remain responsible for the general industrial policy of the Province. The possibility that Burma some day will form a separate unit should not, however, be overlooked. Geographically and ethnologically Burma is not a

part of India. It is capable of independent development on lines of its own; and Sir Reginald Craddock is convinced that no step should be taken in the development of the province which ignores the probability that, so far as can be foreseen, its ultimate destiny is separation from India. The account of Government's industrial policy in recent years which is given in Chapter VIII of the Commission's Report indicates that the industrial backwardness of India is due, not to lack of enterprise on the part of Provincial Governments, despite the restrictions, financial and other, on their powers, but to the deliberate policy of the Imperial Government. The main function of the Imperial Department of Industries, as His Honour conceives it, should be to organize co-operation between the Provincial Departments in the various provinces with a view to economy of effort. Its guiding principle in its dealings with Provincial Departments should be to assist and not to control. It should deal with broad and general questions of policy and should confine interference with the activities of a Provincial Department to cases where these activities are set in a direction detrimental to Imperial interests in the widest sense. So far as possible it should work through the agency of Provincial Departments. Applicants for Government assistance, in industrial enterprises in the larger provinces, should ordinarily approach the Provincial Department, which will naturally invoke the assistance of the Imperial Department in matters beyond its capacity. The specialised institutions of research which the Commission favour in paragraph 130 of their report should be under provincial control. Such institutions will doubtless be located in those provinces which are most interested in the results attained. The interest of the Imperial Department in these institutions should take the form of subsidies towards their establishment and maintenance. So far as technical and industrial education is concerned the Commission rightly recommend (paragraph 305 of their report) that its control should lie entirely with Provincial Governments, subject to advisory inspection by an Imperial agency, but they foreshadow the need for the establishment of two central institutions under Imperial control, one for the highest class of instruction in engineering, and the other for metallurgy and mineral technology. Sir Reginald Craddock admits the need for these exceptions at the outset and for many years. But the time may come when the growth of local industrialism will demand the equipment of this province with local institutions of its own.

ANNEXURE 2 (1).

Summary of Local Governments' views on points mentioned in paragraph 9 of Mr. Ley's letter No. 589-D. of 7th December 1919.

Points.	Governments.	Replies.
(a) Whether Provincial Departments of Industries should be created or developed on the lines suggested by the Commission.	Assam . . .	Accept.
	Bihar and Orissa	Strongly support proposal, but point out that financial resources of Local Government are insufficient to carry it out. Do not approve of idea that Director of Industries should be Secretary to Government.
	Central Provinces	Accept views of Commission; desire to engage nucleus staff at once; will consider best means of correlating industrial with other kindred departments when Reforms Scheme has been introduced.
	Punjab . . .	Agree with Commission's recommendations, but think that functions of Department of Industries should include work of registration of Joint Stock Companies, and more specific provision is needed for giving Education Department a voice in questions of general education included in technical and industrial training; they also think that a Development Commissioner is wanted as Chairman of a Board of Industries, to secure co-ordination of industries with other related departments.
	United Provinces	Generally agree with proposals which are mainly on lines already followed in United Provinces, except that the Director of Industries should not be a Secretary to Government, and the Agricultural Engineer should not be transferred to the Department of Industries, at least at present.
	Bombay . . .	Agree.
	Madras . . .	Agree generally; and specifically accept proposals of Commission in respect of control of technical and industrial education, but consider position of Board of Industries and relations of Director of Industries with Local Governments require decision in light of local conditions.
	North-West Frontier Province.	Only a very minor form of provincial organization is possible. This was worked out in discussion with Mr. Low and is accepted by the Government of the North-West Frontier Province.
	Bengal . . .	Accept views of Commission, subject to further consideration of detail, and propose to entertain a nucleus staff and create a Board of Industries.
	Burma . . .	Support Commission's scheme for Provincial Department of Industries, which should be co-ordinated with Agriculture and Co-operative Credit under the control of a Development Commissioner, who would himself be a member of the proposed Development Board. Are not in favour of making the Director a Secretary to Government.

Points.	Governments.	Replies.
(b) Whether responsibilities of Department should include :	Assam .	(i) Strongly support purchase of stores in India, but express no definite opinion on proposals for central purchasing organisation. (ii) Agree.
(i) Local purchase of Government Stores, subject to such degree of centralisation as may be decided on after consideration of report of a special committee.	Bihar and Orissa	(i) Provisionally accept idea, provided Local Government has power to purchase all stores obtained in India. They admit that in practice order should be placed with central agency when economy could be effected. (ii) Agree.
(ii) The collection of commercial and industrial intelligence.	Central Provinces.	(i) Agree, subject to consideration of report of special committee, and to necessity of encouraging local industries. (ii) Agree.
	Punjab .	(i) Agree. (ii) Agree.
	United Provinces	(i) Agree with system of purchase in India through industrial departments, but are inclined to think that purchasing should be in hands of Provincial Departments and functions of central organisation should be advisory. Agree that committee should be appointed to advise on degree of centralisation necessary. (ii) Agree.
	Bombay .	(i) Agree ; actual allocation of duties may await report of Committee. (ii) Agree.
	Madras .	(i) Agree, but hope they will be allowed to examine report of special committee. (ii) Agree.
	North-West Frontier Province.	(i) and (ii) No views.
	Bengal .	(i) Agree, but think purchase of stores should not be unduly centralised. (ii) Agree.
	Burma .	(i) Owing to geographical and political aloofness of Burma, recommend that Provincial Director of Industries should have a free hand to decide in case of articles not made in Burma, whether to buy them in England or in India, and that position of Controller-General of Stores in India, <i>vis à vis</i> the Director of Industries in Burma, should be advisory only. (ii) Support proposals, but desire a special provincial intelligence officer for Rangoon.

Points.	Governments.	Replies.
(c) What arrangements are most suitable for utilizing the officers of the proposed services, chemical and industrial.	Assam	Relations with Local Governments of members of all-India services should be the same as in case of agricultural and for forest services.
	Bihar and Orissa	Members of all-India services should be lent to the provinces on conditions similar to those obtaining in agricultural and forest services. Agree that all-India chemical and industrial services are needed.
	Central Provinces	Have no doubt of advantages of proposed services, having experienced difficulties described by Commission. But experts attached to Local Governments should remain ordinarily so attached throughout their services; appointment and promotion of Imperial officers within Provincial Departments should be matter for Local Governments who might also recruit men on special conditions; but such men should not become members of all-India service without sanction of Imperial Government.
	Punjab	Agree in necessity of an industrial service and of a chemical service, after allusion to criticisms of certain local officers, which are not accepted. Think selection of new department should not be confined to young and inexperienced chemists, and would encourage formation of strong local school of chemistry for research and teaching in connection with university.
	United Provinces	Accept necessity of all-India scientific services, subject to their relations with Local Governments being on same lines as in case of agricultural, forest and other all-India services. They should be under complete control of Provincial Department and Local Government, and their relations with central heads of services should be advisory only. Local Government values advice of Imperial officers but should not be compelled to follow it. Do not accept idea proposed by Commission of sending officers of scientific services for 5 years to colleges or universities. Are opposed to idea of an industrial service, because appointments will not be very numerous, incumbents will have to perform great variety of duties, and qualifications of mechanical engineers will not be suitable for all these. Prefer separate time-scales of pay according to nature of duties. Agree with local Chamber of Commerce that expert advisers should be employed for particular works.
	Bombay	Recognise advantages of Imperial recruitment of industrial and scientific services; but as <i>interim</i> measure desire to recruit other suitable men. Further consideration is required as to staffing of educational institutions from scientific services.

Points.	Governments.	Replies.
(d) What generally should be the relations between Provincial and Imperial Departments.	Madras .	Agree that such services are needed, on understanding that Local Governments should have same administrative relations with members of the services employed under them as in the case of other all-India services. Accept the necessity for an industrial service on lines laid down by Commission.
	North-West Frontier Province.	The province must rely on Imperial experts.
	Bengal . .	Agree in necessity for services, provided members assigned to provinces come under control of Local Governments and serve out their full time, unless transferred for special reasons.
	Burma .	The proposed services should be organised on the lines of the Forest Department.
	Assam .	Officers of Imperial Departments should be advisory in their relations with Provincial Departments.
	Bihar and Orissa .	Not mentioned.
	Central Provinces	Recognise general responsibility of Government of India for industrial policy, but this responsibility should be exercised by advice and personal discussion, which are an absolute necessity to Local Governments. Imperial Government should not interfere in matters of executive details within a province, save where it is necessary to guard extra-provincial interests from serious loss. Local Governments should not have to submit their schemes for sanction, merely for the Imperial Government to see that their schemes do not offend against certain principles governing relations of Imperial and Local Governments.
	Punjab . .	In matters of general administration, control of Local Government should be paramount, but Imperial Department should exercise a very close supervision in all technical matters where expert knowledge is necessary.
	United Provinces.	Agree to Imperial Department, if its functions are advisory and if it is likely to prove helpful. Local Governments must have full power to initiate research and industrial experiment, except in cases where other provinces are likely to be seriously injured. Government of India will be kept informed of what Local Government is doing, so that latter may not have to apply for sanction. Government of India will also retain right to undertake research and industrial enterprise, especially in cases where safety of India is concerned and where Local Governments cannot find funds.

Points.	Governments.	Replies.
	Bombay . . .	Imperial co-ordination should generally be exercised by system of advice and discussion; control should be limited to such financial and other checks as are finally accepted for Provincial Governments generally, and to special cases of paramount importance for India as a whole.
	Madras . . .	Functions of Imperial Department should be mainly advisory, and Local Governments should be allowed full power of initiating work. But Imperial Department should also take up work which Local Governments are unable to perform, and might control development of certain selected industries for special reasons.
	North-West Frontier Province.	No views.
	Bengal . . .	Accept Imperial organisation proposed as a suitable basis for future development. Relations between Provincial and Imperial Departments should be left to develop themselves as experience is gained.
	Burma . . .	Agree as to general responsibility of Government of India for industrial policy, so long as Burma remains part of Indian Empire. This responsibility should be exercised by guidance rather than control, interference being confined to cases where provincial activities threaten to prove detrimental to Imperial interests.

Proceedings of a conference, called by the Indian Munitions Board, for the consideration of the organisation of chemical research.

The conference was held at the Government College, Lahore, at noon, on Tuesday, the 8th January 1918. The following were present :—

1. SIR THOMAS HOLLAND, K.C.I.E., F.R.S., ETC.,
President, Indian Munitions Board.
2. SIR ALFRED BOURNE, K.C.I.E., F.R.S.,
Director, Indian Institute of Science, Bangalore.
3. MR. W. H. F. ARMSTRONG,
Khalsa College, Amritsar.
4. MR. R. D. BELL, I.C.S.,
Controller, Industrial Intelligence, Indian Munitions Board.
5. DR. K. S. CALDWELL,
Patna College, Bankipore.
6. MR. H. B. DUNNICLIFF,
Government College, Lahore.
7. DR. G. J. FOWLER,
Indian Institute of Science, Bangalore.
8. MR. HASHMAT RAI,
Government College, Lahore.
9. MR. S. JACKSON,
Buckingham and Carnatic Mills, Madras.
10. LIEUTENANT A. MACCULLOUGH,
Medical Store Depot, Madras.
11. DR. A. MCWILLIAM,
Metallurgical Inspector, Sakchi.
12. DR. A. N. MELDRUM,
Gujrat College, Ahmedabad.
13. MR. A. R. NORMAND,
Wilson College, Bombay.
14. 2ND-LIEUTENANT W. SAUNDERS,
1st Sappers and Miners, Roorkee.
15. MR. S. W. SHEPHERD,
Eastern Chemical Company, Bombay.
16. DR. J. L. SIMONSEN,
Presidency College, Madras.
17. DR. J. J. SUDBOROUGH,
Indian Institute of Science, Bangalore.
18. THE HON'BLE MR. C. A. H. TOWNSEND, I.C.S.,
Controller of Munitions, Punjab Circle, Lahore.

19. DR. H. E. WATSON,
Indian Institute of Science, Bangalore.

20. MR. B. N. WILSDON,
Agricultural College, Lyallpur.

ADDRESS BY SIR THOMAS HOLLAND.

Sir Thomas Holland opened the conference with the following address:—

I have asked for this privilege of meeting you in conference, firstly, to thank you for the help you have all given the Munitions Board in taking up problems that seemed to be of urgent importance during the war, and, secondly, to discuss with you various suggestions that have been made as to the way in which it will be most profitable to organise chemical research especially in its bearing on the utilisation in the country of Indian raw material.

The war has demonstrated to us the necessity of making each large unit in the Empire self-contained in the matter of munitions. The war has also shown that modern munitions means practically all the requirements of a civilised community *plus* the special machinery used by the soldier in the field. Above all things the war has shown that the chemist is a more dangerous fighter than either the gunner or the cavalry soldier.

It is not necessary for me to remind you of the fact that chemistry is the foundation of all modern civilised activities; you also can recall many instances of the way in which normal chemical activities in peace time may be turned readily to account for war purposes. The manufacture of liquid chlorine on a large scale was a necessary part of the German process for the manufacture of artificial indigo. The manufacture being thus established as a weapon to kill an Indian industry, was available, when war broke out, for use on a large scale as an instrument to murder men.

Hitherto, there has been a tendency in India to import our physical science direct from Europe, although in the natural sciences,—geology, botany and zoology,—the work done in India has been of far more than local importance: our naturalists have been among the most distinguished of those who have built up these three divisions of natural science.

Chemistry, however, has a greater claim than either of the physical sciences for special recognition here. Apart from the fact that we must in future maintain a staff of all varieties of chemists, just as we must maintain any other variety of soldier for purely military requirements, the new industries of India will largely depend on the raw materials of the country, and research work on these materials can be done only on the spot. This applies, with little qualification, to the mineral and inorganic products, while with regard to organic or vegetable substances, it applies with absolutely no qualification whatever.

Whether the research work is done on vegetable dyes, on essential oils, on drugs, on tanstuffs, or on foodstuffs, the only chemical research of value will be that done in co-operation with the botanist and bacteriologist, and under conditions that permit of discovering the best conditions under which the plant can be grown and harvested.

It is obvious that whether a plant is grown for its fruit, its juices or its fibrous products, it varies in productivity according to very slight variations of climate and soil, according to the time of year, and even sometimes according to the time of day at which it is collected. Apart altogether from the subsequent problems of curing and manufacture, the chemical work necessary to detect the most favourable conditions of growth, can be done only on the spot where abundance of raw materials, grown under varied conditions, can be subjected to investigation. It would be just as wise to refer the investigation of an Indian village crime by report to the London police, as to do no more than send samples of our vegetable products for examination at the Imperial Institute.

This is altogether apart from the duty of training the educated young men of the country to qualify for research and technical work. We need not

touch that question to-day, though it ought to be an essential part of the organization of every scientific and technical department.

You all know how the beet-root was developed by science in Europe, until, before the war, it was possible for the European sugar manufacturer, working with the disadvantages of a temperate climate, to cut out the Indian sugarcane at a distance of some 5,000 miles. I have been told that this indicates the death knell of trade in tropical vegetable products; that, similarly, the chemist of Europe will kill for ever the production of natural indigo.

That, however, is not my particular form of pessimism; what science can do in Europe, against the disadvantages of a temperate climate, it should be able to do more abundantly by turning tropical advantages to account. Science is not the monopoly of Europe, but we must do more than transplant the results if it is to grow in India: we must undertake our own research work here.

I have spoken thus because I want the authorities to realise that the chemical problems are not even yet touched by appointing a single chemist to analyze the doubtful materials passed by the Collector of Customs, another to inspect our explosives, another to assist the Director of the Geological Survey, a tinctorial chemist to the Madras Government, and another lonely chemist in the Forest Research Institute at Dehra Dun. Each of these suffers from isolation, from want of *esprit de corps*—from absence of prospects as each runs into his official cocoon.

Organized confusion exists in India among chemists more conspicuously than among representatives of other sciences. Many of them overlap in their activities; few of them that are officials have any limits laid down for their activities; it is not possible for anyone to obtain their collective opinion on chemical questions. Yet among the many problems that cry out for solution in India, chemical questions are the most important as well as the most numerous.

I propose to ask your views among other things as to the best method of official reform. As a basis for discussion, I will outline one scheme which has been already suggested; and, as this matter has been brought to the notice of the Industrial Commission, I should like to be in a position to convey to my colleagues your views regarding this suggested scheme of official organization.

The principal chemical problems in connection with Government activities are divided among:—

- (a) Agriculture.
- (b) Forest products.
- (c) Drugs, perfumes, essential oils and dyes.
- (d) Tanning.
- (e) Sugar and alcohol manufacture.
- (f) Saltpetre refining.
- (g) Salt and Khari manufacture.
- (h) Mineralogy.
- (i) Metallurgical inspection.
- (j) Explosives manufacture.

For administrative purposes these might be controlled in three groups:—

- A. Agricultural Chemistry, with the chief laboratory at Pusa.
- B. Organic Chemistry, with two chief laboratories at Dehra Dun and Bangalore.
- C. Mineral Chemistry, with the chief laboratory at Kalimati or Calcutta.

Each group might be placed in charge of senior officer, one of whom will be Chief Chemist to Government of India; or it might possibly be better to have three Deputy Chief Chemists for the three groups with a Chief Chemist at Dehra Dun and Simla, his status and functions being analogous to those of the present Surveyor-General.

Junior members of the service could be lent to the Local Governments and principal Government departments for terms normally limited to five years. These officers would carry on purely routine duties and in some cases teaching, the principal problems of research being undertaken at the chief laboratories according to their nature.

All results of scientific and practical value would be published in the Records of the Indian Chemical Department, which would be issued in three series and edited by the three Deputy Chiefs. Once a year the whole staff of chemists might assemble for a week's conference successively at Pusa, Dehra Dun, Bangalore and Calcutta. This conference should be attended by private chemists, including manufacturing chemists and chemical members of the Education Department. Papers read at this conference, if approved by a small committee, might be published in the Records, which would thus establish at once a definite position of authority and value in scientific literature.

Even if you, the Commission and Government were to accept such a scheme it would not be practicable, on account of recruitment difficulties alone, to work it under war conditions; but there are many questions arising from such a scheme that we might profitably discuss to-day.

There has been a certain amount of correlation among you during the past few months, due to the friendly action of Dr. Simonsen, very generously acting as an Honorary Adviser to the Munitions Board. The objects before us were the following:—

- (1) the possibility of preparing in India certain chemicals which are essential to the textile and other large industries, but which cannot be imported in sufficient quantities, if at all, during the war;
- (2) the possibility of manufacturing other chemicals which are ordinarily imported and might be made in India under normal conditions of trade;
- (3) the best way to assist firms with advice, undertaking for them search where their own staff has not the time or facilities;
- (4) the preparation, on a relatively small scale for the Medical Services, of drugs that can be made just as well in the laboratory as in the factory;
- (5) the systematic investigation of raw materials of probable economic value;
- (6) the publication, when possible, of results.

If we cannot at once get an organised department of chemistry, there is still much under all these six heads that we can do under war conditions and indeed for war purposes. For example, in the manufacture of certain drugs, why cannot we enlist the help of students to make these in the laboratory, just as we can organise work parties of women for the manufacture of comforts for the troops? I feel sure that dozens of advanced chemical students would gladly give up their spare time to this work, and college authorities would be willing to grant facilities if only some one could be induced to set out the tasks and arrange for a satisfactory inspection of the products. It would not be safe to manufacture all drugs in this way, but there are some in which a wide latitude of quality is possible and easily determinable, and the work would have to be organised under the supervision of the Medical Store Department.

Turning to the other questions, a valuable series of results have been obtained already. At the Indian Institute of Science, for example, Drs. Hay, Fowler, Sudborough and Watson, in addition to their previous programme, have taken up, at the suggestion of the Munitions Board, the electrolytic preparation of white lead, the refining of waste copper, the enzymatic hydrolysis of fats and the preparation of varnish. The utilisation of copper waste has been the subject of three reports by Dr. K. S. Caldwell, who carried the work as far as possible with the existing laboratory equipment at the Patna College. When considering proposals for enlarging the equipment, it was discovered that Dr. Hay had also taken up the work at the Indian Institute of

Science and thus a certain amount of overlapping has inadvertently occurred. Mr. A. R. Normand at the Wilson College, Bombay, has been investigating methods for preparing soluble chromate from chrome iron-ore and for the conversion of acetylene into acetaldehyde and acetic acid. Mr. F. L. Usher of the Central College, Bangalore, will present to the Science Congress the results of his work on the oxidation of alcohol to acetic acid; he has also been engaged on colloidal medicinal preparations. Mr. H. B. Dunncliff proposes, when the tamarind fruit is again available, to study this source of tartaric acid; he has already in conjunction with Lala Hashmat Rai at the Government College, Lahore, been at work on the purification of *nim* and *til* oils. The question of manufacturing citric acid is being taken up at the Khalsa College, Amritsar, by Mr. W. H. F. Armstrong in conjunction with Mr. Sher Singh. Dr. P. C. Ray of Calcutta is taking up the manufacture of formaldehyde and is investigating the poisonous principle of ricin in castor-oil cake. Mr. V. N. Sarangdhar of the Wilson College, Bombay, has reported on the isolation and cultivation of the specific yeast associated with mahua flowers and on the efficiency of various methods of estimating sugar. Mr. Bellars at the Rangoon College is investigating the value of Burmese black varnish as an electrical insulator.

I should like your advice as to how these results can most suitably be made available to manufacturers and to other workers who may be following up similar lines unknown to us. Some of the reports will be read to the Science Congress and afterwards published as a supplement to the Journal of the Asiatic Society; but it would be an advantage if the papers on chemical questions were kept together in some publication with a distinctively chemical flavour, a publication which would be recognised by workers in other countries to cover all that really matters, in the way of chemical work in India. Your views on this question will be valued by the Munitions Board.

With this question is bound up that of the organization required to set out programmes of work so that each chemist gets an appropriate task without an undesirable amount of overlapping.

A very difficult question is that of the conditions under which advice should be given to, and research undertaken for, industrial firms. Manufacturers naturally do not wish to have made available to their competitors results obtained at their expense or based partly on new research work and partly on their own experience. If the industrial chemists on the staff of a public institution be allowed to draw fees as consultants, it will be necessary to provide for the interests of those chemists that are engaged on problems equally important though not of a kind that a firm could turn immediately to practical account.

The system adopted by the Geological Survey follows the common rule of most public services in giving information and advice without charge to all *bonâ fide* enquirers. Advice cannot usefully be given under such circumstances without the receipt of information from the enquirer, and such information is never published without permission.

If we adopt the system of allowing officials to accept private consulting practice for fees, the consultant may find himself in the embarrassing position of receiving information on the same subject from competitors. In ordinary private practice he would naturally decline to advise two competitors, and a firm would be shy about consulting a chemist who is already known to be engaged by a competitor. This would result in failure to make full use of the services of an official, and that is undesirable in a country like this with such a small number of qualified industrial chemists.

We might profitably discuss the question of whether, or when, one should publish the results of a technical investigation undertaken on behalf of and at the expense of a manufacturing firm. Is it fair to use a public institution without giving the public the full value of the results? The general interests of the public and the special interests of the firm might perhaps be met by adopting a recognised interval before publication; but this course becomes in practice far less simple than it seems; for there is seldom a definite date for concluding an investigation: it always dovetails into side issues and dependent investigations. So far as I have been able to study this difficult question, there appears to be a balance in favour of the conclusion that a public

official should be purely a public servant; he should treat with confidence results placed at his disposal but should be free to publish those obtained as the outcome of his researches. Ordinarily, publication is so late and is necessarily so imperfect compared with the practical points known to the firm for which the work is done, that the firm gets a sufficient start ahead of its competitors in the same line. Often they would be able to obtain patent protection for essential parts of a new method.

In considering the question of co-ordinating chemical research, it is obvious that a systematic investigation of Indian raw materials, especially vegetable products, is about the most urgent. In spite of the valuable results obtained at Dehra Dun, at the Indian Institute of Science, at the Imperial Institute in London, and in our various colleges, only the fringe of this subject has so far been touched. For this work the chemist requires the co-operation of the departments of Agriculture, Forests and Botany. It thus appears desirable to organize the chemical fraternity for representation on the Board of Scientific Advice.

The co-ordination attempted during the past year by the Munitions Board has been accomplished by your friendly co-operation through Dr. Simonsen as Secretary of the Congress; our first object has been to meet some urgent demands arising directly from the war. But we have done very little so far, and must be content with small things so long as we are in India so desperately short of chemists free of heavy routine work. This conference will result, I hope, in valuable suggestions for operations in the immediate future as well as in advice of value to the Industrial Commission which will be required to report on the question of organizing the scientific services to meet industrial needs.

In addition to the question of official organization it has been suggested that we might consider to-day a proposal to establish in India a section of the Society of Chemical Industry. The size of the country is against the adoption of any one capital city as a centre, while in each city the number of chemists is insufficient for effective discussion of subjects. An alternative suggestion, which is at variance with the usual organization of the Society, is to form a section which will meet annually as a branch of the Science Congress. Your views on this subject will be welcomed by the Council of the Society who have been already in communication with Dr. Simonsen.

DISCUSSION.

Sir Thomas Holland's address was followed by a discussion as to the order in which the matters raised in the address should be taken up later in the day.

2. It was agreed that a sub-committee consisting of Drs. Simonsen, Sudborough and Caldwell should make proposals for the conduct of researches, on the present basis, during war time.

3. The official organization required after the war for dealing with chemical problems was taken up by Dr. Sudborough.

4. Dr. McWilliam agreed to open the discussion on advice to industrial firms.

5. Dr. Meldrum took charge of the discussion on the publication of results.

6. Dr. Fowler agreed to present the case for the establishment of a section of the Society of Chemical Industry.

7. The meeting adjourned at 1-30 P.M.

Co-ordination of chemical research during the war.

8. On resuming at 3 o'clock Dr. Sudborough reported that the sub-committee had agreed upon the following general principles:—

- (a) that a monthly list of researches in progress should be circulated;
- (b) that, at the foot of the list, a list of problems awaiting investigation, should be printed;

- (c) that chemists undertaking research work for the Board should be requested to inform the Board of any problems that occur to them.

It was agreed that the allocation of researches should be left in charge of a single chemical adviser, as it was considered that the number of chemists was too small and that they were too scattered to enable proper arrangements to be made by a committee. It was therefore considered desirable to have a permanent chemical adviser for the Board who should, when necessary, constitute a committee for the consideration of any particular problem. This would appear to be especially necessary when any request for expenditure on an investigation was made. The chemical adviser should also tour regularly and consult with officers conducting researches and also with chemists engaged in works. He would then be in a better position to advise the Board in case special expenditure was required.

9. There was general agreement that investigators should not be paid for any particular piece of research but that assistance to them would frequently be necessary in order that the mechanical and routine portions of research could be carried through without valuable waste of the researcher's time. For this purpose it was thought that research assistants might be appointed. These might engage in teaching and, accordingly, their pay might be met, partly by the Local Government or by the authorities of the institution in which they are working, and partly, as regards the assistance given in research, by a subsidy from the Munitions Board. It was thought that the appointments might generally be for one year and renewable, but that other conditions, such as the amount of salary, would have to be determined by the circumstances of each particular case. It was mentioned that firms might, on occasion, pay for these assistants for definite pieces of work.

Government organization of chemical research after the war.

10. Dr. Sudborough, in opening this discussion, differentiated between the organization of chemistry and the organization of chemists and drew attention to the differences between research in pure science and work on the applications of science to industry. While the investigation of the applications of science to industry can be organized, the researcher in pure science must be left to work entirely as he wills. The conference strongly endorsed the opinion that the position of the worker in pure science must, after the war, be carefully safeguarded as, with attention now strongly rivetted on the practical applications of science, there might be a grave disaster at the end of ten or fifteen years if progress in pure scientific research was not provided for.

11. The organization of chemists in a Government service, in the ordinary sense of this expression, was then considered. Dr. Sudborough thought that one drawback was connected with the fact that success in work on the applications of science to industry depended on these applications being taken up by manufacturers. He was in doubt whether manufacturers would approach a Government service or department in which the results obtained would be public property. Manufacturers naturally make a claim on work done for them. Messrs. Shepherd and Jackson thought that there would be no difficulty on this point provided advice to industrial firms was given on carefully planned lines and that adequate precautions were taken to prevent the leakage of confidential information and for securing to the manufacturer, at least for a time, the results of the investigation. These points were again taken up later in the discussion.

12. Dr. Sudborough was also doubtful whether the best work could be obtained from members of a service drawing fixed pay, working under fixed conditions, and having fixed office hours. It was generally recognised that the members of such a service were not likely to tie themselves to fixed office hours and the practical difficulties in this respect were reduced to those connected with the subordinate staff. On this point also it was not thought that in practice any real difficulty would arise.

13. It was agreed that the Government chemical service should include all chemists in Government service, for example, chemists in the departments of

Customs and Excise, in educational institutes and in the Forest and Agricultural Departments.

14. Dr. Sudborough next discussed whether there should be a single central chemical research institute for the whole of India or whether there should be two or three institutes as suggested in Sir Thomas Holland's address. Against one centre it was urged that the Forest and Agricultural Departments must have pure chemists in touch with them, that in the case of metallurgy, for example, it was necessary, in the case of many problems, to be in touch with the works and in nearly all cases to be in "the atmosphere" of the works. Dr. Sudborough thought that most problems, forest, agricultural, and metallurgical, could be worked out at any centre. Sir Thomas Holland considered that nine-tenths of the Government work would be concerned with ascertaining the value of raw materials and that this fact must be considered in forming a judgment. The general opinion was in favour of centralization at a single institute, but opinion was undecided as to the particular locality in which this central institute should be established. It was generally agreed that the situation should be such as would enable research work to be undertaken all the year round and that vested interests, such as already exist at Dehra Dun, Pusa and Bangalore, had to be taken into account. The facts that the Indian Institute of Science, Bangalore, is not a Government institution and that if it ceases to be organized on its present basis, the site reverts to the State of Mysore, were points for consideration.

15. There was general agreement that research work should not be cramped by financial restrictions and that the widest latitude in expenditure should be allowed within the limits of the budget grants.

16. It was agreed that such a Government service could only be Imperial. It would not prove possible for even the larger provinces to maintain a sufficiently large staff of chemists for work in all branches of the science. It was pointed out by Sir Thomas Holland that while decentralization is desirable and natural in executive work, centralization is the better policy in advisory work. An imperial department can control local eccentricities and, although it is apt to be unsympathetic to local enthusiasms, the balance is in favour of centralization. Scientists require to be controlled and local ignorance requires to be instructed.

17. Consideration was then given to the training of students and apprentices at the Government Central Research Institute and to the question whether the work at this institute could be combined with a post-graduate training in research. It was agreed that, while it was necessary to train Indians for the future chemical industries of India, teaching should form no part of the functions of the institute; although graduates and others might be attached to officers of the institute to receive an indirect training by assisting them in their work.

18. The Government institute would undertake standardizing work such as is done at the National Physical Laboratory and analytical work as at Somerset House.

19. Sir Alfred Bourne enquired what the position of non-Government chemists would be in the event of the establishment of a large Government service of chemists. Messrs. Shepherd and Jackson thought that there would be no cause for opposition or antagonism: there would be an annual conference in which all chemists would participate and the journal or other publications of the department would be available for the publication of the works of outside chemists. In this connection, it was pointed out that a Government department will publish work without a close regard for expense and that both Government and non-Government chemists would be enabled to have their work published in a recognised publication and on a scale, as regards style and illustrations, which a chemical society could not bear.

Advice to industrial firms.

20. It was agreed that firms ought to be able to consult the Government Chemical Research Institute on technical points and that a fee should be charged for the advice given. It is necessary to have a protective tariff against

- trivial enquiries and it was recognised that firms of standing would themselves desire to pay fees to preserve their self-respect. It was also agreed that these fees should be so high as not to bring the Government service into competition with private consulting chemists.

21. The case of poor firms which are unable to pay will require consideration and the head of the department should have powers to accept problems for investigation without payment. All applications for investigation on behalf of firms must be dealt with by the head of the department and no individual member of the staff should engage in technical work without the sanction of the head of the department. It was generally recognised that, up to a certain point, public information must be given freely by a Government institute.

22. The allotment of fees was then considered. The danger of the members of a public service directing their energies towards the mere earning of fees was recognised. It was also pointed out that, although one member of the institute might have charge of an investigation, he would require assistance to some extent from his fellow researchers in the institute. It was thought that fees might be properly divided, more or less, on the basis of one-third to the institute, one-third to the investigator, and one-third to the other members of the staff. The latter share would ensure general contentment and the willing assistance of the rest of the staff and would also safeguard the position of the workers in pure science.

Publication of results.

23. It was pointed out that one firm might apply for information already communicated to another firm and it was recognised that such information could be given only in certain circumstances; for such reasons, the head of the department must have power to refuse to undertake researches or to give information. Provision must also be made against the possibility of firms suing Government for leakage of information communicated confidentially to the institute for the purposes of a research undertaken for them. Such a leakage might occur accidentally. These possibilities were cited as indicating the need of carefully laying down the lines on which work can be undertaken for private firms.

24. While research is being conducted, during the war, on its present basis under the Munitions Board, it was agreed that the best method of dealing with results would be to put a good firm into touch with the investigator who had done the work.

25. It was agreed that, ultimately, with the organisation of a Government service, the establishment of a journal was essential and that the head of the department, in consultation with the staff, must have power to decide whether results should or should not be published. As regards work done for firms, it was recognised that the information should be treated for a time as confidential and it was suggested that three or five years from the date of the investigator's report was a suitable period.

Formation of a section of the Society of Chemical Industry.

26. Dr. Fowler thought that, in the future, one might reasonably anticipate the formation of sections at Bombay, Cawnpore, Madras, Calcutta and Lahore, but at present did not see how more than one section for the whole of India could be started. Even with only one section, the great distances which separate the individual chemists would prevent the holding of regular meetings. It seemed impracticable to form a section at any one centre—say Bombay, where a sufficient number of chemists could be secured as members for holding regular meetings. Incidentally, Dr. Fowler drew attention to the functions of the Institute of Chemistry, of which the basis is to be widened, so as to include the whole profession. As regards the Society of Chemical Industry, the conclusion arrived at was that the conference could do nothing at present to start such a section and that till chemists in India increase in numbers and a Government service or department is organised, the chemists must utilise the chemical section of the Science Congress for the publication of their papers and the organisation of the Munitions Board for the utilisation of the results obtained by them.

27. Sir Thomas Holland, in closing the proceedings, hoped that the discussion would assist in opening the way to important developments.

List of Researches undertaken for the Indian Munitions Board in Collegiate Institutions.

- | | |
|---|---|
| 1. Oxidation of alcohol to acetic acid | F. L. Usher, Esq., Central College, Bangalore. |
| 2. Colloidal medicinal preparations | " Ditto ditto. |
| 3. Electrolytic preparation of magnesium | Ditto ditto. |
| 4. The causes which render bleaching powder unstable in hot climates. | Dr. A. N. Meldrum, Gujarat College of Science, Ahmedabad. |
| 5. Refining of waste copper | Dr. K. S. Caldwell, Government College, Patna. |
| 6. Indigenous sources of tartaric acid | H. B. Dunnicliff, Esq., Government College, Lahore. |
| 7. Causes of the corrosion of tin-lead alloy used in the Henley wiring system. | Ditto ditto. |
| 8. Purification of <i>nim</i> and <i>til</i> oils | H. B. Dunnicliff, Esq., and Lala Hashmat Rai, Government College, Lahore. |
| 9. Conversion of acetylene to acetaldehyde and acetic acid. | A. R. Normand, Esq., Wilson College, Bombay. |
| 10. Preparation of a soluble chromate by extraction from chrome iron ore without the use of caustic soda or sodium carbonate. | Ditto ditto. |
| 11. Isolation and cultivation of the specific yeast associated with mahua flowers. | V. N. Sarangdhar, Esq., Wilson College, Bombay. |
| 12. Effect of basic lead acetate on sugar solutions. | Ditto ditto. |
| 13. Utilization of Burmese black varnish or thitsi as an electrical insulating material. | A. F. Bellars, Esq., Government College, Rangoon. |
| 14. Oxidation of methyl alcohol to formaldehyde. | Dr. P. C. Ray, University College of Science, Calcutta. |
| 15. Determination of the amount of citric acid in limes. | W. H. F. Armstrong, Esq., and Sher Singh, Esq., Khalsa College, Amritsar. |
| 16. Electrolytic preparation of white lead. | H. O. Kershaw, Esq., Presidency College, Madras. |
| 17. Purification of Indian fish oils | Rev. Father Caius, St. Joseph's College, Trichinopoly. |
| 18. Fireproofing of gunny cloth | Dr. B. N. Ghose, Cotton College, Gauhati, Assam. |

Researches at the Indian Institute of Science, Bangalore in which the Indian Munitions Board is interested.

| 4. Electrolytic preparation of white lead | |
| 5. Oleo resins | |
| 6. Lac varnish | Dr. G. J. Fowler. |

ANNEXURE 4.

Account of Sectional meeting of Agricultural Chemists held at Pusa in February 1919.*Extract from the Agricultural Journal of India, Volume XIV, Part II, April 1919.***III.—THE FIRST CHEMICAL MEETING.**

The first meeting of Agricultural Chemists and Bacteriologists in India was held at Pusa from the 24th to 28th February 1919 under the chairmanship of Dr. W. H. Harrison, Imperial Agricultural Chemist. It was attended by the Agricultural Chemists of all provinces, and also by Mr. W. A. Davis, Indigo Research Chemist, Mr. C. M. Hutchinson, Imperial Agricultural Bacteriologist, and Mr. R. D. Anstead, Deputy Director for Planting Districts, Madras. The meeting was opened by Mr. J. MacKenna, C.I.E., I.C.S., Agricultural Adviser to the Government of India, who welcomed the delegates and emphasized the value of such meetings in relation to the future development of the investigation of Indian agricultural problems.

There were ten subjects down for discussion. These may be broadly stated as follows:—

- (1) References from the Government of India.
- (2) Consideration of facilities for the development of industrial problems arising out of the successful researches of Agricultural Chemists and the provision of specialised laboratories for the investigation of problems of general importance.
- (3) Questions regarding the Service of Agricultural Chemists, their duties, and the technique of their work.
- (4) Post graduate teaching in agricultural chemistry at Pusa.
- (5) Bacteriological subjects.

It will be remembered that the Board of Agriculture in India, at its meeting held at Poona in 1917, passed a resolution that in its opinion the time had arrived when some form of legislation was necessary to regulate the sale of fertilizers in India in order to protect both the planting industries and the Indian cultivator. The Government of India requested the meeting to frame a draft Fertilizer Act applicable to Indian conditions. This was accordingly done, the Fertilizer and Feeding Stuffs Act in force in the United Kingdom being taken as a model and suitable modifications made therein. The other reference from Government for detailed consideration was Resolution VIII of the same Board dealing with the question of reducing the present railway freight for the carriage of manures. To any one acquainted with conditions in this country, the importance of increasing the use of concentrated manures as a part of the general agricultural development of the country is obvious. Among the causes which operate against the extended use of the manures is the fact that manures have to be carried over long distances from the centres of supply to make them available to cultivators. Further, the demand of the individual cultivator is mainly for small consignments of manure, and, in view of the caste prejudices prevalent in the country, many fertilizers, such as bone-meal, dried blood, and poudrette, are classed by the railway companies as offensive goods. Again, there is no uniformity in the rates charged at present by the various railways for the carriage of manures. After a due consideration of the various difficulties it was resolved that the Railway Board be asked to arrange that the present minimum rate of 1-10th pie per maund per mile should be charged in all cases on minimum wagon loads of such concentrated manures, and that the Provincial Agricultural Departments should encourage the formation of local distribution centres so as to build up a regulated traffic which is capable of taking full advantage of the concession of the minimum rate.

It very often happens that the research work of an Agricultural Chemist or Bacteriologist leads up to a problem of industrial importance which he is obliged to give up because there is no suitable technological laboratory for carrying it to a successful commercial issue. The work done on malt extracts in the

Coimbatore laboratory, and on saltpetre, indigo, etc., at Pusa, are instances in point. The creation of a technological laboratory as one of the special sections of the Imperial Agricultural Department under the Government of India where such subjects of industrial importance can be carried to a successful commercial issue was therefore recommended by the meeting.

There are again numerous problems which though not directly industrial are still of great importance in connection with agriculture. Among such problems requiring immediate consideration are, (1) animal nutrition, (2) soil physics, and (3) vegetable biological chemistry, but there are neither specialized laboratories nor suitable staffs to undertake this work. The meeting recognised the need for the provision of such laboratories with separate staffs under the Government of India for the investigation of such problems of general application. It was felt that the location of these laboratories should be determined by the particular requirements, as regards, for instance, the need for collaboration of their staffs with other departments, sections, climatic and other conditions and they need not necessarily be at Pusa.

The proposal made in the report of the Indian Industrial Commission for the formation of a Chemists' Service was not accepted by the meeting mainly because intense local knowledge is required for effective work for agricultural improvement by chemical methods, and it is not desirable that the Chemists in the Agricultural Departments should be formed into a Service apart from the Indian Agricultural Service, in which the bond of union would be the Science rather than its application. On the other hand the meeting was definitely of the opinion that in addition to the Agricultural Chemists attached to the Provincial Departments a strong central body of chemists should be maintained by the Imperial Department of Agriculture from whom Provincial Departments can draw for the investigation of special problems.

With the rapid expansion of chemical investigations in the provinces it has become necessary to relieve the Agricultural Chemists of the teaching work so that they may be enabled to devote more of their time to research work. The meeting, therefore, recommended duplication of the chemical staff for the adequate pursuit of research and teaching. In the opinion of the meeting the duties of the Agricultural Chemist as opposed to the Professor of Chemistry should be primarily limited to the research and executive side only, giving such assistance in teaching as may arise out of his research and which fits in with the college course. The teaching officers should also be given opportunities to engage in research work.

The meeting next considered the question of soil surveys. It held that soil surveys throughout this country would be of undoubted value not only in cases where new lands are in question but also for general application as a means of obtaining information as to the relationships between climate, soil and crop. The necessity of standardization of methods not only in the case of such surveys but also in the analysis of soils and other materials was recognised and important recommendations were made.

The question of post-graduate teaching in agricultural chemistry at Pusa and the class of student to be admitted to this advanced course was then considered. It was resolved that the teaching should be strictly directed to instruction in the various specialized branches of agricultural chemistry and that the students to be admitted to this course should be either graduates of an Agricultural College, or Science graduates of an University who have attended a Provincial Agricultural College for at least a year and are recommended for further training in agricultural chemistry by the Agricultural Chemist.

A day was specially set apart for the consideration of bacteriological subjects. The necessity of providing for the proper study of soil bacteriology by the Agricultural Departments in India was recognised, a full discussion of provincial conditions having revealed an urgent demand for the investigation of bacteriological problems either connected with the soil or with agricultural industries. It was accordingly recommended that Local Governments should consider the desirability of adding an Agricultural Bacteriologist to their scientific staff.

The question of the standardization of methods of biological analysis of soils was also considered in detail.

Detailed proceedings of the meeting will be published in due course.

ANNEXURE 5.

Statement showing to what extent action is already being taken on the Commission's recommendations as summarised in Chapter XXIV of the Report.

Recommendation (numbers are those of Commission's summary.)

Action being taken.

- | | |
|---|---|
| (3) Stimulation of the production of leather and of lightly tanned hides and skins. | Government of India have been considering question for some time past. A research factory has been working at Maihar on tan stuffs and tan extracts, with Government help; a leather trade school has been established at Madras; a leather research factory is being started by the Bengal Government at Calcutta; proposals are being worked out by the Munitions Board for central research factories; the Government of India are formulating fiscal proposals; and several large tanneries on modern lines are starting with Government advice and encouragement. Much has been done also during the war to help small Indian tanneries. |
| (5) Necessity for expert forest engineers. | Two officers have been already engaged by the Forest Department, and further and more extensive proposals have been submitted for the Secretary of State's sanction. |
| (6) Establishment of Government depôts for sale of timber. | An agency has been established in Calcutta for the sale of timber from the Andamans and of such other timber as Local Governments may consign to it for the purpose. A similar agency has been established in London for the sale, in Great Britain and on the continent of Europe, of all Indian timbers exported by Government. The development of this system of disposal now rests with the Local Governments, who have been informed of the action taken by the Government of India. |
| (7) Increase of staff and equipment at Dehra Dun. | An extensive scheme is under preparation by the Government of India. |
| (8) Creation of Fisheries Departments in Burma and Bombay and an increase in Madras. | It is understood that Bombay have the matter under consideration. |
| (17) Survey of the coal situation, with a view to effecting economy in mining and consumption. | An expert has been brought out from England and has returned to prepare his report after examining the situation in India. |
| (20) Survey of hydro-electric possibilities. | This started last cold weather. |
| (31) Improvement of system under which State technical scholarships are granted. | The rules have been recast and further amendments are under consideration. |
| (49) to (51) Revision of organisation for commercial intelligence and statistics. | Scheme is under preparation. |
| (54) Technical officers to assist Indian Trade Commissioner. | Proposals are being put forward for deputing Forest and Geological experts. |
| (55) Indian trade agents for Mesopotamia and East Africa. | Bombay Government have been consulted. |
| (57 to 64) Creation of an organisation for purchase and inspection of Government stores in India. | No action can be taken till Secretary of State's approval has been received to the principle; but proposals for appointment of committee are being worked out. |

- | | |
|---|--|
| (65 to 68) Facilitation of acquisition of industrial sites. | Question of legislation is under consideration. |
| (75) Veto on use of power-driven machinery in jails. | Question has been referred to Jail Commission. |
| (80 & 81) Strengthening of Geological Survey and inspection of Government concessions. | Proposals will shortly be submitted for Secretary of State's sanction |
| (82) Modification of mining lease forms and constitution of advisory boards of minefields. | Local Governments' opinion will shortly be invited on definite scheme. |
| (83) Preparation of mining manuals. | Local Governments are being addressed. |
| (90) Proposal to facilitate registration of partnerships. | Question of legislation is under consideration. |
| (97) Housing of industrial population in Bombay. | Bombay Government are being addressed. |
| (102) Reduction of maximum factory hours. | Opinions of Local Governments are being invited. |
| (105) Collection of occupational statistics. | Matter has been for some time under consideration, and will be taken up with Census Commissioner when appointed. 200.) |
| (126) Appointment of an expert committee to consider possibility of establishing industrial banks and affording other financial help to small industrialists. | No action can be taken till Secretary of State's views have been obtained regarding proposed provincial and central departments of industries; but proposals for committee are being worked out. |

India Office, London,
25th September 1919.

Revenue.
No. 86.

**To His Excellency the Right Honourable the Governor
General of India in Council.**

MY LORD,

I have considered in Council the letter of Your Excellency's Government No. 15 (Industries), of the 4th June 1919, on the subject of the Report of the Indian Industrial Commission. In this letter you do not attempt to deal with the numerous recommendations made by the Commission, but ask my approval to a few cardinal points of principle, and I assume that when these principles are settled you will examine the detailed recommendations contained in the report, referring in due course any proposals which require my sanction.

2. Before dealing with the specific points covered by your letters it seems necessary to clear the ground by a general declaration of policy. The restrictive policy laid down by Lord Morley in 1910, as modified by Lord Crewe in 1912, though temporarily in abeyance while this enquiry was being made, is still in force, and if the active participation by Government in industrial development is to be accepted as one of its legitimate functions a new policy is required.

With the quickening of political life that will follow the grant of constitutional reforms the demand for progress in administration and social reform may be expected to become insistent, and if progress is not to be hampered by want of funds the taxable capacity of the people will have to be increased. To this end the natural resources of India must be effectively utilised, as new opportunities for the investment of capital present themselves, in order that the standard of comfort of the people may be raised, and the economic strength of the country may increase. Further, as the experience of the past few years has shown that in time of war India cannot rely on outside sources for her needs, the matter is one in which political expediency, economic advantage and military security are coincident and accord with the interests of the Empire as a whole.

I accept the two fundamental principles underlying the recommendations of the Commission; first, that in future Government should play an active part in the Industrial development of the country; secondly, that Government cannot undertake this work unless provided with adequate administrative equipment and forearmed with reliable scientific and technical advice. Following on the acceptance of these principles I agree that suitably equipped organisations should be set up in the Provincial Governments and in the Central Government.

3. In giving effect to this policy, State assistance will take various forms such as research, the survey of natural resources, technical and scientific advice, educational facilities, commercial and industrial intelligence, the establishment of pioneering and demonstration factories, financial help, the purchase of Government stores in India, whether in the usual way of business or under a guarantee of purchase over a fixed period, and probably also fiscal measures. The extent to which and the manner in which assistance under each of these heads can appropriately be given will doubtless be considered by Your Excellency's Government when the detailed recommendations of the Commission are examined, but it seems desirable that concurrently with the establishment of the new Department, the powers of the Government of India and of local Governments in regard to direct financial assistance, which are now exceedingly limited, should be precisely defined. I would be glad therefore, if, after considering chapters XIV and XX, of the Report, you would favour me with your views, first on the main question of the forms which financial assistance may legitimately take, and secondly, on the subsidiary question of the limits within which and the conditions under which such assistance may be given by the Government of India and the Local Governments.

It would be premature to discuss at this stage the fiscal issue, which was deliberately excluded from the scope of the Commission's enquiry, and I am not prepared to make any pronouncement on this aspect of the case until the representatives of the people have been given the opportunity to express their views. The question will have to be faced in the near future. I am confident that in the discussions that will take place in India the interest of the Empire as a whole will receive due consideration.

4. Connected with the fiscal question are other needs such as greater initiative and further incentives to production as well as increased efficiency of labour. You will doubtless consider how far these can be fostered, and I would here only remark in regard to labour that if the efficiency of labour be increased even to a moderate extent India could probably hold her own. If, therefore, development is to proceed on sound lines, and if enduring results are to be obtained labour must be made more efficient. In India, where the workers are unorganised, a special obligation lies upon Government to study their welfare and to secure for them better education, better housing, and a higher standard of living. By her adherence to the International Labour Convention India will now become subject in respect of labour conditions to international criticism. This need not be resented, as it is in the best interests of the country that present conditions should be improved, provided that it is recognised that Indian conditions are radically different from those of western countries and that western standards cannot at once be applied.

5. Turning now to the points referred to in your letter, I approve in principle the proposal that Provincial Departments of Industry should be set up on the general lines laid down by the Commission. I accept also the proposed definition of the functions of these Departments except that relating to the control of industrial and technical education. I suggest that Local Governments should be left free to revise the list of duties enumerated in paragraph 3 of your letter so that the new Departments may not at the outset be over weighted, and that, so far as is possible, the branches of work for which the Director is responsible may be in harmony with the classification of subjects under the scheme of constitutional reforms. Under any arrangement the Director's duties must apparently include both reserved and transferred subjects, but the less this is so the better. For these and other reasons I would prefer to reserve further consideration the question of handing over the control of technical education to the new Departments.

6. Your Excellency's Government are not yet prepared to formulate proposals regarding the organisation of the Imperial Department of Industries, but propose to set up as an *interim* authority a Board of Industries and Munitions, which would close the war commitments of the Indian Munitions Board, take over from the Commerce and Industries Department certain items of work, undertake the initial work of organisation, and in particular frame detailed proposals for the new permanent Department.

I sanction this proposal and agree that the Board should retain the powers now possessed by the Munitions Board. Until a permanent Department has been created, the Board would not be attached to any Department of Your Excellency's Government, but would be under the direct charge of the Viceroy, the President of the Board taking part in Council meetings when industrial questions are discussed, but with no power of voting.

7. I am glad to observe that in defining the relations between the Imperial and Provincial Departments, you favour a large measure of Provincial independence, and that within their general financial and other powers, the Local Governments would be given a free hand subject to the reasonable reservations detailed in paragraphs 18 and 19 of your letter. I have, however, little doubt that Local Governments, limited as they will be in respect of resources and staff, will readily seek the advice and assistance of the Imperial Department. But for the most part reference should be voluntary, and the necessity of obtaining previous sanction should as far as possible be avoided.

8. When the permanent Imperial Department has been set up it should, when opportunity offers, be placed in charge of a Member of Council. The volume of work of the new department is necessarily uncertain, but it is not improbable that at the outset it will sufficiently occupy the whole time of a

member and in that case I shall not object to a separate membership for Industries when legislative authority has been obtained to increase the number of Members of Council. But as the work of all the civil Departments of Your Excellency's Government will be affected in various degrees when the scheme of constitutional reforms becomes operative, and as a readjustment of portfolios will then become necessary, the desirability of placing cognate subjects, such as Commerce, under the charge of the Member for Industries should be kept in view. The arguments advanced in your letter have not convinced me that it is desirable that these two branches of the administration should be placed permanently in charge of separate Members.

9. I approve the appointment of expert Committees to consider the recommendations of the Commission regarding the creation of all-India scientific services. Each Committee should be directed to frame detailed proposals for the organisation in terms of employment of the service, if it considers its creation advisable, and to formulate proposals for the location and equipment of research laboratories.

10. I accept the principle of an all-India industrial service, and agree that although a training in some form of mechanical engineering will in most cases be the best basis of recruitment, this qualification should not in all cases be required. I understand that it is your intention not to include in the service men of the foreman type or experts engaged for special purposes on short term agreements, but to reserve it as a rule for men of good education, with technical qualifications or business training. From this reservoir Provincial Directors and Deputy Directors of Industries, Factory Managers, and perhaps also Factory and Mines Inspectors might be drawn if suitable men are available.

11. I also accept the general principle of an agency for the purchase and inspection of stores in India, and approve the appointment of a Committee to work out the detailed organisation for an Indian Stores Department.

It has been suggested that with a view to keeping the India and Home Departments up to date and co-ordinating their methods, interchanges of personnel should take place. This suggestion will, no doubt, be considered by your Committee.

12. I desire to associate myself with your cordial appreciation of the work of the Commission. The comprehensive review of the problem and the practical proposals contained in their report have made it possible to lay down, with some assurance of success, the outlines of a new policy, and, if that policy bears fruit, the credit will largely be due to the labours of the Commission.

I have the honour to be,

My Lord,

Your Lordship's most obedient humble Servant,

EDWIN S. MONTAGU.

No. 1085-E. A.

GOVERNMENT OF INDIA.

FINANCE DEPARTMENT.

PENSIONS AND GRATUITIES.

Delhi, the 15th November 1919.

RESOLUTION SANCTIONING THE RECOMMENDATION OF THE PUBLIC SERVICES COMMISSION IN REGARD TO THE PENSIONS OF GAZETTED OFFICERS OF CERTAIN SERVICES.

RESOLUTION.

The Government of India have been in correspondence with His Majesty's Secretary of State for India regarding the recommendations made in paragraphs 87 to 92 of the Report of the Royal Commission on the Public Services in India, for the improvement of the existing rules relating to superannuation and retiring pensions of gazetted officers in certain of the civil services in India, and they are now pleased, with his approval, to announce the following new rules, which shall relate to such pensions of the officers (other than military officers or members of the Indian Civil Service) and services specified below :—

The Agricultural Department, Indian and Provincial branches.

The Civil Veterinary Department, officers of and above the rank of Deputy Superintendent.

The Customs Department, Collectors and Assistant Collectors.

The Educational Department, Indian and Provincial Services.

The Factory and Boiler Inspection Departments, Inspectors.

The Indian Finance Department, officers of and above class III.

The Military Accounts Department, officers of and above the rank of Military Accountant, second class.

The Forest Department, Imperial Service and Provincial officers of and above the rank of Extra Assistant Conservator.

The Geological Survey of India, officers of rank equal to or above that of Assistant Superintendent.

The Provincial Civil Service, Executive and Judicial.*

The Land Records (Burma) Department, officers of and above the rank of Assistant Superintendent.

The Medical Department, Civil Surgeons and Civil Assistant Surgeons, Professors of Medical Colleges and Chemical Examiners.

The Indian Mines Department, Inspectors.

The Mint and Assay Departments, Masters and Deputy Masters.

The Police Department, Imperial Service Officers and Deputy Superintendents.

The Postal Department, officers of rank of or above that of Superintendent or gazetted Deputy or Assistant Postmaster.

The Telegraph Department, officers of and above the rank of Superintendent or Assistant Superintendent.

The Public Works Department and Railway Department (Engineering Establishment), officers of and above the rank of Assistant Engineer.

The Registration Department, officers of or above the rank of District Registrar.

The Northern India Salt Revenue Department, officers of and above the rank of Assistant Superintendent.

* For the present this term will be held to include the following :—

Deputy Collectors, Sub-Judges and District Munsifs in Madras; Deputy Collectors and Magistrates, Judges of the Small Cause Court, Subordinate Judges, 1st class and 2nd class, and Assistant Judges, and Sessions Judges in Bombay; Deputy Magistrates and Deputy Collectors, Subordinate Judges and Munsifs in Bengal, Deputy Collectors, Subordinate Judges and Munsifs in the United Provinces; Extra Assistant Commissioners, Extra Judicial Assistant Commissioners and Subordinate Judges in the Punjab; Extra Assistant Commissioners and Judicial Extra Assistant Commissioners in Burma; Deputy Magistrates and Deputy Collectors, Subordinate Judges and Munsifs in Bihar and Orissa; Extra Assistant Commissioners, District Judges and Subordinate Judges in Central Provinces and Berar; and Extra Assistant Commissioners in Assam.

The Salt and Excise Departments, officers of and above the rank of Inspector in Bombay and Madras, of Assistant Commissioner in the United Provinces, Assistant Superintendent in Burma, of Superintendent in Bengal, Bihar and Orissa and Assam and of District Excise Officer in the Central Provinces.

The Survey of India Department, officers of and above the rank of Extra Assistant Superintendent.

The Survey (Madras) Department, Directors and Assistant Directors.

The Imperial Meteorological Department, officers of and above the rank of Assistant Meteorologist or Assistant Director.

The Opium Department, officers of and above the rank of Sub-Deputy Opium Agent or Assistant Opium Agent.

The Archaeological Department, officers of rank equal to or above that of Assistant Superintendent.

The Jail Department, officers of and above the rank of Superintendent.

Any other officer eligible for an additional pension under Rule III below.

I. These rules only apply to officers joining the above services or appointments after the 29th August 1919, and to those existing incumbents who elect in writing to come under the provisions of these rules in their entirety, and to forego finally all privileges, in relation to pension for which they were eligible under the former rules and which are not definitely continued in the new rules. Unless the delay is explained to the satisfaction of Government, this option must be made before the 1st April 1920, or, in the case of officers now on leave, within three months of their return from leave; and the option once made is final.

II. Ordinary Pensions.

(1) Subject to the absolute right of Government to decline to permit any officer to retire before reaching the age of superannuation should it be necessary in the public interest to retain his services, Imperial officers of the Forest, Geological Survey, Public Works, Railway and Telegraph Departments and any others who would be covered by Article 635 of the Civil Service Regulations will be allowed to retire optionally after 20 or more years' service, and in that event they will ordinarily be entitled to draw a pension not exceeding 30 sixtieths of average emoluments, subject to the following maxima :—

R									
4,000	a year after	20 years' completed service.	
5,000	" "	25 " " "	
5,200	" "	26 " " "	
5,400	" "	27 " " "	
5,600	" "	28 " " "	
5,800	" "	29 " " "	
6,000	" "	30 " " "	

(2) Subject to the same absolute right of Government to decline to permit any officer to retire before reaching the age of superannuation, and to the maxima specified in the preceding clause, officers of services other than those covered by that clause will be allowed to retire optionally after 25 or more years' service and in that event the pension admissible to the officer will ordinarily be regulated as follows :—

25 sixtieths of average emoluments after	...	25 years' completed service.
26 " " " "	...	26 " " "
27 " " " "	...	27 " " "
28 " " " "	...	28 " " "
29 " " " "	...	29 " " "
30 " " " "	...	30 " " "

(3) In the case of the Agriculture (Imperial), Educational (Imperial and Provincial Services), Civil Veterinary (Imperial), Factory and Boiler Inspection, Indian Mines, Mint and Assay and Meteorological Departments, Distillery Experts in the Salt and Excise Departments, and of such appoint-

ments as may be definitely specified in this behalf in other Departments [except those covered by clause (1) above] in which officers are normally likely to be recruited after reaching twenty-five years of age, officers recruited over that age may reckon as service qualifying for superannuation pension the number of completed years not exceeding five, by which their age at recruitment exceeded twenty-five years. This concession will not be granted to individual officers appointed at an age exceeding twenty-five years to departments or appointments other than those included above.

(4) Government will have an absolute right to retire any officer after he has completed twenty-five years' service, without necessity to give reasons and without any claim for compensation in addition to pension, and in that event the pension admissible to the officer will ordinarily be regulated on a scale not exceeding that prescribed in clause (1) or clause (2) above, in the case of optional retirements of officers of the service to which he belongs.

(5) Government reserve an absolute right to reduce the pension ordinarily admissible, in the case of any officer whose service has been unsatisfactory.

(6) The payment, out of India, of pensions granted in rupees will continue to be regulated by the provisions of Articles 934 and 971 of the Civil Service Regulations.

II Special Additional Pensions.

(1) The existing lists of special appointments which are given in Articles 475 and 643 of the Civil Service Regulations have been classified, with certain additions, in two grades, as shown in the schedule annexed, the lower grade comprising those posts which involve high but intermediate responsibility, the higher consisting of those which require a marked degree of independent administrative and professional capacity.

(2) Officers who have held appointments listed in the lower grade in the Schedule will be entitled to an additional pension at the rate of Rs300 a year for each completed year of effective service in any appointment included in that grade, provided that no officer may draw an additional pension in excess of Rs1,500 in respect of service classed in the lower grade.

(3) Officers who have held appointments listed in the upper grade in the Schedule will be entitled to an additional pension of Rs500 a year for each completed year of effective service in any appointment included in that grade, provided that no officer may draw an additional pension in excess of Rs2,500 in respect of service rendered in the lower and upper grades combined or in the upper grade alone.

(4) These additional pensions will be awarded, as in the past, only to officers who have given proof of special energy and efficiency. The existing restriction in Article 475, Civil Service Regulations, against the award of additional pensions to officers retiring of their own option before the age of 55 with less than 28 years' service, will also be maintained.

2. The above revised scale of pensions (including both ordinary and special additional pensions) will apply retrospectively to all officers who retired after the 23rd July 1913, being the date on which the Government of India gave a promise to certain memorialists that the position of officers retiring before the introduction of an improved scale would be taken into consideration. The increased pensions will, however, be payable from 1st April 1919 only.

3. The necessary additions and corrections to the Civil Service Regulations will be issued in due course.

ORDERED that the Resolution be communicated to several Departments of the Government of India (including the Financial Adviser, Military Finance and the Indian Munitions Board), to all Provincial Governments and Minor local Governments, the Comptroller and Auditor General, the Heads of Departments subordinate to the Finance Department, all Accountants General, the Comptroller, Assam, the Chief Auditors of State Railways and Government Examiners of Railway Accounts, the Examiner of Accounts, Military Works

Services, the Examiner, Government Press Accounts, the Controller of War Accounts, the Audit Officer, Delhi Province, and to the Examiner of Customs Accounts.

Ordered also that the Resolution be published in the *Gazette of India*.

By order,

H. F. HOWARD,

Secretary to the Government of India.

Schedule of appointments carrying additional pensions.

A.—Upper Grade.

- Directors of Public Instruction in Madras, Bombay, Bengal, United Provinces, Punjab, Bihar and Orissa and Burma.
 Vice-Chancellors of Universities (if in pensionable service).
 Educational Commissioner, Government of India.
 Director General, Archaeology.
 State Railway Members of the Railway Board. } If in pensionable service.
 Agents of State Railways.
 Chief Engineers, Railways.
 Commissioners of Divisions, not being members of the Indian Civil Service.
 Officers promoted from the Provincial Service to hold Indian Civil Service posts of the rank of, or higher in rank than that of Commissioner of a Division, or a Divisional Judgeship of the first grade in Burma.
 District and Sessions Judges of the first grade and Divisional Judges 1st grade in Burma (not being members of the Indian Civil Service).
 Inspectors General of Police (except Inspector General of Police, North-West Frontier Province and Inspector General, Railway Police, Rajputana).
 Director, Central Intelligence Department.
 Commissioners of Police, Calcutta and Bombay.
 Inspectors General of Prisons, Bengal, Madras, Bombay, United Provinces, Burma, Punjab and Bihar and Orissa.
 Surveyor General.
 Agricultural Adviser to the Government of India.
 Inspector General of Forests.
 Chief Conservators of Forests.
 Settlement Commissioner, Burma.
 Secretary to the Government of India, Public Works Department.
 Inspector General of Irrigation.
 Chief Engineers, Public Works Department.
 Director General, Posts and Telegraphs.
 Chief Engineer, Telegraphs.
 Director, Geological Survey.
 Comptroller and Auditor General.
 Controller of Currency.
 Accountants General.
 Mint Masters.
 Military Accountant General.

B.—Lower Grade.

- Officers of the Indian Educational Service holding appointments on R1,500—50—1,750 a month.
 Director, Zoological Survey.
 Directors, Public Instruction, Central Provinces, Assam and North-West Frontier Province.
 Superintending Engineers, Railway Engineering Department.
 Deputy Agents of State Railways, if in pensionable service.
 Secretary, Railway Board.

Inspector General of Police, North-West Frontier Province, and Inspector-General, Railway Police, Rajputana.

Deputy Inspectors General of Police.

Commissioners of Police, Madras and Rangoon.

Inspector General of Prisons, Central Provinces.

Officers promoted from the Provincial Civil Service to hold superior Indian Civil Service posts lower in rank than that of Commissioner of a Division, or Divisional Judge of the first grade in Burma.

Deputy Director, Central Intelligence.

Inspectors General of Registration.

President, Forest Research Institute.

Superintendents of Circles, Survey of India.

Directors of Agriculture.

Conservators of Forests.

Director General, Meteorological Department.

Superintending Engineers, Public Works Department.

Deputy Secretary to the Government of India, Public Works Department.

Electrical Adviser, Government of India.

Postmasters General and Deputy Director General of Post Office.

Director, Telegraph Engineering.

Deputy Director General, Telegraph Traffic.

Officers (other than Chief Engineer) of the Telegraph Engineering Service who entered the service previous to the 1st April 1914, down to and including the two senior officers of the R1,750 grade.

Superintendents, Geological Survey.

Collectors, Imperial Customs Service.

Deputy Commissioner, Northern India Salt Department.

Chief Inspector, Mines.

Controller, Printing and Stationery.

Appointments in Class I of the General List of the Indian Finance Department.

Civilian Assay Masters.

Managing Director of the Ghazipur Opium Factory.

Military Deputy Auditors General.

Senior Controller of Military Supply Accounts.

Deputy Military Accountant General.

Junior Controller of Military Supply Accounts.

Military Accountants, First Class.

Any other pensionable appointment not included above the minimum substantive pay of which is not less than R1,500 a month.

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 13th November 1919, based on the Indian Daily Weather Reports of the period.

1. Fairly widespread rain fell almost daily in the Peninsula. The disturbed conditions which appeared in the south of the Bay towards the end of the previous week developed into a storm off Nellore during the 6th, which moved towards the head of the Bay and disappeared by the morning of the 10th. It carried the rain to Orissa and was also the cause of some heavy falls on the north Madras coast; Masulipatam received nearly 8" in 24 hours and Cocanada 14" in 48 hours. Weather was again disturbed in the south of the Bay from the 10th and moderately heavy rainfall occurred locally on the east Madras coast between the 11th and 12th.

2. *Burma*.—A few scattered falls of rain occurred daily in Lower Burma; in Upper Burma rain fell locally on the 10th and at individual stations on three other days.

Northeast India, including Orissa.—In Orissa rainfall was nearly general on the 9th, and occurred locally or at a few stations on three other days. Elsewhere weather was dry.

The United Provinces, Central India and the Central Provinces.—In the east of the Central Provinces local rain fell on the 10th and there were individual falls on four other days; over the rest of the division the week was rainless.

Northwest India.—There was no rain.

The Peninsula.—Rainfall was nearly general in south Hyderabad between the 8th and 12th, in Mysore on the 8th and 12th, in Malabar between the 7th and 11th, in the Madras Deccan between the 9th and 11th, and on the north Madras coast on the 6th, 8th, 10th, 11th and 12th; rain fell locally or at a few stations on one other day in south Hyderabad, on two other days in Malabar and on the north Madras coast, and on five other days in Mysore. Local rain fell in the Konkan on the 9th, in the Bombay Deccan on the 9th and 11th, and in southeast Madras on the 6th, 7th, 10th, 11th and 12th; a few falls also occurred on one other day in all these areas.

3. The chief amounts of rainfall reported were as follows:—

November	6th.	Masulipatam 7·80", Cocanada 4·78" and Vizagapatam 0·88".
"	7th.	Bassein 1·33", Mangalore 1·42", Trichinopoly 2·32", Cocanada 9·31", Vizagapatam 1·47" and Calingapatam 1·45".
"	8th.	Gulbarga 1·72", Hyderabad (Deccan) 0·95", Hanamkonda 2·52", Calicut 0·89", Cocanada 1·48", Vizagapatam 3·66" and Calingapatam 3·71".
"	9th.	Table Island 1·94", Cuttack 0·90", Sambalpur 0·95", Jagdalpur 0·82", Karwar 1·37", Bijapur 0·98", Raichur 3·45", Mangalore 0·95", Cuddapah 1·60" and Vizagapatam 0·98".
"	10th.	Yamethin 3·21", Chanda 1·05", Hyderabad (Deccan) 1·10", Chitaldrug 1·27", Calicut 1·66", Madras 2·17" and Nellore 1·82".
"	11th.	Port Blair 1·91", Jagdalpur 0·71", Mysore 1·02", Cochin 3·53", Madura 1·77", Nellore 1·14", Masulipatam 0·90" and Cocanada 3·21".
"	12th.	Hyderabad (Deccan) 3·04", Chitaldrug 1·19", Cochin 1·66", Trivandrum 1·32", Negapatam 2·60", Bellary 2·78", Nellore 2·07", Vizagapatam 2·12", Calingapatam 3·35" and Gopalpur 2·48".

4. The week's rainfall was 20 per cent or more in excess in the Bay Islands, Upper Burma, Orissa, the Central Provinces East, Konkan, the Bombay Deccan, Hyderabad South, Mysore, Malabar, the Madras Deccan and the Madras Coast North; and was 20 per cent or more in defect in Lower Burma, Assam, Bengal, Chota Nagpur, Bihar, the United Provinces, Kashmir, Central India, Berar, the Central Provinces West and Hyderabad North. It differed from the normal by less than 20 per cent in Madras Southeast. No rain usually falls at this time of year in the Punjab, the North-West Frontier Province, Baluchistan, Sind, Rajputana and Gujarat.

The rainfall from the 2nd May to date is 20 per cent or more in defect in the Bay Islands, Kashmir, Sind and Hyderabad North; and was 20 per cent or more in excess in Chota Nagpur, Baluchistan, Rajputana West, Central India, the Central Provinces West and the Madras Coast North. In the remaining divisions the rainfall of the period differs from the normal by less than 20 per cent.

G. C. SIMPSON,
Offg. Director General of Observatories.

Dated the 13th November 1919.

B. A. MANT,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 8th November 1919.

Burma.—During the week light to moderate rain fell in several districts of Lower Burma. There was practically no rain in Upper Burma. Reaping of early paddy has commenced in some districts of Lower Burma. Plucking of cotton and gathering of ground-nuts are proceeding and cultivation of miscellaneous dry crops continues in Upper Burma. Standing crops are generally in good condition but their outturn is expected to be below normal owing to shortage of rain. Cattle are generally healthy. The price of unhusked rice in Rangoon remains unchanged at rupees 150 and that for white rice at rupees 385 per hundred baskets for specials.

Assam.—During the week the weather was seasonable and favourable to crops. Plucking of tea, ploughing for and sowing of mustard and pulses are in progress. Harvesting of cotton is going on and its outturn is fair. Prospects of winter rice and sugarcane are fair to good and other crops are generally in fair condition. Cattle disease is reported from six districts. The price of common rice continues to fall.

Bengal.—The week was rainless in Western Bengal. Paddy on high lands is suffering owing to continued want of rain. Harvesting of early winter paddy continues. Sowing of spring crops is proceeding but the progress is slow in some western districts. The average price of common rice has fallen by about 4·16 per cent in Bengal.

The weekly report on famine in Bankura is as follows:—Gratuitous relief and relief works were closed in Bankura and there is no distress.

Bihar and Orissa.—During the week rain fell in Orissa the fall being heavy in Puri and light to moderate in the remaining districts. There was no rain in Bihar and Chota Nagpur. Sowing of spring crops is in progress. Harvesting of early winter paddy continues in Orissa and Chota Nagpur. Standing crops are doing well. More rain is wanted for paddy in parts of Saran, Darbhanga, Purnea and Balasore. Gratuitous relief was given to 17,275 persons in Bhagalpur, 784 in the Santal Parganas, 4,398 in Cuttack, 6,983 in Puri and 36 in Hazaribagh. The number of persons attending relief works was 241 in Bhagalpur and 130 in the Santal Parganas. The price of common rice has risen in four districts, fallen in nine and remained stationary in the remaining districts as compared with that of the preceding week. The average price of local common rice at headquarters was 5·96 seers a rupee against 5·64 in the preceding week, and that of maize was 7·91 seers against 7·70 seers in the preceding week. Cattle disease is reported from ten districts. During the week ending the 1st November 6,888 persons were given gratuitous relief and 3,051 attended test works in nine Feudatory States of Orissa:—*vis.*, Athgarh, Baramba, Dhenkanal, Hindol, Narsinghpur, Nayagarh, Bamra, Daspalla and Khandpara.

The weekly report on famine is as follows:—Famine operations were closed in Angul on 31st October. In Bhagalpur Sadr relief workers were 167 and persons gratuitously relieved by poor houses, orphanages and village doles 3,542, total under relief 3,709. Valedictory doles for recipients of gratuitous relief are being distributed. In Banka relief workers were 74 and persons gratuitously relieved by poor houses, kitchens and village doles 13,723, total under relief 13,797. Relief work was closed on 6th November. In Deoghar relief workers were 180 and persons gratuitously relieved by village doles 767; total under relief 897, grand total under relief 18,403. Prospects of crops are excellent. The condition of people has much improved. General conditions are returning to their normal state. Relief operations are being closed in the course of the month.

United Provinces.—During the week no rain fell. Preparation of lands for and sowing of spring crops and harvesting of autumn crops continued. Irrigation of spring crops, sugarcane and late rice and picking of cotton are in progress. Pressing of sugarcane has commenced in places. Standing crops are doing well. Prospects are favourable. The condition of agricultural stock is satisfactory. Fodder is somewhat scarce in flooded tracts of Ballia but is sufficient elsewhere. Water and market supplies are sufficient. Prices are generally stationary.

Punjab.—Report not received.

North-West Frontier Province.—The week was rainless. Sowing of spring crops and harvesting of certain autumn crops are in progress. The outturn of cotton is below average in Peshawar. Standing crops are generally average but prospects of crops on unirrigated areas in one district are reported to be poor. Prices of wheat:—Peshawar 7 and Dera Ismail Khan $7\frac{1}{2}$ seers per rupee.

Jammu.—No rain fell during the week. Prices are stationary. Fodder is sufficient.

Kashmir.—Report not received.

Rajputana.—During the week the weather was seasonable. Sowings of spring crops continue. Supply of fodder and water is adequate. The condition of agricultural stock is generally good.

Central India.—During the week the rainfall was nil. Harvesting of autumn crops and sowing of spring crops are in progress. Picking of cotton has commenced in Gwalior and Indore. Standing crops and their probable outturn are in fair to good condition except in Bhilsa where they are bad. Agricultural stock is generally good except that cattle disease is reported in parts of Gwalior, Indore, Baghel khand and the Southern States. Prices are high.

The weekly report on famine in Bundelkhand is as follows:—Distress is not acute. Numbers on relief are decreasing. People are reverting to agricultural operations. There is no wandering or emaciation. Relief measures are adequate. Suspensions of land revenue are being granted. *Tukari* advances are sufficient. The public health is good. Prices vary from 6 to $7\frac{1}{2}$ seers per rupee. Numbers on relief in thousands:—works 3.4, gratuitous relief 4.8, total 8.2.

Central Provinces.—During the week the weather continued to be clear but was occasionally cloudy over the southern half of the Provinces. Chanda alone had an inch of rain. Harvesting of autumn crops is proceeding and threshing and winnowing have started in places. Sowings of spring crops are well advanced and germination has been successful. Prospects of autumn crops are excellent and spring sowings are being effected under favourable circumstances. No deficiency of fodder and water is reported from anywhere. Agricultural stock is generally in good condition. Wheat in Nagpur and Akola and rice in Bhandara and wheat, rice and *juar* in Amraoti became dearer by over a seer. Elsewhere prices remained stationary or fluctuated slightly, indicating a slight upward course.

Fewdatory States:—Gathering of autumn crops and sowing of spring crops continue.

Bombay.—Slight rain fell during the week in the Konkan, parts of the Deccan, Karnatak and Kolhapur. Standing crops are generally in good condition except in parts of Bijapur where spring seedlings have slightly been damaged by insects. Harvesting of autumn crops and spring sowings continue. Cotton picking is in progress in parts of Nawabshah and the Deccan. Supply of fodder and water is adequate. Agricultural stock is generally sufficient. Cattle are in good condition. Prices of food-grains are still high. Relief operations have now ceased everywhere.

Hyderabad.—During the week scattered showers were received. The average was eight cents. Autumn and early rice crops are generally in fair to good condition. Former are being harvested. Sowings of spring crops are progressing. Cattle disease is reported in some talukas of the Mahbubnagar, Nalgonda, Warangal and Karimnagar districts. Prices of grains continue to be high and showing a slight downward tendency. *Juar* is selling at 4 seers per rupee in the Raichur district.

The weekly report on famine is as follows:—Situation continues generally satisfactory. Relief operations are being closed in the Aurangabad and Bir districts and in parts of the Warangal and Mahbubnagar districts but are being continued as a closing test of famine in the remaining parts of latter districts. In the Siddipet taluk of the Medak district and in the Nalgonda and Karimnagar districts the number of persons on relief is decreasing excepting for a few camps. *Tukari* is still being advanced to help spring cultivation. Prices of grains continue to be high with a slight downward tendency. Rice is selling at $3\frac{1}{2}$ seers and *juar* 7 seers per rupee. Numbers on relief in thousands for week ending the 23rd October:—works 15, gratuitous relief 15, total 30.

Mysore.—During the week the rainfall was fair to good. Standing crops are in good condition. Cattle are generally healthy. Water and fodder are available. Prices are high and generally rising. Prospects of season are fair. Harvesting of rice, ragi and sugarcane proceeds with outturn fair.

Coorg.—The week was generally wet. Rice crop is in good condition. Picking of cardamom continues. Cattle are generally healthy. Water and fodder for cattle are available. The public health is fair. Prices of food grains are high.

Madras.—During the week the rainfall was very heavy in Carnatic, North Arcot, Salem, Trichinopoly, Tanjore, Pudukkottai, Malabar and the Hills, heavy in Godavari, Kistna, Guntur, Cuddapah, Chittoor, Coimbatore, Madura, Ramnad, South Kanara and Cochin, good in Vizagapatam Littoral, Tinnevely and Travancore, fair in Ganjam, Vizagapatam Agency and Anantapur and light elsewhere. Standing crops are in fair condition generally but they have been damaged in small areas in Trichinopoly and Ramnad owing to heavy rains. The withering *ragi* in parts of Chittoor is generally reviving after recent rains. Harvesting of paddy and dry crops is generally fair. Fresh sowings of paddy and dry crops are progressing. The condition of cattle is generally good. Water is sufficient except in parts of eight districts. Pasture and fodder are sufficient generally. Prices continue to fall. Prospects are generally fair.

R. A. MANT.

Secretary to the Government of India.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, NOVEMBER 15, 1919.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller-General, etc.

GAZETTE OF INDIA.

NOTICE.

The 8th November 1919.

On and after 15th November and until further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published in Delhi, Parts II and III will continue to be published in Calcutta. All notifications and other matter intended for publication in those Parts should be addressed to the Publisher at Delhi and Calcutta, respectively.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette* and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777-79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 p.m. on Friday, and that any papers sent thereon must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India."

Rates of Subscription.

	per annum.
Subscription for <i>Gazette</i> and Supplement	Rs. 15 0 0

The following entry which appeared in the notification published by this office in Part II of the *Gazette of India*, dated the 21st June 1919, under the heading "Cessation of Exclusive Privileges" is hereby cancelled:—

1913—827 (General Electric Co.).

The following entry which appeared in the notification published by this office in Part II of the *Gazette of India*, dated the 5th July 1919, under the heading "Cessation of Exclusive Privileges" is hereby cancelled:—

1914—1545 (General Electric Co.).

The following entry which appeared in the notification published by this office in Part II of the *Gazette of India*, dated the 12th July 1919, under the heading "Cessation of Exclusive Privileges" is hereby cancelled:—

1914—1554 (General Electric Co.).

APPLICATIONS FOR PATENTS UNDER SECTION 8.

November 4.

- 4974. R. S. Jacobs. *Improvements in and relating to signalling lamps.*
- 4975. J. Wells. *Improvement in gas cleaning apparatus.*
- 4976. J. Wells. *Improvements in gas producers.*
- 4977. T. B. Kitson. *Improvements in or connected with glass-moulding apparatus chiefly for making pressed ware.*
- 4978. E. C. Tonkin and H. T. Collins. *Improvements in or relating to taps for controlling the supply of fluids.*
- 4979. T. Scott-Anderson. *A process for the complete and permanent preservation of all iron, steel or wood in any shape and in any place.*
- 4980. E. E. F. Leparmentier. *Improved luge.*
- 4981. J. N. Stables. *Improvements in vehicle wheels.*
- 4982. G. H. Thomas and G. S. Wilkinson. *Improvements in means for starting the engines of aeroplanes.*
- 4983. J. A. Launder. *Improvements in or relating to means for supporting garments and garment hangers.*
- 4984. J. A. Launder. *Improvements in or relating to coat hangers and the like.*
- 4985. F. G. Lynde. *Improvements in or relating to the manufacture of concrete slabs.*
- 4986. W. Marriott. *Improvements in or relating to reinforcements for reinforced concrete posts and poles and the like.*
- 4987. Wingot Ltd. *Improvements relating to machines for mixing concrete ingredients or other substances.*
- 4988. V. H. Gatty. *Improvements in dyeing certain colours on vegetable fibres, yarns and fabrics.*
- 4989. A. H. Jorgensen. *Improvements in alarm apparatus.*
- 4990. W. Reid. *Improvements in connection with apparatus for tipping wagons.*

November 5.

- 4991. G. F. Rose. *Cutter combs for improved tea cutting or breaking machine.*
- 4992. G. F. Rose. *Drop sieve for improved tea cutting or breaking machine.*
- 4993. W. C. McLoughlin. *Improvements in and relating to spinning machines.*

November 6.

- 4994. T. Culshaw. *Improvements in and connected with the construction of ceilings.*

November 7.

- 4995. H. E. Marcel. *Improvements relating to appliances for waving or treating hair.*
- 4996. Bessemer Gas Engine Co. *Improvements in hot plate apparatus and method of controlling the temperature of the same.*
- 4997. E. Vinograd and M. N. Grotent. *Car couplers.*

4998. Foreign Willito Road Construction Co. *Improvements in and relating to asphaltic pavements.*
 4999. A. M. O'Brien. *Improvements in or relating to continuous fractional distillation.*
 5000. F. G. Lynde. *Improved means for the construction of concrete slabs, walls and other structures.*
 5001. U. S. Industrial Alcohol Co. *Improvement in liquid fuel.*
 5002. O. R. Williams. *Improvements in the manufacture of railway buffers.*
 5003. J. Wells. *Improvements in gas producers.*
 5004. P. B. Jagger. *Improvements in and relating to rope untwisting apparatus.*
 5005. Corning Glass Works. *Heating vessel and glass therefor.*
 5006. R. Blakoe. *Improvements in friction driving gear for motor vehicles, motor boats, and aircraft.*
 5007. L. D. Mote. *A device for supporting and carrying invalids or patients.*
 5008. R. J. Dennett. *Improvements in or relating to the driving mechanism from the road wheels for taxi-meters or the like.*
 5009. F. Bown. *Desk attachment for concentrating light.*

November 8.

5010. W. J. Sharland. *A self-closing cotter, with seat and lock combined, with an automatic top door fastener, for railway wagons.*
 5011. Gillette Safety Razor Co. *Improvements in safety razors.*
 5012. McKenzie, Holland & Westinghouse Power Signal Co., Ltd. *Improvements relating to railway signalling systems.*
 5013. D. R. Karkaria. *An improved oil press.*

APPLICATIONS ACCEPTED AND ADVERTISED UNDER SECTION 6.

Notice is hereby given that all persons interested in opposing the grant of a Patent on any one of the applications, referred to below, may, at any time within three months of the date of this *Gazette of India*, give notice at the Patent Office in the prescribed form No. 5 of such opposition.

Printed copies of the specifications in the following list will be on sale at the Patent Office, 1, Council House Street, Calcutta, within about three weeks.

Any one desiring a copy posted to an address in British India should send to the Patent Office the sum of annas eight by money-order on which the number of the application should be stated on the coupon at the foot of the order.

3850. General Electric Co. *Improvements in and relating to the manufacture of steel.*
 4550. U. Duchesne and C. A. Gareau. *Improvements in back pressure brakes.*
 4617. A. H. R. Fadden, L. F. G. Butler, and Cosmos Engineering Co., Ltd. *Improvements in or relating to cylinders for internal-combustion engines.*
 4640. G. W. Sutton. *Improvements in motor cultivators.*
 4661. D. H. Bibb. *A briquette moulding machine.*
 4676. C. T. Walker. *Rail clips for steel sleepers.*
 4860. P. N. Mehta. *A process for the manufacture of potassium chromate and calcium chromate from chromium ores feldspar and gypsum.*
 4915. Thomas Robinson & Son, Ltd., C. J. Robinson and T. J. Stevenson. *Improvements in machines for separating dust and other particles from grain and other granular substances.*
 4916. J. Morrison. *Improved process for coating or covering the surface or surfaces of metal with lead or its alloys.*
 4919. N. G. Beckwith. *Improvements in and connected with rotary pumps.*
 4920. Holt Manufacturing Co. *Improvements in chain-tracks for vehicles with self-laying tracks.*
 4921. Holt Manufacturing Co. *Improvements in and relating to chain-track vehicles.*
 4926. W. J. Still. *Improvements in and connected with the cylinders of internal combustion engines.*
 4927. E. H. Young. *Improvements in cotton delinters.*
 4930. International General Electric Co., Inc. *Improvements in and relating to cooling dynamo electric machines.*
 4931. International General Electric Co., Inc. *Improvements in and relating to bearings.*
 4939. R. A. Thom. *Improvements in or relating to steam superheater pipes or elements and a method of manufacturing the return ends or torpedo ends of such elements and the like.*

PRINTED SPECIFICATIONS PUBLISHED.

Printed copies of the undernoted specifications may be purchased at the Patent Office, 1, Council House Street, Calcutta, annas eight each.

3954. Monotype Machine (Colonel (Patents) Syndicate, Ltd. *Improvements in or relating to keyboard composing and similar machines.*

4277. Arentox Co. *Improvements in the art of protecting and fireproofing wood and other materials.*
 4693. R. M. Vaz. *Improved humidifier triple nozzle.*
 4710. C. W. Metcalfe. *Loaded mileage register.*
 4731. C. M. Calatayud. *Interchangeable loading platforms or transporters for use with motors, trucks, horse-drawn vehicles or the like.*
 4737. H. P. Floyd. *Scissors shield clips for shovels.*
 4766. M. Walton. *Rapid reset lightning arrestor.*
 4788. Pyle-National Co. *Motor generator sets.*
 4793. A. W. MacIlwaine and G. F. Holderoff. *Improvements in the extraction of oil by rotatable solvents.*
 4810. A. H. Buckley and R. A. Buckley. *Improvements in starting rheostats for electric motors.*
 4820. F. W. Stockton. *Method and apparatus for preserving inflated rubber balls, such as tennis balls which are inflated by means of compressed gas.*
 4821. Marconi Wireless Telegraph Co., of America. *Improvements in methods and apparatus for radio signalling.*

SEALING FEES DUE UNDER SECTION 10.

Notice is hereby given that a patent may now be sealed on the applications referred to below. If it is desired that a patent should be sealed, a request on the prescribed form No. 7 accompanied by the fee, Rs. 30, should be sent to the Controller of Patents, 1, Council House Street, Calcutta.

CESSATION OF EXCLUSIVE PRIVILEGES.

The public are warned that entries under this heading must not be accepted as final, as under the provisions of Rules 9 and 11 of "The Indian Patents and Designs (Temporary) Rules, 1915," the Controller may extend the time prescribed by the Indian Patents and Designs Act, 1911, and by the Inventions and Designs Act, 1888, for paying the necessary renewal fees.

The Patent Office will supply on request definite information, so far as possible, as to the position of any particular Patent or Exclusive Privilege.

NOTICES.

THE PATENT OFFICE, 1, COUNCIL HOUSE STREET, CALCUTTA.

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. *All communications* relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (11 of 1911), or in continuation of applications under the Inventions and Designs Act (V of 1888) must be made in English and addressed to the Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed and a full address given in all communications.

2. *Directions* for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Temporary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1915, together with current regulations and instructions. *These should be consulted before an application is made to the Controller.*

3. *Advice.* The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs

or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inventions. Models are not required unless specially asked for. Drawings must be on tracing cloth and the Rules and Instructions for the preparation of drawings as given in the Handbook should be strictly followed. A provisional patent cannot be secured under the Indian Patents and Designs Act, 1911.

4. Applicants are warned that the Indian Patents and Designs Act, 1911, is in force in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. The International Convention for the Protection of Industrial Property does not include India. For information regarding patents in countries other than India application should be made to the patent offices in the countries concerned.

5. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission for which due allowance should be made. In cases where it is not possible to have the fees handed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

6. *Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. There is no provision of Law in British India for their registration. Neither does this Act deal with *pictures, photographs, etc.*, for which copyright is obtainable under the Indian Copyright Act, 1914.

7. *Printed Specifications* of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*. These specifications can be purchased at the Patent Office at a uniform price of 8 annas per copy; and may be seen free of charge, together with other publications of the Patent Office, at the following places:—
